If there still be a lingering doubt in the mind of any that Jesus is the Christ, "the King's Son," let him study the human heart and its deepest needs and his doubts will fly. Sin like a sombre cloud casts a darkened shadow across every life. Man has ever found himself gripped in the relentless grasp of an evil nature. None is exempt. All alike are tarred with the one black stick. If a man tells you he has not a sinful nature get a little closer and you will detect the odor of the tar so familiar to yourself. Congratulate ourselves as we may upon our goodness, it is still a fact that we are by nature sinful. But while this is true, it is also true that man feels stirring within him a higher and holier nature. He feels within a purpose to be other and better than he is. Before him he sees the ideal of a holy character, a nature wholly free from sin, and that nature he feels to be akin to God.

Now look at Jesus in the light of these facts. His days are one long sequence of holy thoughts and perfect deeds. In Him you look for sinfulness in vain. In Him there is no fault, not the shadow of a thought that man can brand as sinful. This at once differentiates Him from all others. In Him man finds his ideal *expressed. Let the heart once come in* touch with Jesus and it needs no other answer to its questions. In Him it is satisfied. What it would have, Jesus already has. In touch with Him the soul must keep if *it would have its needs supplied*, and its higher life realized. Surely He who alone realizes life's ideal and satisfies the needs and aspirations of the heart must be the Christ. Oh, soul, have you the assurance *this morning from need supplied*, ideals sanctified and heart satisfied, that Jesus is the Christ? Believe Him for His word has been given. If not for this believe Him for His work's sake. If still you *doubt, consult the testimony of history* and of the human heart, and your soul, responding to His divine touch, will surely cry out, "Yes, Jesus, I know Thou art the Christ of God!"

Christian Faith.

Christian faith is a grand cathedral with divinely pictured windows. Standing without, *you see no glory, nor can you by* imagine any; standing within, every ray of light reveals a harmony of unspeakable splendors.—Nathaniel Hawthorne.

A PROMINENT CHURCH WORKER SAYS SHE OWES HER LIFE TO PE-RU-NA.

Mrs. Hattie LaFountain

DOCTORS PRESCRIPTIONS FAILED TO RELIEVE

Mrs. Hattie La Fountain, Treas. Protected Home Circle and Catholic Ladies of Olmo, writes from Galion, O., as follows:

"After my first child was born I suffered for several months with bearing down pains accompanied by dreadful headaches. I was afraid my health was ruined for life, and felt very downcast about it. One day when a friend was visiting me she told me of Peruna and what it had done for her when she suffered with irregular menstruation. My husband procured a bottle the same evening and I began to take it daily according to directions. Before the first bottle was used I was entirely well, and you certainly have one grateful woman's blessing. I have also advised my friends to use it." MRS. HATTIE LA FOUNTAIN.

Secretary Woman's State Federation Says: "Pe-ru-na Does More Than is Claimed For It."

Mrs. Julia M. Brown, Secretary of the Woman's State Federation of California, writes from 13114 Fifth St., Los Angeles, Cal., as follows:

[illegible] medicine which did what it professed to [illegible] I have never advocated any medicine I feel [illegible] that it is but justice to speak a good word for it because I have found it to be such a rare exception.

"I have known several women who were little better than physical wrecks, mothers who dragged out a miserable, painful existence, but were made well and strong through the use of Peruna. I have known of cases of chronic catarrh, which were cured in a short time after [illegible] forms [illegible] had been experimented with when I feel nervous and worry out, and I have always found that the results were most satisfactory."

JULIA M. BROWN.

HER GREAT FORTUNE.

A Woman Saved From Life-Long Misery and Made Happy and Useful.

A woman confined to the house for several years with a chronic female derangement had finally given up hope of being cured.

She had tried physician after physician, and remedy after remedy, without any permanent improvement.

Her treatment had cost her husband who was a poor man hundreds of dollars. They had been obliged to deny themselves many comforts of life in order to get money enough to pay the physicians.

The woman had become weak, nervous and wretched, and scarcely able to keep out of her bed. Her children were growing up neglected and ragged, because of the want of a mother's care. Her husband was becoming discouraged and broken down with overwork.

Picking up the paper one day she happened to read an item which contained the news that Dr. Hartman would treat such cases free of charge by letter. She immediately wrote the doctor describing her case, and giving him all her symptoms.

She soon received a letter telling her exactly what to do, and what medicines and appliances to get. She began the treatment (the principal remedy being Peruna) at once, and in a few weeks she was well and strong again, able to do her own work.

This offer of free home treatment to women is still open to all who may need the services of this eminent physician. All letters applying for treatment will be promptly answered, and be held strictly confidential.

Miss Annie Hoban, Post Pocahontas of Yemassee Council of Red Men (Women's Branch), writes from 872 Eighth Ave., New York:

"Three months ago I was troubled with backache and a troublesome heaviness in the stomach. Sleep brought me no rest, nor even a restless sleep. The doctor said my nervous system was out of order, but the prescriptions didn't seem to relieve me. I was told that Peruna was good for building up the nervous system. After using it for two months I know now that it is. I want to say that it made a new woman of me. The torturing symptoms have all disappeared and I feel myself again. Peruna did me more good than all the other medicines I have taken."

ANNIE HOBAN.

Miss Mamie Powell, Lake Charles, Louisiana, writes:

"I sincerely believe that Peruna is woman's best friend, for it has certainly been that to me. I had had headaches, backaches and other aches every month for a long time, but shortly after I began taking Peruna there was a thing of the past, and I have good reason to be grateful. I take a bottle every spring and fall now, and that keeps my health perfect, and I certainly am more robust now than I have been before, and am weighing more. I do not think one will be disappointed in the results obtained from the use of Peruna."

MISS MAMIE POWELL.

If you do not desire prompt and satisfactory results from the use of Peruna, write to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

Illustrated Announcement and Sample Copies of the Paper Free.

THE YOUTH'S COMPANION, BOSTON, MASS.

The Boastful Scot.

H. L. Doherty, the English tennis champion, was complimented one day at Newport upon his coolness in play.

"Yes, I manage to keep cool," said Mr. Doherty, "but I fancy I should do better if I had Scotch blood in my veins."

The young man then told a story illustrative of Scottish coolness under trying circumstances.

"A number of Scots," he said, "were working on a fifty-story building. One, up near the roof, lost his foothold and fell. But even in his swift descent through the air he remained quite cool and calm. In fact, as he shot past a friend on the twelfth story he sang out:

"'Eh, Saundy, man, 'tis a fall as I shall hae!'"

At the burial of a South London man six dogs, draped in black, followed the cortege.

CONTIPATION

"For over nine months I suffered with chronic constipation and [illegible] I had to take an injection of water [illegible] every 2 hours before I could have action. [illegible] tried Cascarets today. I am happy. During the nine months before I took Cascarets I suffered untold misery with [illegible] Thanks to you I am free [illegible] can use [illegible] Cascarets." [illegible] Bruce, Ill.

Burglars in Bound Brook.

The fall business of burglars seems to have opened up in this vicinity with more vigor than usual. Last night the homes of John Wall and Henry Bonham, in Second street, and that of W. B. R. Mason, in High street, were visited. In each case the methods were similar. The prowlers effected an entrance by opening a first-story window. Ascending to the second floor in each house they found a pair of trousers, which they took downstairs and appropriated the contents of the pockets. On Saturday night the home of Edward V. Brokaw, in Watchung road, and that of Mrs. Camell, in Union avenue, were entered, but the hauls were small in each case.

"Travelers" over the Delaware

Orders have been placed or are about to be placed with the John A. Roebling's Sons Co., of Trenton, for cables to be used for transporting traffic across the Delaware river in places where bridges were recently carried away by flood. This method will be resorted to pending the rebuilding of the bridges. These cables are known as "travelers." The cable is strung across the river and on it is placed a traveling wheel and to this is fastened a rope attached to a tack boat. One of these cables is in use at Lambertville, and has been for many years, to carry canalboats between the Delaware and Raritan canal and the Pennsylvania canal.

Concerning Proctor's Theatres.

That perennially graceful minstrel comedian, George H. Primrose, who made a fortune with his own shows, and then retired to enjoy a period of well earned ease and competence, is the latest example of a man who simply can't "loaf." After six months of luxurious idleness, the popular blackface king has declared that he didn't feel that life was worth living unless he could get into burnt cork again. Besides, he has taken a fatherly interest in those diminutive dancers, the Foley Brothers, who assist him in his specialty, and for their sake also he has decided to return to the footlights. Primrose owns the largest private estate in Mt. Vernon, N. Y., a stable of fast trotters, a steam yacht, and plenty of government bonds. Yet he has deliberately chosen to keep on working, and his decision will be hailed with delight by all who have ever enjoyed his performance. Mr. Primrose is to appear in the F. F. Proctor theatres during the Winter.

THE YOUTH'S COMPANION,
144 Berkeley Street, BOSTON, MASS.

Horse Frightened by Trolley Becomes Impaled on a Picket Fence.

Last Friday afternoon while Mr. and Mrs. Howard Sutphen, of Rayville, Hunterdon County, were driving in Somerville, their horse became frightened at an approaching trolley trolley car. Mr. Sutphed stood up in his buggy and signalled for the motorman to stop his car, but the car continued coming at a high rate of speed which resulted in the horse bolting to the sidewalk and attempting to jump over an iron picket fence, five feet high in front of the Mack residence. It succeeded in clearing the fence with its fore legs, but on account of the buggy holding him back he became impaled on the sharp iron pickets and was disemboweled. The horse was speedily relieved from its agonizing sufferings by being shot through the brain. Mr. Sutphen and wife escaped injury.

It is said the trolley car still kept on and ran over a block without slackening speed and was only stopped then to allow some passengers off who had seen the accident and went back to render assistance. The car still continued on, neither the motorman nor the conductorstopping to investigate the accident.

"Uncle" Russell Sage.

The wasteful "bulls" and "bears" of Wall Street, who generally live fast and exhaust their capital of cash and vitality in self-indulgence, are fond of jeering at "Uncle Russell" and calling him "miser" and other opprobious names. The "accommodation" he affords them when in a "deal" fails to excite their gratitude, especially since they know he always gets back his money with good interest, while they often lose theirs. They are hardly just. If they but imitated their "uncle's" moderation they hight hope perhaps to live and prosper as long as he. Whatever may be said of Mr. Sage's strong grip on the dollar, the figure of his last birthday clearly demonstrates the excellence of some points of his character.—Baltimore Sun.

The Latest Passenger Turbine Steamships.

The Queen, the new turbine steamship built at Dumbarton for the South-eastern and Chatham Railway, to be used in the channel service, is 310 feet in length, 40 feet broad and 25 feet in depth. In her recent trials of the Firth of Clyde she developed a speed of 21.76 knots, and when she was traveling ahead at the rate of twenty knots it was found possible to stop her dead in two and one-half times her own length.

The Queen is the first turbine passenger steamship to be placed on the regular English channel service. She will make the trip from Dover to Calais, a distance of 24.2 statute miles, in less than an hour. The Samphire, an express steamship on the same route of forty years ago, had a speed, on official trial, of 15.3 miles per hour. The Nord, built in 1898, which is now running, although showing a trial speed of 21.5 knots, developed a schedule service of only 15.8 knots. Owing to the shallow harbor at Calais, the vessels of this line are limited to a draught of ten feet.

Mrs. Rabbit—Now I wonder if that fool boy thought I couldn't find my burrow without him coming and pointing it out for me?

ESSAY ON THE HORSE.

A Noble Quadruped Ridden on the Spinal Cord by the Bridle.

The following remarkable essay on the horse is said to be from the pen of an Indian student:

"The horse is a very noble quadruped; but when he is angry he will not do so. He is ridden on the spinal cord by the bridle, and sadly the driver places his foots on the stirrup, and divides his lower limbs across the saddle, and drives his animal to the meadow. He has four legs; two are on the front side and two are afterward. These are the weapons on which he runs. He also defends himself by extending those in the rear ways cry for food but it is always at the morning time. They have go[illegible] but not so long as the cow and [illegible] like animals.—Scottish

LEGAL NOTICES

Election Notice!

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the County of Somerset will hold their first meeting on

TUESDAY, SEPT. 1, 1903.

At 10 o'clock in the morning, at such places as may be designated by the Township Clerks of the respective townships of said county. Such boards shall organize according to law and then proceed to ascertain the names and residences of all the legal voters in their respective districts, by making actual inquiry at every dwelling house or habitation, or of the head of every family residing therein, and shall continue such enumeration of voters from day to day, on successive days, completing same on or before Friday, Sept 4. (Sec 23 Election law.)

SECOND MEETING

AND PRIMARY ELECTION

Said Boards of Registry and Election will also meet on

TUESDAY, SEPT. 8, 1903,

At the same places from 1 until 9 p. m., for the purpose of transcribing and making up from its canvass books two lists of all persons entitled to vote in its election District, who shall personally appear before the board for that purpose, or be shown to its satisfaction by the affidavit in writing of some voter in the election district to be a legal voter therein.

On the same day between 1 and 9 o'clock p.m., the Primary Election shall be held in every election district in the County of Somerset.

THIRD and FINAL MEETING.

Said Boards of Registry and Election will also meet on

TUESDAY, OCT. 27, 1903,

At the same places, and between the hours of 1 p. m. and 9 p. m. for the purpose of revising and correcting the Original Registers, and for adding thereto the names of all persons entitled to the right of suffrage in such Election District at the next election.

Notice is hereby given to all Boards of Registry and Election in the County of Somerset that they are required to strictly observe Sections 24 and 32 of "An Act to Regulate Elections (Revision of 1898)" approved April 4, 1898, and that the County Board of Elections will be in session at Somerville on

Wednesday, Oct. 28, 1903,

For the purpose of receiving the registers and receipting for affidavits, etc.

General Election Nov. 3, 1903

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

Cutler, Sr., 81 years of age, a
of North Plainfield township,
terday.

Member of the Retail Clerks' Mutual Aid Association gave their first dance at the Casino Wednesday evening.

The third annual masquerade ball of the Original Florodoras will be held in Bound Brook Hall Thursday evening November 12.

The Plainfield election Tuesday resulted in the election of all the County Democratic candidates, and all the Republican nominees on the city ticket.

Members of the First Baptist Church of North Plainfield have extended an unanimous call to Rev. Dr. John A. Chambliss to become a pastor of their church.

The Southern Jubilee singers will give a concert in Y. M. C. A. Hall this evening at 8 o'clock. A musical treat for men and women. A silver collection will be taken.

At the 4 o'clock service at the Y. M. C. A. tomorrow, Mr. Fletcher Humphrey will speak and the Southern Jubilee Singers will sing. The service is for men and boys only.

Mrs. Helen Maria Dyckman, of Westervelt avenue, this borough, died suddenly in Brooklyn, last Sunday. Three daughters, the Misses Mary A., Harriet P., and Kitty Dyckman survive her.

Through a mistake the Watchung and Springdale items in the REVIEW last week were somewhat mixed, thereby locating Mrs. Geibelhouse and others at Springdale instead of Watchung.

[redacted]

of the bride on West Fourth street, by Rev. Cornelius Schenck, pastor of Trinity Reformed Church.

Invitations are out for the marriage of Miss Kizzie DeMott, daughter of Mr. and Mrs. Henry DeMott, of this borough, to John Raymond Lambert, at the residence of the bride's parents, 59 Somerset street, Thursday evening, November 26, at eight o'clock.

Miss Elizabeth A. Sears and Albert I. Littell both of Plainfield were married at the home of the bride's parents, Mr. and Mrs. Frederick Sears, of Clinton avenue, Wednesday evening by Rev. Erskine M. Rolman, rector-emeritus of Grace Episcopal Church.

Mrs. McKelvey, wife of J. O McKelvey, pastor of Warren Chapel, gave a tea at her home on Grandview avenue, Wednesday afternoon, to the members of the Chapel and the "grown up" members of the Sunday School. She was assisted in receiving by Mrs. A. V. D. Honeyman, Mrs. Benjamin Moore, Mrs. John Green, Mrs. Gibson Smith, Mrs. J. W. Gavett, Mrs. William Demarest and Mrs. Charles D. Wheeler.

A Quiet Borough Wedding.

Miss Minnie Hansen, daughter of Mr and Mrs. Peter Hansen, of Lincoln place, this borough, and Peter Peterson, of New Brunswick, were married Wednesday evening by Rev. J. O. McKelvey, of Warren Chapel.

The Influence of the Youth's Companion

The gospel of good cheer brightens every page of *The Youth's Companion*. Although the paper is nearly seventy-seven years of age, it does not look back on the past as a better period than the present.

The Companion believes that the time most full of promise is the time we are living in, and every weekly issue reflects this spirit of looking forward and not back.

To more than half a million American families it carries every week its message of cheer. Its stories picture the true characteristics of the young men and women of America. Its articles bring nearly three million readers in touch with the best thought of the most famous of living men and women.

Annual Announcement Number fully describing the principal features of *The Companion's* new volume for 1904 will be sent to any address free.

The new subscriber for 1904 will receive all the issues of *The Companion* for the remaining weeks of 1903 free from the time of subscription, also *The Companion* Calendar for 1904, lithographed in twelve colors and gold.

THE YOUTH'S COMPANION,
144 Berkeley Street, BOSTON, MASS.

Somerset County Election Returns

The official returns as reported by the County Clerk show the following result:

For Assembly, S. S. Swackhamer, Democrat, received 3190; Dolliver, Republican, 2539; Trumpore, Prohibition 141. Swackhamer's plurality 692.

For County Clerk, J. L. Anderson, Democrat, 2829; A. G. Anderson, Republican, 2896; Ackor, Prohibitionist, 150. A. G. Anderson's plurality 25.

For Coroner, Somers, Democrat, 2756; Toms, Republican 2931. Toms' plurality 175.

Loizeaux Lumber Company Incorporates

Certificate of incorporation has been filed in the office of the Union county clerk by the J. D. Loizeaux Lumber Company, with principal office in Plainfield. The incorporators are Joshua D. Loizeaux and Frederick C. Jennings, of Plainfield; John B. Buss, and John R. Dunn, of Somerville. The total authorized capital stock is $100,000, divided into 1,000 shares at a par value of $100 each.

Meeting of Board of Health.

The regular meeting of the North Plainfield Board of Health was held last Monday evening at the home of the secretary Rev. W. E. Honeyman. It was decided that the quarantine for scarlet fever should be 21 days instead of 30 as heretofore, provided desquamation had taken place.

An Old Resident Passes Away

After a long illness Benjamin Arrowsmith Hegeman, Sr., of Sycamore avenue, this borough, aged 83, passed away at midnight Sunday. The funeral was held Thursday afternoon in Trinity Reformed Church, Plainfield. The deceased is survived by five children, one of whom, B. A. Hegeman, Jr., resides on Myrtle avenue this borough.

Hits Mayor Smalley a Whack.

It comes with mighty poor grace for Mayor Smalley, of North Plainfield, to denounce a Republican on the allegation that the latter has said a good word for a Democratic candidate in Somerset county. The Mayor is apparently able to see a mote in a brother's eye without distinguishing the beam that is in his own op-

[redacted]

pupils who receive a stated per cent. will be given a "free" day the last Friday of each month.

Pupils on Roll of Honor for October Grammar Grade—Douglas Demler, Tessie Schmidt, George Schmidt, Minnie Beyer. Primary Grade—Elsie Schmidt, Minnie Blume, Lillian Willis, Lottie Gunn, Clarence Schmidt, John Blumetta, Ferdinand Blume, Swift White.

LIBERTY CORNER.

Miss Lela Quimby, of Morristown, was a guest at the parsonage this week.

The proceeds of the supper held at the Chapel, last Tuesday evening netted $23.50.

Miss L. W. Blazure, of Newark, is visiting Mrs. Isaac Fennimore.

Mr and Mrs. Elias Runyon, of New Brunswick, were guests of William I. Hayes.

Mrs. J. A. Hoffman, of Plainfield, is visiting her sister, Mrs. Julius Froehling.

Mr. and Mrs. Nagle, Dr. Adam Hubschmitt, Mr. and Mrs. Stegman and sons, Miss Mamie Pettibaum and William Smith, of New York City, were guestt of Mrs. J. Ziegler, Sunday.

The Rev. C. B. Condit attended a meeting of the Executive Committee of the State Christian Endeavor Union last Monday.

Miss Mamie Titus, of Westfield, who has been visiting her cousin, Mrs. C. C. Acken has returned home,

C. C. Acken and family visited his brother, Harry Acken, of Plainfield, last Sunday.

* * *

STIRLING.

J. Poggo, who recently bought of John P. Wolf the Rose Hill Park farm, is building a new twelve room boarding house, next the one that he purchased. Charles Bolmia has the contract for the carpenter work.

* * *

WARRENVILLE.

At the auction held by Henry Waggoner last Monday there was not a large attendance but there were some good buyers who obtained bargains. Mr. Waggoner will remove to the Peter Newmiller place.

Reform Club Meetings

Mr. Brown was present at the meetings held at the Reform Club Monday, Thursday and Friday nights. Evangelist J. B. Oakley, of Elizabeth, assisted by Mr. Brown will have charge of the meeting tomorrow afternoon. In the evening Mr. and Mrs. Brown, Secretary Tom Marsh, of the 146th Street Mission, New York City and Evangelist Oakley will be present. Extra music has been prepared for both meetings. A cordial invitation is extended to the public.

Success of the Voting Machine.

Like all things new, it was expected that the voting machines, used for the first time in this State on Tuesday, would come in for more or less unfavorable comment, but taking all things into consideration, it is the opinion of the REVIEW that the machines are a great improvement over the old style ballot box in casting and counting the votes.

As to what effect the machines may have in inducing voters to vote straight tickets, or to remain away from the polls, is another matter.

The machine in North Plainfield appeared to work satisfactorily in every respect, and very little trouble was experienced by any of the voters. Whether all these voters voted exactly as they wished, cannot, of course be told, but there was very little delay by any of them, and it is fair to assume that they did.

But when the polls were closed at 7 o'clock, and the full vote announced in just one and one half minutes from that time, there were satisfied smiles on the faces of all interested which showed unmistakably that the machine was a great success in that respect.

SUBURBAN NOTES.

WATCHUNG.

A very quiet home wedding occurred last Tuesday evening at the home of Mr. and Mrs. William Gordon when their daughter, Miss Edith Gordon and Frank Mundy of Metuchen were married by Rev. W. C. Snodgrass, D. D. of the First M. E. Church, of Plainfield.

The little six months old baby of Mr. and Mrs. George Mobus, who had been quite ill died last week.

Willie Dotton, the young boy, who has been very ill with scarlet fever, is convalescing and able to sit up.

Election Tuesday was very quiet. Ballot cast 98 of which S. S. Swackhamer received 20 majority, A. G. Anderson 16 and Howard Toms 16.

Mrs. D. Meyer, of Bayonne is visiting her nephew, Postmaster Schmidt.

At the regular school meeting last Friday night, it was decided to omit the afternoon recess and close the school at 3

A FLOATING ISLAND.

Four Men Adrift all Night on a Storm-Tossed Lake.

A correspondent of the Newark *Sunday News* tells a thrilling story of an all night ride on a floating island in Greenwood Lake, which almost shames Jules Verne's most imaginative yarns.

For many years the island has been one of the standard sights of Greenwood Lake. The natives knew it as Cranberry Marsh; to summer visitors it was "the floating island." It lay close to the east shore of the lake, a short distance below Stirling Forest Station of the Erie Railroad, and half a mile to the south of the boundary line between New York and New Jersey. It was nearly abreast of Storms Island. A narrow channel, scarcely fifteen feet wide at its broadest part, separated it from the mainland. Old residents declared that the island had grown measurably each year.

It contained about three acres and was nearly circular in shape. Many doubted that it was really afloat, and declared that it was simply a quaking bog. It really was nothing but a huge of moss and peat, held together by the roots of the cranberry bushes which covered the island with a thick growth. The soil of the island was the black mould formed by the decaying leaves and roots of the cranberry bushes. At the north and east banks of the island were a number of tamarack trees of considerable size, some of them being from three to four inches at the butt. Every part of the island was firm enough to be walked on, but in rough weather the island would heave with a motion resembling that of the waters of the lake.

There were four camps on the island, or, rather, at its edges. The largest, at the south end of the island, was owned by Jediah Allen and his son, F. B. Allen, the latter a hotel keeper at 9 and 11 Pearl street, Paterson. The elder Allen spends nearly all of his time at the camp on the island. At the north end of the island were several shanties, or camps. One was owned by George Harrison, of Paterson, who with his wife and daughter had occupied it until a few days before the big storm which carried the island away. Another was owned by Alderman James McDonald, of Paterson, and his two brothers, Thomas and Edward McDonald. The other camps were owned by Mrs. Post, but had not been occupied during the summer.

Although practically a part of the island, the camps were built on floating foundations, more to insure the buildings against settling, and to provide a suitable foundation at slight trouble, than in any anticipation of a voyage by water in company with the island. Allen's camp and boathouse was built on a float, like a huge scow. The other shanties were buoyed on barrels lashed together with timber booms, and on these booms the houses were built. McDonald's house was moored to the tamarack trees on the island with wire cables. The float on which the Allen house was built was anchored more solidly.

Four piles, one at each corner of the float, were driven into the mud at the bottom of the lake, and to these piles the float was fastened with stout cables. These piles were driven right through the island, and as a result, played an important part in its movements when it broke loose from the anchorage of roots that had held it for years to its original location.

JEDIAH ALLEN'S NARRATIVE.

"My son had come up to spend some time with me," he said, "and Ted McDonald and a friend of his from Paterson were in their camp. We four were the only people on the island during the big rain storm and flood of Friday and Saturday, October 9 and 10. The McDonalds were at the north end of the island, and we were at the south. On Saturday the water had risen several feet, and during the afternoon and evening it kept on gaining. About 8 o'clock we noticed that the island seemed higher out of water than it had been, although the water on the mainland was rising. We figured from this that the roots that held the island to the bottom of the lake had been pulled out, and that the island was rising with the water, just as a boat would. It was a fearful night. It was raining in torrents, and the wind was blowing hard from the northwest, with a squall every now and then from the northeast. At 8:30, almost to the second, Ted McDonald came running over to us, shouting that the island had broken loose. As he spoke we saw the lights on the shore swing round us, and instead of looking to the south, we could see the lake, apparently, turn round, so that we were looking right up to the north.

"The island had broken loose, and was swinging round on the piles of our house as a pivot. For a few minutes we thought that the piles would hold the island, but as it swung clear round and bore full on the piles, with the wind driving against

[Continued on Last Page.]

Just as it Happened

It is with no degree of pleasure, nor with any desire to obtrude his personal affairs upon the public that the editor of the REVIEW places himself before his readers in the light of a man who allows himself to take part in a street fight, nor is he proud of the fact that he called a man a liar, and it is only because the incidents in connection therewith have not been correctly reported by other newspapers that he does so here. The fight (if fight it can be termed) was not of his seeking, and the only part he took in it was that of defending himself against a larger and stronger man who struck the first and only blow the editor received in the fray.

The incidents in connection with the trouble were these:

A few moments after seven o'clock the editor was asked by Councilman Charles A. Lee, in the second polling district if he had heard how the vote went in the first district. He replied by reading the result from a memorandum which he had. Lee upon hearing the figures made some caustic remark questioning the editor's Republicanism. One word brought on another when Lee accused the other of accepting boodle to support Swackhamer. This the editor denied several times until finally he replied that "any man who says I have received a single cent of boodle lies." Lee persisted and said he could prove it and again he was called a liar.

At this point citizens stepped between the disputants and both parties were hustled out of the building into the street.

Lee was handed over to Chief Marshal Campbell who stepped up just at the moment Lee reached the sidewalk. Campbell tried to quiet Lee and get him to go home, but Lee broke loose from Campbell and aimed a blow at the newspaper man, who owing to his inability to see well in the dark, was unprepared for it. Lee followed up the first blow with three others which the editor successfully parried.

During all this time Campbell was within touching distance of the parties, but made no move whatever to stop Lee.

At this point the crowd of several hundred men yelled for Lee's arrest, but Campbell would do nothing, so some of the crowd took hold of Lee and endeavored to get him away, but the spectators were so indignant over the officer's actions that some of the more hot headed ones yelled out to lynch Lee, and made an effort to get at him. Then the brave and valorous (?) officer asserted his authority in the endeavor to protect his master. (Lee is at the head of the police department of the borough, which may account for Campbell's non-interference). Just at this moment, and while the crowd was trying to get at Lee, while Campbell and two or three others were trying to get Lee away, Dr. Adams came up in his automobile, into which Lee was placed and taken home.

When the crowd learned of this they were furious and a large number of the younger ones, most or all of whom were boys, went to Lee's house and vented their displeasure by serenading (?) him with tin pans and such instruments, and finally by throwing missiles at his house. Campbell was sent for and after considerable trouble dispersed the crowd.

Great pressure was brought and is still being brought upon the editor to have Lee arrested, but it was then, and is now his opinion that it was the duty of the Marshal, who witnessed the affray, to arrest Lee on his own responsibility, and so he interviewed Campbell, and said to him:

"Campbell, you saw that man strike me; will you arrest him?"

"What man?" Campbell asked.

"Mr. Lee," was the reply.

"I did not see any one strike you and know nothing about it," the Marshal replied.

"Campbell, you were within two feet of Lee and myself when Lee struck me, and you could not have helped seeing the whole thing," the newspaper man said.

Campbell replied: "I know nothing about it."

"Then you will not arrest Lee?"

"No, I will not," Campbell replied.

The law governing the duties of the Borough Marshals as set forth in the General Ordinances of the borough are very plain, and as applicable, to this case read as follows:

Rule 27. Marshals—The prevention of crime being the most important object in view the Marshals' exertions must be constantly used to accomplish that end.

Rule 28. He must, to the utmost of his power, prevent the commission of assaults, breaches of the peace and all other crimes about to be committed.

Rule 31. When any person charges another with the commission of a crime, and insists that the person be taken into custody, the Marshal shall require the accuser if unknown to him, to accompany him as a witness, along with the accused to the Station House or Recorder's office.

Section 2 of Rule 44 reads as follows:

Sec. 2. For any violation of any of the foregoing rules any member of the Police Department may, after being given an opportunity to be heard before the Council, by resolution of the Council be reprimanded, suspended with or without pay, fined or expelled.

It remains to be seen what action the the Mayor and Council will take towards disciplining the Marshal for this his latest malfeasance, as well as that brought against him a few days ago by ex marshal Fahn wherein the marshal was charged with spending much of his time when he should have been on duty in back rooms playing cards, or at other places drinking beer.

Inasmuch as the editor of the REVIEW bears no animosity nor seeks for revenge, and Mr. Lee has expressed himself as regretting the part he took in the matter, and admits that he was at fault in publicly making the charges as he did, it has been deemed best by mutual friends that the matter of pressing a criminal charge for an assault and battery be dropped.

SEBRING TAKES CHANCES

DEFIES BOROUGH AUTHORITIES

Charles P. Sebring sprang a surprise on boroughites Wednesday night by attempting to move the old Wolfe dwelling from West Front street to a vacant lot, corner Grove street and Prospect place, the entrance to the Washington Park district.

It will be remembered by most of the REVIEW readers that Mr. Sebring attempted the same thing last September, but was prevented by the borough authorities. The matter was then compromised and Sebring was negotiating for ground at the rear of the Schepflin building, but when the deal fell through, Mr. Sebring concluded to make another attempt to move the building to the first named location.

He claims to have the consent of Plainfield city authorities and of the Board of Freeholders of both Somerset and Union counties, but not of the Borough officials, they claiming that it is not in their power to grant a request to obstruct any of the borough streets.

Sebring claims he is not obstructing the street and is going ahead with the house as rapidly as it can be done by horse and windlass power. While so doing he is occupying the house as a residence.

Objection is made to moving the house to the borough because of its old and dilapidated condition, boroughites claiming that it will seriously injure property in that district to allow any such building taken there. Sebring says he will fix the house up and put it in presentable shape before he finishes the job.

Thursday night it was thought the house would be taken across the line into the borough, and a special marshal was detailed to watch at the section all night and to arrest all engaged at the work, but no attempt was made until Friday morning when a gang of men under Mobus Brothers resumed work and moved it several feet nearer the borough line.

It is said by those who claim to be "wise" on the subject that the building will be taken as close to the line as possible on Saturday night, and when the old bell in the Methodist Church near by rings out the midnight hour announcing the arrival of Sunday the building will be hustled to its intended location and the borough officials cannot help themselves. This will probably be a question for lawyers to decide, and the outcome is looked forward to with much interest by the whole of the west side.

The State Sunday School Convention to Meet at Newark.

The annual state Sunday School convention meets this year at Newark, N. J., Wednesday and Thursday, November 18 and 19, in the Peddie Memorial Baptist Church. The elementary grade teachers will hold their institute on Tuesday and Wednesday at the First Presbyterian Church. The speakers from outside the state will be Mr. John Sparhawk, Jr., of Philadelphia, Mrs. M. B. B. Langzettel, of New York, Mrs. Flora V. Stebbins, of Fitchburg, Mass., and the International general secretary, Mr. Marion Lawrance, of Toledo, Ohio. The program promises an unusually practical and inspiring gathering. The superintendents will hold their third annual banquet and conference on Wednesday evening. Any New Jersey Sunday School worker may become a delegate to the convention, and the state secretary, Rev. E. M. Fergusson, Trenton, will furnish program and instructions.

Mr. Swackhamer's Appreciation

Plainfield, N. J., Nov. 4, 1903.

Mr. Editor.—I desire to express through your columns the deep sense of gratitude which I feel to the citizens of Somerset county for the honor which they have conferred upon me by my re-election to the General Assembly. I am conscious of the high responsibility imposed by this trust, and it will be my constant and earnest endeavor to discharge it faithfully and well.

Very truly yours,
S. S. SWACKHAMER.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

STOLE HIVE OF BEES.

The Toms River Courier reports that a thief at Cassville stole a hive of bees from W. C. Van Hise recently and it characterizes the larcenous individual as fully equal to the man who appropriated a red-hot stove.

A MARKET FOR TAILS.

Since the publication of the story from Hoboken telling of Patrol Driver Thomas Van Dusen's ingenuity in fixing artificial tails to the docked appendages of his horses, he has been daily besieged with many letters. The article was extensively copied, and letters from all over the country reach the driver. Thomas at his post reads the missives with much amusement. The idea seems to be prevalent that Van Dusen is manufacturing the tails, and he exhibited a dozen letters asking for from two 100 of the articles, and asking for wholesale prices on them. One of the letters asks if he can make a tail for a bulldog, while another picked up at random from the promiscuous heaps, naively inquires if the tails can be made of old whisk brooms.

OLD INDUSTRY REVIVED.

The marl industry named the town of Marlboro. Years ago men "struck it rich" there, and an extensive industry began and flourished for years. The marl was mined and the farmers kept their hired men carting marl to their farms all winter. So valuable was the marl for fertilizing that farmers would often convey it a day's journey. Mother Earth is still rich in such resources, but man has manufactured a variety of artificial fertilizers, and their condensed form caught the farmers' approval for economy of time. After years of use the strong chemicals in patent fertilizers are wearing the land out, and many farmers are glad to resort to the old marl beds. Lewis Shoemaker, of Marlboro, has opened his marl bed and is operating the industry with the aid of a white mule. He finds ready sale for all the marl put out.

One of Duke's Barns Set on Fire.

A fine big barn on the estate of James B. Duke, president of the American Tobacco Company, near Somerville, was set on fire last night by an incendiary. It contained several hundred tons of hay, and burned fiercely threatening other buildings.

The discovery of the fire was made by the wife of one of Mr. Duke's farmers. She says she saw a well-dressed young man hanging around the barn before the fire.

This is the second big barn that has been burned by an incendiary on the Duke estate. In both instances hay to the amount of several thousands of dollars and costly buildings with valuable contents, were destroyed.

The Fest of Sparrows.

The government has again been giving some attention to the English sparrow and while at this writing no definite statistics are obtainable, it is roughly estimated that there are upwards of a hundred million of the little feathered creatures in this country. The sparrows have long ago been voted a pest, but it was not until recently that strenuous efforts have been made toward their extermination.

"Equip the boys with the Stevens rifle," says a well known Washington official, "and the sparrow question won't be a matter of doubt very long."

This thought is right in line with the ideas that the J. Stevens Arms & Tool Co., of Chicopee Falls, Mass., the well-known firearm makers, have been advocating for some time. The Stevens people have been urging the use of the small caliber rifle on farms where not only the sparrow, but woodchucks, squirrels, crows, hawks are also sources of nuisance.

As a general proposition it does seem reasonable to believe that a man or boy, armed with a "Stevens" and instructed in its use, could rid the neighborhood of the living crop destroyers at a small outlay and have a lot of fun himself while at work.

RESULTS OF THE ELECTIONS

Latest Returns From the Political Contests Held in Eleven States.

McCLELLAN CHOSEN MAYOR

The Republicans Carry Ohio by an Increased Plurality.

The Democratic Candidate Carries Four of the Five Boroughs in Greater New York, Beating Low in Brooklyn by About 1400—Great Runs Ahead of His Ticket, Being Especially Strong in Kings County—Canal Project Wins in New York by Over 200,000—Republicans Again Sweep Massachusetts.

Elections were held in eleven States on Tuesday. Full State tickets were voted for in Massachusetts, Rhode Island, Maryland, Ohio, Kentucky, Iowa and Mississippi, while in New York, Pennsylvania, Nebraska and Colorado a justice of the upper courts, Regents of the State University or minor State officers were chosen. Municipal officials were selected in New York City, San Francisco and Salt Lake City and the larger New Jersey cities. The Prohibitionists had a ticket in all the States except Colorado, the Socialists in all except Nebraska and Colorado, the Populists in Iowa and Colorado, and the Socialist Labor party in New York, Massachusetts and Ohio. Fusion was effected in Nebraska only, though the Republicans of New York indorsed the Democratic nominee for Judge of the Court of Appeals.

New York City.—After one of the most remarkable campaigns ever known in New York, the Democracy was swept back into power, and in spite of the fact that nearly every newspaper and practically every minister of religion was against him, George B. McClellan, son of the Civil War General, was elected third Mayor of Greater New York, defeating Mayor Seth Low by a plurality of 63,617 votes. All the Tammany city candidates were elected by about the same majority. In four of the five boroughs Democrats were elected as Borough Presidents. George Cromwell, of Richmond, will be the only Republican in the new Board of Estimate and Apportionment, which controls the city budget and is the arbiter of all expenditures for public improvements.

The vote shows a tremendous change of public sentiment since Mayor Low's election two years ago, when he won by 31,632. At that time he carried all the boroughs but Queens, his plurality in Manhattan and the Bronx being 5663, in Brooklyn, 25,767, and in Richmond, 763. In Queens, Shepard (Democrat) had a plurality of 561. At this election McClellan carried Manhattan and the Bronx by 58,829; Brooklyn by 1808, and Queens by 5198, a gain of more than 4000. This makes a total net gain for McClellan of about 103,000, as compared with Shepard's vote of two years ago. Low carried only one borough—Richmond—by 218 votes.

To the astonishment of all political forecasters, Brooklyn, the stronghold of the Fusionists, was carried for McClellan by a plurality of approximately 1808. This means the political retirement of the aged Hugh McLaughlin, Democratic leader in Brooklyn, who fought the Tammany ticket. McClellan carried every borough with the exception of Richmond, which gives a small Low majority.

Another surprise was the light vote given to William S. Devery, former Chief of Police, who ran as an independent candidate for Mayor, and who boasted that his election was "a sure thing." His total vote in Greater New York is 2665. This is a smaller vote than was given to the Socialist Labor candidate and but little more than the average Prohibition vote.

Edward M. Grout was elected Controller and Charles V. Fornes, President of the Board of Aldermen. These two men were originally on the Fusion ticket and were endorsed by Tammany, whereupon the Fusionists took their names from the Low ballots and nominated other candidates. It was the nomination of Grout and Fornes by Tammany that caused Hugh McLaughlin, the veteran leader of the Kings County Democracy, to bolt.

The vote was enormous, almost up to the registration, which was 628,807, and was probably the largest vote ever cast in the greater city, though nearly 60,000 who registered stayed at home. The total vote cast was 569,130.

The constitutional amendment which was submitted to the voters providing for the expenditure of $101,000,000 for the improvement of the Erie Canal, so as to permit the transportation of barges each carrying 1000 tons of freight, has been carried. This was due almost entirely to the vote of New York City, where the vote was practically unanimous in favor of the amendment. Very few counties up the State voted in favor of it. The amendment was voted against heavily, even in some of the important counties traversed by the canal; in those counties which were not traversed by the canal, the amendment was simply slaughtered. Erie County, which was supposed to be a hotbed of canal sentiment, did not do so well as the advocates of the improvement had expected, and but for the vote of this city the scheme would have been killed.

NEW YORK.

New York State elected a new Assembly. Republicans increased their majority in that body. Returns indicate that the Assembly of 1904 will be composed as follows: Straight Republicans, 95; independent Republicans, 1; Democrats, 54. The Assembly of 1903 was made up as follows: Republicans, 89; Democrats, 61. The State Senate held over, but there was an election in the Westchester Senatorial District to fill the vacancy caused by the resignation of Charles P. McClelland, Democrat. Francis M. Carpenter, Republican, defeated the Democratic nominee, William Temple Emmet. Carpenter's victory, with the vote of the Lieutenant-Governor, the presiding officer of the Senate, will give the organization Republican control of that body. The Senate of 1904 will stand thus: Straight Republicans, 25; independent Republicans, 4; Democrats, 21. Returns from all Assembly districts of the State give the Republicans a net gain of sixteen in the Assembly, thereby increasing the Republican majority in the State Assembly.

Elections for Mayor and other city officers were held in a number of the cities up State. Buffalo did not elect a Mayor, but its voters selected a City Treasurer and minor officers, and the Republicans captured everything. The Republicans also elected James G. Cutler for Mayor of Rochester by 1111 plurality over George E. Warner (Dem.) and James Johnston, Citizens' party candidate, and practically all the rest of their city ticket. In Albany the Republicans re-elected Mayor Charles H. Gaus and the whole city ticket. Syracuse elected Alan C. Forbes (Rep.) for Mayor over Police Justice Frederick Thompson (Dem.) by 2401. In Elmira the Republicans defeated Mayor Daniel Sheehan and elected W. T. Coleman by a safe plurality. The entire Republican ticket is elected in Chemung County. In Watertown Charles D. Bingham (Rep.) was elected Mayor, Daniel W. Cahill (Rep.) President of the Council and George W. Reeves (Dem.) City Judge. In Rome T. G. Nock was elected Mayor by a plurality of 197. He was the Republican nominee. In Corning the Republicans elected their local ticket. Binghamton re-elected Mayor Smith and the balance of the Republican ticket. Plattsburg elected McCaffrey Mayor on the Republican ticket. Talcott (Dem.) was re-elected Mayor of Utica by a plurality of 3061. The Democrats elected five Aldermen and seven Supervisors, and the Republicans three Aldermen and eight Supervisors. The Common Council is Democratic. In Schenectady Eisenminger was elected Mayor by a plurality of 31. Oswego went Democratic. Dr. James E. Mansfield defeating John Smith for the Mayoralty by a plurality of 844. The Republicans of Mt. Vernon elected Dr. Edward F. Brush Mayor and five Aldermen.

John H. Kellogg (Rep.), of Ogdensburg, and Henry T. Kellogg (Rep.), of Plattsburg, are elected Supreme Court Justices in the Fourth Judicial District by pluralities of more than 13,500 each.

NEW JERSEY.

Trenton, N. J.—Latest returns indicate that the Republicans have carried the State on the legislative tickets and for the county and city offices by very substantial majorities. The Senate will stand 14 Republicans to 7 Democrats; the House, 38 Republicans to 22 Democrats. In Cape May County, where the Democrats made one of their hardest fights, the Republicans elected Lewis M. Cresse Senator by about 1000. Camden County has elected a Republican Assembly ticket by 6000 majority, and Burlington a Republican Senatorial and Assembly ticket by upward of 1000 plurality. In Mercer County the Republicans will have a plurality of 2500. In Atlantic the Republicans have elected their ticket by 4000 and in Morris by 2500. Bergen County has gone Republican by 600. Plainfield elected Democrats to the Assembly and a full county ticket. In Cumberland County James Boyd Davis was elected. Sussex County has elected a Democratic Senator by 800 plurality. Essex County elects 11 Republican Assemblymen. The county is Republican by 12,000, the city of Newark by 4000. Republicans of Trenton claim the election of James Buchanan Mayor and Frederick Gilkeyson Receiver of Taxes by about 600 plurality. After the most exciting canvass in the history of Jersey City Mark M. Fagan was re-elected Mayor over J. J. Murphy, his Democratic opponent. The majority for Fagan will be between 2000 and 2500. Two years ago Mayor Fagan was elected by 5058. In Paterson William H. Belcher, Republican, was elected Mayor by about 500 majority over John Johnson, Democrat. He succeeds John Hinchcliffe, Democrat, who declined a renomination.

OHIO.

Columbus, Ohio.—Myron T. Herrick, of Cleveland, the Republican candidate for Governor, was elected over the single tax Mayor, Tom L. Johnson, of Cleveland, by a plurality of more than [illegible]. In districts that have [illegible] doubtful by leaders of [illegible] parties a steady Republican gain over two years ago is shown by the returns. Franklin County, of which Columbus is the county seat, shows the Johnson following stronger than was believed. In the face of this, however, the entire county Republican ticket will be elected. Hamilton County, in which Cincinnati is situated, gives Herrick for Governor an exceptionally large vote, with a plurality of at least 25,000. Cuyahoga County this time shows the Johnson ticket far behind. Ottawa County, which has been a Democratic stronghold, shows a Republican gain in all parts. Eastern Ohio has piled up an immense vote, mainly Republican. Columbiana County, which has been considered a doubtful county because of the inroads made in municipal elections by the Prohibitionists, went for the Republican State ticket. The Legislature will be Republican by a good majority. This insures Senator Hanna another term in the United States Senate.

MASSACHUSETTS.

Boston, Mass.—John L. Bates, the Republican candidate for Governor, was re-elected to that office by a plurality of 35,372 over Colonel William A. Gaston, the Democratic nominee. The entire Republican State ticket won and the Legislature is heavily Republican, although the Democrats made slight gains in both branches. The Socialists lose two of their three members in the House. John Carey, of Haverhill, the leader of the trio, was beaten by a Republican. Drew, who was nominated in Rockland to succeed the late Frederick G. MacCartney, failed of election, but in Brockton, Ransdon was re-elected. In Boston Gaston rolled up a plurality of about 19,000 carrying nineteen of the five wards, including East Boston, Governor Bates' home ward. Even Dorchester swung over to the Democratic column, but former Congressman Fitzgerald moved out into that Republican stronghold some time ago for the express purpose of making it Democratic, and it appeared that he has succeeded. Gaston received 47,252 votes in the entire city and Bates 28,388. Last year Gaston received 45,666 and Bates 32,127, so that the Democratic candidate made a net gain of three and one-half per cent., while Governor Bates suffered a loss of eleven and one-half per cent. Last year Bates carried the State by 37,120, his total vote being 196,276, against 139,156 for Gaston. The outside cities show a slight gain for Gaston. The returns from the same towns show a loss in the Socialist vote. Senator Lodge listened to the returns at the Republican State Committee's rooms. He expressed himself as satisfied with the result, saying that he was especially well pleased over the victory because of the attacks made personally upon Governor Bates.

RHODE ISLAND.

Providence, R. I. — Returns show slight Republican gains, which indicate the election of all the Republican State ticket, except Governor, and Republican control of the Legislature. The gains are not sufficient to overcome Garvin's plurality of 7500 last year. Colt, the Republican candidate for Governor, made his heaviest gains in Providence. The Legislature is Republican in both branches. The Mayors of the five cities in the State, four Democrats and one Republican, were re-elected. Miller, the Democratic Mayor of Providence, is re-elected by an increased plurality. The Republicans elected their Mayor in Woonsocket.

MARYLAND.

Baltimore, Md.—The indications on the morning after election are that the Democrats have not only carried the Legislature, but have elected Warfield Governor by a plurality of 5000. Baltimore went Democratic by 4000. Incomplete returns from the counties indicate Democratic gains. Kent went Democratic by about 100, Hartford 200, Howard 500, Anne Arundel 100. A Democrat will probably succeed McComas in the United States Senate. All reports up to midnight from scattering precincts in the city show that Warfield, the Democratic candidate for Governor, will carry the city by about 4000 majority. The reports from these precincts are from Democratic strongholds and a large number of ballots were thrown out on account of defectiveness.

PENNSYLVANIA.

Philadelphia, Pa.—Estimates from the sixty-seven counties of the State indicate a plurality for Mathews (Rep.) for State Treasurer, of 217,784. Snyder, for Auditor General, and Morrison and Henderson, for Judges of the Superior Court, received approximately the same immense pluralities. Snyder, who became the object of criticism because as a State Senator he voted for what is popularly known as the "Press Muzzle" law, was apparently cut very little. The returns indicate Republican gains in forty-nine counties, and Democratic gains in the remaining eighteen counties. It is apparent from the nature of the estimates received during the night that the official count will increase the Republican plurality to such an extent that it may exceed 200,000.

IOWA.

Des Moines, Iowa.—Returns from thirty-eight precincts in Iowa at 9 o'clock give a net Democratic gain of 682, establishing a ratio of gain of twenty-one per cent. Should this be maintained, Governor Cummins' plurality will be 50,000, or less than forty per cent. of what it was two years ago. The voting was light, but was full as heavy as was expected. Republicans attribute the falling off in their plurality to a factional fight against Cummins, owing to his advocacy of tariff reform. Polk County, Cummins' home, shows even a heavier percentage of loss than precincts from other parts of the State. Governor Cummins has been re-elected by approximately 40,000 plurality. Republicans, at 11 o'clock, estimated their plurality at 53,000, while the Democrats said that it would not exceed 8000. They regard this as a great victory for Sullivan, their nominee. Cummins' plurality two years ago was 83,000.

KENTUCKY.

Frankfort, Ky.—Returns here indicate Governor Beckham's re-election by from 18,000 to 20,000 plurality and the election of seventy Democratic members of the House, against thirty Republicans. The Senate will be composed of twenty-three Democrats and fifteen Republicans. Governor Beckham's election will be contested by Colonel Morris Belknap, the Republican nominee, on the ground of ineligibility. The State constitution provides that State officers may not be re-elected. Governor Beckham, however, was chosen to fill an unexpired term.

CONNECTICUT.

Bridgeport, Conn.—Denis Mulvihill, the stoker Mayor, was re-elected for another term of two years by a majority estimated at 2000. Last year he had 3000. The Democrats swept the city.

Ansonia, Conn.—Mayor Stephen Charters, the labor Mayor of the city, was re-elected by a greatly reduced majority. City Treasurer Henry Jordan was re-elected by 40 votes. These are the only members of the labor union administration re-elected. The Republicans elect all the other city officials.

VIRGINIA.

Richmond, Va.—The election in Virginia, which was for members of Assembly, resulted in a Democratic sweep of the State. There were few contests, the field, as a rule, being left open to the Democrats. Two surprises appear, however, in the defeat of the Democratic nominees in Botetourt and Fredericksburg. The vote generally was light, being only about twenty-five per cent. of the registration.

COLORADO.

Denver, Col.—With nearly full returns from this city and scattering returns from the State, there seems little doubt of the re-election of John Campbell (Rep.) for Judge of the Supreme Court. No other office was filled at this election. The vote has been light throughout the State and returns are incomplete. The News (Dem.) concedes the election of Campbell.

MISSISSIPPI.

Jackson, Miss.—The vote in the State was light. The Democratic ticket, headed by J. K. Vardaman for Governor, was elected, there being no opposition.

NEBRASKA.

Omaha, Neb.—Judge Barnes (Rep.) is elected Supreme Judge over Judge Sullivan (Dem.), the present incumbent, by a plurality that may reach 8000. The rest of the Republican State ticket is elected by 10,000. Barnes running considerably behind the other candidates. These figures were conceded by the Democrats.

CALIFORNIA.

San Francisco, Cal.—Incomplete returns indicate that Mayor Schmitz, candidate of the Union Labor party, has probably been re-elected. His opponents are Crocker, Republican, and Lane, Democrat. Crocker is running ahead of Lane.

UTAH.

Salt Lake, Utah.—Incomplete returns show heavy Democratic gains and indicate the election of Morris, Democrat, for Mayor.

PANAMA IN REVOLUTION.

Isthmus Declares Independence From Colombia and Proclaims Republic.

Panama, Colombia.—The revolution which has been quietly planned since the rejection of the canal treaty by the Colombia Congress broke out when the independence of the Isthmus was proclaimed. A large crowd, made up of all political parties, marched to the headquarters of the Government troops, where Generals Tovar and Amaya were imprisoned in the name of the Republic of Panama. No resistance was made.

The enthusiasm of the people was immense, and at least 3000 of the men in the crowd which made the Colombian officers prisoners were heavily armed.

The battalion of Colombian troops at Panama favors the movement, which is also thought to meet with the approval of at least two of the Government transports.

Should the revolution succeed the way will be open for renewed negotiations with the United States for the canal, which the residents of the Department of Panama heartily favor.

LYNCHEHAUN TO STAY HERE.

Federal Commissioner Says the Irish Fugitive Can Not Be Extradited.

Indianapolis, Ind.—The most important extradition case that ever came up in this State was decided adversely to Great Britain, when United States Commissioner Charles Morris refused to deliver up to the Government of England the noted Irish fugitive, James Lynchehaun.

The Commissioner's decision upholds the contention that Lynchehaun's crime was of a political nature and that, therefore, the case is not one in which extradition is possible.

Drunkard Kills His Mother.

In a fit of drunken rage Frederick D. Putnam, a clerk in a Brooklyn law office, knocked his aged mother down in front of their home and then kicked her to death. He is held on a charge of murder. Putnam had been drinking heavily for several days. He is thirty-seven years old and a colored man. He has been in his position in the law office for a number of years and was considered a competent clerk.

Naval Training Stations in Canada.

It is announced that the Canadian Government has decided to establish three naval training stations in Canada, at Halifax, Montreal and Kingston.

The President Votes at Oyster Bay.

President Roosevelt made a flying trip from Washington to Oyster Bay, L. I., cast his ballot and immediately went back.

Negotiations Progressing.

The negotiations for the settlement of differences between Russia and Japan were reported to be going forward without a hitch.

NAVAL ARSENAL WRECKED

Fatal Explosion Demolished Iona Powder Station in Hudson River.

THE LOSS EXCEEDS $2,000,000

Six Men Killed, Ten Wounded and Buildings Shattered Into Fragments—Shells Pierce Walls and Shock Felt Twelve Miles Away—Stones and Bricks Hurled Far Out Into the River.

Peekskill, N. Y.—Six men were blown to pieces and ten were injured in an explosion which reduced to an almost total wreck the United States Naval Arsenal on Iona Island, in the Hudson River, three miles from this place.

The first of a series of explosions occurred in one of the shell houses on the island, where six men were engaged in drawing explosive charges from a consignment of old shells recently removed from the battleship Massachusetts. Four massive shell houses, built of brick and stone, were blown into the air. The barrack building of the Marine Guard was almost completely demolished. A stable building was wrecked and cousumed by flames, and every building on the island was wrecked and consumed by flames, and every building on the island was riddled with projectiles that were hurled in every direction.

The force of the explosions broke windows and did other damage in this city, Haverstraw, West Point, Highland Falls, and even caused the falling of a wall in an elevator building at Ossining, eight miles away.

The dead, all of whom were workmen employed by the Naval Ordnance Department, were: Frederick Brown, Haverstraw; Patrick Curran, Haverstraw; George Moorehead, Tomkins Cove; James Conolly, Peekskill; Frederick Locke, Peekskill; Frederick Ward, Stony Point.

The more seriously injured are Otto Fries, Chief Gunner, who was in charge of the arsenal; Frederick Anderson, a magazine tender employed at the arsenal, and Gunner Frank Kerwin, of the battleship Massachusetts.

Iona Island, which has been used by the Government for about two years, is an oblong piece of land running north and south in the Hudson River, and cut off from the west shore by a bit of swamp land which gave it the name of an island. The West Shore Railroad at the southern end is trestled across to the island and runs along its western side.

The arsenal, which lies between the railroad and the main channel of the river, consists of four brick and stone shell-houses, 300 feet long and thirty feet wide, arranged in pairs, 120 feet apart, and numbered from one to four. About 150 feet to the southwest of the western pair of shell houses is the marine barracks, a two-story structure. The entire station is the largest naval arsenal in the world.

No one will ever be able to tell exactly how the accident occurred, for all those who were near are dead, but it was known just what they were doing, and it is said that they were engaged in unscrewing the base plug from a thirteen-inch shell. The plug was rusty and stuck fast.

So great was the force of the explosion that whole kegs of powder were thrown many hundreds of yards without exploding. Every piece of glass in every building on the island had been instantly shattered by the first explosion, and the second blew in a portion of the marine barracks building several hundred feet away. Many of the workmen employed on the island became panic-stricken and made a wild dash for the railroad trestle leading to the main land.

The second explosion was followed by great bursts of flame in various adjoining structures, and as the debris flared up the hundreds of shells buried under the fire began to burst.

The cost of some of the buildings was as much as $50,000 each. A few of them were empty, but the others were filled with old powder and various magazine stores unloaded from ships going out of commission. The most recent unloading was that of the cruiser Columbia, which soon is to go out of commission.

Other stores on the island consisted of lignite, dynamite, cordite, millinite, lyddite and gun cotton. There has been great care taken, it is said, to prevent accident. A red flag of danger was always hoisted over the island. Thermometers were placed in each structure and their records taken frequently to keep track of possible chemical changes.

PANAMA SHELLED.

Colombian Gunboat Bogota Fires on Rebels in Captured City.

Colon, Colombia.—The city of Panama is completely in the hands of the revolutionists, and no serious attempt has been made to recapture it. The Colombian gunboat Bogota, which arrived in the harbor after the declaration of independence, threw a few shells into the city, but without damage to property. One Chinaman was killed.

Commander Hubbard, of the United States gunboat Nashville, notified the prefect of Colon and the Panama Railroad officials that no troops from either end of the Isthmus would be allowed transportation on the railroad.

Lieutenant A. M. Beecher Killed.

Lieutenant Albert M. Beecher, of the battleship Maine, was killed at Newport, R. I., by falling from the forward turret of the battleship down a hatch for forty feet.

Millionaire Philanthropist Dead.

George T. Hoagland, a millionaire philanthropist, is dead at his home in St. Joseph, Mo., aged ninety. Mr. Hoagland gave liberally to charities and to Methodist educational institutions.

Earthquake Kills 350.

A terrible earthquake has practically demolished the town of Turshiz, Persia. Three hundred and fifty of the inhabitants were killed and many injured. One hundred and eighty-four carpet factories were destroyed.

FOOTBALL PLAYERS KILLED

Sixteen Crushed to Death at Indianapolis in a Collision.

PURDUE'S ELEVEN DECIMATED

Purdue University Special Hits a Switch Engine Head-On—Seven Players, Two Assistant Coaches and a Trainer Killed Outright—Fifty Persons Hurt—The Game Abandoned and Team Disbanded

Indianapolis, Ind.—Running at the rate of thirty miles an hour, a Big Four special train of six coaches, loaded with students of Purdue University, including the football team, was wrecked just inside the city limits by coming into collision with a switch engine hauling a train of coal cars. Fifteen persons were killed outright and fifty were injured, some of them so seriously that there is no hope of their recovery.

There were 934 students and spectators on the train, and the football team, which was scheduled for a game with the Indiana University team here, was in the forward car, and four players, three substitute players, two assistant coaches and one trainer were killed outright, and five members of the team were seriously and several slightly injured. The train was a special, made up at Lafayette, and, with few exceptions, all the passengers were Purdue students.

Many of those killed and severely injured were among the best men on the team, and there will be no effort to reorganize it this year. The Indiana University team came in a few minutes after the wreck occurred and assisted in the work of rescue and in caring for the injured. President Stone, of Purdue, was on the train, but was not injured.

The trains came together with a great crash, which wrecked three of the passenger coaches, in addition to the engine and tender of the special train and two or three of the coal cars. The first coach on the special train was reduced to splinters.

The second coach was thrown down a fifteen-foot embankment into the gravel pit, and the third coach was thrown from the track to the west side and badly wrecked. The coal cars plowed their way into the engine and demolished it completely. The coal tender was tossed to the side and turned over.

A wild effort on the part of the imprisoned passengers to escape from the wrecked car followed the crash. Immediately following the wreck the students and the others turned their attention to the work of rescuing the injured, and by the time the first ambulances arrived many of the dead and suffering young men had been carried out and placed on the grass on both sides of the track.

The dead were removed last. Several [illegible] to remove [illegible] from the mangled cars, [illegible] service and the dead were carried away as fast as they could be taken from the wreck.

Many of the bodies were so mangled that they could be identified only by letters and other paper in the clothing. The cause of the accident has not been explained. The engineers of both trains say they had the right of way and were proceeding without knowledge that another train was on the track. There is a sharp curve where the wreck occurred, and many freight cars were standing on the side tracks, obscuring the view.

The following were taken from the wreck dead: W. H. Grube, substitute player, Butler, Ind.; Walter Furr, member of the team; E. C. Robertson, assistant coach; Walter Roush, substitute, Pittsburg; R. J. Powell, Corpus Christi, Texas; W. D. Hamilton, centre rush, Lafayette; Walter Robertson; Gabriel S. Drollinger, beheaded; Sam Squibb, Lafayette; Jay Hamilton, substitute player, Huntington, Ind.; N. R. Howard, Lafayette; Patrick McClair, assistant coach, Chicago; Samuel Truitt, player, Noblesville; G. L. Shaw, Lafayette; W. S. McMillon, Indianapolis.

William Bailey, of New Richmond, Ind., substitute player on the Purdue University football team, died on the afternoon after the accident from internal injuries received in the Big Four wreck. This is the sixteenth death.

Boston, Mass.—Cutts, the football coach, injured in the train wreck near Indianapolis, is Oliver Cutts, the Harvard player about whom there was such fuss two years ago.

FUNERAL PARTY KILLED BY A TRAIN.

Three Men, a Woman and a Coffined Body Ground Under Wheels.

Charlotte, N. C.—Three men and a woman, riding in a wagon in which there was a coffin containing the body of Mrs. Kate Lewis, on the way to interment, were struck by an express train on the Southern Railway six miles north of Concord. The occupants of the wagon—Mrs. Lulu Townsend, John Key, Benjamin Tippet and Daniel Weaver—were instantly killed, their bodies, as well as that of Mrs. Lewis being ground to fragments.

The wagon was proceeding, drawn by two mules, on a road alongside the railroad track. As the locomotive reached with a few yards of the wagon the mules became frightened and bolted fairly in front of it.

Cost of Army Maneuvres, $350,000.

The army maneuvres just finished at Omaha, Neb., cost the Government $350,000, according to reports of army officers made on request of Major-General Bates.

Quit Pulpit For Business.

Because he believes that the ministry would not make a sufficient provision for the support of himself and family when old age shall have overtaken him, the Rev. J. A. Johnson, pastor of the Birmingham Methodist Protestant Church, at Pittsburg, has laid aside the work of the church and entered upon a business life. He believes that a man's ability in his useful days should be employer to provide for his family, and that this is a feature overlooked by the church.

CONEY ISLAN

Fourteen Blocks a Destroyed at I

NOTORIOUS BOW

Five Hundred Per Loss Estimated at city of Water Giv struction — Many Up in the Flames

New York City.—swept by a fire w destroyed property about $1,000,000, homeless and enti acres of dives, cl rants, dance halls characteristic Co which lined the Bo blocks and extended the surf line of the sea.

The region destroyed w the same as that which wa 1896, except that this time left in ashes is much larger than at the former fire.

Five persons were injured—only one mortally. He was Albert Rubein, proprietor of the Silver Dollar Pavilion.

The fire started in a vacant building known as the Hippodrome, adjoining Tice's Albatross Hotel. It spread so swiftly that soon not only the Hippodrome, but Tice's hotel was blazing fiercely.

Both of these buildings are on Tilyou's walk and close to the large structures of Steeplechase Park. There was a light wind blowing at the time almost directly from the west, and the sparks and flames were carried along in a line parallel with Surf avenue and seemed to threaten the destruction of the mile or more of buildings in front of them.

The buildings at Steeplechase Park were scorched by the heat, and several times burst into flames, which, however were quickly subdued by the fire apparatus which is a part of the park's equipment.

From Tilyou's walk and the Bowery the fire worked its way diagonally in a northeasterly direction toward Surf avenue, which it reached at Schreiber's walk. From there it went ward along the south side of Surf nue to Stratton's walk, Henderson walk, and finally to Thompson's, where it was held in check by a heavy brick wall of Henderson's ing pavilion.

Explosions followed one another at short intervals, increasing the danger as well as the difficulty of fighting the fire. They were caused by the bursting of branch gas mains, gasoline tanks, siphons for charging beer kegs and kindred devices. Small stocks of cartridges in rifle galleries went off, the slugs darting in all directions.

Stauch's and Henderson's were the only brick buildings in the burned zone. Henderson's Theatre, [illegible] ate, cafe, [illegible] restaurant, [illegible] bar [illegible] the year. [illegible] $125,000. Stauch's, [illegible] vative estimate, was valued at $90,000.

There was a heavy handicap at the start. Coney Island gets its supply of water from a pumping station at Daly's lane, behind Sheepshead Bay, where there are many sunken wells. When Coney Island became a part of New York some of this water was diverted to Flatbush and elsewhere, leaving a supply utterly inadequate.

It is estimated that besides these larger buildings there were on each of the fourteen blocks, eighteen smaller buildings, making 252 buildings in all that were destroyed. The average value of the smaller buildings was about $2000. This would bring the total loss on the smaller buildings a little over $500,000.

FIRE COST TWENTY-FIVE LIVES.

Result of Thirty Minute Blaze in Overcrowded New York Tenement.

New York City.—Twenty-five persons, twenty-one men, three women and a baby, were suffocated in an early morning fire in a tenement house at 240 Eleventh avenue, between Thirty-fifth and Thirty-sixth streets.

The "House of All Nations" this particular building is called, because of the babel of mingled English, Italian, Austrian and Hungarian speech in its halls and stairways. On each of the five floors lived four families, two in front on each side of a central passageway, and two in the rear. Each of these families accommodated from three to ten boarders, and there were 150 persons in the house at the time of the fire.

One woman, who jumped from a third-story window, was fatally hurt.

As far as loss of life is concerned it was said at Police Headquarters that no more disastrous tenement house fire ever occurred in the city.

The fire was remarkable because so large a loss of life occurred in so short a period. Twenty minutes after the firemen arrived the fire was under control, and the flames could not have had more than ten minutes' headway before the alarm was sent in.

In that time more than two score persons huddled together in the crowded rooms, died just where the devouring flames and blinding smoke discovered them. It was not known until the fire was subdued that one had perished, but the firemen's short and terrific battle disclosed heartrending scenes.

Poor Arctic Whale Catch.

A vessel arriving at Onalaska reports the catch of the arctic whaling fleet up to October 21 as sixteen whales. Whalemen say the season has been the poorest in the history of bowhead whaling.

Charges Fraud.

Ex-Senator Smith, receiver of the United States Shipbuilding Company, made his report to the court, declaring the trust a swindle, and accusing Chas. M. Schwab of the deliberate purpose of wrecking it.

Tornado Tears Up Oklahoma.

Two persons were killed and nine injured by a tornado that formed three miles north of Hydro, in Caddo County, O. T. A half dozen farm houses were destroyed. The property loss is estimated at $50,000.

Tragedy at Washington.

Louis Mortfeld shot and killed his wife and committed suicide at their boarding house at Washington, D. C. Mortfeld was a paroled patient from St. Elizabeth's Hospital for the Insane, and it is believed the deed was committed because of his fear of being returned to the asylum.

War sure Next Spring.

The new diplomatic agent of Bulgaria in London says war between his country and Turkey next spring is inevitable.

Hungary Expels a Mormon Preacher.

Frank Pingre, a Mormon missionary, was arrested at Temesvar, Hungary, while addressing a meeting held for the purpose of establishing a Mormon settlement there, and a decree of expulsion from Hungary has been issued against him.

Aided Land Frauds.

Commissioner Richards, of the General Land Office, declared in his annual report that United States Commissioners aided in the perpetration of wholesale public land frauds.

New Two-Cent Stamp.

The Bureau of Engraving and Printing, at Washington, has begun to turn out the new two-cent postage stamp, which will soon be on sale everywhere. The original design of the two-cent stamp in the series of 1902 proved unsatisfactory and will be replaced by those now coming out.

Skull Crushed Over Election Dispute.

During an election discussion at Danville, Ky., William Middleton, aged twenty, struck Fountain H. Sasty with the butt of a gun, crushing his skull.

Schoolboy Commits Suicide.

Because of trouble in school at Chester, Pa., the fourteen-year-old son of A. Manor, a township farmer, committed suicide upon returning home. His mother found him hanging in the barn.

Blanche Chessbrough Weds.

Wallace D. Scott, a Sioux Falls, S. D., lawyer, and Blanche Chessbrough, the divorced wife of Roland B. Molineux, were secretly married in Chicago, Ill. Scott represented Mrs. Molineux in her suit for divorce.

near, will not its approach be as distasteful as ever? By no means, says the doctor. Under present conditions death is like an unnatural sleep, which overtakes us early in the day—say before dinner. In the future it will come after a full meal, when the day's work is done.

An Aristocracy in America?

The Impossibility of an American Aristocracy of Wealth :: :: ::

By Anna McClure Sholl

CHIEFLY upon two conditions depends an aristocracy—the continued possession and exercise of power, and the consequent unity of aims and ideals. The aristocratic body in England, for instance, is self-conscious; its members are united by mutual understanding. They acknowledge certain well-recognized laws of life and manners. They depend upon each other to uphold these laws. Individually, wealthy Americans may be both self-conscious and self-assertive, but collectively they are antagonistic to one another. The accumulation of wealth implies struggle, and struggle does not bring forth the kind of qualities which make the gentle and stately men and women of Van Dyck's canvases one great family.

One of the greatest perils of the republic, and one reason why a genuine American aristocracy can never be formed is that a strong class has arisen, without its strength being officially recognized, as in the aristocracy of rank, and certain duties and obligations toward society are imposed upon it by that recognition. For if wealthy Americans lack social unity among themselves, they lack also to a greater degree, the sense of social responsibility, that mark of a true aristocracy. The sense of his public duties, inborn in an English aristocrat, is owing, to be sure, largely to the law of primogeniture, a law which also insures to him that wealth without which the aristocratic ideal can not be perfectly enforced. He is expected to take his seat in Parliament, to give his aid in legislation, to perform certain public duties which have no connection with his own material prosperity. Another bar to unity of social aims and ideals among the wealthy is their frequent lack of genuine culture. To know rather than to feel is the aim, and ideals are not born of knowledge alone. The culture which implies courtesy and humanity—those aristocratic essentials,—is too often lacking.

If this unity of social ideals upon which an aristocracy largely depends [illegible] exist, is it likely to be evolved out of the present conditions? Its evolution would depend largely upon the permanent power of one class, exercised in the right direction. But though the second condition may be possible, the first can never be. Under conditions peculiar to American life, great fortunes are constantly changing hands. Accumulated by the fathers, they are squandered by the sons, or divided among many children, or lost through mismanagement or speculation. The aristocracy of wealth constantly endangers its position by its very style of living, making large demands on even large fortunes. The law of decay, which eventually protects society from power of whatever nature, operates to disperse wealth so that the powerful class can not be the permanent class, can not therefore form an an aristocracy. It is the safeguard of the aristocracy of rank that its power is mystical as well as material; can never, therefore, wholly perish. Another bar to unity and permanency in the wealthy class is the constant inundation of newcomers. Into the rose-lighted drawing-room may stride at any moment a breezy Westerner, or a member of the first generation, his riches raw upon him.—McClure's Magazine.

The Care of Children's Eyes

By D. T. Marshall, M. D.

ORIGINAL research in a large eye clinic has proved to me that many parents, even of fair intelligence, are extremely negligent of the eyes of their children.

Either from some congenital defect of the inner eye, or from the presence of squint and the consequent inability to fix both eyes upon an object, the work is thrown upon the better eye, and the poorer eye gradually becomes less capable from mere disuse. It would be well for parents to test the vision of their children by covering first one eye and then the other with a small card or book, and asking them to read some sign or describe some object at a convenient distance. It is often a matter of great surprise for one to find that a child sees very little with one of his eyes. If children having such eyes are fitted with suitable glasses when young, the vision of the poor eye may be made equal to that of the other, and by use become stronger instead of weaker. Children with squint can often be cured without operation by wearing proper glasses.

Very often defects in vision in children are noticed only when they are sent to school. The teacher notices that the child cannot see the blackboard, and so notifies the parents of a defect, which they themselves might have easily observed had they ever given the matter any attention. Since the large influx of Russians, Hungarians and the inhabitants of Southeastern Europe and Syria to this country, there has been, especially in New York, a very large increase in the number of cases of granulated eyelids, or trachoma.

This is a contagious disease which is characterized by the growth on the inside of the eyelids of small granules as large as pin-heads, or larger, which look very much like grains of pearl sago after they have been soaked in water. In some cases this disease gives rise to no symptoms, but in most cases there is sooner or later redness, and sensitiveness to light. Later on there may be clouding of the cornea (the tranparent part of the eyeball), extreme sensitiveness to light, and in extreme cases blindness. Even when the disease gives rise to no symptoms, later in life it may cause a contraction of the inner surfaces of the lids, which causes the eyelashes to turn in and rub on the eyeball, thus giving rise to great discomfort and loss of good vision.

The method of exposing the inner surface of the eyelid is very simple. For the lower lid, the most common seat of trachoma, simply put the finger on the lower edge of the lid, and pull down, at the same time telling the child to look up. To examine the upper lid, take hold of the eyelashes with the thumb and forefinger of one hand, and with the other hand gently press a pencil-point or the edge of a card against the fold above the stiff part of the lid, and fold the lid backward, at the same time telling the child to look down. The eyelids turn back with a snap. It does not hurt. If the inside of the lid is not smooth and clear, the child had better be taken to an oculist for examination. The above method of turning the lid is useful when one is called upon to remove a foreign body from the eye. Cinders and grains of sand do get into the eye, and it is not always convenient to get a doctor to take them out. Turn the lid back, and with a toothpick or hairpin, around the end of which a bit of cotton has been smoothly wound, gently wipe out the offending object. If you have no cotton at hand, wet the end of a toothpick and crush it up, thus forming a kind of brush.

Grains of sand and cinders which are lodged in the cornea are more serious, and usually have to be removed under cocaine influence by an experienced oculist.—Woman's Home Companion.

A BOY MAY DRAW CORRECTLY BY USING A PANE OF GLASS

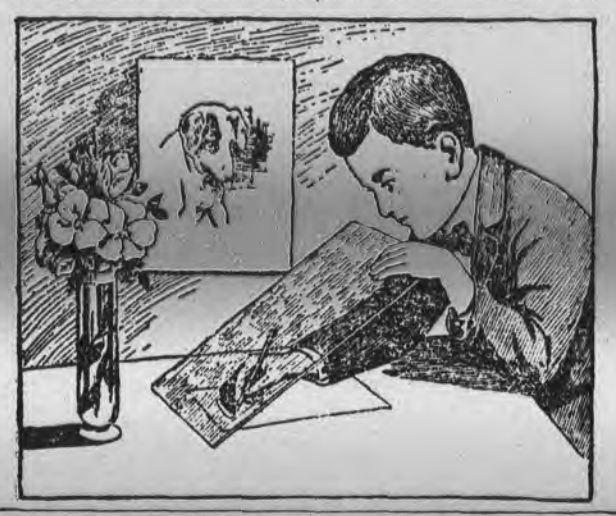
With a Little Practice One Is Enabled to Obtain a Perfect Perspective.

To get a correct drawing of a landscape, or of other objects, in the right perspective, hold a pane of glass over the drawing paper, which must lie on the table, or be fastened to the drawing board.

Hold the glass in a slanting way so that the lower edge of the pane rests on the table or ordinary board, while the other edge slants toward you so that it is close to your chin.

Looking perpendicularly down on the paper through the pane of glass, you will see the landscape or other object reflected in the glass and it will be easy to draw the outlines of your object on the paper.

The only difference is that the picture appears upside down, but with a little practice you will be able to get a drawing which is absolutely correct in regard to perspective.



THE CHIPMUNK AT HOME.

The little chipmunk, which we see scampering along the stone walls everywhere, is one of the very prettiest of our four-footed animals. By reason of his beautiful markings of black, buff and chestnut he is sometimes called the painted squirrel, and because he seldom leaves the ground for the trees he is also known as the ground squirrel. He is one of the most provident of animals, spending most of the autumn in storing away food to last him through the winter. First of all, though, he digs a long, winding tunnel in the earth, with several short branches, which he uses as storerooms. Into these he carries nuts of all kinds, wheat, buckwheat, grass seed and any other available food which will keep. He carries these things, a few at a time, in two pouches—one in each cheek—and when you see him homeward bound on an autumn morning, you will notice that his face looks very much swollen. Watch him a little while and you will see him enter his burrow by a small round hole, close to an old stump, perhaps. In a few moments he will have stored his load of provisions, and will reappear at the doorway with the swelling all gone from his face.

When the weather becomes cold in November, the chipmunk retires to his well stocked burrow and sleeps away a large part of the winter, waking up at intervals to stretch his limbs and to sample the good things he spent so much time in gathering. When the warm days toward the close of February herald the approach of spring, the little ground squirrel comes to the door of his home to sniff the fresh air and to warm himself in the strengthening sunlight.—Woman's Home Companion.

CATAPULT.

To make a catapult from an old pen first break off the points and then

stick it into a piece of wood. Use one of the points for a spring, as shown in the illustration, and you will have a catapult that will throw peas or small wads of paper.

STORIES FOR LITTLE PEOPLE.

Once upon a time there was a little boy named Ned, who always cried because he could not have everything he asked for. As he was two years old, do you not think he was too big to act in that way? Well, one day he saw a man with an ax, and he cried for that. "But you cannot use it," said the man. "It is too big for a little boy like you." "I want it," cried Ned. "Give it to me." And so the man left the ax and went away. Next day he came back and said: "Will you let me have my ax? I want to chop some wood to make a fire." "Yes," said Ned. Then the man said: "Thank you," and he told Ned a story about a big, big boy who lived with his mamma in a forest. "What did the boy do?" asked Ned. "He cut down trees," said the man, "and he took care of his mamma and his baby sister." "Did the baby cry?" asked Ned. "Oh, no," said the man. "You see, the baby wanted to save all her strength so she could laugh just like the fairies. Sometimes little boys forget how to laugh if they cry too much." "Did the big, big boy cry?" asked Ned. "Oh, no," said the man. "You see, he wanted to be strong, too; so he always kept still. Why, sometimes when he laughed he was so merry that all the birds began to sing. And if you will laugh and not cry you will be happy, too, and your mamma will sing." "And I will be a big, big boy some day?" asked Ned. "Oh, yes, if you don't cry," said the man. And then the man said "Good-by" and went away.—Brooklyn Eagle.

A JAPANESE FLYER.

A very simple flying machine can be made from a piece of cigar box wood. Cut a ruler-like strip of wood, and bore

exactly in its centre a small hole the size of a slate pencil. On one-half of the strip the right, on the other half the left side is filed down to a knife-like edge (see illustration). Cut a round stick of wood about the length and thickness of a penholder and insert it from below into the hole of the flyer. The illustration to the right shows how the stick of wood is brought to a whirling motion, causing the flyer to mount high into the air.

SEA BIRDS AND STORMS.

While wild duck have been unusually forward this year, it is equally true that most of the sea birds nesting along the coast have been peculiarly backward. There has also been a good deal of infant mortality among those kinds that have the habit of leading their young to the sea as soon as they are hatched. If the seas are heavy when this occurs numbers of them still feeble in their power of swimming are overwhelmed and thrown on the shore with a fatal violence. Their loss will not be regretted by the sea fishermen, who have been complaining more than a little of late years of the injury to fishing done by the immense numbers of some kinds, such as the shag, that are entirely fish eaters.—Country Life.

DUCKS AS PETS.

Very few boys keep ducks as pets, though a good many keep them for profit. Yet there is no bird more easily tamed, especially if cared for and fed constantly by the same person. Ducks are quick-witted birds, and can be trained to follow their master like a dog and do all kinds of tricks.

THE VALUE OF SALT.

An Article Much Thought of by Ancients and Moderns.

The manner in which that humble but indispensable commodity salt is dealt with it the People's Friend reminds one of the French saying that the civilization of a people can be estimated by its consumption of soap and salt. After pointing out that salt is now an absolutely necessity as an ingredient to any food we take, the People's Friend goes on to say:

"But it is not in food alone that salt was valued by the ancients. Among them a salt spring was regarded as a gift from the gods, and any salt found in the soil lent it a peculiar sanctity, and made it a place where prayers were most readily heard. Every meal that included salt had a certain sacred character, creating a bond of piety and friendship between host and guest; hence the expression, 'There is salt between us, meaning friendship, and to be 'untrue to salt' means to be disloyal or ungrateful. The numerous references in the Bible to salt indicate that the sacred writers attached much importance to it as a symbol of something that was of great value. Roman Catholics also believe that there is some virtue in salt, as it is used by them in baptism. They consider it a symbol of wisdom, and put a few grains in the mouth of the person baptized."

It is also interesting to recall that in Russia it is a universal custom for presents of "bread and salt" (which, however, often take the shape of rare and costly articles) to be given by their friends after a change of abode, or on the arrival in their home of a newly married couple.

WISE WORDS.

Be ignorance thy choice where knowledge leads to woe.—Beattie.

Hard workers are usually honest; industry lifts them above temptation.—Bovee.

He who commits injustice is ever more wretched than he who suffers it.—Plato.

Land mortgaged may return, but honesty once pawned is ne'er redeemed.—Middleton.

If there be a crime of deeper dye than all the guilty train of human vices it is ingratitude.—Brooke.

Do not allow idleness to deceive you, for while you give him to-day he steals to-morrow from you.—Croquill.

The best portions of a good man's life is his little nameless, unremembered acts of kindness and of love.—Wordsworth.

In life it is difficult to say who do you the most mischief—enemies with the worst intention or friends with the best.—Colton.

The greatest of all human benefits, that at least, without which no other benefit can be truly enjoyed, is independence.—Park Goodwin.

The essence of chivalry is to look out for the little ones. Whenever a child can be helped, wherever a stranger can be guided, or a friend who is shy be set at ease, wherever a weak brother can be saved from falling and its shame, wherever an old man's step can be made easy, wherever a servant's position can be dignified in his eyes, is the chance of chivalry to show itself.—W. C. Gannett.

We might see so much more beauty if we willed it. We might cause many unknown feelings to flower of we were not in such a hurry to feel strong ones. We miss in the swing of excitement many opportunities of giving sympathy in little things to those we love, which, if they had been used, would have added finer fancies, subtler and sweeter shades, to our power of feeling.—Stopford A. Brooke.

Lamps.

Lamps do not necessarily give light. If they furnish well, 'tis all we ask. They must be very, very beautiful.

A lamp that does not harmonize with other furnishings is an eyesore.

Bent glass has seemingly been an inspiration to the designers.

Filigree brass is one of the most effective materials noted.

Bead fringe, narrow or wide, borders shades of glass or metal.

Jeweled effects are so gorgeous as to recall old fairy tales.

Crystal lamps with glistening pendants are the choice for Colonial furnishing.

Colors were never more magnificent, and they are used to sumptuous advantage in the bent glass.

Cabochons rival the "gems" that seem to have been cut out with an axe.

Darkest emerald, ruby and sapphire vie with delicate opalescent shadings.

Goats to Kill Snakes.

That useful animal, the goat, is being put to a new use on a farm ten miles northwest of Columbia. A carload of them was turned loose on a piece of ground on the Branham-Hearn farm for the purpose of exterminating rattlesnakes. The plot of ground is thickly covered with undergrowth and there are so many rattlesnakes on it that workmen are afraid to enter it to clear it up. Goats were suggested, and Hewitt Brothers, the proprietors of the farm, ordered a carload at once. The experiment is being watched with much interest. Goats on the State farm at Columbia have proved their efficiency in the clearing of thickly covered ground, but some doubt if they will be able to exterminate the snakes as well.—Kansas City Times.

Courtesy Like Flowers.

All the best things of the garden suggest refinement and courtesy. Nature might have contented herself with producing seeds only, but she accompanies the prosaic action with fragrant flowers and delicious fruit. It would be well to remember this in the ordinary courtesies of life.—E. P. Roe.

North Plainfield Weekly Review.

Founded March 24, 1900.

An Independent Republican Newspaper published every Saturday at 33 Somerset Street, North Plainfield, N. J.

HARRY H. WEBB, Editor and Proprietor.

TERMS OF SUBSCRIPTION.

If paid in advance $1 per year; if not paid in advance $1.25 per year. The REVIEW is delivered by carrier in Plainfield and North Plainfield, and is on sale at news stands

Long distance and local telephone 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, NOVEMBER 7, 1903.

THE RESULT IN SOMERSET.

Of the three candidates voted for at Tuesday's election, the Republicans secured two and the Democrats one.

Samuel S. Swackhamer, the successful candidate for Assemblyman on the Democrat ticket owes his re-election to his Republican friends, and he properly appreciates the fact.

There never was any doubt of his re-election from the day he was nominated; it was only the majority that was questioned.

In selecting A. G. Anderson for County Clerk, no better choice could have been made. Mr. Anderson will make a good and efficient Clerk.

W. Howard Toms, the successful candidate for Coroner on the Republican ticket, will now have an opportunity of qualifying and thus be rewarded for his hard luck of a year ago when he was elected to the same office, it afterwards transpiring that no vacancy existed.

It is conceded on all sides that the result of Tuesday's election is a defeat for Newton B. Smalley in the broadest acceptance of that word. He boasted openly before the election and at the convention that he would guarantee from two hundred to four hundred majority for Dolliver in North Plainfield, and he worked to that end. But the people suspected that the Mayor had ulterior motives in boosting Dolliver, and they were extremely suspicious of his every movement.

It is no reflection on Mr. Dolliver, the Republican candidate for Assembleman, that he lost this first political battle. Mr. Dolliver's character is of the highest, his talents are unquestioned, but he was everywhere recognized as Mayor Smalley's candidate, and this, coupled with his youth, made his defeat certain. He will be none the worse off for his defeat, but, on the contrary, a gainer, as the future will disclose.

The fact that not a prominent Republican here in the borough who took any part against the annexation movement knew that Mr. Dolliver was to be a candidate for the Assembly until Mr. Smalley brought out the fact on the morning of the convention, aroused suspicion, and later on when Mr. Dolliver refused to come out flat-footed against annexation, the question arose as to whether the "Harmony" bridge was not another plan to still further the annexation scheme. Therefore the majority of the people of North Plainfield with questionable faith in the "Harmony" bridge preferred to send back to the Assembly the man who had faithfully and conscientiously served them before.

We believe that Mr. Dolliver has a bright future before him. He has the ability and the character, backed up by an old and well-known family name celebrated for honesty and other attributes, and as soon as a few more years are added to his life to enrich him with that experience so necessary for all public men to possess, he will be heard from on the winning side.

LET WELL ENOUGH ALONE.

The North Plainfield Board of Education at a meeting held last week, passed a resolution asking for a transfer of our High School to Plainfield. This resolution was voted upon at a meeting held the previous week and the vote was then a tie.

The resolution was referred to the Plainfield Board of Education, at the regular meeting Monday evening. No action will be taken upon it, however, by that body until work has actually begun on the new City high school building. The President of the Board is reported to have said that it was possible that the new building might not be more than adequate for the city's own needs. It is expected that work on the new building will not be started until next spring.

It seems the only reason set forth by those in favor of doing away with the High School is based upon a question of economy. But will it prove a money-saving scheme? In the first place the originators of the scheme claim that by sending the High School pupils over to Plainfield the crowded condition in our schools will be overcome, and yet the president of the Board, Mr. Joy, acknowledged that in either event another school building must soon be erected here. So whether the pupils are sent to Plainfield or not, the expense of a new school building must be met.

Then again the Board of Education now receives over two thousand dollars a year from the State to be applied on the expenses of the High School. This is more than fifty per cent of the cost of conducting the school, the amount being based upon the average attendance. Should the High School pupils be transferred to Plainfield this sum would be immediately cut off and unless Plainfield received the pupils from here at a much lower rate than it receives from Dunellen, Scotch Plains, Fanwood and other neighboring towns, it would cost us more to send our pupils there than does our present system of conducting the schools.

By a transfer of our High School pupils to Plainfield we would be cut off entirely from the State aid, which Plainfield would receive, and we would be obliged to pay Plainfield whatever amount she saw fit to charge us for each and every pupil we sent there, and, our borough children would be at the inconvenience of walking from one to three miles each way to the Plainfield school.

There is still another view to be taken of the question should Plainfield consent to educate our pupils. The population of Plainfield like that of North Plainfield is rapidly increasing, and if we give up our High School, discharge our teachers, remodel our school rooms to accommodate primary pupils as planned, and thereby throw out the expensive furniture, library, apparatus, etc., etc., and in a year or so Plainfield finds that it could not accommodate its own children, where would North Plainfield stand?

No thinking man will deny the fact that without public schools very few people would locate in the borough. People seeking homes for themselves and families, having children old enough for the High School, would naturally demand such a school before locating in a place. If such prospective citizens were to be told that we had no such school here but that our children must go to Plainfield for such advantages, the chances are such people, as well as those having younger children, but who look ahead a few years, would locate any place but in the borough.

IT MUST be interesting to outsiders to learn that a borough of nearly six thousand people, with over a million dollars of taxable property, depends on one police officer to protect the entire borough, which embraces several square miles of territory; also to further learn that this lone officer is publicly charged with being a frequenter of drinking and card playing places much of the time when he is supposed to be on duty and that the Mayor and Council governing said borough have taken no action to discipline or even investigate the charges referred to. And what must people think of the conduct of such an officer who will stand within two or three feet of a man striking at another man on the main street of said borough and make no move to arrest the man, or even try to prevent the assault, and afterwards claim he saw no crime committed?

A NEW discovery in natural history here in the borough is creating much excitement in (un) scientific circles, namely: That a cam(pb)ell can become suddenly blind and unable to see anything two feet away, and then regain its lost sight in a few seconds. It is not known whether the whole of Somerset county has this same effect on camels, but it is thought that if taken to Somerville and subjected to a thorough test that even stranger things than the above may develop.

THE majority against the annexation scheme was 161. The majority against the recognized annexation candidate Tuesday was 141. Taking the proportion of votes cast at the two elections, the above results are just about even—plainly showing that annexation has received its second—and let us hope, its final defeat.

A CAM(PB)ELL may be quite satisfactory to "his honor," but from the demonstration made last Tuesday night here in the borough it is evident that the people demand some other kind of an animal to protect the peace and welfare of the citizens.

Somerset County Roads

NOTICE TO CONTRACTORS.

The Board of Chosen Freeholders of the County of Somerset will meet at the Court House, in Somerville, in said county, on TUESDAY, THE FIRST (1) DAY OF DECEMBER, 1903,

at ten o'clock in the forenoon, and up to eleven o'clock a. m., on said day, will receive and then and there publicly open and read, bids for macadamizing three roads in said county, as follows:

No. 1, extension of Mountain avenue from Washington Drive in borough of Bound Brook northerly through Bridgewater township to Warren township line, a distance of 7,285 feet or 1 38-100 miles. For this road two bids are asked, one for 8-inch macadam and one for 10-inch rock bottom.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 4,890 cubic yards of earth excavation.

Price per square yard for 11,337 square yards of 10-inch rock road complete.

Price per square yard for 11,337 square yards of 8-inch macadam road complete.

Price per lineal foot for 1,800 feet of underdrains.

Price (lump) for the construction of the whole road complete.

No. 2 begins at Blazier's Corners in Bernards township and extends southerly through Basking Ridge to Davidson's bridge over the Passaic River, the county line near Millington, a distance of 16 898 feet or 3 1-5 miles.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 8,165 cubic yards of earth excavation.

Price per square yard for 14,423 square yards of 10-inch rock road complete.

Price per square yard for 9,200 square yards of 8-inch macadam road complete.

Price per lineal foot for 1,500 feet of underdrains.

Price per cubic yard for 500 cubic yards of binding material.

Price (lump) for the construction of the whole road complete.

No. 3 begins at Far Hills in Bernards township and extends northeasterly to middle of North Branch of the Raritan River at Schomp's Mills, thence crossing Bedminster township northerly through Peapack and Gladstone to the Morris county line.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 14,655 cubic yards of earth excavation.

Price per square yard for 5,356 square yards of 10-inch rock road complete

Price per square yard for 26,208 square yards of 8-inch macadam road complete

Price per lineal foot for 8,000 feet of underdrains.

Price (lump) for the construction of the whole road complete.

No bids will be considered in which all items are not filled out.

Bids must be for complete work, including all materials.

No informal or unbalanced bids will be considered,

The price must be written in the bids and stated in figures.

Samples of trap rock to be used by the contractor, and a statement of the place where the same is obtained, must accompany each bid.

Each bid must be accompanied by the name and residence of the bidder, and with an affidavit that no person other than those mentioned is financially interested therein.

Each bid must be accompanied by a certified check of One Thousand Dollars, payable to the order of Wm. J. Logan, Director, upon condition that if the contract be awarded to the bidder, he will, when required by the Board, execute an agreement in writing to perform the work according to the specifications.

The successful bidder will be required to execute a bond with two or more sureties to the Board of Chosen Freeholders of said county in the penal sum of the estimated cost of said work within 30 days from the award, or the bid will be declared forfeited. Bidders must satisfy themselves by personal examination or otherwise, of the nature and extent of the work and shall not at any time after submission of a bid dispute or complain of errors in estimates, nor assert that there was a misunderstanding in regard to the work to be done or the materials to be furnished.

The Board reserves the right to change a portion of the road from rock to macadam, and from macadam to rock, if it seems advisable, and the price of such work so stated in the bid by the square yard to govern such work.

The right to reject any or all bids is reserved to the Board.

The maps, profiles, specifications and blank bids can be seen at the office of Henry I. Budd, State Commissioner of Roads, Trenton, N. J., and at the office of Joshua Doughty, Jr., County Engineer, Somerville, N. J.

By order of the Board of Chosen Freeholders of Somerset County.

WM. J. LOGAN, Director.

Somerville, N. J., Nov. 3, 1903.

Women Know

how to economize to pay for Life Insurance. Talk it over with your wife. If you cannot make payments in large amounts, you can pay weekly and get Industrial Insurance.

SHERIFF'S SALE
IN CHANCERY OF NEW JERSEY.

Between John D. Kirch et al., Ex'rs, etc., complainant, and Walter P. Lindsley et al., defendants.—Fi. Fa. for sale of mortgaged premises.

By virtue of the above stated writ of Fi. Fa. to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE TWENTY-THIRD (23) DAY OF NOVEMBER NEXT.

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit:

All that tract or parcel of lands and premises situate, lying and being in the township of North Plainfield, in the county of Somerset and State of New Jersey:

Beginning at a stone plan'ed for a corner in line of other lands of Elias Allen and being the southeast corner of lands this day conveyed to said Elias Allen by Aaron Allen, and running (1) thence along the line of other lands of the said Elias Allen in a magnetic course of north sixty-seven degrees and four minutes east (N. 67° 04' E.) a distance of one hundred and twenty-three and no tenths (123.0) feet to a cedar stake where formerly stood a white wood tree; (2) thence still along the line of other lands of the said Elias Allen north fifty-nine degrees and forty-three minutes east (N. 59° 43' E.), a distance of five hundred and ninety-eight and thirty-six one hundredths (598.36) feet to a stake and stone heap by a cedar tree; (3) thence along the line of lands of George Demler, crossing the valley and the valley road, north eighteen degrees and twenty-five minutes west (N. 18° 25' W.), a distance of thirteen hundred and eleven and twenty-three [illegible] (1311.23) ft to an angle point; (4) thence still along the line of la d of said Demler up the [illegible] north no degrees and forty-five minutes east (N. 0° 45' W.) a distance of two thousand and one and seventy-eight one hundredths (2001.78) feet to a point and corner; (5) thence along the line of lands of formerly Dr. Corra Osborn on the northerly side of the second mountain south eighty-nine degrees and twenty minutes west (S. 89° 20' W.), a distance of eight hundred and ninety-five and ninety-five one hundredths (895.95) feet to a stone planted for a corner in line of lands of formerly said Osborn, said stone being the northeast corner of lands this day conveyed to Elias llen by Aaron Allen. (6) thence along the line of lands this day conveyed to Elias Allen by Aaron Allen, running first over and down the mountain (through lands of the grantors), making and establishing a division line for property of Aaron and Elias Allen, south no degrees and nineteen minutes west (S. 0° 19' W.), a distance of thirteen hundred and fifty and no tenths (1350.0) feet, more or less, to a stone plant d for a corner; then second along the the edge of woods north eighty-nine degrees and forty-one minutes west (N. 89° 41' W.) three hundred and twenty-five and ninety-five one hundredths (325.95) feet to a stone placed for a corner at the north rly end of the old l ne; then third south five degrees and thirty-eight minutes east (S. 5° 38' E.) down the old lane six hundred and three and three tenths (603.3) feet to a stone planted for an angle point; in the old lane, then, fourth, south twenty-eight degrees and fifty-three minutes east (S. 28° 53' E.) across the valley road and the valley, a distance of eighteen hundred and ninety seven and thirty-seven one hundredths (1897.37) feet to the first above mentioned stone and place of beginning. Containing 76 68-100 acres, more or less.

Being the same premises conveyed to the said Walter P. Lindsley by deed of Elizabeth D. Turney (single, bearing date April 10, 1902, and recorded in Somerset County Clerk's office, in Book S No 9 of Deeds for said county, on pages 292, etc.

Dark Hair

"I have used Ayer's Hair Vigor for a great many years, and although I am past eighty years of age, yet I have not a gray hair in my head."
Geo. Yellott, Towson, Md.

We mean all that rich, dark color your hair used to have. If it's gray now, no matter; for Ayer's Hair Vigor always restores color to gray hair. Sometimes it makes the hair grow very heavy and long; and it stops falling of the hair, too.

$1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

A Lock of Napoleon's Hair.

Concerning the things which Sir Arthur Fairbairn has picked up from foreign lands, he proudly shows you a lock of the great Napoleon's hair. This valuable find is artistically framed, and contains at the back three autograph letters which establish its authenticity. The lot was acquired by Sir Arthur in a mean street in Paris for six louis. And it is one of the most peculiar of paradoxes that it stands near an exquisite tea service, each piece marked with the imperial cipher and crown, the present of the third Napoleon to Sir Arthur's father, with hard by a splendid vase, the present of Emperor William, who, with the Man of Iron by his side, avenged with Marshal Tramp in an insatiate onslaught the havoc and humiliation meted out to his fatherland by the man whose tress of hair lies before you.—M. A. P.

The Tactful Woman.

A tactful woman is a woman who can live within her income without seeming to.—Detroit Free Press.

Steam Yachts Come High.

"More than $50,000,000 is invested in the fleet of American pleasure craft, and of this total nearly $40,000,000 is in steam yachts," says Ralph D. Paine, in The World's Work. "The approximate cost of wages, maintenance, repairs and insurance may be placed at $6,000,000. The five thousand men employed about three months earn $1,500,000 while they are afloat, and to feed them costs steam yacht owners an average total of $2500 a day. It has become easier for an owner to rent a first-class steam yacht than to get a tenant for a costly summer estate, and the demand has increased so rapidly that a charter for a first-class steam yacht will command from $5,000 to $20,000 a month, exclusive of all charges for keeping the boat in commission.

"It would be an easy matter to mention twenty-five American steam yachts whose aggregate value is $10,000,000. The millionaire's standard of living has increased in the maintenance of his yacht as well as in his homes on shore, and a yachting item of $100,000 a year is included in the budget of a modern Midas. One of them said recently that he reckoned on a cost of $1000 a day as long as his yacht was in commission, and another claimed to have spent $150,000 for the maintenance of his 270-foot yacht last year."

Too Much Kitchen.

The French, the best cooks in the world, perform their entire task within the area that is often given in this country, in a house of moderate size, to the china closet alone, for the American, following his English ancestor, has fallen into the habit of giving an undue amount of importance to the kitchen or service portion of the house. The tendency reacts upon itself, and it may be that the exaggerated importance given to the servant problem in this country is less unavoidable than the ordinary housewife supposes. If she could but once be brought to consider restricting the area now given to the kitchen and the closets connected with it, might it not be found that the ordinary routine of household life would move along more easily and with less friction?—F. Chouteau Brown, in Good Housekeeping.

Mrs. L. C. Glover, Vice Pres. Milwaukee, Wis., Business Woman's Association, is another one of the million women who have been restored to health by using **Lydia E. Pinkham's Vegetable Compound.**

"DEAR MRS. PINKHAM: I was married for several years and no children blessed my home. The doctor said I had a complication of female troubles and I could not have any children unless I could be cured. He tried to cure me, but after experimenting for several months, my husband became disgusted, and one night when we noticed a testimonial of a woman who had been cured of similar trouble through the use of **Lydia E. Pinkham's Vegetable Compound,** he went out and bought a bottle for me. I used your medicine for three and one half months, improving steadily in health, and in twenty-two months a child came. I cannot fully express the joy and thankfulness that is in my heart. Our home is a different place now, as we have something to live for, and all the credit is due to **Lydia E. Pinkham's Vegetable Compound.** Yours very sincerely, MRS. L. C. GLOVER, 614 Grove St., Milwaukee, Wis." Vice President, Milwaukee Business Woman's Ass'n.

Women should not fail to profit by the experience of these two women; just as surely as they were cured of the troubles enumerated in their letters, just so certainly will Lydia E. Pinkham's Vegetable Compound cure others who suffer from womb troubles, inflammation of the ovaries, kidney troubles, nervous excitability, and nervous prostration; remember that it is Lydia E. Pinkham's Vegetable Compound that is curing women, and don't allow any druggist to sell you anything else in its place.

An Indiana Lady Tells of a Wonderful Cure:—

"DEAR MRS. PINKHAM: It is a pleasure for me to write and tell what your wonderful medicine has done for me. I was sick for three years with change of life, and my physician thought a cancerous condition of the womb. During these three years I suffered untold agony.

"I cannot find words in which to express my bad feelings. I did not expect to ever see another well day. I read some of the testimonials recomending your medicine and decided to write to you and give your treatment a trial.

"Before I had taken half a bottle of **Lydia E. Pinkham's Vegetable Compound,** I began to sleep. I have taken now six bottles and am so well I can do all kinds of work."—MRS. LIZZIE HINKLE, Salem, Ind.

If there is anything in your case about which you would like special advice, write freely to Mrs. Pinkham. She can surely help you, for no person in America can speak from a wider experience in treating female ills. Address is Lynn, Mass.; her advice is free and always helpful.

$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness. Lydia E. Pinkham Med. Co., Lynn, Mass.

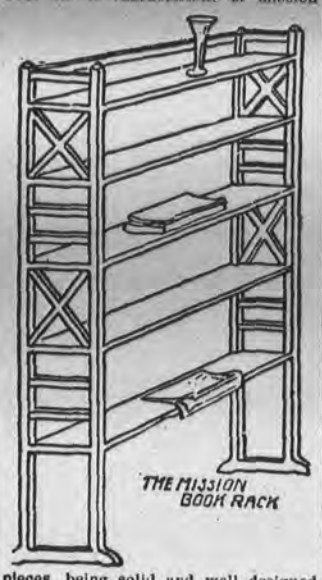
Soldiers of the Turkish Army.

A GROUP OF THE ALBANIAN REGIMENT OF THE GUARD.

The fierce fighting men of the Turkish army who may be called on to defend the Sultan and his government against the Macedonian revolutionists, or foreign invaders, as the case may be, form a bulwark not easily overthrown. The Turkish soldier is a fatalist, and fights with an enthusiasm inspired by his belief that his reward in the future life will be all the greater for having died in defending the faith.

Mission Bookrack

Though it fits right into a mission scheme of furnishing, there is nothing to prevent this mission bookrack from being utilized in any room where a bookcase is suitable. If the room be done in mission style the wood should of course be of the same sort as other pieces of furniture, the beautiful tea brown being a general favorite. Such pieces may, however, be stained in any color or to represent any wood. This one is characteristic of mission



pieces, being solid and well designed generally. It may be used as it is or it may be fitted with a rod and hangings. All this must naturally be governed by the rest of the room.

A tumbler combination lock for post-office boxes has been invented for those prone to lose their keys.

In the city of New York there are only 737,477 white persons born of native parents.

A Hidden Portrait

An important part is played by hidden pictures in politics, particularly in French politics. An example of such pictures is that shown above, the original of which was sent to the Philadelphia Record by Will Leigh, of Lahaska, Pa. The head of Napoleon is formed by the leaves in the upper righthand corner of the bunch of violets.

Perpetual Light.

A small quantity of radium salts in the Currie laboratory, where this wonderful substance was discovered, was sufficient to render the walls, the instruments, the air, radio-active. That is, the walls, the instruments, the air, gave off radiations of their own merely because radium was or had been present. Imagine the gain to mankind when a process is evolved for making those radiations luminous. Ordinarily gas or electric light would no longer be necessary. There would no longer be dark corners in the world. Everything that had felt the influence of the radium would shine, and since the energy of the salt is well-night perpetual, there would never be any need of renewing the lighting contract. —Theodore Watlers, in the September Everybody's.

Oshkosh, the Menominee Chief For Whom Was Named a Prosperous Wisconsin City

Oshkosh was the name of a Menominee chieftain who had been very kind to the settlers, and who remained so to the day of his death. His grandson, Reginald Oshkosh, a graduate of the Carlyle School of Indians, was present at the recent celebration of the fiftieth anniversary of the founding of the town and delivered an address.

The semi-centennial celebration and the agitation that has resulted from it have brought into existence a movement to remove the bones of Chief Oshkosh from the Keshena Indian reservation, where they now lie, to the city that bears his name, and above them to erect a monument.

WHY DO PLANTS HAVE THORNS?

From an Article by Ferdinand Faideau, in La Science Illustree, Paris—Condensed and Translated For Public Opinion.

The influence of the environment is very great in the formation of thorns, so great, in fact, that we frequently find that a plant in one place has thorns and a few miles away is devoid of them. Observation and experiment are in agreement in showing that three causes are in operation here, namely, impoverished soil, dryness of the atmosphere, and intensity of light, each of which provokes or accentuates the condition under discussion. In this connection it is interesting to state that cultivation diminishes the number of spines and in many instances makes them disappear after several generations.

M. Lhotelier has shown by a long series of experiments that thorny plants when submitted to the action of humidity tend to lose their spines,

THORNS OF EGLANTINE, SLOE-TREE, AND GOOSEBERRY STEMS.

the reduction taking place in two ways. In the case of spines which are produced by modified leaves or modified stems, there is a tendency to revert to the primitive type, while in those which originate in stipules—an organ unnecessary to the life of the plant—the spine diminishes and in many cases completely disappears. The partial deprivation of light also produces a more or less complete suppression of the thorns, as proved by many authenticated instances.

It thus appears that thorns are the result of insufficient nutrition, but this answer by no means exhausts the subject, for the question arises, what is the use of the thorns, and how do they benefit the plant? Grindon claimed that the thorns have no use since they are found in a large number of families different both as to form and as to needs, but there can be but little doubt that the thorn is a means of protection to the plant and that its purpose is to inspire a healthy respect in quadrupeds. The thorn protects the creatures which carry it, and where the case be that of a hedgehog or thistle, beast or bird, it allows its possessor to the more effectually defend itself. To pluck a bouquet of eglantines without tearing the clothes or wounding the fingers is an operation which requires consummate cleverness, and thus in numberless instances from the sloe-tree to the gooseberry we see that nature has made provision for these members of her family, so that they may defend the young leaves and tender buds so necessary to the continuance of their lives.

Ade's Parlor Trick.

George Ade attended recently a dinner of theatrical people in Boston. The stage folks sang song and told stories, but Mr. Ade, who is very quiet and retiring, would neither sing nor speak. He was, he said, no good at anything of that kind. Finally, though, the calls for Mr. Ade became too vehement. The young man had to yield. He rose and said:

"I will tell you an excellent trick in parlor magic. You take a tumbler and fill it two-thirds full of filtered water. Then you insert in the water a lump of sugar and a spoon and you begin to stir. In a few minutes the sugar will become invisible."

SCIENTIFIC & INDUSTRIAL

The Falls of Hobabanilla, in Cuba, are to be the source of power for use in lighting Cienfuegos and operating forty-three miles of electric railway in and near that city.

The consumption of sulphur in Mexico exceeds 1,000,000 kilogrammes annually, more than half of which is imported, although there are in various parts of Mexico immense deposits of sulphur as yet unworked.

The coal handling machinery at a Boston wharf recently lowered the world's record by raising coal from a steamer ninety feet to storage pockets at the rate of 320 tons an hour. The capacity of the shovel was two tons.

With 385 pounds of smokeless powder the new forty-five caliber, twelve-inch gun will send an 850-pound armor-piercing shell through 19 5-10 inches of Harveyized nickel-steel armor at a distance of a mile and a half.

It has been suggested that, in view of recent developments in ionic investigation, all matter may be composed of a single mother-substance-protyle. This protyle is supposed to be manufactured by destructive processes from concrete matter in the Crookes tube.

The results of the change from steam to electrical power on New York's electrical railways are a reduction of cost per passenger from 2.24 cents under steam to 1.98 cents, and an increase in gross earnings of $400,000, accompanied by a decrease in expenses of $90,000.

At a recent meeting of the Leipsic Medical Society Dr. Braun described a new method of painless dentistry. It consists in the use of suprarenalin and cocaine, which makes the gums so insensitive that the dentist can hold up the extracted tooth before the patient knows what has happened.

The famous collection of meteorites of the late Russian Privy Counselor, Julian Siemaschko, will go to the city of New York. The American meteorite hunter, Professor Henry A. Ward, of Milwaukee, a few weeks ago at Charkow, Russia, bought the collection for $6200 from Miss Siemaschko, a daughter.

Another "largest automobile in the world" is a harvester in Southern California. The machine is sixty feet long and thirty feet wide. The motive power is furnished by oil. Eight men are required to run it. As the machine starts off the grain begins falling in sacks on the opposite side from where it was cut and the straw drops into a cart behind.

It is not known just how long mosquitoes can live, but their average life is much longer than is ordinarily supposed. Thousands of them live through the winter, hibernating or asleep in dark places in barns or house cellars. In sparsely settled localities, where they cannot find such places for shelter, they live through the winter in hollow trees; and, even though the temperature may fall far below freezing, they are not winter killed, but on the approach of warm weather become active again.

Sequel to Duel That Didn't Take Place.

Several South German newspapers publish a story which is a sequel to the Saxon scandal, from which it appears that the Crown Prince of Saxony and the Saxon General Treitschke are being driven out of the army. It is stated that when the scandal occurred a strong opinion prevailed in high military circles in Berlin that the Crown Prince was bound to challenge his brother-in-law, the Archduke Leopold Ferdinand, now Herr Woelfling. The Crown Prince refused. Pressure from Berlin caused the appointment of a military court of honor, under the presidency of General Treitschke, to adjudicate. This decision excited displeasure in influential military circles in Berlin, where General Treitschke was blamed for the verdict of the court of honor. It appears that further pressure was brought to bear on Dresden, with the result that both the Crown Prince and General Treitschke, finding their positions untenable, will retire after the manœuvres.

Indians Who Actually Work.

It has always been a theory among Westerners that an Indian — a full blood—wouldn't work. But all this summer forty Indians from Haskell Institute have been at work for the Santa Fe near Emporia. Side by side with them a gang of Greeks has been employed, and the railroad bosses say the Indians excel the Greeks in every way. Indeed, it is acknowledged that the Indians made the best workmen of any engaged on the road, and there are gangs of several nationalities employed near Emporia. All summer these Indians, many of whom belong to the football and baseball teams at Haskell, have kept up their practice in these games. They never seem too tired to play a game of ball, and they have beaten all the teams in the neighborhood.—Kansas City Journal.

Queer Sugar Bowl.

In Lapland the family dining table is not furnished with a sugar bowl. From a rafter of the house a string is suspended, to the end of which a lump of rock sugar is fastened. The sugar hangs just over the table. As each Lap feel the need of saccharine refreshment, he bites off a piece, and then goes on with his meal

THE WHI... OF SOUTH...

ADR'EN LOIR, ...

THERE a... Africa a... ber of in... the term... most Fo... called white ants, ... destruction which th... sects are a real se... try; they live in n... ranean nests, and ar... est obstacles to ev... culture. During t... sects perform their... the greater part of ... visible and moving ... of small tunnels w... on their way as th... Not only do they a... all sorts, but they ... and even when th... appears sound the... with ants which d... undermine masonry. T... appear intact, but some d... covered that the building is ... about to fall into dust. The ra... with which the insects work may be ... judged when it is stated that a lawyer of Bulawayo found after an absence of a week that the insects had made occupancy of his house impossible. Eight days only had suffice for these destroyers to raise in the chimney a nest as high as a man. I have seen cases of wine from Europe, the corks of which had been entirely consumed by ants, leaving the bottles to waste their contents on the floor of the storeroom.

One frequently comes across these ants' nests, little hills erected at short distances from each other around a hill of earth fifteen feet in height, at the top of which is a gaping opening, the entrance to the nests. The nest

AN ANT'S NEST.

itself is composed of galleries holl... irregularly, all ending in a large ... lery, which may be considered ... principal avenue of the city. Th... nue leads to the deepest part of the ... nest, where we may find the residence of the queen. When sovereignty has been placed on the head of a queen, the workmen tear her wings off and place her in a cell proportioned to her size, with an adjoining cell for her mate.

As in our own cities ... these nests forms a st... ...n-taining a queen, roy... ...orkers and other useful ... of society. As thousands of eggs are laid each day in these nests, it is not difficult to understand the ever-increasing number of ants that inhabit them. These small but fearful enemies of nies which live in the same neighborhood, and two ant nests never live man themselves have implacable ene... together in peace, even where they are inhabited by individuals closely related to each other from the standpoint of race. The most formidable enemies of the white ants, however, are the large black ants called Matabeles, because of their color, which is analagous to that of the inhabitants of Matabeland. The black ants are much larger than the white, and a legion of Matabeles is sufficient to throw an entire city of white ants into a state of absolute panic. Much more vigorous than the latter, armed with formidable mandibles, the invading black ants throw themselves on the poor frightened creatures of the white city, seizing as many as thirteen at a time, and carrying them quickly to their own hill. In this case the Matabele is not inspired by any bloodthirsty desire, for it does its captive no harm, being content to keep it in a condition of slavery. Much less diligent and intelligent than the little white ant, the black ant makes the former work for the black colony, the white ant laboring faithfully in the domain of its masters, constructing for them comfortable cells, taking care of their larvae, and digging tunnels which permit their captors to go from one place to the other sheltered from the wind and rain. Thus it is that frequently we find entire tribes of white ants living in the Matabele communities.

Large and small ants have one common enemy, the ant bear, which is very numerous in those regions where prey is abundant. There is absolutely no safety when one of these animals enters the nest, although this does not prevent the number of ants from increasing in enormous quantities, in places the nests of these insects occupying such an extent of territory that they form small villages, attacking everything, devouring everything, cutting the roots, destroying the leaves, hollowing and emptying the interior of branches and leaving only the bark, the whole tree falling into dust. At Bulawayo in the municipal park out of every fifty trees planted one only lives, and it is estimatted that the damage in this town alone amounts to 250,000 francs per year.

A Big Tomato Vine.

A tomato vine, nearly sixteen feet high, was on exhibition at the Illinois State Fair. It was grown at Paragould, Ark.

At Cologne recently a thief chased by the police took refuge in a church, and, kneeling before the altar, claimed sanctuary after the mediaeval fashion. The police arrested him all the same.

king advantage of the offer, Aeneas
elected his household gods and carried
them in triumph and for joy to a place
of safety. So pleased were the Greeks by
this unaffected act of piety that they
extended to him further indulgence, allowing him to save one other thing, when, returning in haste, he bore off on his shoulders his aged father, whose wisdom and affection constituted for him a priceless inheritance.

Were the traditions thus related to repeat itself in history to-day and the privilege granted every genuine Christian believer, in a supposed season of calamity and privation, to make a selection of that one possession most highly prized by him, both because of its intrinsic value and its immortal influence, the truest wisdom would dictate a peculiar and, to thousands, an inexplicable choice. This choice would not be silver or gold, military fame or civic honor, profound learning or matchless eloquence; this choice would not be even father or mother, husband or wife, son or daughter, friend or lover; precious as might be each of these, it would not be the one thing wisely chosen if the choice were made both for time and eternity. What then would the one thing be? Strange as it may seem to many, the calm, firm, heaven guided, intelligent choice of the earnest, thankful Christian in that solemn, sacred hour, would be a certain book—a book ancient and artless, elevating and ennobling, divine and durable.

As I utter this sentence you anticipate the designation I am about to make. You need not be told that. This book is no work of mere poetry, neither Iliad nor Odyssey, Milton's Odes nor Shakespeare's plays; no work of mere history, neither Livy nor Tacitus, Hallam nor Hume; no work of mere philosophy, neither Bacon nor Hamilton, Descartes nor Locke; no book of mere biography, neither Plutarch nor Lamartine, Remusat nor Voltaire; no book of mere romance, neither George Eliot nor Scott, Bulwer nor Thackeray; no book of mere ethics, neither Plato nor Seneca, Paily nor Bain; no book of Christian morality and meditation, neither Thomas a Kempis' "Imitation of Christ" nor Bunyan's "Pilgrim's Progress," Hooker's "Homilies" nor Paschal's "Thoughts"—great and good as are many if not all of these immortal works [illegible]

[illegible] solution [illegible] to the [illegible] sed [illegible] men's creation burn into ashes or bury in the sea, if at their expense we might save to our hearts and lives here and hereafter that one single book, which has an origin and a character and a mission and a destiny as far above every work of man's creation as the skies are above the clouds—that book whose "author is God, whose subject is man, whose object is salvation, whose end eternity"—that book of which Pollock, in an outburst of poetic fervor and Christian faith, so feelingly writes:

This lamp from off the everlasting throne
Mercy took down, and in the night of time
Stood casting on the dark and gracious bow,
And forever more beseeching men with tears
And earnest sighs, to hear, believe and live.

Surely, brethren, this must be the book of all books, which, while full and rich with the sweetest strains of poetry, the most memorable deeds of history, the most inexhaustible stores of philosophy, the most thrilling incidents of biography, the loftiest principles of ethical and moral teaching, counts no one of these its features of chiefest glory, but rather this: that for centuries it has gone up and down this world of ours, relieving human consciences, illuminating human intellects, redeeming human spirits, transforming human lives, and that, in so beautiful and glorious a degree, that the thinking world is beginning to accept the statement of Schleiermacher, "To abolish the Bible is to pluck up by the roots all that is noblest and truest and divinest in the world's civilization."

Oh! if there is one prayer that I offer up daily with more constancy and fervor of soul than another in our age of theological ferment and unrest, it is this: God, keep me as an ambassador of Christ and the great brotherhood of Christian believers, true now and always to the infallible Word of the eternal God. As in the past, supernatural revelation has had to contend against the sophisms of Hume and the transcendental philosophy of Germany, so to-day, all about us there are those who battle against the idea of a living, personal, omnipotent Jehovah, who can and does freely and fully communicate with His children; and to-day there is a call long and loud for those who accept the Bible as the full and satisfactory oracle from heaven, to stand up and out against all these attacks, and that, too, with convictions strong and unshaken.

With you to-day I come to consider the question, What are some of the evidences that the Book we call the Bible has been given by inspiration of God? I say some, for we have no time, even if we had the ability, to enumerate them all. That these sacred writers themselves believe that theirs were the oracles of God is without question. Hear David sing: "The spirit of the Lord spake by me and His word was in my tongue;" and Isaiah, "Hear, oh heavens, and give ear, oh earth, for the Lord has spoken, the mouth of the Lord hath spoken;" and Ezekiel, "The Word of the Lord came expressly to Ezekiel, the priest and the hand of the Lord was upon him;" and Peter, after the death of Judas, "Men and brethren, the Scripture must needs have been fulfilled, which the Holy Ghost by the mouth of David spake before concerning Judas;" and Paul would speak, "not in the words which man's wisdom teacheth, but which the Holy Ghost teacheth." And how our Lord throws the "broad shield of His infallible truthfulness" over the whole Old Testament canon, testifying both to the accuracy and the inviolability of the Word of God. The Old Testament was then, as now, divided into the Law, the Prophets and the sacred writings. Holding up the scroll that contained these, the Master of the ages with firmness of conviction and rapture of soul, could exclaim: "It is written." Search the Scriptures, the Scriptures cannot be broken. With the spirit of these our consecrated predecessors, in Christian faith, let us rejoice today as we study the divinity and inspiration of the Word of God. Among the substantial truths of Bible inspiration is the pure and lofty character of the teaching that sounds and glorifies and perpetuates the pages of this more than [illegible] teachings respecting God and [illegible] holiness and sin, death and [illegible] if in the whole circle of religious [illegible] to [illegible] to commonsense, is not [illegible] and [illegible] filled up by the revelations of the inspired Word.

Take the one question of the Godhead and the light thrown upon it by the sacred Scriptures. As Dr. Stuart Robinson has eloquently said, "The Bible maintained the unity of God amid all the darkness of the Western pantheism; the vivid personality of God amid all the sophistry of the Eastern pantheism; and inflexible purity of the holiness of God amid all the obscurity of Egyptian theories and Canaanitish idolatry, the omnipresence of God amid all the theories of gods many and lords many." How infinitely above and beyond all human speculations are the revelations of the Divine Word respecting the Divine mind! How majestic such declarations as these: "In the beginning God created the heavens and the earth; before the mountains were brought forth or ever Thou hadst formed the earth and the world, even from everlasting to everlasting, Thou are God;" "God is a spirit;" "God is love;" "God is light." In a magnificent treatise on this fundamental question of God and the revelations respecting it made by the Scriptures, an American writer has pointed out five conceptions of God found in the Bible, and found nowhere else among all the religions of earth. Hear and weigh these:

(1) God is a spirit, existing from eternity, Creator of heaven and earth; (2) God is one, yet revealing Himself in the threefold distinction and personality, Father, Son and Holy Spirit; (3) God is absolutely infinite in all His attributes and capacities—in power omnipotent, in knowledge omniscient, in existence omnipresent, in purpose immutable, in character immaculate; the embodiment of all that is good and great; the impersonation of all excellence; (4) God is providential, not far off and inaccessible, careless of self-acting laws and untouched by human woes, but a God of sympathy, compassion, love; a God, who, in all His laws, and behind all His laws, and above all His laws, and in control of all His laws, not only guards cherubim and seraphim angels and archangels, but also marks the movement of lily, sparrow and child; and above all, God is a Redeemer, living and dying among men in self-sacrifice ineffable, to lift them from darkness to light, from sin to glory, in short, not a mere ideal of a God to worship, but a God with whom every human soul may have personal, conscious relations, a God to [illegible] a God to love, a God to pray to, a God to obey—a God to love [illegible] we [illegible] anathema [illegible] if we would serve Him, and a God so loving that our very sin has moved Him to a self-denying atonement. Truly, this Book that tells so much about God must be a book from God.

Because it is God's Book, the Bible is peculiarly man's book, when man would rise to loftiest conceptions and highest achievements. It is wonderful how our whole English literature has become permeated, saturated and elevated by sentiments and expressions from the Holy Scriptures. One of the most interesting studies to the student, alike of the Bible and of Shakespeare, is the indebtedness of the Bard of Avon to these oracles of light and life. A careful study of Shakespeare's life reveals no fewer than five hundred and fifty biblical quotations and sentiments. Here in "Richard II." are forty; then in "Richard III." are forty-nine; yonder in "Hamlet" alone, eighty-two. How many biblical books are there? Sixty-six. From how many does Shakespeare quote? Thirty-seven. A careful study of this subject will reveal that Genesis furnishes the poet thirty-one quotations or references; Psalms, fifty-nine; Proverbs, thirty-five; Isaiah, twenty-one; Matthew, sixty; Luke, thirty; Romans, twenty-three. Nor is this exceptional. A scholarly American author has declared that it is as impossible to subtract the Bible from our modern English literature as "to unbraid the sunbeams or subtract the yellow or violet rays from the tides of light that fill the solar system with warmth and cheer." Each English student knows how true this is. Without the Bible Milton could never have written his "Paradise Lost" and "Samson Agonistes." Without the Bible Bunyan could never have composed his "Pilgrim," or Tacit his "Jerusalem," or Dante his "Inferno," or Burns his "Cotter's Saturday Night." No wonder John Quincy Adams could exclaim: "In whatever light we view the Bible, whether with reference to revelation or history or morality, it is a mine of knowledge, like which none other has ever been found in any land or any realm." No wonder that Daniel Webster, prince of forensic orators, could say that the perusal of the Bible in his early days imparted to him many of the chief excellencies of his literary style. No wonder that the gifted Choate eloquently exclaimed: "I would have the Bible read, not only for its authority, revelations, commands and exactness obligatory yesterday, to-day and forever, but for its literature, its pathos, its dim imagery, its sayings of consolation and wisdom and universal truth." Truly this Book of books must be the Book of God.

But we have a higher proof of biblical inspiration even than this, and that is the perfect adaptness of the Word of God to the conditions of all classes and kinds of men. Dr. Storrs well says: "The treatise of Plato on immorality is attractive to the scholar, but obscure and dull to the unlettered man; the Veda of the Hindus is, as a whole, unintelligible; the Koran is said to be a sealed book to the majority of its constituents. In contrast to all these, the Bible fills the whole circumference of man's endowment; it touches every thought and feeling in this great humanity; it is adapted to inspire sage, to instruct the savage, to guide the child." Truly, this is a universal book, answering man's deepest questions, solving man's most intricate problems, illuminating man's most darkest hours, giving him support in life, peace in death, and a song of sweetest melody amid the ineffable glory of the eternal world. The gifted Hallam felt this when he said: "The Bible fits every fold and crevice of the human spirit."—Not so philosophy, education, science. Our astronomers point out Uranus and Jupiter, but not the Star of Bethlehem. Our geologists unfold earth's strata, but reveal no Rock of Ages. Charles Reade, the litterateur, writes the first line of his own epitaph, "Reade, Dramatist, Journalist, Novelist;" but Charles Reade, the Christian, pens the other line: "I hope for a resurrection, not from any power of nature, but from the will of the Lord God Almighty." Whence came that revelation save through the dome window of the sky? ...e Bible alone answers our deepest questions, solves our most intricate problems, illumines our darkest hours. There can be no night when it gives no song, no desert where it furnishes no fountain. Its revelations supply support in life, peace in death and songs of everlasting joy beyond life. No heart is too hard for its truths to melt, no sin too great for the Bible to banish, no life too degraded for the Bible to transform. Only let a man test God's Word and he will have in its favor an argument that no sophistry can destroy and no skepticism touch.

The Heart's Influence.

If there is joy in your heart, let it shine in your face. This is one of the lesser ministries of love—the cheering power of happiness. Every bright face makes a brighter world.

NEW IDEAS in TOILETTES

New York City.—Loose coats of all sorts are greatly in vogue and make ideal cold weather wraps. They can be slipped on over the gown with per-

COAT WITH CAPE COLLAR.

fect ease and without danger of rumpling. This May Manton one includes several novel features and is adapted to a variety of materials, but is shown in pastel tan broadcloth with the cape collar of velvet trimmed with fancy braid and edged with heavy ecru lace. The inverted pleats, that are stitched with corticelli silk, give exceedingly becoming lines while providing the fulness and flare that are much in vogue. *The sleeves are novel and effective as* well as comfortable.

The coat is made with yoke portions to which the fronts and backs are attached. Both the coat and the sleeves are laid in inverted pleats, the outer ones being stitched flat for their entire length, the inner left free for a portion thereof to provide flare at the lower edge. The sleeves are in bell shape and fit with comparative snugness above the elbows, and at the neck is the cape collar which can be further enhanced by fringe knotted into the lace when desired.

The quantity of material required for the medium size is five and a quarter yards twenty-seven inches wide, three and a quarter yards forty-four inches wide or three yards fifty-four inches wide, with one-half yard of velvet for the cape collar, four and a half yards of braid and one and three-quarter yards of applique to trim as illustrated.

Becoming Princess Gown.

Princess gowns are among the features of the season and are exceedingly becoming to well formed women. The one shown in the large drawing is both novel and handsome and allows of variations without number. The model, however, is made of broadcloth, in the new shade known as Lombardy plum, with the epaulettes and cuffs of velvet in the same color overlaid with applique of heavy lace, the square yoke and collar of cream chiffon, tucked and enriched with lace, and trimming of fancy braid piped with velvet. The color is as beautiful as it is new and the combination of materials singularly rich and attractive, but the gown can be made entirely of velvet, of cloth or of similar material. As illustrated the closing is made invisibly at the left shoulder seam and beneath the trimming at the left front seam, but it can be effected at the centre back if preferred.

The gown is made with centre fronts, side fronts, backs, side backs and under-arm gores. Both the centre front and the back are full length, but the side fronts, under-arm goers and side backs are lengthened by the circular flounce which is joined to the edges of the front and the backs. The epaulettes are arranged over the shoulders and the neck is finished with a regulation stock. The sleeves are among the newest of the season, and show deep flare cuffs, which extend well over the hands, and above them form full drooping puffs.

The quantity of material required for the medium size is fourteen and a quarter yards twenty-one inches wide, twelve yards twenty-seven inches wide or seven and a quarter yards forty-four inches wide, with seven-eighth yards of velvet, three-eighth yards of tucking and six yards of braid to trim as illustrated.

Very Fashionable Stockings.

Stockings of striking effect have narrow bands of lace inset, many of them of contrasting colors, the most striking being black in white. An inch band of lace in some of the stockings undulates serpentine fashion over the instep and up the leg. In other stockings the inch bands are put in to form conventional designs over the instep, and in others inch bands of lace are set around the stocking from the ankle, perhaps the length of it.

Hats For Misses.

Misses' hats are very large, the crowns are quite high, and are either trimmed with a very long plume, caught in with a buckle at the front of the crown and drooping over the brim at the side, or else the crown is surrounded with very short tips.

Filmy Princess Dresses.

We hear of tulle and mousseline princess dresses, but, of course, these filmy fabrics are but "superstructure," requiring as a foundation a perfect dress of handsome silk.

Shoulder Capes.

Small capes that cover and protect the shoulders make a feature of the season's styles and are greatly in vogue both as parts of costumes and as general wraps. The two May Manton designs illustrated are admirable and are one round, giving a smooth fit over the shoulders, the other cut in deep points that fall in handkerchief style. Both are double and both show the stoles that are preferred to every other form of neck finish. As illustrated the round cape is made of tan colored cloth, the pointed cape of the

PRINCESS GOWN LENGTHENED BY CIRCULAR FLOUNCE ON SIDES.

same material in the shade known as mole-skin, both being finished with stitching in corticelli silk. The stole of the round cape is made of heavy ecru lace finished with drop ornaments, but that of the pointed cape is cut from the material, simply stitched and finished with fringed ends and drop ornaments placed at the neck and midway of its length.

The round capes are cut in one piece each and arranged one over the other and finished at the neck with the stole. The pointed capes as illustrated also are double and finished with the stole, but can be made with the under portion cut from the outer edge to the depth of the stitching on the upper cape only and joined thereto, thus giving the effect of two capes without the additional weight.

The quantity of material required for the medium size is for round cape two and three-eighth yards twenty-one inches wide, one and three-eighth yards forty-four inches wide or one and an eighth yards fifty-four inches wide, with one yard of all-over lace for the stole; for pointed cape three yards

SHOULDER CAPES.

twenty-one inches wide, one and a half yards forty-four inches wide or one and three-eighth yards fifty-four inches wide.

WORTHY of a higher recommendation than I can find words to express."

This is what Mr. J. H. Plangman (of Sherman, Tex.) says of Doan's Kidney Pills. He tells his experience in the following words: He says, "Sometime in September I was taken with a dull aching pain across the small of my back, directly over the kidneys. I paid small attention to this at first, thinking it would pass off. But instead of getting better it became worse and in a short time the pain centered through my left hip and down my left leg as far as the knee." This is precisely what kidney trouble will do with the body.

It does not always show itself at first, but appears just in this way, when some unusual movement or action brings sharp pains and exhaustive aches, telling of sick kidneys.

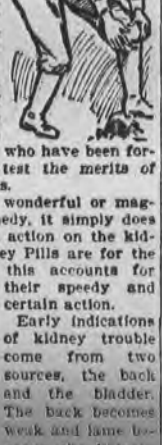
So Mr. Plangman's experience bore this out. Continuing, he says: "I did not know the cause of the trouble, but I am led to believe now that it was first brought about by jumping in and out of the wagon and in some way I may have strained my back.

"I was constantly growing worse," he continues, "and I became very much alarmed about my condition. I knew that something had to be done or serious results were sure to follow. I went to a specialist here in Sherman, and underwent a rigid examination."

Then he relates how the doctor told him that it was a serious case, but that he could cure him for fifty dollars. However, necessity knows no law and Mr. Plangman paid half down and took the treatment and followed it faithfully for four weeks.

Naturally, he thought that he would soon be rid of the trouble, but in spite of the doctoring he goes on to add, "I was in such misery that it was almost impossible for me to do my work."

"It was at this juncture that Doan's Kidney Pills came to my notice and I procured some from the drug store of C. E. Craycroft. I used these pills according to directions and to my surprise I was considerably relieved on the second day and in a short time completely cured."



. . . . . .

This is the universal experience of those who have been sufferers from Kidney trouble and who have been fortunate enough to test the merits of Doan's Kidney Pills.

There is nothing wonderful or magical about this remedy, it simply does the work by direct action on the kidneys. Doan's Kidney Pills are for the kidneys only and this accounts for their speedy and certain action.

Early indications of kidney trouble come from two sources, the back and the bladder. The back becomes weak and lame because the kidneys are sick, and relief from backache can only be complete when the kidneys are set right.

Irritation of the bladder shows that the kidneys are out of order. Delay in prompt attention often causes serious complication.

Relieve and cure sick kidneys and ward off dangerous diabetes, dreaded dropsy and Bright's disease, by using Doan's Kidney Pills.

They begin by healing the delicate membranes and reducing any inflammation of the kidneys, and thus making the action of the kidneys regular and natural.

Aching backs are eased. Hip, back, and loin pains overcome. Swelling of the limbs, rheumatism and dropsy signs vanish.

They correct urine with brick-dust sediment, high-colored, excessive, pain in passing, dribbling, frequency. Doan's Kidney Pills dissolve and remove calculi and gravel. Relieve heart palpitation, sleeplessness, headache, nervousness.

Foster-Milburn Co., Buffalo, N. Y.

Cured of His Bad Habit.

A few months ago the son of a railway director was, through his father's influence, given a position of some importance on a large railway. He was fresh from Cambridge, and in the orders which he from time to time issued to the men under him always made use of the longest, most unusual words. This habit led to some rather expensive blunders, and, the matter coming before the general manager, he wrote the young official the following letter:

"In promulgating your esoteric cogitations and in articulating your superficial sentimentalities and amicable, philosophical, or psychological observations, beware of platitudinous ponderosity. Let your conversational communication possess a clarified conciseness, a compacted comprehensibleness, a coalescent consistency, and a concatenated cogency. Eschew all conglomeration of flatulent garrulity, jejune babblement, and asinine affectation. Let your extemporaneous descantings and unpremeditated expatiation have intelligibility and veracious vivacity without rhodomontade or thrasonical bombast. Sedulously avoid all polysyllibic profundity, pompous prolixity, psittaceous vacuity, ventriloquial verbosity, and vaniloquent vapidity. Shun double entendre, prurient jocosity, and pestiferous profanity, obscurant or apparent. Don't put on airs; say what you mean; mean what you say, and don't use big words."

The young official took the gentle hint and changed his style.—Los Angeles Times.

One in four of the people of Chicago is a German. N. Y.—45

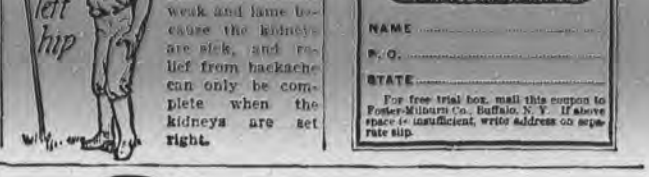
Possible Waterpower of the Globe.

Those who are looking forward with trepidation to the time when the world's coal supply shall be exhausted will find solace in some rough calculations by John Clarke Hawkshaw, a prominent civil engineer, concerning the water power now going to waste. He says: "Assume a depth of ten inches of rainfall to flow off each square inch of land surface, the mean height of which may be taken as 2250 feet above sea level. Then the water from the whole surface falling through the mean height would give 10,310,000,000 horse power in perpetuity. Our present yearly output of 225,000,000 tons of coal would give that horse power for only a little over half a day."

Patience and Perseverance.

"The public is a big thing," says an advertiser of experience. "It is hard to stir up. It moves slowly sometimes—wants to get acquainted first. Likes to deal with well-known people. The only way to get acquainted and become well known is to be patient and keep on advertising."



GUARANTEED CURE for all bowel troubles, appendicitis, biliousness, bad breath, bad blood, wind on the stomach, bloated bowels, foul mouth, headache, indigestion, pimples, pains after eating, liver trouble, sallow skin and dizziness. When your bowels don't move regularly you are sick. Constipation kills more people than all other diseases together. It starts chronic ailments and long years of suffering. No matter what ails you, start taking CASCARETS today, for you will never get well and stay well until you get your bowels right. Take our advice, start with Cascarets today under absolute guarantee to cure or money refunded. The genuine tablet stamped C C C. Never sold in bulk. Sample and booklet free. Moss Is Indestructible.

There is a creeping moss found in the islands of the West Indies which is called the "life tree," or, more properly, the "life plant." Its powers of vitality are said to be beyond those of any other plant. It is absolutely indestructible by any means except immersion in boiling water or application of a red hot iron. It may be cut up and divided in any manner, and the smallest shreds will throw out roots, grow and form buds. The leaves of this extraordinary plant have been placed in a closed, air-tight, dark box, without moisture of any sort, and still they grow.

The French Recruits.

The number of recruits accepted for the French army for 1904 is only 136,000, against 233,000 for 1903, although the difference in the number of men on the lists is not more than 500. The decrease of 37,000 is due to a more rigorous examination of the conscripts.

How's This?

A Floating Island.

Continued From First Page

the tamarack trees like a sail, two of the piles snapped off short, and the others pulled out of the mud. We could feel the island start ahead as the piles pulled out, and from the way the lights changed we could see that we were adrift and going down along the east shore of the lake.

"I tell you, we were pretty well worked up at that. We had the small boats ready, but with the lake rising the way it was, and with the night so black that we couldn't see a single landmark, and the wind blowing hard and switching around every now and then but never moderating, we decided to stick to the island until the last possible moment. What we were most afraid of was being carried carried over the dam at the outlet, where the canal company takes its supply for the canal. We knew there must be a regular cataract going over the dam, and if our island got carried down that it would go to pieces, and there wouldn't be enough of us or the island left to hold a decent inquest over.

"We strained our ears listening for the fall of the water over, and several times we thought we heard it, but each time decided that we would stick to the island for awhile longer. Just when we had made up our minds that we had to leave, the wind shifted sharp to the northeast and sent the island away from the east shore. We made a quick turn, missing the buckets on the big icehouse slide by about two feet. If we had been fifty feet nearer shore the island would have gone to pieces right there.

"All the way down we had been scraping and bumping on bottom and on rocks and the island worked just like rotten ice when the boys play 'tickly benders.' When the wind shifted we cut across the lake and fetched up against the west shore. Several times the wind, which was very squally, turned clear around, and we must have drifted up and down the lake and sometimes down. Once in a while we managed to get an idea of where we were, but for the greater part of the time we were clean lost.

"We drifted around for nine and a half hours, and just at 6 o'clock Sunday morning we fetched up in the little cove on Mrs. Olcott's land, at the southwest end of the lake. Although we had turned around a good many times we brought up in almost the original position of the island, with our house to the south and McDonald's to the north.

"It was anxious waiting until daylight to know just where we were, but we were mighty thankful to be anywhere and stay there. Of course there aren't many people who can boast of having cruised around Greenwood Lake for ten hours on a three-acre meadow lot, but I'm satisfied with having done it once. I don't want to go through that night's experience again, and I don't believe any of the any of the others do."

In all probability the island is a fixture in its present location. Where it grounded is in the shallowest part of the lake, and as it entered the cove at the very top of the highest water known in Greenwood Lake in half a century, it has been left resting on the bottom of the lake by the receding of the water. Already the cranberry bushes and other vegetation on the island have begun to put out new roots, and in a short time the island will be as solidly anchored as a part of the mainland. At first there was some talk of towing it back to its original position, but the difficulties and the expense of the undertaking would be too great. It is well out of the way, and will not be disturbed.

Phil May's Story of an Australian Prisoner.

Phil May, the English artist, whose death occurred recently, worked in his youth on the "Bulletin," of Sydney, Australia. Occasionally the young man would be assigned by the "Bulletin" people to the police courts, and from these assignments he would bring back sketches, now humorous and now pathetic, that were admirable.

One of the best of the "Bulletin" sketches hangs in the library of Joseph Chamberlain. It portrays a thin, hang-dog man in the prisoners' bar, talking to a very mild and sympathetic looking judge. Mr. May's story of the sketch is that the prisoner had been dragged before the judge every few months for a number of years.

"Your face is familiar here," the latter now said.

"It is, your Honor—worse luck," returned the prisoner.

"Are you married yet?"

"Not yet, sir."

"Not yet, eh? How long is it now that you have been engaged?"

"Seven years, your Honor."

"So long as that? Why in the world haven't you got married in all that time?"

"Because, your Honor," the prisoner explained, "Ann and I haven't managed to be both out of jail at the same time."—Boston Post.

Twice Nothing.

The Busy Season.

The demand in the various departments of Harry Feinberg, the popular priced outfitter, for clothing, furnishing goods, hats and shoes, located at 329 West Front street, opposite Grove street, has proven that honest values and the best of treatment will always prevail, especially so when one can get whatever he needs at lowest market prices and can be fitted out complete from underwear to headgear for $10, or your boy for $3. The 10 per cent coupon as shown on the first page of the REVIEW is another one of his enterprises.

Deposits, $700,000.

It was but a month ago that we announced that our deposits reached the $600,000.00 mark. Since then we have added another $100,000.00 to the total. The number of depositors now represented on our books is over 1,400, which means that nearly one hundred accounts have been added during every month the Company has been in existence. Such a record demonstrates in an able manner that our broad and far-reaching facilities are meeting a definite need.

We continue to invite new business subject to the following liberal terms;

On accounts of $200. or more, subject to check, 3 per cent. is paid.

On accounts of $5.00 or more 3 per cent. interest is paid, provided the money is on deposit for three months or longer.

G. Holley Freeman has been fined $15 by the Fire Committee of Common Council of Plainfied, being declared guilty of carelessness while driving to a fire last Saturday. Freeman's negligence caused injuries to himself and Assistant Chief Jennings, both of whom were thrown from the hose wagon, and the wagon itself damaged. In consideration of Freeman's former good conduct, he has been reinstated.

The Original Florodoras' Ball

As usual the Original Florodoras scored a big success with their masquerade ball which took place at Bound Brook Thursday night. Suhr's Orchestra, from Plainfield furnished the music. The officers of the club are: President, Spencer Clickner; vice president, Edward Sutton; secretary, Ernest Jones; treasurer, Frank Jin Terry.

Councilman Arnold Makes Charges.

At a meeting of the Borough Common Council, last Friday evening, Councilman Arnold asked that the sale of intoxicating liquors be prohibited in Saengerbund Hall. He claimed that the Hall was rented to all classes without restriction, that liquor was sold and that the people patronizing the Hall indulged in brawls that disturbed the peace and welfare of the borough. No action was taken by the Mayor and Council on Mr. Arnold's request, except that Councilman Lee was instructed to attend the next dance and investigate the situation and report at the next meeting.

It was the opinion of the Council that all complaints and arrests should be made at the instigation of the county authorities. The Hotel keepers in the borough have been protesting for a long time against liquor being sold in Saengerbund Hall, claiming that no license is paid and therefore it is an injustice to them as they are required to pay for the privileges.

Sudden Death of the Editor's Father

Owing to a telegram announcing the sudden death of George W. Webb, Esq., of Galena, Kansas, last Wednesday, Harry H. Webb, a son of the deceased, left for Galena, Thursday morning.

Y. M. C. A. Orchestra Tendered a Reception.

Monday evening in the parlors of the Association, Stephen Cahoone, president of the Association expressed thanks and appreciation to the orchestra for the work they had done. Rev. C. E. Herring also made an address. Under the auspices of the Social Work Committee, refreshments of ice cream and cake were served.

A. G. Anderson Installed as County Clerk

Alexander G. Anderson; who was elected County Clerk of Somerset County took the oath of office last Tuesday. which was administered by Judge Louis H. Schenck.

Mr. Anderson gave $25,000 bonds, his sureties being L. A. Thompson, W. H. Cawley, W. H. Long and W. H. H. Wyckoff.

Union County Press Club.

A Union County Press Club will be organized at Elizabeth this afternoon, arrangements having been made to hold a meeting of men connected with the editorial and business departments of all daily and weekly newspapers at the Lyceum Theatre, in that place.

The Last Sad Rites

A large number of friends attended the funeral over the remains of George Demlar which took place last Monday afternoon at Watchung. Rev. Dr. Snodgrass, pastor of the M. E. Church, Plainfield, officiated. Several selections were sung by a quartette composed of Miss Beeching, Miss Higgins, Henry Ackor and E. E. Runyon.

Interment was made in Hillside Cemetery, Plainfield. The pall bearers were: George Schmidt, Daniel Ackor, Harrison and Worth Codington, William Gordon and Truman Bilyeu.

Mr. and Mrs. Apgar Celebrate Tenth Anniversary

Mr. and Mrs. Walter Apgar, of East Fourth street, Plainfield celebrated the tenth anniversary of their wedding day last Monday evening by entertaining about eighty friends who came from New York City, Philadelphia, Washington, N. J., Somerville, Dunellen and Plainfield.

The house was beautifully decorated with evergreen, chryanthemums and carnations.

Mrs. Buckley furnished the music for the tripping of the "light fantastic toe" which was thoroughly enjoyed. This was followed by a bountiful collation at midnight.

Mr. and Mrs. Apgar were the recipients of many handsome presents among which were articles of solid silver, cut glass and linen.

The affair was a very pleasing one and will long be remembered by all who were fortunate enough to be present.

The Sebring House is on the Move

Sometime ago Charles Sebring was refused by the Mayor and Common Council of this borough permission to move his house from Front street, Plainfield onto property which he owned in the borough. It is said Mr. Sebring was advised by his lawyer to go ahead and carry out his original plan and thus test the Mayor and Council's right to refuse his request.

Mr. Sebring secured the consent of the Plainfield authorities and also that of the Somerset Board of Freeholders and then started his house toward the borough. The house glided along all right until it reached the middle of the Grove street bridge, when the real tragedy in the farce comedy "Playing to the Grandstand" took place. This occurred last Saturday afternoon when the Mayor had his officers arrest Sebring and the men employed by him, and taken to the lock-up where they were afterwards released.

Mr. Sebring was to have had a hearing before the recorder Tuesday night, but after appearing in the court room the case was adjourned one week. The house is continuing its journey boroughward, and the general belief is it will land on the foundation originally planned by Mr. Sebring.

Board of Freeholders Meeting

At a regular meeting of the Board of Freeholders at Somerville last Tuesday the election bills were referred to the Auditing Committee and the Director and Clerk authorized the bills paid when approved.

A resolution was introduced by R. W. Hoagland expressing the Board's appreciation of J. B. Duke's action in improving miles of stone roads and building several bridges, which was adopted.

Petitions for the public road from Neshanic Station to Centreville and improving the road from Calvin Corle's to the old York road near Freemont Schafer's and a spur from there to the bridge at South Branch, were filed.

The County Collector was authorized to borrow $20,000.

An application from Hon. S. S. Childs for permission to erect poles for wires for carrying light, heat and power upon the road from Far Hills to Bedminster, Peapack and Gladstone was refused.

The Finance Committee reported expenditures to date as follows:

The Board of Education met at Warrenville School Saturday night for the regular monthly meeting.

Tom Collins has given up the huckster business and is now clerk for Fred Kirch.

* * *

Rev. Geo. Bowers will preach tomorrow evening in Wilson Memorial Chapel, Watchung. A cordial invitation is extended to the public.

Accidentally Shot While Cleaning Gun.

Martin E. Thickstun, twenty-three years old, of Metuchen, was killed Monday morning by the accidental discharge of a shot gun which he was cleaning.

He was the oldest son of Martin E. Thickstun, Sr., who was formerly in the newspaper business in New Brunswick. He practised law in Perth Amboy and lived with his parents at the homestead on Dark Lane, Metuchen. He was an enthusiastic hunter and was cleaning his gun in readiness to go hunting the next day when the sad accident occurred.

BEFORE THE RECORDER.

John Goodwin's Incarceration, and trial before Justice Doud.

A large crowd of people gathered around the borough lock up Monday night in the vain endeavor to be present at the hearing of John Goodwin, whose case came before the Recorder, Thomas Doud, that evening, and was heard in the little room over the lock up. It is safe to assert that a "weightier" or "bigger" subject than John Goodwin was never before brought to the notice of the Recorder.

The people filled the dingy, dirty little room over the borough lock-up long before the hour set for the hearing, and hundreds who were more than ordinarily interested in the case were unable to get inside and so returned home.

Inside the air was hot and foul; windows were opened and many outsiders climbed the bell tower and hung on like so many large birds, all anxious to hear and see what they could.

On the opposite side of the room, the outside stairway was crowded with men from top to bottom, and a man at the top by pressing his ear against the glass in the door, could hear a word now and then, which he repeated to his less fortunate neighbors.

Occasionally a man would emerge from the room by way of the inner stairs, and, after taking a few long breaths of air, would tell how he could near suffocating and had to get out. The statements regarding the progress of the case were seized upon with wonderful interest by the outside crowd.

The court room and its surroundings are so dirty and disagreeable, and access thereto so difficult that many were unable to reach it at all. It is situated in the rear of Warren's livery stable house, and is reached by way of a narrow alley from Lincoln Place This alley is dark, and dirty. A large pile of ashes is on the opposite of the alley from the entrance to the court room, and there is no mistaking the odor. On the other side of the building are the fire horses. The lock up is a small detached brick building, about sixteen feet square, two stories high. The lower floor is dark, ill-smelling, little or no ventilation and used as a calaboose or borough lock-up. It was in this place that John Goodwin was thrust Saturday afternoon, in spite of his pleading. Here it was that but for prompt medical treatment he would probably have died.

Above this jail is the Recorder's office, or borough court, and it was in this little room that the trial was held which resulted in John Goodwin being fined $10 for disturbing the peace and resisting an officer.

Nearly everybody in North Plainfield and hundreds in Plainfield know John Goodwin, a cousin of "Nat" Goodwin, and so it does not make much difference what the verdict of any one-man court might be, it would be rather difficult to change the opinion of the hundreds of friends John has, as to the relative merits of such a verdict, so it may be just as well to pass over that feature of the case.

The incidents leading up to the arrest of Goodwin are quite generally known, and as near as it has been possible to gather them are these:

Goodwin is a trustee of the Grove street church known as the First Church of Christ. When the house which Chas. P. Sebring is having moved from Plainfield to the borough, neared the church last Saturday, Goodwin went there with the idea of seeing that no harm was done to it. Between one and two o'clock the spectacular arrest of Sebring and his men by Mayor Smalley, took place. Mayor Smalley ordered some of the heavy timbers hauled and placed on the church grounds; Goodwin objected. Smalley insisted and told the driver to go ahead. Goodwin, still on his own ground, took hold of one of the horses and turned it away. After Goodwin had shoved the horses away and stepped back on the church property ten or fifteen feet, Smalley ordered the Chief Marshal to arrest Goodwin. Goodwin demurred, saying he had committed no crime, and asked for authority for arresting him without a warrant; and said if properly arrested would accept it, but that he was only defending his own property.

He was arrested however by five men and dragged off the church property on to the sidewalk, whereupon Goodwin repeatedly told them that such treatment was unnecessary and that he would go with them peaceably. He was taken to the lock-up and in spite of his entreaties, as said before, was placed in a dungeon as though he had been guilty of some great criminal offence. Overcome with the excitement coupled with a horror of the place, Goodwin was taken very ill with heart trouble and it was thought before a physician could reach him, he would die but fortunately the physician who was summoned, succeeded in restoring him to consciousness again, but he is still under the doctor's care.

Goodwin seems to feel the disgrace of being placed in a cell more than anything else in connection with the whole affair. Sebring and the men employed by him were not placed in cells, and Goodwin pleaded to be left with them in the outer room, but without success. It is said this more than anything else brought on the attack of heart trouble.

THE TRIAL.

Without a warrant, with no knowledge as to why he was arrested, Goodwin was hustled off to jail by orders of Mayor Newton R. Smallay, and after a cash bail had been furnished by Goodwin he was told to appear before the Recorder at 7 o'clock Monday evening. He appeared with his counsel, Hon. S. S. Swackhamer, and several witnesses who saw the transaction.

As near as it has been possible to learn from one who was present throughout the whole of the trial, but who took no part in the proceeding, the charge against the prisoner was for disturbing the peace and resisting an officer.

Arrayed against him were the following:

NEWTON R. SMALLEY
CHARLES ARTHUR REED
CHARLES A. LEE
JAMES K. ARNOLD
WILLIAM T. CAMPBELL
FRANK ROWLEY

and a number of lesser lights—bright satellites in the crown of their chief!

The judge before whom the trial was held was Thomas Doud.

The trial occupied over two hours and was replete with interesting incidents. The people were not surprised at the verdict which fined Goodwin $10.

It was suggested to the Recorder that the fine be not collected and the defendant patrolled under guarantee of his counsel. The Recorder would not consent to this but stated that as no one would be held surety for the counsel that he demanded the cash, and would sit until it was forthcoming. This was where the surprise came in!

While Goodwin was being cross examined some one in the room, in a loud voice, suggested that a pecuniary transaction between Goodwin and a widow woman be looked into. Goodwin appealed to the court for protection and asked if he was to get protection. The Recorder replied in the affirmative and said:

"Show me the man who made that remark, and I will have him put out of court."

Goodwin pointed to Wm. C. Smith, and said: "There is the man who made the remark." And as Capt. Smith stood up and was recognized by the Recorder, instead of being put out of the room, he was told to "sit still." Just at this point some one in the room called out: "You're afraid to put him out; he belongs to the King."

Goodwin testified that he was on the church property when arrested and claimed that he had a right to keep the horses off of the property. He blamed Smalley for all the trouble. He said Lee stood behind Smalley when the order was given to drive on the church property and that when Smalley said "arrest him," that Lee added, "and lock him up."

Andrew Love, Sr., president of the Borough Board of Health, a witness for Goodwin, engaged in a wordy war with the Mayor, which came near leading to blows between the two. Smalley had been testifying and not liking the expression on Love's face, pointed his finger at Love and said:

"If you don't believe what I say, get up here and deny it."

Love jumped to his feet and shouted out:

"Don't you point your finger at me; I won't stand it. I won't allow anybody to point their finger at me, much less you, and if I do get up I will show you up."

It was with difficulty that the Recorder restored order.

An amusing feature of the trial occurred during the cross examination of Love Love when Reed asked him how old he was. Love replied: "I am plenty old enough to vote; don't forget that." Reed endeavored in cross examining to make Love contradict himself, but failed.

The prosecution testified that Goodwin fought desperately to keep from being arrested and to turning the horses from the church property.

The defense testified that Goodwin was on the church property when arrested and taken away. This testimony was upheld by Chief of Police Campbell.

Counsel Swackhamer moved that the case be dismissed on grounds that defendant had violated no ordinance. He held that Goodwin had a right to protect the property, but the counsel's motion was overruled.

Goodwin has ten days in which to institute certiorari proceedings, which, if he does, will be taken to the Supreme Court of New Jersey, as this is the only court to which an appeal can be made from a borough Recorder's decision.

Disputed Ownership of Property at Watchung

Regarding the strip of land which is in dispute by Dr. R. Moldenke, of Watchung, and Mrs. Geibelhouse, of Plainfield, but who owns considerable property in Watchung, a reporter of the REVIEW interviewed Dr. Moldenke who made the following statement: "Regarding the dispute on a strip of land between myself and Mrs. Blume-Geibelhouse, which was commented upon this week in the Plainfield papers, the following additional facts may be stated.

"Before erecting the Castle on the property deeded me by my father, I had a survey made and discovered that the strip in question, which was included in his holdings, was being used by Mrs. Blume-Geibelhouse. It seems that the strip was originally sold to a man by the name of Regur, but not having the consent of the mortgagee, the sale was declared void by the Sheriff in a subsequent transaction. Nevertheless I took pains to get a deed from Regur, thus having two deeds for the land in question at the present time. The Moldenke family, however, have always paid taxes on their full acreage, which included this strip. Until the recent survey by myself there had been none since the Regur matter originally took place. Mrs. Blume-Geibelhouse, however, had her place surveyed and must have known that this strip was not entered in her deed.

"The fence which I have put up is along the line of her own survey.

"After endeavoring for a year to bring about a peaceable solution of the difficulty, I am forced to take decisive action by an attempt on the part of Mrs. Blume-Geibelhouse to put the disputed piece under cultivation. I have now complete possession and will maintain it at all hazards."

Shrewsbury and Plainfield Half Yearly Meeting of Friends.

The Shrewsbury and Plainfield half yearly meeting of the Society of Friends was held in the Old Meeting House on Watchung avenue, Thursday and Friday. The morning session, Thursday, convened at 11 o'clock, the religious service being addressed by Wm. M. Jackson, of New York; John Shotwell, of Manasquan; and prayer was offered by Wm. Williams of Plainfield. Following this service was the business meeting during which the affairs of the Society were adjusted after the usual manner.

In the afternoon at 3 o'clock a Philanthropic meeting was addressed by Anna M. Jackson, of New York. Her subject was the "Race Question," and she told particularly of the work of the Friends in the colored schools of the South.

The program for the evening session was prepared by a Committee of the Young Friends' Association, and was very entertaining. Recitations, readings and songs were given by Zila Scheff, Wm. D. Williams, John Shotwell and Agnes Cooley. Andrew J. Gavett, Jr. very cleverly performed a number of slight of hand tricks which were very interesting to young and old

A religious meeting was held Friday morning at 11 o'clock.

On both days meals were served in the rooms at the Meeting House, to those in attendance.

Death of a Respected Citizen

Andrew Vanderbeek, of Plainfield passed away at his home Wednesday morning. Mr. Vanderbeek had been a resident of Plainfield for forty years. He was an active member of the First Baptist Church, and also took much interest in temperance matters.

Friends were permitted to see the remains from 2 until 4 yesterday afternoon. Brief services will be held in the church at North Branch, N. J., this afternoon at 2 o'clock.

A fire broke out yesterday morning in a shed at the rear of John Goodwin's house and destroyed some wall paper which he had stored in there. Mr. Goodwin was prostrated by the excitement and a physician was summoned.

A Woman's Auxiliary to the Y. M. C. A. Formed

A Woman's Auxiliary to the Y. M. C. A. was formed last Tuesday, of which Mrs. Stephen Cahoone was elected temporary chairman and Mrs. J. W. Gavett was made secretary pro tem. Regular officers will be elected later. The next meeting will be held Monday, November 30, at 3 o'clock in the Association building.

Somerset County County Freeholders Thank J. B. Duke.

The Somerset County Board of Freeholders this week passed resolutions thanking James B. Duke, the president of the American Tobacco Company, for building miles of stone roads through his large estate in the county, and declaring that he had enhanced the beauty of the county and increased the value of property. Mr. Duke is now engaged in more extensive improvements on his estate than ever before.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

Charles Moore, of 1238 West College street, Philadelphia, was arrested by Game Warden Guthridge at Camden terminal Monday night on a charge of having in his possession a rabbit that he was about to take to Philadelphia in violation of the Jersey game laws. Justic Barr imposed a fine and cost of $23 40, which Mr. Moore promptly paid.

Last week great flocks of "frost" or gray-back snipe fed on the beaches of Cape May County, and gunners enjoyed fine sport shooting them. Former Councilman Crawford Buck, of Sea Isle City, made a record kill. He rides a bicycle on his gunning trips along the beach. The birds are more easily approached on a wheel or in a wagon than thau they are on foot.

The present fall will go down in history as remarkable for the number of second crops of spring and summer fruits that have been gathered by farmers in the vicinity of Burlington. October strawberries, raspberries, blackberries and plums were common, while last week J. H. Vanneiver, of the Columbus road, picked his second crop of Bartlett pears.

Steps are being taken toward changing the public road along the river between Califon and the railroad bridge near Hoffman's. The recent high water has damaged the roadbed considerably and in many places made it almost impassable. A petition will be circulated among the taxpayers, to be presented to the Lebanon township comittee, praying for the building a new road on higher ground farther from the river.

The Passaic Valley Flood Commission at their meeting at Paterson last Saturday to here suggestions as to methods of preventing a recurrence of floods, listened to C. C. Vermeule, formerly of the State Geological Survey, who suggested storage reservoirs at different points along the Passic. It was brought out by City Engineer Harder that the bottom of the river was now six feet higher than a few years ago.

Members of the Newark Board of Trade have won their fight against the Merchants' Association of New York in the matter of the proposed closing of the drawbridges over the Passaic and Hackensack rivers and Newark Bay between 7 and 9:30 o'clock in the morning and 5 to 7:30 o'clock at night. While the board has not yet received the official report rom the War Department, Secretary Root has issued it, and it refuses the request of the New Yorkers.

There is a legacy of $10,000 waiting for Miss Margaret Carew, formerly a nurse in Paterson, if the local lawyers there can find her. It seems that three years ago Miss Carew was in a New York hospital, where she became acquainted with Frank J. Edwards, a civil engineer. The latter was a patient at the institution and Miss Carew nursed him back to health. On his recovery Mr. Edwards started for his home, in Pasadena, Cal., where he owns extensive orange groves.

Captain Harry Denyse of the oceangoing tug Unique, which towed in from sea last week the American ship Henry B. Hyde, says that he observed to the westward of the ship channel a humpbacked whale about 75 feet in length. At first sight he took the object to be a wreck, bottom up. In a minute, however, it disappeared throwing up the mud from the bottom and sending a column of water high in the air. This is the first whale sighted inside of Sandy Hook in a long time.

Glass factories in every town in South Jersey have such a rush of orders that they can not be filled. Moore Brothers Company is operating five furnaces to their fullest capacity, turning out more ware than ever before. In one day last

GOOD UNTIL NOV. 13, 1903.

PRESIDENT'S MESSAGE ON CUBAN RECIPROCITY

Washington, D. C.—The President transmitted to Congress the commercial treaty with Cuba, with the following message:

"To the Senate and House of Representatives:

"I have convened the Congress that it may consider the legislation necessary to put into operation the commercial treaty with Cuba, which was ratified by the Senate at its last session, and subsequently by the Cuban Government. I deem such legislation demanded, not only by our interest but by our honor. We cannot with propriety abandon the course upon which we have so wisely embarked. When the acceptance of the Platt amendment was required from Cuba by the action of the Congress of the United States, this Government thereby definitely committed itself to the policy of treating Cuba as occupying a unique position as regards this country. It was provided that when the island became a free and independent republic she should stand in such close relations with us as in certain respects to come within our system of international policy, and it necessarily followed that she must also, to a certain degree, become included within the lines of our economic policy.

"Situated as Cuba is, it would not be possible for this country to permit the strategic abuse of the island by any foreign military Power. It is for this reason that certain limitations have been imposed upon her financial policy, and that naval stations have been conceded by her to the United States. The negotiations as to the details of these naval stations are on the eve of completion. They are so situated as to prevent any idea that there is the intention ever to use them against Cuba, or otherwise than for the protection of Cuba from the assaults of foreign foes, and for the better safeguarding of American interests in the waters south of us. Those interests have been largely increased by the consequences of the war with Spain, and will be still further increased by the building of the Isthmian canal. They are both military and economic. The granting to us by Cuba of the naval stations above alluded to is of the utmost importance from a military standpoint, and is proof of the good faith with which Cuba is treating us.

"Cuba has made great progress since her independence was established. She has advanced steadily in every way. She already stands high among her sister republics of the New World. She is loyally observing her obligations to us, and she is entitled to like treatment by us.

"The treaty submitted to you for approval secures to the United States economic advantages as great as those given to Cuba. Not an American interest is sacrificed. By the treaty a large Cuban market is secured to our producers. It is a market which lies at our doors, which is already large, which is capable of great expansion, and which is especially important to the development of our export trade. It would be, indeed, shortsighted for us to refuse to take advantage of such an opportunity and to force Cuba into making arrangements with other countries to our disadvantage.

"This reciprocity treaty stands by itself. It is demanded on considerations of broad national policy, as well as by our economic interest. It will do harm to no industry. It will benefit many industries. It is in the interest of our people as a whole, both because of its importance from the broad standpoint of international policy, and because economically it intimately concerns us to develop and secure the rich Cuban market for our farmers, artisans, merchants and manufacturers. Finally, it is desirable as a guaranty of the good faith of our nation towards her young sister republic to the south, whose welfare must ever be closely bound with ours. We gave her liberty. We are knit to her by the memories of the blood and the courage of our soldiers, who fought for her in war; by the memories of the wisdom and integrity of our administrators, who served her in peace, and who started her so well on the difficult path of self-government. We must help her onward and onward, and in helping her we shall help ourselves.

"The foregoing considerations caused the negotiation of the treaty with Cuba and its ratification by the Senate. They now, with equal force, support the legislation by the Congress, which, by the terms of the treaty, is necessary to render it operative. A failure to enact such legislation would come perilously near a repudiation of the pledged faith of the nation.

"I transmit herewith the treaty, as amended by the Senate and ratified by the Cuban Government.

"THEODORE ROOSEVELT.

"White House, November, 1903."

Big Fire in Brooklyn.

One of the most savage fires that the Brooklyn (N. Y.) department has had to contend with in years destroyed nearly all of the big plant of Hermann Behr & Co., manufacturers of sandpaper, which ran from No. 31 to 45 Tiffany place, between Harrison and Degraw streets, entailing a loss of $200,000.

Sleeping Girl Expires.

Bessie Knecht, the "sleeping girl," is dead. She was taken to a hospital last February unconscious. After forty-seven days she partially revived, but soon sank into a coma, and never fully regained consciousness.

Lord Rowton Dead.

Montagu William Lowry-Corry, first Baron Rowton, died at London, Eng.

New Trial For George B. White.

George B. White, who was convicted in the United States District Court last May of wrecking the National Bank of South Pennsylvania at Hyndman and of making false statements to the Controller of the Currency, will get a new trial.

Italian Minister a Suicide.

Signor Rosano, who was appointed Minister of Finance in the new Cabinet in Italy, committed suicide in Naples by shooting himself with a revolver.

CONGRESS BEGINS WORK

Chief Features of Brilliant Opening of Extra Session.

The House Elects Cannon Speaker, and Members Take Great Interest in Drawing Lots For Seats.

Washington, D. C.—The organization of the House of Representatives in special session, called for the purpose of enacting legislation necessary to carry into effect the provisions of the Cuban treaty, was marked by no unusual departure from precedent. Interest, of course, centred chiefly in the election of the Speaker.

Mr. Cannon was formally presented to the House as its Speaker by the defeated aspirant, Representative John Sharp Williams, of Mississippi.

Representative Littlefield, of Maine, introduced a bill for the "protection of the President and Vice-President" and for other purposes, fixing the penalty for the killing of a President, Vice-President or foreign ambassador or minister as death, and fixing other penalties for attempts upon their lives or for conspiracy. It is a modification of last year's "anti-anarchy" bill.

The program for the two sessions appears to be a simple one. Legislation for Cuba, passage of the appropriation bill in amounts generous, but not extravagant, and a speedy adjournment seems the total sum of operations.

Of the many important subjects to be brought up in some shape or other before the time of holding the next national convention the recent postoffice scandals will form a leading question, without doubt. Democrats are certain to insist upon a Congressional investigation, while the Republicans are as certain to oppose such an investigation upon the ground that it would at this time furnish those indicted with weapons of defense.

The mail frauds, Indian frauds and pension frauds will also be subjects of partisan and bitter speeches; echoes of the W. A. Miller case and the "open snap" will be heard, the Senate will be stormed by those who will endeavor to deprive Senator Reed Smoot, the Mormon apostle, of his seat, not on the ground that he is a polygamist, but on the ground that he sanctions polygamy, and that the oath he took as an apostle of the Church is in conflict with the one he took as a Senator of the United States.

Another effort will be made to obtain statehood for Oklahoma, New Mexico and Arizona, with Senator Quay leading the statehood forces in the Senate and William Randolph Hearst, the Congressman-editor from New York, furnishing the ammunition to his Democratic colleagues on the House side.

And last, but not least, in the announcement of attractions there is Baker, from Brooklyn, another new Congressman, in his effort to awaken the conscience of his fellow lawmakers on the subject of free railroad transportation, a proposition which he is equipped, ready and willing to discuss and proclaim to the date of adjournment, or longer, if necessary.

BOSTON AND MONTANA WINS.

Still Authorized to Inspect Minnie Healy Mine Despite Appeal.

Helena, Mont.—The Supreme Court denied the right of F. Augustus Heinze and the Johnstown Mining Company for a writ of supervisory control in the matter of the order made by Judge Clancy, allowing the Boston and Montana Company the right to inspect the workings of the Minnie Healy mine.

The Boston and Montana Company was granted permission to inspect the underground workings of the Minnie Healy August 21, 1903, by the lower court of Silver Bow County. From this decision F. Augustus Heinze appealed to the Supreme Court for a writ of supervisory control. The order directed that the Boston and Montana Company, through its agents, was for ten days permitted to inspect and survey all openings in the claim extending toward or into the Piccolo and Gambetta claims, and all other openings except certain ones extending to the south and into the Snohomish and Tramway claims.

The Boston and Montana was also permitted to make weekly inspections of the Minnie Healy until a hearing of the case could be had.

Woman Hermit Dead.

Mrs. Mary Oliver, eighty-six years old, a widow hermit, who had the reputation in the neighborhood of being a miser, died in her squalid basement at No. 2293 Second avenue, New York City. The police searched the woman's apartments and found a bundle of first mortgage bonds in her favor on property in Harlem, to the value of $11,000, $3000 worth of life insurance papers on her own life, and $22,000 worth of United States Government bonds.

American Murders in London.

A verdict of murder and suicide was returned in London, Eng., at the inquest over the bodies of the latest victims of the Armenian feud. The names of the two members of the Huntchagist Society murdered recently were both given as Krikorian, while the name of the murderer and suicide is now said to be Dickran, alias Gorgie Yangie.

Wisconsin Village Wiped Out.

Bibon, a little village on the Omaha road, twenty miles south of Ashland, Wis., was destroyed by fire. The fire started in the mill of the Chicago Coal and Lumber Company, owned by J. H. Krueger. The loss will reach $75,000.

State Bank Dynamited.

The State Bank at Parker's Prairie, Minn., was robbed of $3000 by burglars. Dynamite was used to blow open the safe.

Three Killed by Dynamite.

Three men were killed by a dynamite explosion at Harrisburg, Va. They were W. H. Bowman, former Superintendent of Water Works Grant Dunable and Lewis Tame. Four men were injured. The men attempted to thaw out frozen dynamite, which exploded.

Dominican Town Shelled.

The town of Macoris, thirty-five miles east of San Domingo, was bombarded by a Dominican gunboat, but the rebel forces retained possession of the port.

MONTANA MINES OPENED

Truce in Copper War Gives Work to 20,000 Men.

Passage of Fair Trial Law Expected to Unravel Copper Mine Tangle—Amalgamated Company to Resume Work.

Butte, Mont.—In accordance with a statement made by William Scallon, President of the Anaconda Mining Company and the representative of the Amalgamated Mining Company in Montana to the Butte Miners' Union, that if Governor J. K. Toole would summon the Legislature in special session with a view of the enactment of a "fair trial" bill, which provides for the removal of any case from any Judge where bias and prejudice is shown, the Amalgamated would at once resume operations in Montana, the order was given for all the mines to open upon the receipt of news from Helena that the Governor had ordered an extra session to convene December 1.

The Governor has issued the call at Helena, following the presentation of petitions to him from practically every organization of labor and business men in the State of Montana, asking that an extra session be called, that legislation remedial to the present state of affairs be enacted.

The resumption of the Amalgamated properties means the return to work of approximately 20,000 men and the averting of an unusual crisis in Montana, as the Amalgamated Company operates in at least six different counties. In Butte alone it restores a pay roll of about $25,000 a day.

The Legislature is called especially to pass laws to relieve the industrial condition in Montana, caused by the shutting down of Amalgamated Company's properties.

The aim of the session is to pass a law whereby mining cases may be taken from one Court to another when the Judge in the initial Court is shown to be prejudiced. Other legislation of like character has also been promised.

A so-called fair trial bill of the character now proposed was passed by the last Legislature, but was decided by the Supreme Court to be unconstitutional on technical grounds.

Recently at Butte Judge William Clancy, of the District Court, gave a decision, in which he said that he might appoint a receiver at any time for the Boston and Montana Company, one of the largest constituent companies of the Amalgamated. The decision was made on the application of John MacGinnis, a prominent holder of stock in the properties controlled by F. Augustus Heinze, of the Montana Ore Purchasing Company, which has been at war with the Amalgamated for years.

Upon this announcement by Judge Clancy, President William Scallon, of the Anaconda Copper Mining Company and general manager of the Amalgamated, issued orders to shut down all the Amalgamated properties in Montana and elsewhere, declaring that the company, unable to secure judicial fairness in the Courts, could not continue in business.

The works of the Amalgamated Company will at once resume in various parts of the State. This includes the greater mines in Butte, the smelters of the Washoe Company, in Anaconda, the largest in the world; the smelters of the Boston and Montana Company, in Great Falls, also vast in their capacity; the coal mines at Storrs, Belt, Oakdale and in Wyoming; the great quarry in Northern Montana, and the immense lumber industries in Western and Northwestern Montana.

MAY COELET WEDS.

Greatest American Heiress Added to Peerage as Duchess of Roxburghe.

New York City.—Miss May Goelet was married to the Duke of Roxburghe in St. Thomas' Church, New York City, at Fifty-third street and Fifth avenue. Bishop Doane, of Albany, performed the ceremony, assisted by the Rev. Dr. Ernest M. Stires, rector of the church. Robert Goelet, the brother of the bride, gave her away.

The wedding, though a quiet and simple affair, was the most brilliant international marriage since Consuelo Vanderbilt became the Duchess of Marlborough.

The value of the splendid wedding gifts was estimated at $1,500,000. The Roxburghe family jewels, which include one of the finest collection of emeralds in Europe, were given by the bridegroom. The Duchess of Roxburghe's gifts include a head ornament of diamonds, a beautiful emerald ring and an old French fan, set with jewels. Robert Goelet's gift to his sister is a tiara of diamonds.

Fatal Riots in Spain.

Disorders of a serious nature broke out at Santander, Spain. Armed rioters attacked the shops, built barricades in the streets, and set fire to the Passionist Church. During the riots one man and a child were killed and several persons were injured. At Cabolon, in the Province of Toledo, the Mayor of the town was assassinated.

Bryan Agrees to $7500 Allowance.

William J. Bryan, with his counsel, appeared in the Probate Court at New Haven, Conn., for a hearing on the amount of Mrs. Bennett's allowance, pending the adjustment of the Bennett estate. Judge Stoddard's suggestion for $7500 a year was agreed to by Bryan as executor, and that amount was ordered by the court.

American Securities in Europe.

A trust company has been organized in Switzerland with a capital of $1,000,000 to handle American railroad securities.

Boy Murderer Gets Fifteen Years.

Charles Jones, a twelve-year-old colored boy, who confessed to the murder of Miss Caroline Link on August 30, pleaded guilty of murder in the second degree at Baltimore, Md., and was sentenced to fifteen years in the Maryland Penitentiary.

Missouri's Old War Claim.

State Auditor Allen has completed the war claim of Missouri against the United States for $475,186. The claim is for money paid for interest on union military bonds amounting to $6,400,000.

THE KAISER HAS A TUMOR

Operation Performed on the German Ruler's Throat.

SURPRISE TO COURT OFFICIALS

Removed Growth Declared by Famous Specialists to Have Been Entirely Harmless—Official Statements of the Operation Made to Reassure the Public—Kaiser's Father a Victim.

Berlin, Germany.—Emperor William was operated upon to remove a polypus (a tumor having ramifications like legs and feet) from the larynx.

The only inconvenience the Emperor suffers is that he has been enjoined not to speak until the wound caused by the operation heals.

The bulletins announcing the result of the operation caused much astonishment, even among court officials, who had no suspicion that the Emperor was suffering from any affection of the throat.

Every effort is made to prevent popular anxiety, even to the announcement that the Emperor has arranged a hunting party for three weeks hence. Details are given to the public with apparent frankness, much as they were sixteen years ago when Frederick's illness, though not its nature, leaked out through official channels.

It is admitted, though, that the Emperor is forbidden to speak, and is unable to eat any solid food. His temperature is said to be 36.3 centigrade, but save his physicians, the Empress and the Imperial Chancellor, Count von Buelow, alone were permitted to see him. Moreover, physicians and many laymen know the danger of such an operation exists less in the surgical act than in the consequences. A swelling of the glottis may result, which would stop the passage of the air to the lungs and suffocate him; pneumonia may set in, or the vocal cords may be affected so severely that the Kaiser never will speak again. The last possibility is dreaded, particularly in the light of the Emperor's enforced silence.

Perhaps the greatest cause of the alarm was the suddenness of the news. Even court officials of high standing had no warning of the Emperor's condition, and it is said the Kaiser himself did not know the malady had taken root in his throat until a few days ago. He suffered no marked discomfort from it—at first, anyway—and expressed astonishment when told the growth was on his larynx. The Emperor, from whose mind his father's fate never faded, was uneasy until assured by his physicians a polypus was not necessarily dangerous. When told it might be only a harmless tumor he seemed relieved.

The growth in the larynx at once suggested that the Emperor might be suffering from something worse than a simple polypus, but Professors von Lenthold, Ilberg, Schmidt and Orth supplement the bulletins in replying to inquirers by most positive personal declarations that the affection was merely a "good-natured polypus," not likely to return or to be followed by any evil effects.

Mexican Boer Colony Fails.

The efforts of ex-Senators Pettigrew and Marion Butler to establish a colony of Boers in Mexico have failed. As the representatives of a syndicate of American capitalists they purchased 800,000 acres of land adjacent to the Gulf coast between Tampico and the mouth of the Rio Grande. This land was purchased with the view of settling Boer families thereon.

Three Autoists Killed.

Two fatal accidents, due to fog, occurred at Gaillon, Department of Eure, France, prior to the automobile races that were held there. M. Danjan, one of those who were to take part in the races, while trying to avoid a carriage, ran his car into a ditch. He was thrown out and the car turned over on him, injuring him so badly that he died in an hour.

Turner Must Go Back.

Judge Lacombe, in the United States Circuit Court, handed down an opinion on the application on behalf of John Turner, an anarchist, who hoped, through a writ of habeas corpus, to escape deportation, ordered by the Washington officials. Judge Lacombe dismissed the writ, refusing Mr. Turner the right to remain in this country.

William L. Elkins Dead.

William L. Elkins, financier and street railway owner, died at his residence, Ashbourne, near Elkins Park, Pa., after an illness of more than a month. His death was caused by rheumatic gout and a hardening of the walls of the heart arteries. He was born near Wheeling, W. Va., May 2, 1832.

Senator Clark Wins Suit.

The great timber suit brought by the United States against Senator W. A. Clark, involving timber land in the Bitter Creek Valley, Western Montana, to the value of $2,000,000, was settled by Judge Knowles, of the United States District Court, in favor of Senator Clark.

Lynched by Five Men.

Zallie C. Cadle, who stabbed Policeman Cox at Brinkley, Ark., was killed by a mob and his dead body strung up to a telegraph pole.

Ecuadorians Are Pleased.

The recognition by the United States of the independence of the Isthmian Republic has caused great rejoicing among Ecuadorians.

Steamer Forces Blockade.

A Dominican warship prevented the Clyde Line steamer Cherokee from landing at Puerto Plata, and sent her to San Juan, whence, acting under Minister Powell's instructions, without papers or a pilot, she returned to Puerto Plata and forced the blockade.

Chilean Leader a Suicide.

Carlos Toribio Robinet, one of the most popular leaders of the radical party, in Chile, committed suicide in Santiago. He had been accused of embezzling the public education funds

COLOMBIA FILES PROTEST

Strongly Objects to Our Fostering New Republic.

Attitude of This Government Means That It Will Protect Panama Against Aggression by Any Nation.

Washington, D. C.—It was learned in official circles that the United States of Colombia has lodged a protest with the State Department against the action of the United States in connection with the events which have occurred on the Isthmus of Panama. In the terms of the protest it is known that strong objection is made to the attitude of the United States in general and against interpretations made by this Government of the treaty of 1846 between the United States of America and the United States of Colombia.

Other than admitting that such a document has been filed in the State Department, the officials there will say nothing about the matter.

President Roosevelt will have a new report on the Panama Canal route ready for submission to the Senate when the treaty granting a right of way through the new republic is presented for ratification. Admiral John G. Walker, Chairman of the Isthmian Canal Commission, will prepare this report. He sailed for Colon on the President's yacht Mayflower, carrying Admiral Coghlan, who will command the American naval forces in adjacent waters.

Mr. Bunau-Varilla has been designated to represent the Republic Panama here, but will not negotiate a new treaty. This work will be performed by a special commission.

The new treaty will give this Government either a lease in perpetuity or a cession of the canal zone. This Government can have its own choice. The United States will also be given full jurisdiction over the zone, both as regards government and sanitation. The four islands in the Bay of Panama will be given the United States. The monetary consideration for Panama will remain the same as in the old treaty, $10,000,000 cash and an annuity of $250,000.

LIQUOR BAN ON WHOLE TOWN.

Hotel Served With List Which Interdicts All Men of the Place.

Hillsborough Bridge, N. H.—The male population of Antrim has been placed under ban by former Governor D. R. Goodell, a well-known temperance reformer of that no-license town, who has legally warned a hotel here, the only place selling liquor near Antrim, not to sell to any male inhabitant of that place.

The hotel has been served with a list of those interdicted, which contains the name of every one of the 400 male residents of Antrim more than twenty-one years of age. No one is exempt, ministers, doctors, lawyers, and even Mr. Goodell's own name and those of his sons appearing in the document.

This is considered the most sweeping movement made under the new license system adopted last year. The license law provides that no liquor shall be sold to "any person where notice in writing has been given forbidding sale to such person from the parent, guardian, husband, or wife of such person, or by any magistrate or overseer of the poor of a town or city."

In the preamble of the warning left at the hotel, Mr. Goodell describes himself as a magistrate. The hotel people are withholding sale from all Antrim people until they obtain legal advice.

BRYAN IS MADE EXECUTOR.

Judge Stoddard Protests Against His Asking to Be Qualified.

New Haven, Conn.—Protest was made by counsel for Mrs. Grace Imogene Bennett against the qualification of William Jennings Bryan as executor of the will of Philo Sherman Bennett if Mr. Bryan persists in taking an appeal from the decision of Judge L. W. Cleaveland refusing to accept the sealed letter as part of the will.

The Court, however, permitted Mr. Bryan to qualify because the Probate Court does not have power to disqualify executors.

Mr. Bryan said to the Court that the estate is valued at about $302,000, a large part of which is in book accounts of the firm of Bennett, Sloan & Co., of New York City. He had no preference as to the amount of bond to be required of the executors.

The amount of the bond was finally agreed upon as $350,000.

Our Shoes Liked Abroad.

The popularity of American boots and shoes in other countries is illustrated by a Berlin letter to the London Commercial Intelligence, a leading trade paper of England. It says that "the importation of American boots and shoes into Germany is steadily on the increase. In 1900 they constituted over four per cent. of the entire imports of this class, in 1902 nearly ten per cent., and during the first half of the current year more than fourteen per cent."

Not Guilty of Fraud.

In the United States Court at Scranton the jury brought in a verdict of not guilty in the cases against the managers of the Correspondence Institute of America, who were accused of using the mails for the purpose of fraud. In these cases it was alleged that the institute advertised courses that it didn't teach, that it was a bogus concern.

Italy Recognizes New Republic.

The formation of the new Republic of Panama and its recognition by the United States is looked upon with satisfaction all over Italy.

Eight Lives Lost in the Kearsarge Mine.

Eight men lost their lives as a result of a fire in the Kearsarge Mine at Summit, Mont. All of the victims were suffocated. The origin of the fire is unknown. The financial loss will probably reach $100,000.

College Girl a Swindler.

Miss Maud Miller, a student in the Normal College, at Marion, Ind., was placed under arrest on a charge of raising one-dollar notes to tens. The work was done with pen and ink and she succeeded in passing four of them.

New York City.—Long coats made in the severe tailor style are among the features of the season and are greatly worn both as separate wraps and for the entire suit. This very excellent May Manton one is adapted to both uses and to all the season's fabrics, but is shown in light weight melton in military blue stitched with corticelli silk, and makes part of the costume.

COAT WITH PLAIN SLEEVES.

The coat is made with fronts, backs, side backs and double underarm gores which allow of a perfect and graceful fit. The seams at front and back extend to the shoulders and are concealed by the straps. The neck is finished in regulation coat style and the sleeves can be the plain ones with roll over cuffs or the full bishop sort as may be preferred.

The quantity of material required for the medium size is four and one-fourth yards forty-four inches wide, or three and one-fourth yards fifty-two inches wide.

Two Novelties of the Season.

Shirt waists with plastron effects are among the novelties of the season and are exceedingly effective. The one shown on the left of the large drawing is made of louisine silk in shades of blue and is piped with velvet and trimmed with ornamental buttons, but the design is equally well suited to all the silk and wool waistings and to the cotton vestings which are so popular. When the latter are used the lining can be omitted and the edges simply stitched or a trimming of braid substituted for the piping of velvet.

The waist consists of the fitted lining, which closes at the centre front, the fronts, the back and the plastron. The back is tucked from the shoulders to the waist line to give a tapering effect to the figure, but the fronts from the shoulder to yoke depth only and are gathered at the waist line. The plastron is cut on a curved outline and attached to the right side, hooked or buttoned over on the left. The sleeves are the fashionable ones of the season that are large below the elbows and small above and are finished with straight cuffs. At the neck is a novel stock with tie.

The quantity of material required for the medium size is four and three-eighth yards twenty-one inches wide, four and one-fourth yards twenty-seven inches wide, or two and three-eighth yards forty-four inches wide.

All broad shoulder effects are in vogue. The other very stylish blouse shown in the large drawing is trimmed and tucked to give continuous lines in waist and sleeves and is eminently graceful and smart. The model is made of cerise crepe de chine and is trimmed with heavy net with appliques of silk cherries and a ruche of chiffon, but all materials sufficiently pliable for fine tucks are suitable and the trimming can be lace or applique of any sort. The sleeves are wide and full over puffs of cream chiffon that are charming in their effect, but the under sleeves can be of the material if preferred.

The design is simplicity itself, all the effect of elaboration being obtained by trimming. The lining is smoothly fitted and both it and the waist are closed at the back. The yoke is separate, made of combined tucking and net, and below it the front and backs are laid in narrow tucks, those at the centre front full length, others extending to yoke depth only. The sleeves are arranged over fitted ... support the full puffs an... faced to form the caps ... the bell shaped portions ... for several inches.

The quantity of mate... for the medium size is fi... ty-one inches wide, three ... yards twenty-seven inches ... three yards forty-four inch... wide, with one yard of net forty inches wide, one yard of chiffon and half a yard ... tucking to make as illustrated.

SHIRT WAIST. TUCKED BLOUSE.

Persian Lamb Trimming.

Persian lamb trimming of lustrous fibre silk is one of the important accessories of the season. It comes in galloons of various widths and appliques of different forms, which, however, are invariably edged with a plain or novelty fibre braid. These will be much used, both in millinery and dress trimming, as will also wool embroideries on chiffon or taffeta in Oriental or pompadou colorings and cloth cut work in two colors outlined in black and white or pongee colored silk cord. Garnitures of wool embroidery in multicolors, with fringe ornaments and dangles, are attractive novelties.

The Gibson Girdle.

The latest belt, called rather unimaginatively the Gibson girdle, is wide in the back and tapers slightly to the front, where it is fastened with two straps and silver or gun-metal harness buckles. The girdle comes in black and colored leathers and has scalloped bands of self-colored or contrasting shades of leather stitched on either side, leaving a space between about an inch in width.

Soft Graceful Effects.

Soft, graceful effects in gowns are sought for this season, says a Paris correspondent of Bon Ton, and to gain this end skirts are made fuller and fuller, boleros and jackets are short, showing the high girdles beneath, and the sleeves admit of a hundred and ... of one designs as long as they are loo... and "doppy" with lace or pleated ... ruffles falling over the hand.

Woman's Fancy Blouse.

Fancy blouses retain all their favor and will be much worn during the coming season. This one, designed by May Manton, includes the new cape effect with the fashionable shallow yoke and princess closing and is fitted both to the odd waist and gown. The original is made of mauve crepe de chine, trimmed with ecru lace and bands of velvet in a darker shade, but all the thinner materials of the season are appropriate.

The waist is made with a fitted lining which closes at the centre front. On this lining are arranged the yoke, which closes at the left shoulder seam, and the portions of the waist proper. The back is plain, drawn down in gathers at the waist line, but the fronts are laid in box pleats at their edges and both they and the sleeves are tucked at their upper portions, the tucks providing fulness below. The little cape, or bertha, is circular and falls over the arms-eye seams, so giving the broad effect of fashion. The sleeves are snug for a short distance below the shoulders, but form full puffs at the wrists where they are held by straight cuffs.

The quantity of material required for the medium size is five and three-fourth yards twenty-one inches wide,

FANCY BLOUSE.

four and one-half yards twenty-seven inches wide, or two and one-eighth yards forty-four inches wide, with three-eighth yards of lace for yoke.

Why Our Future is Assured

By President Roosevelt

MANY qualities are needed by a people which would preserve the power of self-government in fact as well as in name. Among these qualities are forethought, shrewdness, self-restraint, the courage which refuses to abandon one's own rights, and the disinterested and kindly good sense which enables one to do justice to the rights of others. Lack of strength and lack of courage unfit men for self-government, on the one hand, and on the other, brutal arrogance, envy, in short, any manifestation of the spirit of selfish disregard, whether of one's own duties or of the rights of others, are equally fatal.

In the history of mankind many republics have risen, have flourished for a less or greater time, and then have fallen because their citizens lost the power of governing themselves and thereby of governing their State; and in no way has this loss of power been so often and so clearly shown as in the tendency to turn the Government into a government primarily for the benefit of one class instead of a government for the benefit of the people as a whole.

Again and again in the republics of ancient Greece, in those of mediæval Italy and mediæval Flanders, this tendency was shown, and wherever the tendency became a habit it invariably and inevitably proved fatal to the State. In the final result it mattered not one whit whether the government was in favor of one class or of another. The outcome was equally fatal, whether the country fell into the hands of a wealthy oligarchy which exploited the poor or whether it fell under the domination of a turbulent mob which plundered the rich. In both cases there resulted violent alternations between tyranny and disorder, and a final, complete loss of liberty to all citizens—destruction in the end overtaking the class which had for the moment been victorious as well as that which had momentarily been defeated. The death knell of the republic had rung as soon as the active power became lodged in the hands of those who sought, not to do justice to all citizens, rich and poor alike, but to stand for one special class and for its interests as opposed to the interests of others.

The reason why our future is assured lies in the fact that our people are genuinely skilled in and fitted for self-government, and therefore will spurn the leadership of those who seek to excite this ferocious and foolish class antagonism. The average American knows not only that he himself intends to do about what is right, but that his average fellow-countryman has the same intention and the same power to make his intention effective. He knows, whether he be business man, professional man, farmer, mechanic, employer or wage-worker, that the welfare of each of these men is bound up with the welfare of all the others; that each is neighbor to the other, is actuated by the same hopes and fears, has fundamentally the same ideals, and that all alike have much the same virtues and the same faults.

Our average fellow citizen is a sane and healthy man, who believes in decency and has a wholesome mind. He therefore feels an equal scorn alike for the man of wealth guilty of the mean and base spirit of arrogance toward those who are less well off, and for the man of small means who in his turn either feels, or seeks to excite in others, the feeling of mean and base envy for those who are better off. The two feelings, envy and arrogance, are but opposite sides of the same shield, but different developments of the same spirit.

The Great City Versus the Town

By the Editor of the Home Companion

THERE are a great many people in this country who inhabit great cities, especially New York, who have a fashion of decrying all life outside of a metropolis. They arrogate to themselves the brains and the world-knowledge and the taste of America, and turn a scornful lip at their provincial friends. With such we do not necessarily quarrel. It is pleasant to see people who are satisfied with their station. But there is a danger that persons who do not live in great cities will fall into a like belief and get to think that their own lines are cast in extremely hard places. The thoughtful man will not readily be convinced that all good is confined to big cities. A little experience will show him that he can live as deep and as large in a quieter neighborhood, seeing less, but with more time to digest what he sees. A huge city is something like a three-ringed circus. In one ring artists are performing all manner of little color stunts; in another people are dining in good clothes; on a stage men with tin armor and blunt swords are playing a game called drama; all around a track people are in various kinds of races for pennies. There is a great deal "doing" if you get to that, and the feats are wonderful, extraordinary, and what-not.

But does one get so much real enjoyment for one's money at a three-ringed circus as when one goes to the old-fashioned show with one ring, where he has just as much time to listen to the clown as to see a man turn a double somersault over six elephants? At least there is a reasonable doubt. And so there is about the advantage of a great city over a small one. A few good pictures, a few good books, a play or two, and time to think them over—this may certainly be as beneficial as a flood of stuff which one not only cannot see, but cannot possibly think about. And this does not take into account at all the opportunity for seeing green things every day, the chance to live where the nerves are not worn out by horrible noises. Upon the whole, the inhabitant of a small city will do well to count his blessings before he laments his fate.

Heroes and Heroines in Humble Life

By E. B. Sherman

CARLYLE in his essay on heroes seems to regard power and its exercise as the chief requisites of heroism and to ignore or minimize motives and moral qualities. Among his heroes the most conspicuous are Odin, Mahomet, Dante, Shakespeare, Luther, Knox, Johnson, Rosseau, Burns, Cromwell, Napoleon and others who by war, literature or oratory have largely affected the course of history and the destinies of men and nations. But Carlyle also says: The hero is one who lives in the inward sphere of things, in the true divine and eternal, which exists always, unseen by most, under the temporary and trivial. His heart is a piece of the everlasting heart of nature herself."

Emerson uses the words hero, heroic and heroism in a broader and more philosophical sense than Carlyle. Happily, he was free from the prejudice, the intensity and narrowness of the great Englishman. He says: "Heroism speaks the truth; it is just, generous, hospitable, temperate, scornful of petty calculations; it feels and never reasons, and therefore is always right."

It is easy to see that Emerson recognized heroism as depending in no manner upon the condition, limitations or accidents of human existence, but rather as a grand overtone whose infinite vibrations reinforce and turn into sweetest music the sound of every prayer, uttered or unuttered, the generous emotions and aspirations of every soul seeking a better life.

Cherishing a feeling of profound reverence and admiration for the great heroes, who through the ages have wrought grandly for humanity and achieved enduring renown, who inspired utterances and shining deeds have been graven upon imperishable tablets, and who have bequeathed to us and all coming generations the estimable legacy of their illustrious example, I must yet confess a doubt whether the most magnificent exemplars of heroism have not been found in the humbler walks of life, among those who, in their simplicity of soul and modest grandeur of character, never dreamed that in all the essentials of true manhood and glorious womanhood they held high rank in heaven's untitled aristocracy.

How many heroic souls, obscure and unknown, whose names have perished from remembrance, were wrought and fashioned in nature's divinest mould, and have made their lives sublime by gracious deeds of beneficence and self-abnegation!

As the most delicate and fragrant flowers are often found nestling modestly among the dead leaves or peeping timidly forth from some shady bower, so the most resplendent virtues blossom and diffuse their sweet aroma in the lowliest and roughest paths trodden by bruised and bleeding feet.

The rose may seem to add pride to peerless beauty; the lily to minimize its delicacy by a tacit demand for admiration; but the shy arbutus yields its unrivalled fragrance only to the earnest wooer who seeks it with loving care in the hidden nook where it was planted by fairy hands and perfumed by the breath of dainty dryads.

God has vouchsafed to the world no choicer blessing than the unconscious heroes and heroines who give to earth its greatest charm and without whose presence heaven would suffer irreparable loss.—Chicago Tribune.

CHILDREN'S DEPARTMENT.

D.F.
Said Fido "My-I love to sing- But isn't it a funny thing- That grown-ups should so jealous be- They always will throw things at me!"

THE MOTHERLY ROOSTER.

J. A. Bussard, who lives on the County Infirmary road, not far from the Jonas Bussard place, owns a large, awkward, philanthropic rooster that has lately become quite a curiosity in the neighborhood. He has assumed the parental responsibility of a brood of little chicks. By accident the little ones, when at a tender age, were deprived of the love and care of their mother, and save for this thoughtful rooster would have been left to face a cold and unsympathetic world alone. It is a fact that as soon as Winfield (this is the rooster's name) found out that the chicks were orphans he felt that something should be done, and as there were no volunteer stepmothers to come to the front, Winfield had the courage of his convictions to provide for the offspring himself. He began clucking much like an old hen, but his coarse tone of voice frightened the youngsters at first. Winfield did not get discouraged and by degrees won the confidence and affection of every member of the brood. His big feet scratched furiously for the support of his proteges, and he was soon the centre of attraction in the poultry yard. When evening came and he conducted the little innocents into a small coop where he had never been before, and gathered them carefully under his wings, the sight was something which Mr. Bussard regarded as almost incredible and simply amazing. The rooster continues faithful in devotion to his charges and they are growing finely. Winfield is a wonderful rooster and could possibly lay eggs if necessity demanded such an innovation in poultry circles.—Huntington (Ind.) Herald.

THE BOY AND THE CIRCUS.

I remember my first experience as a boy with the circus. The parade was to pass through my native village. We waited long for its appearance. Finally a huge golden chariot appeared filled with musicians. The band began to play and then the cages of wild animals, the elephants and the other attractions came in view. What a novel experience for a farmer's boy! No wonder we were wild in our anxiety to see the circus. A New Jersey boy was so fascinated with the show he was induced to run away from home and join the gang of men who worked for the circus. He was told that he would soon be promoted. His work was to help take down tents at night after the exhibition was given. He found that the work was the hardest he had ever experienced. He had no sleep at night. After the tents were taken down and loaded upon the cars the rough men were all congregated in one car and there they would usually become intoxicated or wild with drink. The poor farmer's boy, who left the sick mother at home and a loving father, fearing to remain in the car with his carousing companions, seated himself upon the bunker between two cars outside while the train was in motion. One of the men, crazed with drink, searched for the boy, and finding him in his secluded position attempted to drag him into the car. In doing so the boy's foot caught in the coupling and was terribly bruised. He kept on his way with this bruised foot for a week, after which time he appealed to the poor master at Rochester, N. Y. On examining the foot the boy fainted. The flesh of the foot had become rotten and the foot had to be amputated. As soon as the boy had recovered sufficiently he was sent back to his father and mother. He will have nothing more to do with circuses.

THE DISOBEDIENT MICE.

Two contrary little mice in disobedience of their parent's orders left their home one day for a stroll through the world. They had not gone far when they came across a plate of nice cool milk.

"Ah!" cried Tommy Mouse. "Isn't this fine? I told you we knew more about the world than our parents. See what we have found."

"Yes," replied Jimmy Mouse, "if we had listened to our parents we would have stayed at home and gone hungry."

Then they both fell to drinking the milk and drank and drank until they could hardly drink any more. And yet there still remained half of the milk in the plate.

"You had better trot along home," said Mr. Rat, who passed just then, "I see the cats coming this way."

"No, it would be a shame to run away and leave all this nice milk," said Jimmy. "I guess he doesn't know any better than our parents."

"I don t believe he does," said Tommy.

So they kept on drinking until they rolled over exhausted.

And just then two large gray cats came in the door.

"Let's run," said Jimmy in a weak voice.

"I'm so full I can't move," replied Tommy feebly.

"So am I," said Jimmy, with a sigh.

And those were the last words of the poor little disobedient mice.—Pittsburg Dispatch.

READING IN GROUPS.

Isn't too little attention paid by you young readers to the order in which you read books? It is not difficult to obtain lists of books so arranged that each helps in the understanding and appreciation of the following one. In the reading of Scott, for example, wouldn't it be wise to take them—or those you prefer—in the order of their time? First comes "Count Robert of Paris," then "The Betrothed," next "The Talisman" and "Ivanhoe," then "Castle Dangerous," "The Fair Maid of Perth," "Quentin Durward" and "Anne of Geierstein"—all of which are of times before the discovery of America by Columbus. Reading them in this order one has a better idea of the early times and appreciates each the more because of those before. If you are just beginning to read Scott try taking the books chronologically, in this way.—St. Nicholas.

"Are you nearly ready Helen?" Find Helen.—Brooklyn Eagle.

The Funny Side of Life.

THE ERA OF THE HUSTLER.

Lives of some great men remind us
That we will, if we are wise,
Leave our modesty behind us
And get out and advertise.

SELLING A BIRD.

Old Lady—"Does this parrot use any bad language?"

Bird Dealer—"No'm; but he's a young bird and easy taught."—Tit-Bits.

HIS ASSISTANT.

First Lawyer—"Does your assistant know anything about law?"

Second Lawyer—"Not a thing. We only keep him to draw up wills."—Life.

JUST SO.

Little Elmer—"Papa, what are follies?"

Professor Broadhead—"Amusements that we have grown tired of, my son."—Puck.

BRIEF.

Stella—"Is that a love letter from Jack?"

Bella—"No, simply a hasty note; it's only twenty-three pages."—New York Sun.

NEARING THE DANGER LINE.

Algernon—"Tommy, do you think your sister would marry me?"

Tommy—"Yes, she'd marry almost anybody, from what she said to ma."—Pearson's Weekly.

THE LIMIT.

"He's a mighty mean man."

"In what way?"

"Why, he's stone-deaf, and he never tells the barber until he is through shaving him."—Life.

MAN OR THE MACHINE.

Automobilist—"Say, where can I get some repairs made? I've met with an accident."

Farmer—"What d'ye want—a machine shop or a hospital?"—Leslie's Weekly.

INDISPENSABLE.

The Cow—"What are you good for, anyhow?"

The Frog—"Why, I'm one of the most useful animals in existence. How could the railroads get along without frogs?"—New York American.

THE ONLY METHOD SHE KNEW.

Husband (losing all patience)—"Oh, why are you forever bothering me for money in this way?"

Wife (coolly)—"I suppose it's because I can't think of a better way."—Philadelphia Press.

POST-NUPTIAL PLEASANTRY.

"I wonder if you have any idea how foolish you looked when you asked me to marry you?"

"No, I haven't, but I know I couldn't have looked half as foolish as I was."—Chicago Tribune.

KNEW A THING OR TWO.

Benedict—"How is it you've never thought seriously of marriage, old man?"

Bachelor—"But I have, dear boy. That's the very reason why I'm still single."—Ally Sloper.

AFTER THE PARTY.

Mrs. Upjohn—"Didn't it worry you almost to death to entertain that big crowd last night?"

Mrs. Highmore—"No, indeed. I enjoyed every minute of it thinking about the Yuppstarts and the Buttininus that I knew wanted to be here and that I hadn't asked to come."—Chicago Tribune.

THE GENTLE VOICE HE HEARD.

"Namoi," he said softly as he gazed at the moon above them, "isn't the evening beautiful? Do you know, strange fancies throng my mind on an evening like this? Every zephyr seems to bear gentle voices, perhaps from the spirit world. Do you hear such voices?"

Silence for a moment.

"I think I do, George."

"What do they sound like to you?"

"They are very indistinct, but they make me think that papa and brother Henry are calling the dog."—London Tit-Bits.

FABLE WITH DOUBTFUL MORAL.

"Honesty is the best policy," quoted the fine old gentleman, as he called attention to an undercharge on the part of the overworked waitress who had served him.

The manager indulged in a commendatory smile, and thoroughly agreed with him.

After the fine old gentleman had departed the manager sent for the overworked waitress and told her she was no longer worth four dollars a week to him. So the girl lost her job.

Question—Has any fine old gentleman a right to the possession of a four-dollar-a-week conscience?—Puck.

SATURDAY, NOVEMBER 14, 1903.

AN INIQUITOUS LAW.

The REVIEW has been at some trouble to ascertain just what the law is in this borough concerning the arrest and conviction of citizens without a legal warrant and without a right of appeal.

As we now understand it (and we have secured the facts from some legal gentlemen who ought to know), the following is the law on the subject:

By the Borough Act of 1897, which ex-Senator Reed had a hand in making, the mayor and recorder are constituted a court to try vagrants, disorderly persons and any person who may violate any ordinance of the borough. In other words, the mayor may himself sit in such a court any day, or the borough recorder may sit in the same manner in a court on any day, and each will have equal powers.

This means, in North Plainfield, that Mayor Smalley has the power to have a summons or warrant issued at his discretion against any persons charged with breaking the peace, being disorderly, or violating an ordinance of the borough; but if he chooses not to sit, then Recorder Thomas Doud may hold his court and exercise the same authority. The two courts have equal powers. Both these officers are given the right under the law to impose a fine not exceeding twenty dollars, or send the defendant to the borough lockup or county jail for ninety days, or do both, and from the verdict thus rendered by Mayor Smalley or Recorder Doud there is no right of appeal, unless the penalty imposed "shall exceed twenty dollars." And in no case can a man call a jury to decide the case unless the borough ordinance permits a penalty over $7.00, or imprisonment over seven days.

That this is an outrageous law there can be no question, because all that the mayor or recorder has to do in order to prevent an appeal is to make the penalty $19.99 or less, or send the defendant to jail for ninety days, and the right of appeal is absolutely taken away.

What show under such a law as this has any poor man in this borough? The John Goodwin case is exactly in point, because Goodwin was fined ten dollars and imprisoned temporarily in the lockup upon his arrest, and all right of appeal is taken away from him.

We are informed that should it happen that the recorder cannot make up a lawful record, there may be an order to have the judgment argued before the Supreme Court, which, will cost anybody, anywhere from $100 to $500 according to the charges of the lawyers, and the borough can appeal that to the Court of Errors.

In such case the poor man is entirely at the mercy of the borough, because, while he must employ and pay his own lawyer, the Borough Council must stand behind its officer and pay all bills for taking up such suit. In other words, it is one single man against the entire borough the moment the mayor or the recorder imposes a fine of less than twenty dollars, or does not fine but sends a man to the county jail for ninety days.

It was greatly to the credit of Assemblyman Swackhamer that, last winter, knowing the injustice of a legislative act of this kind, he introduced a bill in the Assembly to give the right of appeal in the recorders' courts and police courts, whatever the fine imposed should be; and he succeeded in getting it through the House of Assembly with only four votes against it. In the Senate, however, it was opposed very strongly by a leading Senator of one of our counties, who said that it would put the cities to a great deal of trouble to have to look after appeals of this kind in the county courts, and he succeeded in getting the measure killed.

The act which gives all these powers to mayor and borough recorder will be found in the Laws of New Jersey for 1897, pages 289 to 291.

While on this subject it is to be noted that the borough recorder is not to be elected by the people by this act, but is to be appointed by the Borough Council, and the practice has been to have them do it at the suggestion of the mayor. Such recorder is given all the criminal powers of a justice of the peace, who is obliged to be elected to the office, give heavy bond, etc. This is another matter which needs the attention of the legislature. If there is to be a borough recorder to perform all the duties of the mayor and of a justice of the peace, he ought to be elected by the people at large and not appointed. If he ran before the people at a regular election, he might be of entirely different timber from the kind which some mayors are apt to appoint

THAT SEBRING HOUSE MATTER.

There is something very peculiar about the attitude of the Borough Council and some of the borough officials concerning the removal of the Sebring house. Nobody seems to have expected that the removal of the house could be lawfully stopped, because there is no borough ordinance regulating the matter.

Or if it could be, why wasn't it?

The Borough Council passed a resolution on the motion of one of its members, who is a lawyer, demanding that an injunction be obtained preventing the removal. No such injunction was obtained, and, so far as we can learn, none was ever asked for from any court.

The next move was the arrest of Sebring and the workmen for obstructing the public streets, but, instead of locking them up and imposing fine, as in the case of John Goodwin, they were allowed to wait a week, and in the meantime, a compromise, which has not been made known to the public, is said to have been effected and the house is allowed to be set up in the borough.

It would be of great interest to the public if the facts in this case could be made known and published. For whose benefit was all this fuss made? What was to be accomplished by it? The public has its own ideas about the matter and so have we, and we are now gathering together facts about it which we propose to publish when the time comes to warrant it.

In the meantime the borough has been made laughing stock of in the city journals and elsewhere through the state, and all because of either most ridiculous blunders on the part of the Borough Council, or of some peculiar understanding which was not made public, but ought to be, and the sooner the better.

Those citizens who strongly objected to the removal of the old building from Plainfield to the borough had or had not rights in the matter, and, whichever was the case, they have been fooled with. As already there is talk of another old building being brought over to the borough from the corner of Watchung Avenue and East Front Street in Plainfield, the same questions are likely to arise again and probably with just as insignificant results.

That our people are getting tired of this sort of way of conducting our local government goes without saying. It is "neither hot nor cold," and is not in the interest of all our citizens, irrespective of their wealth or poverty, or of their friends or enemies.

WHAT A FARCE.

LAST Saturday a man in our borough was arrested by order of the Mayor, for preventing the dumping of some lumber on the property of the First Church of Christ, (of which the man is a trustee) was taken to the lock-up, placed in a cell, an act that nearly cost him his life, as the horror and repulsiveness of the place brought on an attack of heart trouble so that a physician had to be summoned immediately. Monday evening a hearing was given him before the borough Recorder when he proved by his witnesses that all he did was to refuse the unloading of timber on the church property, and when the Mayor insisted it should be done, he turned the horses aside and stepped back on said property, where the Mayor ordered his arrest. And yet, in spite of this testimony, the recorder found the man guilty and fined him ten dollars. Arrested, placed in a cell and fined ten dollars for protecting property of which he is a trustee!

What a farce the whole affair must seem, not only to the people of this borough, but to our neighbors!

A SWACKHAMER BLOW.

It takes the Newark *Evening News* to hit sledge hammer blows, as witness the following pertinent paragraph: "It was a regular Swackhamer blow that was dealt. Mayor Newton B. Smalley, of North Plainfield, by the people of Somerset County Tuesday. Mr. Smalley is in no position to complain against party irregularities. He can now sympathize with his friend Reed."

THE wave of "temperance reform" which has struck North Plainfield and resulted in the appointment of an investigation committee by the borough council is somewhat surprising in view of the fact that our real temperance workers have been trying for years to have illicit beer selling stopped in the borough. Coming so soon after the election it has been suggested that possibly the result of said election may have had something to do with the investigation.

Somerset County Roads

NOTICE TO CONTRACTORS.

The Board of Chosen Freeholders of the County of Somerset will meet at the Court House, in Somerville, in said county, on

TUESDAY, THE FIRST (1) DAY OF DECEMBER, 1903,

at ten o'clock in the forenoon, and up to eleven o'clock a. m., on said day, will receive and then and there publicly open and read, bids for macadamizing three roads in said county, as follows:

No. 1, extension of Mountain avenue from Wahnetah Drive in borough of Bound Brook northerly through Bridgewater township to Warren township line, a distance of 7,285 feet or 1 38-100 miles. For this road two bids are asked, one for 8-inch macadam and one for 10-inch rock bottom.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 4,890 cubic yards of earth excavation.

Price per square yard for 11,337 square yards of 10-inch rock road complete.

Price per square yard for 11,337 square yards of 8-inch macadam road complete.

Price per lineal foot for 1,500 feet of underdrains.

Price (lump) for the construction of the whole road complete.

No. 2 begins at Blazier's Corners in Bernards township and extends southerly through Basking Ridge to Davidson's bridge over the Passaic River, the county line near Millington, a distance of 16 898 feet or 3 1-5 miles.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 8,165 cubic yards of earth excavation.

Price per square yard for 14,423 square yards of 10-inch rock road complete.

Price per square yard for 9,300 square yards of 8-inch macadam road complete.

Price per lineal foot for 7,500 feet of underdrains.

Price per cubic yard for 500 cubic yards of binding material.

Price (lump) for the construction of the whole road complete.

No. 3 begins at Far Hills in Bernards township and extends northeasterly to middle of North Branch of the Raritan River at Schomp's Mills, thence crossing Bedminster township northerly through Peapack and Gladstone to the Morris county line.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 14,655 cubic yards of earth excavation.

Price per square yard for 5,350 square yards of 10-inch rock road complete

Price per square yard for 26,208 square yards of 8-inch macadam road complete.

Price per lineal foot for 8,000 feet of underdrains.

Price (lump) for the construction of the whole road complete.

No bids will be considered in which all items are not filled out.

Bids must be for complete work, including all materials.

No informal or unbalanced bids will be considered,

The price must be written in the bids and stated in figures.

Samples of trap rock to be used by the contractor, and a statement of the place where the same is obtained, must accompany each bid.

Each bid must be accompanied by the name and residence of the bidder, and with an affidavit that no person other than those mentioned is financially interested therein.

Each bid must be accompanied by a certified check of One Thousand Dollars, payable to the order of Wm. J. Logan, Director upon condition that if the contract be awarded to the bidder, he will, when required by the Board, execute an agreement in writing to perform the work according to the specifications.

The successful bidder will be required to execute a bond with two or more sureties to the Board of Chosen Freeholders of said county in the penal sum of the estimated cost of said work within 30 days from the award, or the bid will be declared forfeited. Bidders must satisfy themselves by personal examination or otherwise, of the nature and extent of the work and shall not at any time after submission of a bid dispute or complain of errors in estimates, nor assert that there was a misunderstanding in regard to the work to be done or the materials to be furnished.

The Board reserves the right to change a portion of the road from rock to macadam, and from macadam to rock, if it seems advisable, and the price of such work as stated in the bid by the square yard to govern such work.

The right to reject any or all bids is reserved to the Board.

The maps, profiles, specifications and blank bids can be seen at the office of Henry I. Budd, State Commissioner of Roads Trenton, N. J., and at the office of Joshua Doughty, Jr., County Engineer, Somerville, N. J.

By order of the Board of Chosen Freeholders of Somerset County.

WM. J. LOGAN, Director.

Somerville, N. J., Nov. 3, 1903.

SHERIFF'S SALE

IN CHANCERY OF NEW JERSEY.

Between John D. Kirch et al., Ex'rs, etc., complainant, and Walter P. Lindsley et al., defendants.—Fi. Fa. for sale of mortgaged premises.

By virtue of the above stated writ of Fi. Fa. to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE TWENTY-THIRD (23) DAY OF NOVEMBER NEXT.

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to-wit:

All that tract or parcel of lands and premises, situate, lying and being in the township of North Plainfield, in the county of Somerset and State of New Jersey.

Beginning at a stone planted for a corner in line of other lands of Elias Allen and being the southeast corner of lands this day conveyed to said Elias Allen by Aaron Allen, and running (1) thence along the line of other lands of the said Elias Allen in a magnetic course of north sixty-seven degrees and four minutes east (N. 67° 04' E.) a distance of one hundred and twenty-three and no tenths (123.0) feet to a cedar stake where formerly stood a white wood tree; (2) thence still along the line of other lands of the said Elias Allen north fifty-nine degrees and forty-three minutes east (N. 59° 43' E.), a distance of five hundred and ninety-eight and thirty-six one hundredths (598.36) feet to a stake and stone heap by a cedar tree; (3) thence along the line of lands of George Demler, crossing the valley and the valley road, north eighteen degrees and twenty-five minutes west (N. 18° 25' W.), a distance of thirteen hundred and eleven and twenty-three one hundredths (1311.23) ft to an angle point; (4) thence still along the line of said Demler up the mountain north no degrees and forty-five minutes west (N. 0° 45' W.), a distance of two thousand and one and seventy-eight one hundredths (2001.78) feet to a point and corner; (5) thence along the line of lands of formerly Dr. Corta Osborn on the northerly side of the second mountain south eighty-nine degrees and twenty minutes west (S. 89° 20' W.), a distance of eight hundred and ninety-five and ninety-five one hundredths (895.95) feet to a stone planted for a corner in line of lands of formerly said Osborn, said stone being the northeast corner of lands this day conveyed to Elias Allen by Aaron Allen. (6) thence along the line of lands this day conveyed to Elias Allen by Aaron Allen, running first over and down the mountain (through lands of the grantor), making and establishing a division line for property of Aaron and Elias Allen, south no degrees and nineteen minutes west (S. 0° 19' W.), a distance of thirteen hundred and fifty and no tenths (1350.0) feet, more or less, to a stone planted for a corner; then second along the the edge of woods north eighty-nine degrees and forty-one minutes west (N. 89° 41' W.) three hundred and twenty-five and ninety-five one hundredths (325.95) feet to a stone placed for a corner at the north rly end of the old lane; then third south five degrees and thirty-eight minutes east (S. 5° 38' E.) down the old lane six hundred and three and three tenths (603.3) feet to a stone planted for an angle point; in the old lane, then, fourth, south twenty-eight degrees and fifty-three minutes east (S. 28° 53' E.) across the valley road and the valley, a distance of eighteen hundred and ninety seven and thirty-seven one hundredths (1897.37) feet to the first above mentioned stone and place of beginning. Containing 76 68-100 acres, more or less.

Being the same premises conveyed to the said Walter P. Lindsley by deed of Elizabeth D. Burney (single), bearing date April 10, 1902, and recorded in Somerset County Clerk's office, in Book S No 9 of Deeds for said county, on pages 292, etc.

LET'S MAKE BELIEVE.

Let's make believe. Our life has too much sameness,
It's too prosaic, dull and commonplace.
Day after day the round of dreamy tameness,
A treadmill trodden at a plodding pace.
What seems most real at most is only seeming—
Why for apparent worries should we grieve?
Throw them aside and wisely go to dreaming.
Let's make believe.

Let's make believe. There is a land quite near us,
A realm enchanted, filled with pleasant things,
Where light and beauty ever are to cheer us,
An instant's flight on fancy's jeweled wings.
Right strange it is that we should here be staying,
That to base things we foolishly should cleave,
When that sweet childhood's game we can be playing—
Let's make believe.

Let's make believe there is no care or sorrow,
That *poverty and sickness are no more,*
That each bright day will bring a brighter morrow,
That for us greater blessings are in store.
Let's make believe that all for good is making,
That those we love our trust will not deceive—
Yet though there comes a time of bitter waking,
Let's make believe.

—Chicago News.

THROUGH FLOOD AND FIRE.

A steamer crossing one of the great lakes in a night of sudden tempest was thrown helpless at the mercy of wind and wave into the trough of the sea by the breaking of a part of the machinery, and it was feared by the panic-stricken passengers—and with just reason—that the hour of doom approached. They crowded the deck and impeded the action of the crew. They screamed and sobbed and prayed. One man who stood apart from the others prayed silently with a hopeless agony on his face. A friend with him touched him on the shoulder.

"Cheer up, Edgar, we are not lost yet" (he had a sudden contempt for the cowardice of the occasion) "at least let us die—if die we must—like men."

"It is not for myself I fear, Walter, but for Miriam; she is so sensitive, so loyal to those she loves; it would break her heart to have her lover drowned like this on the eve of her wedding. She could never outlive such a tragedy."

"She would not be the only one left [illegible] if we go down all these [illegible] with us. Think you, they [illegible]ne to mourn their loss?" [illegible]ried, Walter Dickson, responded.

"Theirs are not parallel cases. Miriam will be a widow, yet no wife. It will be a cruel disappointment of her plans for our happy lives. Walter, if you alone are saved tell her that she must learn to forget me. Her sweet young life must not be darkened by unhappy memories. Promise me."

Something like a sneer distorted Walter Dickson's face; he said with bitter emphasis:

"You have been blind, Edgar, blind as a mole. With eternity in view I must tell you the truth. Come below with me. If we are to die in this storm I shall ease your soul of its last fear. If we live you can prove the truth of my words."

He led his dazed and distracted friend through the tempest and confusion, dragging him by main force to the uncertain shelter of the deserted cabin, and God alone knows whether his motive was that of a sincere friend or the madness and triumph of a sinister nature. But what he told had at least the awful merit of truth.

On the same night on which the steamer with her precious human freight was tempest-tossed in the midnight blackness of the lake, a young woman was walking the floor of her room, wringing her hands in impotent anguish as she listened to the storm without. Her face was pale and worn, her eyes glittered with a feverish excitement. Every muscle was tense, and at last the strain became unbearable, and she rushed from her own room and sought that of an older sister, who was sleeping calmly and profoundly.

"Margaret!" she called, and shook the sleeper lightly.

"Miriam? What is it? Not time to rise, surely? Have you not slept?"

"No, no, how could I? Do you not hear the storm? It is awful! I cannot sleep."

The elder sister sat up and scanned the white face bending over her.

"You have not slept, and to-morrow is your wedding day! Miriam, you will look like a ghost."

"Do you hear the storm?" cried Miriam wildly. "If it rages so on land, how much worse it must be on the water, and Edgar is crossing to-night in the face of this storm."

"Miriam," said Margaret gently, "kneel here and let us say a prayer."

"I have been praying—prayed every minute this night. I hope God will hear me and send the boat on which Edgar is coming to the bottom of the lake!"

"Miriam! Sister, you are crazed. Do you know what you are saying? That you are asking God to destroy the boat that is bringing your lover to you?"

"Yes, yes—that is what I mean. I would be glad if they came and told me that he had gone down, and I was free—free—free."

Her voice rose to a pathetic shriek that blended with the wailing wind and died out in a moan.

"Then it is true—I did not, would not, believe it! You did not love Edgar Ryerson, and you do love his friend, Walter Dickson?"

But Miriam turned away. "Sleep again, my sister, I am sorry I disturbed you. My wedding day is dawning, and we shall soon know whether God has answered my prayer."

A brief line in the morning paper told the story. The boat had gone down in midlake with all on board.

Years had passed. Margaret had married a wealthy suitor, and Miriam spent part of her time with her, a pale, silent girl, absolutely devoid of interest in life. For whom was she mourning? She declared that it was not for Walter Dickson, that it was all a mistake that she had cared for him, save as a friend. Margaret, good and practical, was puzzled. Even her acute theology did not lead her to believe that God had answered the wild, blasphemous prayer of a crazed girl, but she laid her strange apathy to remorse over Edgar's death. And, loving the girl as she did, Margaret tried in every way to interest and amuse her. Miriam took part in these efforts, but without heart. Margaret never noticed the words of the little song so often on Miriam's lips:

"How could I know I would love thee afar
"When I loved thee not anear?"

They would have meant nothing to Margaret, but they voiced the cry of Miriam's soul. She loved Edgar afar.

The family, including Miriam, was giving a house party before closing their summer home on the banks of the lake—that lake of fatal import, where Miriam found her thoughts going out day and night. As a closing entertainment some one suggested a masquerade and a fire of driftwood, as the evening was cool.

When the evening of the masquerade came, Miriam wore a mask and domino. On account of the temperature the driftwood fire was the first attraction. A Hindu uttered the prophecies, while others fed the flame.

"I see," he said oracularly, "a sinking steamer. Two men—comrades—are with others upon its deck."

"Oh, this is shameful—stop him," cried Margaret, but her husband whispered something, and she waited, edging near Miriam, who in her attitude might have been a statue.

"The friend is telling him a lie, but he believes it, and when they two are saved by a miracle of the waters, he goes with him and makes no sign. He believes that his love is faithless."

The flame shot up blue and green, and the Hindu looked about as if seeking inspiration.

"The false friend has just died. He told the truth at the last. But he was not altogether wrong. The woman they both had loved had not returned the love of either. I can read no further." The pretended Hindu turned away as a domino touched his arm.

"Edgar!"

"Miriam!"

Joy never kills. The recuperative power it brings with it is phenomenal.—Mrs. M. L. Rayne, in Chicago Record-Herald.

Palace on Wheels.

The most magnificent railway traveling saloon ever constructed is nearing completion at St. Denis, telegraphs the Paris correspondent of the London Express. It is for the King of Greece, and will cost $100,000. The car is forty-four feet long and has its door in the middle. From the vestibule open out the reception and private apartments of the king. These include bed, toilet and bath rooms, and a library on the left, while on the right are the grand salon and dining room, each thirty-eight feet square.

There are blue silk hangings and polished walnut furniture in the king's bedroom, and the toilet room is a great achievement in artistic taste. The library, which is furnished in the Renaissance style, is furnished in polished walnut, and the ornaments are of bronze. Moss-green cloth, with fine embroidery work, covers the walls. The salon is hung with crushed strawberry colored silk, and the furniture is in mahogany. Every color from orange to violet is blended in the ceiling, from the centre of which hangs a great buttercup electric lamp. From the salon to the dining room is a step through mirrored doors. This room is hung with slate colored cloth, embroidered with silk, and the furniture is polished walnut.

To Build Your Fire.

A good many writers say "build your fire beside a tree to get up the draught." These men are not practical, says a writer, in Field and Stream. A fire for cooking should be "as big as your hat" and built in the most open spot you can find—entirely away from everything. The smoke will take care of itself then and never get in your eyes unless you get to leeward. If the wind is from the north you should face either east or west when you cook, and the wind will blow across the fire in front of you. If you face the wind or have your back to it, the smoke will get in your eyes every time. Let the wind strike your fire, and don't build it in an "eddy."

Both Very Tired.

Sir Edward Clarke, the noted English barrister, tells with glee how a young lawyer once scored off him. Late one afternoon a case in which Sir Edward was interested was called, whereupon he asked that it be put off until the following morning, as he had been arguing a case in another court all day and was much exhausted. The request was granted and the next case called. The young lawyer then asked for postponement of this case also, saying he was too much exhausted. The court asked what he had been doing. "If it please the court," was the reply, "I have been listening to Sir Edward Clarke."—New York Tribune.

THE NEWEST AMERICAN DUCHESS.

This fine and interesting photograph of Miss May Goelet, the new Duchess of Roxburghe, shows the greatest heiress in the world wearing most of her jewels and those of her mother.

Miss Goelet is here in fancy dress as Cleopatra, in which character she attended Mrs. Adair's famous ball in London last spring. It was the most splendid fancy dress ball ever given, and especially so in the matter of jewels. The Countess of Warwick was there as Queen Semiramis, Lady Randolph Churchill as a Byzantine Empress, and the Princess Hatzfeldt as Queen Esther with stockingless feet and jewels on her toes.

But among all these society leaders none wore such valuable jewels as Miss Goelet. Her headdress was a mass of pearls, diamonds and rubies blazing with colored light. Ropes of pearls hung down on each side of her face. Her neck was encircled with many necklaces, and her arms were laden with bracelets. The Oriental headdress was admirably suited to her dark type of beauty. The value of her jewels was not less than $300,000, but that is a trifle, for she is the possessor of $30,000,000 worth of New York real estate.

Miss Goelet has been brought up in the British aristocracy. Her aunt, Lady Herbert, is married to the brother of the Earl of Pembroke, head of one of the most ancient families in England. Her marriage to the Duke of Roxburghe, the only eligible Duke in the United Kingdom, will place her at the very top of British society, and her vast fortune will make her a brilliant hostess at Floors Castle, a great place, which has been neglected as much as Blenheim was.

DAUGHTER OF THE LATE OGDEN GOELET, WHO HAS BEEN CHOSEN BY THE DUKE OF ROXBURGHE FOR HIS DUCHESS.

HOT OR COLD.

Device Which Answers For Two Purposes.

The blow hot, blow cold paradox of the "First Reader" finds its parallel in the ventilated food cover illustrated herewith. This is designed to keep butter, cream, milk, meat, jellies, etc., in cool and perfect condition throughout the warmest weather, or, on the contrary, is equally valuable for keeping foods warm until served. In the first case the cover is filled with iced water, and in the second it is filled with hot water. Where a refrigerator is available, and even in refrigerators, the food cover can be used to assist in keeping jellies and pastry cold and firm. Where meals have to be kept waiting for irregular diners, as in a boarding-house, etc., the heat-retaining features of the cover are also valuable.

KEEPS FOOD HOT OR COLD.

"Furthest North."

The most northerly railroad in the world was opened recently. For its whole length it lies within the Arctic regions. The greater part of it is in Swedish territory, and only a small part cuts through the narrowest portion of Norway until it reaches the Norwegian port of Narvik. The chief object of the line, which now connects the northern Baltic with the Atlantic, is to open up the rich mineral resources of North Sweden and to carry them cheaply to Narvik. The new railway, which will be known as the Ofoten line, is about 140 miles long, and cost about $7,500,000.—Golden Penny.

One-third of the college graduates now are women.

CORN GROWERS' TROPHY.

Handsome Prize Offered For the Best Results in Increasing Crop.

"Let every farmer in the seven great corn States give a few winter evenings and 480,000,000 bushels will be added to the annual crop of the corn belt." In these words Professor P. G. Holden, of the Ames Agricultural College, of Iowa, summarizes the campaign instituted by himself and the Iowa Corn Growers' Association.

It is not increased acreage that Professor Holden wants; it is better results from the present acreage. It is not by any artificial culture he would bring about these apparently gigantic results. He promises and demonstrates that will be realized if the farmer does the simple thing of putting a hundred live kernels in every thirty hills.

His plan requires only the sorting by hand of seed corn into lots of uniform size and the filing of the plates in corn planters in such a way as to drop the required number of grains in each hill.

The Iowa Corn Growers' Association has been formed by farmers who believe in Professor Holden's theory. W. C. Whiting, of Whiting, Iowa, in charge of the Agricultural Division of the Iowa Commission for the Louisiana Purchase Exposition, has personally presented to Ames College and the Corn Growers' Association a trophy valued at $450, which will be awarded annually for seventy-five years for the best results in corn growing according to Professor Holden's theory. The trophy is entirely unique, representing an ear of corn eighteen inches long, the husks of silver and ear of gold, standing on an ebony case. Upon the base are four scrolls in silver, decorated by tiny golden ears of corn, upon which will be inscriptions of the names of the winners of the object for which the cup was given.

CORN GROWERS' TROPHY.

London Baths.

The Lancet has taken up a new crusade, this against London hotel keepers, who, the paper asserts, charge inordinate prices for their baths. American travelers are only too familiar with the prices charged for the morning tub. According to the Lancet, Claridge's and Carleton's are the only hotels in London where one can take a bath free of charge if he happens to have a suite to which a bath is attached. At the Grand, Grosvenor, and Metropole a sponge or hip bath in bedroom costs sixpence, but a hot or cold bath in a bathroom, and in a civilized bathtub, costs one and six. At the Victoria and First Avenue the rates for sponge baths and hot baths are like the preceding ones, but one can get a cold bath in a bathroom for a shilling. At the great Central and Hotel Russell one must pay sixpence for a sponge or hip bath in the bedroom, and a shilling for a hot or cold bath in a bathroom; while at the Cecil a sponge bath costs a shilling, and baths in bathtubs sixpence more. Is it a wonder that the real china tubs of our hotels are a source of unceasing wonder to our transatlantic cousins?

THE BIGGEST FAST HORSE

Size and speed are not commonly associated; indeed, one is apt to preclude the other. A large horse, for example, is not expected to develop much speed. All the more remarkable, therefore, is King Alar, reputed to be the fastest big horse, or the biggest fast horse in the world. King Alar is seventeen hands high and weighs 1450 pounds, but notwithstanding his size, made a trotting record of 2.26 when he was four years old. That was nine years ago, but this summer he equalled his record on the track at Shippan Point, Stamford, Conn. Moreover, he accomplished this feat without any previous preparation, and those who know him well believe he can do considerably better than this figure.

The big fellow has the kindest temper in the world, and his owner, Miss A. A. Marks, of Sound Beach, Conn., can hitch him up and drive him anywhere. She declares that he can draw a ton at a three-minute gait on a good road. So gentle is he that little children are allowed to play about him in his stall, and he seems to be as fond of them as a big mastiff dog.

Horsemen who have seen King Alar have expressed great interest in him as a rare specimen of what one type of American horse should be—large, powerful, and speedy roadsters.

THE FASTEST BIG HORSE, OR THE BIGGEST FAST HORSE IN THE WORLD.

SAFETY LAMP.

The inconvenience, not to say danger, of using unprotected light about gasoline or steam vehicles, says Automobile Topics, has been frequently dwelt upon. It is a real danger, as experience has proved more than once. Absolute immunity from this, as well as great convenience, is attendant upon the use of the hand searchlight illustrated, which is being marketed by a New York firm. It is nothing more nor less than an incandescent light enclosed in a glass bulb, the current being supplied by the dry batteries or accumulators used for sparking the motor. The lamp is supplied with sufficiently long wires to enable it to be carried to any part of the engine that may need examination. A hardwood tube incloses the lamp, and a screw cap protects the bulb when not in use.

HAND LAMP FOR AUTOMOBILES.

Deadly Low Voltage.

It is said that low tension electric currents, say under 120 volts, are more deadly than those having ten times the voltage. Dr. Bertelli and Professor Prevost have made the remarkable discovery that high-tension currents are capable of restoring the action of a heart that has been arrested by a low-tension current.

Riding the "Horseshoe."

Riding the "horseshoe" is a most curious custom that prevails at the coal mines located at Whitwell, Tennessee. The entrance to the mines is at the top of the mountain—one of the many parallel ranges of the Cumberlands—and the miners live either on a bench of the mountain, halfway down, or in the town of Whitwell at the foot.

The track on which the coal is carried to the railroad running through Whitwell is a steep incline two and a half miles in length, and the miners go up in the empty coal cars to their work in the mine; but to each man's belt is hooked his "horseshoe," on which he descends to his home again. More properly, it is a muleshoe, being longer than wide. At the toe a notch is cut, which fits on the rail. On the shoe is riveted a small square board—the miner's seat.

Sitting, then, on this tiny seat, his feet straight out before him, the hollow of a foot sliding down either side of the rail, and acting as a brake, the little muleshoe grasping that same rail, his arms widespread, dipping up or down, to balance him, like a buzzard, swinging and dipping in the air, the Tennessee miner shoots down that two miles and a half of steep incline at the rate of a mile a minute.

METHOD OF SLIDING DOWN THE RAIL.

A singing as of hissing wires precedes the miners, and they whiz past the observer, one after the other in quick succession. If a man gains too fast on the one before him, pressure of the brake—his feet—slackens his speed.

It dizzies one to watch them, and to think what might happen. Two or three have been killed, but hundreds daily ride the "horseshoe."

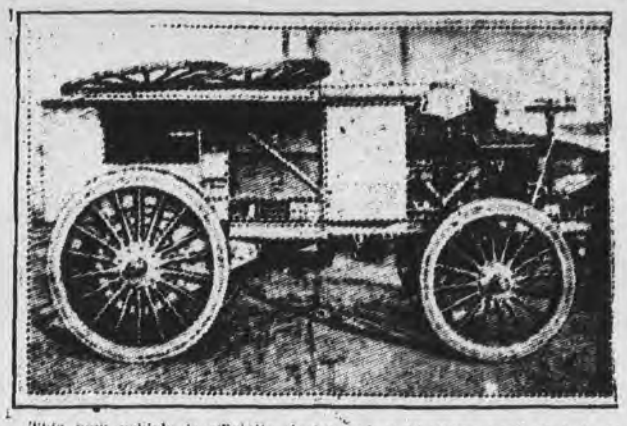
Those who live on the plateau stop there; the level ground slackens their speed and their brake is all sufficient; but so great momentum has been gained that those who wish to go on glide over this level space, of perhaps 200 yards, to the second stage of the incline below.

Who invented this ingenious contrivance we do not know, but, so far as we have been able to discover, it is in use nowhere else.

Our Mixed Population.

So diverse were the races in New York, and so liberal were the opportunities open to all, says the Chautauquan, that Governor Horatio Seymour was able to say that nine men prominent in its early history represented the same number of nationalities. Schuyler was of Dutch descent, Herkimer of German, Jay of French, Livingston of Scotch, Clinton of Irish, Morris of Welsh, While Hamilton was a West India Englishman and Baron Steuben a Prussian.

The Army's New War Automobile.



This new vehicle is officially designated a "battery van" and is intended for service in the field with light artillery. It is, in effect, an automobile machine shop, with a maximum speed of ten miles an hour, built to travel over rough country and capable of following the guns through rivers and swamps. The van will carry 4000 pounds of battery equipment, besides six men, and when ready for active service will not exceed five tons in weight.

HOUSEHOLD AFFAIRS

PEPPERMINTS.

Boil hard for five minutes four cupfuls of white sugar, one cupful of hot water, twelve drops of oil of peppermint and fifteen drops of wintergreen. Pour into a bowl and stir briskly until the mixture begins to thicken. Then drop on a cold tin dish as fast as possible. A small teaspoonful of the candy dropped on the dish will make a lozenge as large as a half dollar. Do not place the lozenges so close together that they will run into each other, or they will not be a good shape.

SWEETBREADS A LA MARYLAND.

Soak the sweetbreads in cold water slightly salted for an hour, then trim them well and blanch them. This is done by dropping them in a saucepan of boiling water to which a little vinegar, a couple of bay leaves, and a few drops of onion juice have been added; let the sweetbreads boil in this water about four minutes, then lift them out and drop them in cold water just half a minute; then drain them and lay them on a plate, put another plate over them and stand a heavy weight on them and leave them in a cool place till ready to fry; then have a kettle of swimming hot fat over the fire. Split the sweetbreads lengthwise, dip them in batter the same as for fried chicken, drop each piece separately in the fat and let them fry over a quick fire till a delicate brown; then lay them nicely on a hot platter with a few strips of broiled bacon and some corn fritters. Pour a rich cream gravy on the platter round the sweetbreads, and serve hot.

PARKER HOUSE ROLLS.

Put two quarts of flour in a deep mixing bowl, make a hollow in the centre, and put in the following: One tablespoonful of sugar, two of butter cut in small pieces, one pint of cold scalded milk and a cake of compressed yeast dissolved in half or two-thirds of a cup of lukewarm water. Cover with a folded towel and stand in a warm place if set in the morning. When the sponge is well risen add a teaspoonful of salt dissolved in a little warm water, mix all the ingredients to a smooth dough that will keep its shape, knead for fifteen minutes, then set to rise once more in a cool place and let raise for six hours. Then again knead for several minutes; roll out evenly until half an inch thick and cut with a good-sized biscuit cutter, put a piece of butter on one side of each biscuit, fold the dough over in centre, pressing down lightly, put in a warm place to raise for half an hour and then bake in a quick oven from fifteen or twenty minutes. Never let sponge or dough where it is too warm to hold the hand.

Broiled meats should be served as soon as cooked.

Brushing the under crust of a fruit pie with white of egg will keep it from being soggy.

Bits of left-over steak may be chopped, seasoned and made into tasty sandwiches for school.

Whiting mixed in a paste with sweet oil removes all spots from tin. Polish afterward with dry whiting and newspapers.

To remove vinegar stains from cruets, etc., crush an eggshell very fine, put inside the bottle with a little warm water and shake.

If the toughest and coarsest pieces of beef are dipped in vinegar before they are stewed, they will be found, when cooked, to be exceedingly tender.

If, when mixing flour for batter, etc., it should become lumpy, let it stand for a few minutes, then drain off the liquid carefully and start mixing again, pouring back slowly.

Camphor, as is well known, is useful in keeping away moths, but it should never be placed near sealskin, as it causes this fur to change color, producing streaks of gray and yellow.

Potato water is a thing that the most economical housewife throws away; yet it has a use. After scraping the potatoes, allow the water to settle, and then strain it. This liquid sponges dirt out of silk.

When scissors get blunt, sharpen them by opening and moving backward and forward on a piece of glass. The stem of a wine glass is suitable. It sharpens the blunt scissors and can be repeated when necessary.

Boots should have the rough dirt cleaned off with a hard brush, then scraped with a piece of soft wood, but never with a knife. Small quantities of blacking should be put on at a time, and polished off quickly.

Much of the dripping from a joint of meat is lost by evaporation in kitchen ovens. This can be avoided, and a large quantity of good dripping saved by taking out the dish when the joint is about half done and pouring off the fat.

A really tough fowl can be made into an excellent roast if steamed for an hour. Before placing in a steamer put a few stalks of celery and a slice of onion inside the bird to flavor it. When it is taken from the steamer, fill with a well-seasoned dressing. The fowl must be carefully handled in stuffing.

Colds

"I had a terrible cold and could hardly breathe. I then tried Ayer's Cherry Pectoral, and it gave me immediate relief."
W. C. Layton, Sidell, Ill.

How will your cough be tonight? Worse, probably. For it's first a cold, then a cough, then bronchitis or pneumonia, and at last consumption. Coughs always tend downward. Stop this downward tendency by taking Ayer's Cherry Pectoral.

Three sizes: 25c., 50c., $1. All druggists.

Consult your doctor. If he says take it, then do as he says. If he tells you not to take it, then don't take it. He knows. Leave it with him. We are willing.
J. C. AYER CO., Lowell, Mass.

FREE MEDICAL ADVICE TO WOMEN.

Don't hesitate to write to Mrs. Pinkham. She will understand your case perfectly, and will treat you with kindness. Her advice is free, and the address is Lynn, Mass. No woman ever regretted having written her, and she has helped thousands.

There are now somewhat over 100,000 students in our colleges, universities and technical schools, and somewhat over 50,000 students in our professional schools of theology, law and medicine.

Japanese warships equipped with wireless telegraph apparatus, have sent and received messages to and from Japan at a distance of about fifty miles.

HAPPY WOMEN.

Mrs. Pare, wife of C. B. ..., a prominent resident of Glasgow, Kentucky, says: "I was suffering from complication of kidney troubles. Besides a bad back, I had a great deal of trouble with the secretions, which were exceedingly variable, sometimes excessive and at other times scanty. The color was high, and passages were accompanied with a scalding sensation. Doan's Kidney Pills soon regulated the kidney secretions, making their color normal, and banished the inflammation which caused the scalding sensation. I can rest well, my back is strong and sound, and I feel much better in every way."

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE BY THE REV. M. W. STRYKER.

"Democracy and Christianity," the Subject of a Forceful Argument by the President of Hamilton College, Clinton, N. Y.—The People's Day Advances.

NEW YORK CITY. — "Democracy and Christianity" was the subject of a forceful sermon by the Rev. Dr. M. W. Stryker, President of Hamilton College, Clinton, N. Y., in the Brick Presbyterian Church, Sunday morning. Dr. Stryker said:

It is not always remembered that, on its human side, Moses founded a republican form of government. It was to be maintained through popular representation. The failure was in Israel, not in the idea. When Samuel anointed Saul he did it under solemn protest. It was a relapse from privilege. Kings were a makeshift and it turned out badly.

Seeking a sound philosophy of man and his affairs, and distinguishing humanity from its utensils and furniture, I would earnestly attempt the connotation of the two words which state—each in its own way, but with the strongest mutual bearing—the whole hope of mankind: Democracy, Christianity. You may run out, in their reach and width, the many propositions which I can now only utter, not amplify. I have only time for the broadax and the adz.

I used the word "mankind"—that is, *man-kinned* — related, cousined, brothered. When Paul, the apostle, speaks (literally) of "the whole fatherdom in heaven and earth"—he affirms the broad and elemental gospel theorem of the common origin, *the common opportunity*, the common concern of all humanity. "God hath made of one blood"—"In one spirit all baptized into one body"—such phrases characterize this whole new covenant and contemplate *the rearrangement of the world.*

A unity of privilege, duty, affection—a common derivation, development and goal—the doctrine of the essential solidarity of man. To affirm this is the instinct, the *infrangible purpose of the gospel. Either* this mutuality, this cohesive and integrating impulse, working its way steadily, however slow its stages, or at last a sterile race and a shattered star!

Economics? It is the law of the world's housekeeping. Politics—it is man's common citizenship. Philanthropy, equity, law, ethics, religion—these are the bonds that transcend race and region and date. Before their scope provincialism passes into insignificance. History is the record of the painful but steady evolution of human unity—homogeneity. Sociology is ethics.

This is the "unceasing purpose" of time. Man's nature involves society. He is environed by his fellows. He is born into and constructed for their close relation. This is his irrevocable constitution—the means toward it, better or worse, are but by-laws. The one inevitable, the others provisional and tentative. These are changed and shaken, that remains. The definition and practical ordering of this relation, whether by means better or worse, the assertion of partnership and federation, in whatever degree of wisdom—the assertion of a common weal (or woe)—this is government.

However they have blundered, or stuttered, or fumbled, the experiment toward the organizing of human life and its activities have been experiments in search of fair and fruitful terms under which men may live together. Perceived or unseen, the ends of government are to secure the well being of men as men, and that be the best government which most quickly and effectually seeks the utmost welfare of [illegible] within its control—which seeks a ri[illegible] and equitable society. As a means to t[illegible] ...ded.

...once to note the ...plications of the ... of government (or ways of getting on together) which men have attempted and exhibited.

Autocracy—the rule of one man, centering all power in his own person and responsible only to himself. "L'etat c'est moi." Absoluteism—an imperfect man cannot, a perfect man would not; for either way individually is frustrated. *Despotism is misanthropic.*

Monarchy—which ordinarily implies a degree of consent and delegation of power, and has wide limits according as the subjects have great or small influence. *The forms of monarchy are not inconsistent* with real popular power, only then their terminology is an anachronism and their retention a superfluous and absurd expense.

Plutocracy is the rule of wealth—the power of money holders as such. It is subtle and subversive of men. That it goes by "community of interest," by silent arithmetic, does not indeed necessitate, but makes possible *oppressions not* less actual because insidious and unavowed. It has ruined great peoples. For "community of the interested" is widely diverse from the interest of the community. The peoples also "cannot serve God and mammon." Plutocracy is not a commonwealth. Weal itself is not mere wealth. The word "wealth" begs the question. Plutus was blind!

Oligarchy, the "few" in power, whether a clique, a bureau, a "machine," or a ring, and by whatsoever means installed and tolerated. Its selectness and separateness and virtual assumption is its odium. Its irresponsibility is its vice. Its selfishness is its defeat. It refuses to share.

Aristocracy, literally the rule by the best, ideally an excellent term and thing, practically, however, the self-elected at their own rating—what one has called "the fine irony of an entailed nobility!" Hereditary privilege tainted with pride and superciliousness and snobbery and the dry rot of these—a non-sequitur, still exploiting the many for the few, class prerogative and the non-human proscriptions of caste. The "best" should rule in the interests of what is good, but the self-styled best, nursing their own exclusiveness, may become the worst.

Anarchy! Contradiction in terms! The law of lowlessness, the rule of caprice and all violence, denying authority in that license which is the parody and ruin of true liberty! Freedom crushed under the absoluteism of the mob!

Theocracy—the reign of God, actual while God is God, truly realized in universal recognition of Him "the first and the last and the living one;" but never delegated to any vicegerent, installed in the common consent of free consciences and when usurped by kingcraft or priestcraft the basest perversion of the highest truth.

Democracy: Self-government by the people. The dignity of the people is the intention of their Creator. He who is the source of this self-rule, is also its only security. Each man with, not apart from, every other, directly and jointly responsible to God. The highest law final—man absolved from all usurpations, and, as a man, secured in the perfect freedom of the largest obedience. *Democracy may be* a name for the mere tyranny of the multitude—a subservient mass a prey to passion and to schemers who are its panderers—flattering while they degrade. But then *the "rule" is lost, and the demos is by* his means thwarted of his ends. Democracy is ideal when it meets all the conditions of total responsibility to God—when in the high peerage of that loyalty *of creature to Creator all neighbors love* all neighbors as one family of the highest! Love, vertical and lateral, is its law—the "perfect law of liberty."

Therefore, I hold both that Christianity *intends democracy, and that only in its* reality can democracy thrive or endure. Other foundation it cannot lay. If the Son of Man shall make the peoples free they shall be free indeed, and not otherwise. *His autonomy is theirs. His valu*ation exalts them. His rights secure theirs. In Him, who is all in all, they are complete.

A republic is a democracy conveniencing its self-rule by representatives who are its agents. These are but trustees and stewards—accountable to the people's intelligent will. Other, they are defaulters.

Believing that under God man shall not fail, I believe utterly in democracy as the final experiment of time, up on which all others have led. If this idea is bankrupted all goes down. Only as it reasons deeply as to the source of its rights and the scope of its duties shall it avert failure and cataclysm. God, or the deluge!

I believe in democracy because I hold that man is not a mechanism but a mechanic—that every individual soul of the race is sacred, that the probation of mankind lies in the full consent to human equality before God, and to all the equities which that involves. Here stands the last bulwark against tyranny. This must be the method, if there be any, before which a false subordination and a false insubordination are both to be banished. The salvation of the peoples is in a divine human society which at last shall realize the whole purpose of Jesus Christ. It has not yet been seen; but "to this bear all the prophets witness"—a society feeling all its common responsibilities, and "each for all" fulfilling every relation—this, and because it is "ideal," is the finality. In it *democracy and Christianity would* meet, and righteousness wed peace!

To conquer this ideal into actuality is the task and travail of time—to doubt that it can be is to surrender the cause of *mankind.*

There is now in some quarters a sickly and sentimental dissent from the goal of democracy, and a cowardly whispered preference against the substantive claim *of man as man. This reluctancy from the* burden of the problem and disregard of the good of the many is ordinarily traceable to a selfish and absentee spirit. It assumes to distrust what love of ease dislikes, and what comfortable and complacent apathy would postpone. Its investments are all in the present, as it is, and it will take no stock in the future as it should be. It interprets the major considerations of life by the minor. "The offense of the cross is not ceased." But it is crucifixion that leads to resurrection. Away with this droning and whining pessimism!

And, on the other hand, there are those who applaud democracy without reckoning its principles and its foundations. Between it and absolutism there is, in time's long run, no logical half way. Can man learn that democracy brings no one down, but every one up? Can man learn its reciprocities and its emancipations? Will man see the basilar doctrine of the inherent value and birthright of each several soul—value to itself, to all others and to the one God of all?

If not, then all falls apart and a society not made up of a bulk of subservients and a few preferred creditors is a fatuity and a dream, and the Nazarene was a dreamer. But that way lies the madness of anarchy.

Any government is, at a given time, strong, as the ratio is of its people (or parts) who believe in it and are ready to back that belief. Ultimately it is as strong as it has principles worthy to be believed in. The bottom idea of democracy is the utmost diffusion of two things: (a) authority, (b) responsibility. Both of these. Neither goes well or far, or can stand fast, alone. These balanced centrifugal and centripetal forces maintain the orbit. All the phases and hopes of a genuine and rational democracy are reducible to the balance of this double idea. The duality is critical.

By this as a definition I will stand—that true democracy is a government in which every whole man, and because a man, counts one. Persons are the units, and government of, by and for these is the sum of all its parts. Its spirit is as great as the number of spirits that share it, and as good as the number of good spirits that share it. Its division exactly equals the dividend, and the quotient is one.

"Division of labor," which is made to mean "you labor and I divide," *is not* democracy. Since, in this long division of "authority and responsibility" every man should be fitted to count one. Democracy menaces itself, denies its raison *d'etre, when it for a moment neglects to* seek this fitness of its merits. Representation is of these fit merits. The proxy is valid only in this. The ballot affirms the importance of each integer. Its qualified intelligence and its unmolested freedom is its safety, that always it shall be counted as one, and never more or less. Less or more is the suppression somewhere of manhood; less, it were tyrannized; *more, it were tyrannical. To corrupt, to* seduce, to intimidate or to suppress it is to violate democracy. Democracy alone causes the rights of a minority to fear a majority. For all and by all this recognition of man declares that *because every* man should count one he shall! No other method of government declares this, or attempts to realize it. Resting its case upon "the right assessment of what constitutes human value," it implies that rights and duties are strictly correlative and reciprocal. It studies its rules in the daylight of its principles. Our Supreme Court is governed by this overruling equity. Democracy is its test and its dictum. It is the ultimate national refuge of the people. It gives the higher law.

The distributive assignment of government is the radical end of democracy, not descending to man, but ascending with him. It is not paternal, but fraternal.

Human ethics rising from loyalty to one mere tribe or clan—Ishmaelitish!—rises toward the comprehension of manright. The history of this growth of human institutions, making and remaking themselves, discovers that they move with the instinct of a generic human life. The impulse strengthens as if by hydrostatic pressure. That great democrat, Lincoln; that splendid representative of the fine old aristocratic family of man, said well, in 1856, what has the broadest possible application: "They who deny freedom to others deserve it not for themselves, and under the rule of a just God cannot long retain it." The paramount doctrine of equal rights is that each soul has a divine right, a kingly and knightly right, to all the liberty he can use, and has the right to stand up in his Maker's image, to show what he can use. Its formative proposition is that a just society lies in the good of all its elements, and that this good lies in the removing, by pick or powder, of all avoidable hindrances to the affirmation of social personality, lies in its enabling and ennobling (so far as circumstances can) each unitary being to live the fullest possible life.

All "liberty" has social limitations, and its problem is to reduce these limitations to the lowest terms necessary to and consistent with its own utmost diffusion. Freedom also is law.

It is not the commercial, the strategic, bearings of the Monroe doctrine that makes it strong in our American hearts *and determination*, but its immense moral meaning that democracy shall not have its providential arena narrowed, nor its scope thwarted by the imposition of another theory of the people. America (noble *America) is the vantage ground* and the bulwark of popular free government, and to maintain this high theory of man undangered, we will fight if need be (though God forbid the need) if all the *seas are to run red!* It was this tremendous instinct in which, in one of the noblest wars of time, we rose up to lift Cuba from under the bloody heel of the line of Philip II. and of Alva. The people's day *advances.*

I come, therefore, to assert that which I have tried to approach, and this it is: That the aim of a true democracy is in the most complete accord with the aims *of the gospel. Both are emancipative.* Their implications are mutual. They alike stand or fall upon the proposition of the universal spiritual rights of all men as men. Each breaks down all "middle wall of partition," and unlooses "the yoke of bondage," opens the gates of day to "every creature under heaven!" Each seeks the greatest quantity of the highest quality. Christianity, truly measured, comes (in the strong words of Henry Nash, in that splendid little volume, "The Genesis of the Social Conscience"): "To make the best the world knows native to the humblest."

"In His name—'Son of Man'—the great Emancipator has "authority to execute judgment" upon all oppressions. He is man's Man! His authority intends the commonalty of all souls yielding to Him a supreme loyalty. His church is the democracy of freed men. Abolishing barriers, rending divisive artificialities, leveling up, not down. He introduces the autonomy of those He redeems from every inhuman bondage, and recalls every child of Adam, every "prisoner of hope," to be in his true birthright a prince and a priest. All for each and each for all is the bold and beautiful charter to which His signature is given, and which is sealed with the sign of the cross! Under it all "suffer and rejoice together."

Democracy is not "the multitude in power, with no adequate ideal to elevate and to guide;" for that is not rule; but it is the people bound in a fraternity, an equity, a unity, in which all are common shareholders in an uplifted and celestialized manhood.

Democracy, justly conceived, is *indigenous* to Christianity—Christianity implies democracy and nothing short of it. Dependence (upon God); independence (of all insalutary duress); interdependence (as members of one great human *body); these are the three august watch*words of what the Son of Man prepares and will perform. They are cardinal. All temporizing expedients will fail. They are dozy and brittle. Paresis stamps *them. They are judged.*

All the real progress in the idea of what a genuine democracy includes, and what it excludes, has been, consciously or not, an appreciation and incorporation of *Christ's ideas of man. It has been* a painful process, slowly penetrating the intricate processes and sodden politics of the world, attended by harsh parodies and bitter failures; but it has been continuous and culminating, and at last it will conquer.

The errors and follies of men in the sacred name of mankind have been appalling. Liberty has been declaimed to by those who were "themselves the servants of corruption," but the very currency of the counterfeit is a testimony to the value of the true coin.

Timid souls shrink back from the birth-pangs of change. The near-sighted and ease-loving refuse to think large enough to see what lies in that proposition, in which the evangel is cognate with the law of liberty—that every man is a man. But the virgin's magnificat is the enunciation of a new society. It is a prophecy. An apocalypse is folded in it. "He hath put down the mighty from their seats and exalted them of low degree."

That cause of the people, which by the utmost widening of responsibility engages and educates the largest number, grows with each latest day. Before its "awful rose of dawn" the lanterns of groping years are superseded. The law of the spirit of life, as Christ, the people's Man, interprets it, making all classes "dangerous classes," and those the most so who must absent themselves from the concerns of men at large; it instills the conviction that an actually human relationship yields to no "adverse possession" of privilege, and that the dynasty of the minority must pass.

For democracy America stands. To it we are shut up. This is the people's land. By Christianity democracy shall stand and by naught else. If it denies the law of Christ, it denies that which begat it. A divinely human society, from God and through men, with the two great and last commandments as its pillars, is that to which we are summoned if we are to *keep faith with men and God.*

Signally, before the envious nations, we are to chasten, unhold, defend that idea, vide as the earth is. We cannot evade the duty, and we must not sell the blessing. *To retreat or to retract* would be to relinquish that opportunity of which America is the trustee—not to exploit a continent, but to uplead a world. New and emphatic providences thrust this double *faith upon us.*

The cause of the peoples—of all the people, the cause of mankind and of every man, specially the lowest and the least—is the cause and the only cause of democracy, and it also is the cause of Him whose errand was liberation, and who, as the eternal deliverer, lives to accomplish all His invincible decree.

Hail, Thou Son of Man! Let all the people praise Thee! Then shall the earth yield her increase! The enlargement of all the sons of men is Thy supreme argument and evidence. They shall walk at liberty because they seek Thy precepts. If Thou shalt make us free we shall be free indeed. Love is Thy law and the fellowship of love its answer. Unto Thyself save Thou this America.

Well did Grover Cleveland say this spring at St. Louis: "It is a solemn thing to belong to a people favored of God."

They Trusted God.

There was a knock at the door of Aunt Fanny's pleasant kitchen one morning, and on the steps stood a little girl with a basket on her arm.

"Don't you want to buy something?" she asked as she came in. "Here's some nice home-knit stockings."

"Surely you did not knit these stockings yourself, little girl?" said Aunt Fanny.

"No, ma'am; but grandma did. She is lame, and so she sits still and knits the things, and I run about to sell them; that's the way we get along. She says *we are partners and so I wrote out a* sign and put it over the fireplace: 'Grandma & Maggie.'"

Aunt Fanny laughed and bought the stockings, and as she counted out the *money to pay for them Maggie said: "This* will buy the bread and butter for supper."

"What if you had not sold anything?" asked Aunt Fanny.

"You see, we prayed, 'Give us this day *our daily bread,' and God has promised* to hear when folks pray; so I guess there wasn't any 'if' about it. When He says things, they're sure and certain."

Happiness in Work.

Some people dream of happiness as something they will come to by and by, at the end of a course of toil and struggle. But the true way to find happiness is as we go on in our work. Every day has its own cup of sweetness. In every duty is a pot of hidden manna. In every sorrow is a blessing of comfort. In every burden is rolled up a gift of God. In all life Christ is with us, if we are true to Him! If we have learned this secret, even the things that seem unpleasant and disagreeable yield joy in the doing. A traveler in South Africa saw some boys playing marbles, using pebbles. One of these rolled to the traveler's feet, and, picking it up, it seemed to him only a rough stone, without beauty or worth. But as he turned *it over a gleam of light flashed from one* spot of it. It was a diamond. Duties seem dull and dreary to us, unattractive, hard, but they infold secrets of happiness which we find when we accept them with *love and do them cheerfully.*—Rev. J. R. Miller.

A New Note.

Make up your minds that definite and *settled opinions in theology, if not within* easy reach, are possible, are desirable, are worthy of intense inquiry. Shake off this lethargy which allows you to remain in eternal suspense, this indifference which *you call liberality, this apathy you name* candor. It needs, I doubt not, some finer and more generous statement to win the ear and heart of Christendom, but I feel a mighty confidence that, the first time now *that Christian theology clears her trumpet* and utters a not uncertain note, the voice of Channing will be the dominant of the strain.—Henry W. Bellows.

SCIENCE & MECHANICS

The amount of heat produced by an average man in a day's work is sufficient to raise sixty-three pounds of water to boiling point.

The Italian Government is considering a scheme to introduce electricity *on a large scale* in the island of Sardinia. The island is rich in waterfalls.

A naval gun when fired sustains a pressure of from fifteen to seventeen tons to the square inch. It has previously stood a charge giving a force of twenty tons to the square inch at the proving grounds.

One effect of the acquisition of the new insular possessions of the United States is shown in the enormous increase in the sugar trade. In the last fiscal year we imported more than 5,000,000,000 pounds of the commodity, of a valuation of over $190,000,000.

Workmen on the Paris Metropolitan in Paris have found a well preserved mammoth tusk in the excavations on the Place de l'Opera. M. Boule chief of the paleontological museum, says that in Paris the ground is full of fossils. Several fine fossils of mammoth and other animals have been discovered in the Paris subsoil.

Electricity is making rapid progress in the Land of the Nile. Not only Cairo and Alexandria, but almost every city in the interior is now lighted by electricity. The telephone system of the larger cities is being extended, and electrically propelled boats will soon ply on the Nile. The system of electric tramways is also being greatly extended.

Most of the prominent shipbuilding yards in the Mikado's Empire are being reorganized and steam power is all parts of the yards and their various shops is rapidly being superseded by electricity and compressed air. The chief reason for this is the general scarcity of water. For the Nagasaki yards, for instance, water has to be brought to the works by boats at an annual cost of over $10,000.

At a recent statistical congress it was reported that in the last thirty-two years in this country the annual number of deaths from heart disease had increased from 7.9 to 12.7 in the 10,000 inhabitants. In the same time apoplexy as a cause of death has risen from 3.4 to 5.8; liver troubles decreased from 3.1 to 2.6; cancer increased from 3.4 to 5.6; suicide from 0.9 to 1.7; typhoid fever decreased from 4.5 to 2.9; and pneumonia increased from 14.6 to 22.5.

His Best Cow.

Of the childhood of C. Oliver Iselin they tell many stories in New Rochelle, where Mr. Iselin has his country house, All View.

According to one of these stories the boy and a half dozen other boys took a walking trip through the State of New York, a number of years ago. One night rather late they passed a farm whose gatepost bore the sign, "Milk for Sale."

Young Iselin said, "We'll have some fun with the milkman," and he entered the yard, busied himself mysteriously for a moment and then pounded on the door.

A figure in white appeared at an upstairs window, and a bass voice said: "What's the matter down there?"

"The matter is," piped the boy, "that your best cow is choking. You had better come down to her."

The milkman dressed and hurriedly descended, but of his informant he could find no trace. Neither could he find any trace of a choking cow. There was, however, a turnip stuck in the pump spout. With an oath he drew it out and returned to bed.—New York Tribune.

St. Joseph's "Unique" Ferry.

A ferry is plying across the Missouri River, a short distance north of St. Joseph, which is described as something unique. It is not run by wind, steam or electricity, but solely by the force of the river's current. Its proprietors call it a "trolley ferry." A steel cable is passed across the stream, over the boat. This cable passes through two stationary pulleys on the deck. By means of these pulleys and the cable the boat is held so that the current of the river strikes it at an angle of about forty-five degrees, and in this "sideways" fashion the current forces it across the channel. It carries 100 tons of cargo over in four minutes. There are no fuel bills to meet, no engines to keep in repair, and no engineers to pay, and as the boat is liberally patronized by farmers, truck gardeners and poultry breeders living near Wathena, on the Kansas side of the river, it is bringing in large dividends for its owners.—Kansas City Journal.

Wounds by Rusty Nails.

Every little while we read in the papers that some one has stuck a rusty nail in his foot or hand or other portion of the body and lockjaw resulted therefrom and that the patient died. If every person were aware of a perfect remedy for all such wounds and would apply it there would be no such reports would cease. The remedy is simple, always on hand and can be applied by any one, and, what is better, it is infallible. It is simply to smoke the wound or any bruise or wound that is inflamed with *burning woolen cloth.* Twenty minutes in the smoke will take the pain out of the worst case of inflammation arising from such a wound. People may sneer at this remedy as much as they please, but when they are afflicted by such wounds just let them try it.

MARSHALL FIELD AND CO.'S WAREHOUSE MANAGER

Cured of Catarrh of Kidneys by Peruna.

HON. JOHN T. SHEAHAN, OF CHICAGO.

Hon. John T. Sheahan, who has been for seventeen years manager of Marshall Field & Co.'s wholesale warehouse, and is corporal 2d Regiment Infantry, I. N. G., writes the following letter from 3753 Indiana avenue, Fort Six, Chicago, Ill.:

Peruna Medicine Co., Columbus, Ohio.

Gentlemen:—"Last summer I caught a cold which seemed to settle in my kidneys and affected them badly. I tried a couple of kidney remedies largely advertised, but they did not help me any. One of my foremen told me of the great help he had received in using Peruna in a similar case, and I at once procured some.

"It was indeed a blessing to me, as I am on my feet a large part of the day, and trouble such as I had affected me seriously, but four bottles of Peruna cured me entirely and I would not be without it for three months' salary."—JOHN T. SHEAHAN.

Mr. Jacob Fleig writes from 44 Sumner avenue, Brooklyn, N. Y.:

"I am now a new man at the age of seventy-five years, thanks to your wonderful remedy Peruna."—Jacob Fleig.

Catarrhal inflammation of the mucous lining of the kidneys, also called "Bright's disease," may be either acute or chronic. The acute form produces symptoms of such preminence that the serious nature of the disease is at once suspected, but the chronic variety may come on so gradually and insidiously that its presence is not suspected until after it has fastened itself it roughly upon its victims.

At the appearance of the first symptom Peruna should be taken. This remedy strikes at once at the very root of the disease.

A book on catarrh sent free by The Peruna Medicine Co., Columbus, O.

Jamaica Tea.

Tea culture experiments have proved successful in Jamaica and it is now hoped that this most unlucky island will prove an ideal place for the growth and cultivation of tea. The Chinese varieties grow luxuriantly, but more hope is placed on the Assam and Ceylon hybrids.—Mexican Herald.

$100 Reward. $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

HAPPENINGS IN NEW JERSEY.

Continued From First Page

week ten carloads of glass went from this plant. More men and boys are at work than at any time before in the history of the town. In Woodbury three furnaces are running full handed, and more ware is being turned out than in any previous season at this time. Night and day shifts at Glassboro run the plant continuously there, and at Williamstown two forces are at work also. Swedesboro has added another small furnace this year and the two are turning out orders rapidly.

Dr. John Dewitt, of Princeton Theological Seminary, has presented to Princeton University library for its large collection of old curiosities a small book rack, made from wood of the house in Stockbridge, Mass., in which Jonathan Edwards used to live while preaching in that town. The rack is particularly interesting here as Jonathan Edwards was Princeton's third president. This same house was also occupied by John Sergeant, many of whose decendants have been closely identified with Princeton as students and other-wise.

There was great excitement last Monday at Perth Amboy in the neighborhood of Masterson's chop house when Mrs. Masterson discovered, as she says, that her son Roy, who is only sixteen years old, was to elope with Lizzie Peterson, a waitress employed in the restaurant. The girl was absent when Mrs. Masterson discovered the alleged plan and the boy disappeared when his mother started a scene. The police were called and for a time it looked as if the couple had eloped, but after a search the boy was found in the big ice box in the basement, hiding from his mother. He was taken in charge by his relatives.

J. M. Brown, W. H. Peterson, Joseph Stevens and John Doerr, cranberry growers in a small way, living at Hammonton, have been swindled out of about $1,000 by an alleged firm of commission merchants of Brooklyn, N. Y. Some time ago this firm sent an agent there to buy up cranberries, and he selected those who had small crops, offering large prices for the products of their bogs. The growers sold readily, and began shipping at once. In a few days they got their checks, but when they placed them on deposit the checks were returned marked "no good" and the growers have been unable to get any information of the firm. No returns at all were made on some of the shipments.

Trading Stamps Must go.

A meeting of more than twenty five of the most prominent business men in Morristown was held Monday afternoon in the Parker building, to take some action in regard to the use of trading stamps. For some time merchants have been complaining that they were not satisfied with the system, and felt something should be done to get rid of it. H. C. Reynolds, who was elected chairman of the meeting, stated that it was the intention to specify a particular time at which merchants should cease to use the stamps. After some discussion December 1 was decided upon.

In order that customers who have at that time stamp books which are partly filled should not lose by this sudden discontinuance, the business men agreed enough stamps would be given such a customer to fill a book.

A resolution was passed which reads as follows: "Resolved, That it is the sense of this meeting that the system of doing business with trading stamps is wrong, and working both to the disadvantage of the merchant and his customer. That the giving of these stamps will be discontinued December 1, thus giving collectors of stamps three weeks in which to fill their books."

It was the opinion of all the business men present that the public was ready to have the stamps go and it was the duty of the merchants to muster courage enough to war against their use. A committee was appointed to carry out the details of this resolution. Here is an opportunity for Plainfield merchants to throw off this yoke of oppression and benefit themselves as well as their customers.

New School House at Basking Ridge

The formal opening of the Basking Ridge school house took place last Monday afternoon. Visitors were present from Gladstone, Peapack, Bernardsville, Liberty Corners, Stirling, Madison and Somerville. The program began with prayer by the Rev. Nicholas Bowers, of Millington. Interesting addresses were made by County Superintendent Krebs, of Somerville, and the Rev. Mr. Jamison, of Basking Ridge. The program was interspersed with songs and recitations by the scholars. Van Cleve Mercker, president of the Board of Education of Bernards Township, presided, assisted by Willett Neer, principal of the school.

The old school house at Basking Ridge is still standing and is a noted building. It was erected in 1800 by Dr. Samuel Finley, a pastor of the Presbyterian Church of the place who headed a classical school in this building for forty years. Among his pupils were three sons of Dr. John Logan, of Germantown; Theodore Frelinghuysen, William L. Dayton, who afterward served in Congress and as Minister to France; Samuel L. Southard, Aaron Cooper, Ezra Dayton and Commodore Stockton, who later became the hero of the Mexican War.

Among prominent men who formerly attended the "old brick school house" were the Rev. Pennington Alward, who later became a missionary to Africa and there gave up his life for the cause; Professor Walter Rankin, of Carroll College, Wisconsin; the late ex-Mayor John C. Rankin, of Elizabeth; Hon. L. A. Thompson, James and Theodore English, of Elizabeth, and Joel Post, father of Colonel Geo. B. Post, of Bernardsville.

The old building has been purchased by the Woodmen, a local lodge, and will be fitted up as lodge rooms.

Embezzled his Employers.

A special dispatch to the *Evening News* from Somerville states that Joseph Taylor, for the last eight years a trusted collector for H. K. Trumpore, a grocery man at Somerville has left town, and he is accused of embezzling a considerable sum of money from his employer. It is believed that Taylor has carried on a systematic robbery for a number of years and the extent of which is not yet known.

His employer recently became dissatisfied with the collections in the country districts, and started on a tour of investigation. In a few hours Trumpore discovered that Taylor had given receipted bills for $100 in small amounts to customers and had failed to turn in the cash. When Taylor was confronted with the evidence of his guilt he broke down, it is said, and made a confession.

Ten years ago Taylor was a trusted clerk of Newman Brothers, grocers, of Plainfield. He embezzled a large sum of money from that firm and escaped punishment. He became an outcast, and was ill and half clothed when Trumpore took him to his home, where he was cared for until he regained his health. Trumpore believing that he had reformed, gave him another chance.

here seems to be little trouble for ng men and women to secure good iness positions if they are thoroughly alified. During the past week, the Plain d Business College has had several re calls than they were able to supply.

union Thanksgiving will be held in First Presbyterian Church Thanksing morning by pastors, members and ngregations of the different local churches of Plainfield except Grace Episcopal and Crescent Avenue Presbyterian Churches. They will hold individual services.

Rev. F. E. Whiteside of Drew Theological Seminary, who was formerly a reporter on a Plainfield newspaper, will address the Y. M. C. A. meeting on Sunday afternoon at 4 o'clock. Miss Florence A. Tucker, who was the soloist at the last two concerts of the Y. M. C. A. Orchestra, will sing and the Boys' Musical Club of the Association will play.

At a large gathering of the members at the Park Club last Saturday evening, the president of the club, S. St. J. McCutchen in behalf of the club presented Samuel Townsend with a handsome twelve bore, hammerless gun as a token of their appreciation for personally supervising the improvements recently completed in the club building.

Under the auspices of the Ladies' Society of Grace M. E. Church a sociable and entertainment was held in the church Thursday evening. The program consisting of piano and vocal solos by Miss Alice Carroll and trombone solos by Kenneth Shupp were pleasing. An autograph quilt was presented to Mrs. Earp. Refreshments and sociability concluded the program.

The funeral services over the remains of E. E. Johnson were held Wednesday afternoon from his late home on Manning avenue and afterward from Bethel Chapel. The services were in charge of Rev. F. D. Tilden and Rev. J. H. Bean. Delegations from the Stone Square Lodge of Masons and from the Odd Fellows were present. Interment was made in the Methodist Cemetery.

Must be Colder Now.

With all the characteristics of a summer afternoon shower a heavy thunderstorm passed over Atlantic City Tuesday afternoon. It lasted about an hour. The weather until last evening has been like early summer. Many persons were in bathing during the shower.

A Borough Wedding.

Miss Ella Wray Van Nest, daughter of Mr and Mrs. G. H. Van Nest, of Whitewood avenue, this borough, and George Scholes Robinson, were united in marriage, Wednesday by City Judge W. N. Runyon. The bride and groom left for Florida where they will make their home.

New Rural Free Delivery Routes.

James L. Lambert, of Fanwood township has been appointed by Postmaster Bird for the Rural Free Delivery route No. 1, and Leslie Tingley, of Plainfield, for route No. 2. Lambert's route leads to Alton and covers a distance of 22⅝ miles; Tingley's follows the Plainfield line south and west and cover 22½ miles. There will be one delivery and one collection a day. This delivery will go into effect December 1.

Early Morning Borough Blaze.

About four o'clock Thursday morning the house of Lewis Bimble, on Harrison street was discovered on fire, and partially destroyed.

The fire is supposed to have started in the rear of the house, in a closet, by some means unknown. The closet was filled with old clothes, and it is possible that mice may have nibbled matches in some of the clothing and thus started the blaze.

The loss will probably reach $500; no insurance. Most of the furniture down stairs was saved, but the occupants lost all or nearly all of their clothing.

The fire was discovered by Lewis Bimble, Jr., who awoke the other members of the family and turned in the alarm.

West End Hose Company, whose quarters [illegible] ble that the insurance policy on the house expired only two weeks ago.

A Pretty Borough Wedding.

Miss Viola Irene La Maire, daughter of Mr. and Mrs. Lawrence Fahn, of Somerset street this borough, and Frank Ivason Leivers, son of former Councilman Leivers, of Plainfield, were united in marriage Wednesday evening by Rev. W. Montgomery Downey, rector of the Church of the Holy Cross.

The wedding took place in the new home, on Belmont avenue, recently fitted up by the bride and groom. The house was very prettily decorated. In a bower of green, over which was suspended a wedding bell, the bridal pair pledged their marriage vows.

The bride was prettily gowned in white and carried a bouquet of bride's roses. A sister of the groom, Miss Viola May Leivers, was maid of honor and Frank Schuck was best man. The ushers were John La Maire and Howard Leivers.

Many and handsome presents were received.

Fair at Saengerbund Hall.

A fair conducted by Benj. F. La Vere opened in Saengerbund Hall Monday night and has been continued every evening this week. A special musical program was rendered each night. La Vere's band, with Albert Sweet as solo cornetist, played Thursday and last night. William Jeffery of Plainfield and George Offerman, of New York City rendered vocal solos. Members of the Gesang and Turn Verein Societies have also assisted in the musical program.

Members of Warren Engine Company were in attendance Wednesday evening in a body and went through a drill, the performance of which brought them many words of praise. Members of the Fife and Drum Corps were also present and took an active part.

Dancing has been another feature of the entertainment each evening.

It is understood that the proceeds of the fair are to be used for the purpose of conducting open-air band concerts next summer.

Borough School Authorities Were Prudent.

On account of the prevalence of diphtheria in Plainfield, the borough school authorities, for the past few weeks, deemed it best to have every teacher and pupil, with the slightest symptom of a cold, remain at home until they had recovered. At one time about one-twelfth of the pupils and five teachers were absent, but now nearly all the pupils have returned and only two of the teachers are absent.

There are only two cases of diphtheria in the borough at present and they are very mild cases.

SEBRING'S HOUSE STILL MOVES!

Plans Changed, House to go to Rear of 35 Prospect Place.

In an interview with Charles P. Sebring yesterday by a REVIEW representative he stated that he had purchased a lot in the rear of 35 Prospect Place, bordering on Green brook, upon which he will move the building which has caused so much excitement in the borough.

Mr. Sebring said that he had changed his plans in order to reach a peaceable conclusion to a matter which had already caused more than ordinary trouble and expense.

The new location will be very desirable in some respects, as a large lawn in front will slope gradually to the brook, making a very pretty outlook. As Mr. Sebring owns both 35 and 37 Prospect Place, entrance to the house will be made through these lots.

Mr. Sebring seems to think that he is greatly benefitted by this change, as the lot cost him but little; in fact, viewing it from his standpoint, it cost him nothing, as he will be compelled to haul the dirt from his lot on Front street, and by utilizing this dirt on the new lot, he will save a long haul which as he puts it will really give him the lot free.

In regard to his conviction in the Recorder's court, for violating one of the ordinances, Mr. Sebring emphatically denies the report that he plead guilty; on the contrary he plead NOT guilty. The reason he was not represented by counsel, he stated, was because it was his understanding that the case would be dismissed.

New Jersey Safely Republican.

The political lines will be closely drawn next year, and it is probable that 450,000 votes will be cast.

In 1900 there were 221,707 Republican votes and 164,808 Democratic. The proportion in 1904 will be about 250,000 Republican and 200,000 Democratic.

Why any one should waste time in speculating about the possibility of a Democratic victory in New Jersey is a mystery.—*Jersey City Journal.*

Contesting Parties Agree on Referee.

Mrs. Hannah Nelson, of New Market, mother of Mrs. Charles Fair, who, with her husband, was killed in an automobile accident near Paris in August, 1902, has formally laid claim to all the testate of both her daughter and the latter's husband, naming in round figures $7,000,000 as its value. By this claim she abrogates former arrangements whereby a settlement of $250,000 or more was said to have been made with her in California by the heirs of son in law, Charles L. Fair.

Both Mrs. Nelson and the heirs of Charles Fair have agreed upon a referee, Bela D Eisler, who will go to France, accompanied by counsel for both, to take testimony about the fatal accident, which involved the Fair millions.

Union County Newspaper Men to Organize.

At a meeting in the Lyceum Theatre building last Saturday afternoon were gathered a number of newspaper men of Union County for the purpose of organizing a County press association. Joseph D. Louden, editor of the Elizabeth *Journal* was chosen chairman and Ralph L. Morrow, city editor of the Plainfield *Daily Press* was chosen secretary. A committee was appointed to formulate a plan for organization and will report at a meeting to be held November 28.

Beware the Bonfire.

It is a marvel that parents will allow their children to go anywhere near bonfires of autumn leaves. The least little breeze is liable to blow the flaming leaves into the little ones' clothing and set them on fire. Yet there are parents who will give their children matches with which to build these fires. Either the parents should adopt some other means of removing the leaves, or the city authorities should take hold of the matter and stop, as far as possible, the burning alive annually of so many little martyrs to the reckless indifference of private citizens and public officials in the burning of fallen foliage.—*Bridgeton Pioneer.*

Burial of T. C. Bird.

The funeral services over the remains of the late Thomas C. Bird, of Gallia, were held Sunday afternoon from his late home. Rev. Mr. Walton, pastor of the Mt. Horeb M. E. Church, assisted by Rev. Mr. Gibbs, pastor of the Baptist Church, officiated.

The deceased was a brother of Postmaster E. H. Bird, of Plainfield. Interment took place in the Gallia Cemetery.

THANKSGIVING AT HIGH SCHOOL.

Scholars Donate Twenty Barrels of Provisions and Clothes to the Children's Home.

Thanksgiving exercises were held in the North Plainfield High School yesterday noon. The program was as follow: Reading of the President's Proclamation, Helen Armstrong; Singing by the school, "Prayer for Peace;" recitation, "Landing of the Pilgrims," Martha Townley; singing by the school, "Praise to Thee;" scenes from Miles Standish, Ralph Hallock; John Alden, Lawrence Milne; Priscilla, Marion Overton; Elder, Arthur Van Arsdale; Magistrate, Charles Doughty; Messenger, Leo Kenney; Indians, Ernest Jackson and Clarence Francisco; Singing by the school, Thanksgiving Anthem; recitation, "The Achievements of Miles Standish," Ethel Quipp; recitation, "The Pilgrim Commemoration," Otto Mueck; recitation, "The Puritan," Clarence Hand; singing by the school, "Hail Columbia; recitation, "A Retrospect," Grace Miller; singing by the school, "America."

The Thanksgiving vacation will extend to Monday, November 30. It has been the custom every year for the school children to bring donations of food, fruit, clothes and money, as a Thanksgiving offering. As a result, many barrels of gifts are each year sent to the Children's Home and many children, who otherwise would not be able to attend school, are enabled to do so by being provided with warm clothing and suitable shoes.

This year the donations are larger than ever before and they will fill at least twenty large barrels.

SUBURBAN NOTES.

WATCHUNG.

A musical and social will be held in St. Peter's German Lutheran Church, on Grove street, December 3 at 8 o'clock. Music will be furnished by the Spier Brothers and other local talent. During the evening a handsome silk quilt made and donated by Mrs. John [illegible] Koch, will be sold by chance.

Mr. and [illegible] New York City are visiting Mrs. G. [illegible] Cunningham.

The Board of Education will hold its regular meeting Friday evening November 26 at 8 o'clock at home of District Clerk.

The Township Committee, at their last meeting, appointed W. Canning as Constable and health inspector in place of F. Bartle who resigned.

Mr. Leake, a travelling agent, will speak in the Wilson Memorial Chapel Watchung tomorrow evening. A cordial invitation to be present extended to all.

Frederick W. Wolfhert and Edward Cantwell have both leased their houses and will move to New York City for the winter. These gentlemen are both in the city, but would remain here during the winter if only the trolley extended out here.

Mrs. Shank's friends are pleased to hear of the speedy recovery which followed the serious operation she underwent in the Wells Memorial Hospital at New Brunswick, recently.

There will be no school next week as the teachers will attend the Teachers' Institute.

Mr. and Mrs. Wm. Springmeyer, of the Bronx, New York City, spent a few days last week with Dr. Charles Moldenke at Villa Elsinore.

Mr. John Heins, of Cranford, representing the Æolian Mfg. Co., spent last Sunday with an automobile party at the homes of Doctors Charles and Richard Moldenke.

* * *

WARRENVILLE.

Ex Judge Mundy is stopping at Hilltop Cottage for a few days.

Joel Codington, of Mt. Horeb will remove to this place in a few days.

M. C. Jennings is building a new cow barn on his farm.

Frank Winn is furnishing coal for the schools in this place and Springdale.

N. B. Snell is painting all of J. C. Cooper's outbuildings.

I. P. Mundy and Peter Williams are building a new barn at Watchung.

* * *

LIBERTY CORNER.

The usual letter from Liberty Corner failed to reach the REVIEW office this week. This is probably the result of an epidemic of typhoid fever said to prevail there. A gentleman from that vicinity called at the REVIEW office yesterday morning and reported that seven cases had been sent from Liberty Corner to the Somerville hospital, and that there were many more cases still at Liberty Corner.

It is not known what caused the epidemic, but it is reported that the failure to properly diagnose the earlier cases caused the spread of the fever. Most of the cases are considered quite serious, and the community is greatly worried over the matter.

FIRST POINT WON BY GOODWIN

Writ of Certiorari Granted Counsel S. S. Swackhamer.

Assemblyman S. S. Swackhamer is quite jubilant over his success at Trenton Wednesday in securing a writ of certiorari in the suit of John A. Goodwin against the Borough of North Plainfield.

This means that the proceedings in the Recorder's court and the arrest of Goodwin will be reviewed by the Supreme Court at the February term.

The particulars of this case were published in detail in the REVIEW last week, and the new trial will be followed with great interest by not only the people of North Plainfield, but of Somerset county.

Asks R. R. Companies $10,500 and Three Life Passes for Saving Train.

D. B. Gray, giving his address as 302 Walnut street, Philadelphia, it is said has made a demand jointly on the Pullman Palace Car Company and the Philadelphia and Reading Railroad Company, alleging that $10,500 is due him for saving the Royal Blue train at the time of the Westfield wreck last January.

The story he tells of the saving of the train is as follows: "Once there we uncoupled the car and disconnected the steam and air rubber hose connection, and when we had unhooked the chains of the Pullman we pushed at regular intervals, and after four of five times hard pushing we were rewarded by seeing our car move. It being down grade, it rolled away for some 200 feet, where we checked it with brakes. This method of pushing we adopted on all the cars until we came to the baggage car. There were flames all around us—the car was so hot we could scarcely touch it; but we quickly uncoupled it and after breaking the steam and air connections, I used the same encouragement to the men—'heave ahoy!'—which aided them in using their strength uniformly, and again we were rewarded as before to see the car move down the grade."

For this he asks not only $10,500, but three life passes, one on the Pullman, one on the Philadelphia and Reading and one on the Central Railroad.

Cat in Organ Creates Excitement.

During the evening service in Christ Episcopal Church, Newton, Sunday night, the discourse of the rector, Rev. Charles L. Steel, was punctuated with a series of howls which emanated from within the large pipe organ. As the sermon continued the noise grew worse, until, after the attention of the congregation had been distracted and the choir thrown into hysterics, a large white Thomas cat emerged into the choir box through the hole cut for the swell pedal in the organ. One of the bassos laid violent hands upon pussy and he was violently ejected through a window. How the cat got into the organ has not been explained.

Place and Dates of Farmers' Institute.

The Farmers' Institute was held at Hackensack, Bergen County, last Monday; at Harlingen, Somerset County, Tuesday; Swedesboro, Gloucester County, Wednesday and Thursday; Keyport, Monmouth County, yesterday and continued today; Shiloh, Cumberland County, November 23 and 24; Vineland, Cumberland County, November 24 and 25; Moorestown, Burlington County, November 27 and 28; Salem, Salem County, November 30, December 1; New Egypt, Ocean County, December 2; Pennington, Mercer County, December 5; Layton, Sussex County, December 7 and 8; Branchville, Sussex County, December 9 and 10; Blairstown, Warren County, December 11; Stewartsville, Warren County December 12; Mount Holly, Burlington County, December 12; Locktown, Hunterdon County, December 14 and 15; Haddonfield, Camden County, December 16; Woodbine, Cape May County, December 17; Williamstown, Gloucester County, December 18; Little York, Hunterdon County, December 21; Three Bridges, Hunterdon County, December 22; Stelton, Middlesex County, December 23; Verona, Essex County, December 28; Allentown, Monmouth County, December 29 Windsor, Mercer County, December 30; Egg Harbor City, Atlantic County, January 27, 1904; Woodstown, Salem County, January 28 and 29, 1904.

The annual meeting of the State Horticultural Society will be held January 7 and 8, and the thirty first annual meeting of the State Board, January 13, 14 and 15.

Somerset County Teachers' Institute.

The Somerset County Teachers' Institute will hold its annual session in the assembly room at Bound Brook on Monday, Tuesday and Wednesday of next week.

A Generous Gift.

There is sometimes ill founded and unjust complaint against men who have become rich through their power to make and use large sums of money. One man, a resident of New Jersey, however, by his own actions, has relieved himself from any such charges and has become a public benefactor.

James B. Duke, president of the American Tobacco Company, some years ago purchased large tracts of land in the valley of the Raritan river, near Somerville. He converted old farms into a magnificent estate, constructed model stone roads, built substantial bridges and now opens his private holdings for the benefit of the public.

In recognition of the generosity of Mr. Duke, the board of freeholders of the county of Somerset have extended him a vote of thanks, expressed in resolutions. The action of the board of freeholders is timely and is a fitting recognition of his generosity. Not only in the matter of public improvement, per se, but in the spirit that has actuated him as a millionaire, Mr. Duke is entitled to public recognition.

Better than that, he will have the heartfelt gratitude of unnamed thousands who will enjoy his beneficence, although they do not have the power of giving to him, directly, an expression of his kindly spirit.—*Trenton State Gazette.*

Want Curfew Law at Trenton.

The Trenton Methodist Ministers' Association, of Trenton, passed a resolution Monday urging Common Council to pass a curfew law.

This action was brought about because of "the great laxity of general public morals evident because of the great number of boys and girls who parade the streets at night, and who are in great danger of growing up criminals to the detriment of public safety and morals." This condition is greatly deplored by the by the Methodist ministers, and they attribute it to "laxity of paternal restriction and discipline."

In the event of the Council's failure to pass a curfew law, "such as has been found effective in other cases of America," the ministers will inaugurate a movement to educate parents as to the care of children.

Copper Instead of Pearls.

The discovery of copper in oysters taken from Raritan bay will not be hailed with pleasure by lovers of the luscious bivalves. According to reports made to the Newark board of health, the amount of the metal in the oysters is sufficient to poison the system of persons eating them, and a chemical examination has left no doubt of the danger run by consumers.

The cause of the trouble seems apparent. Located on Raritan bay and its tributaries are immense copper smelters, the refuse from which is drained into the waters of the bay, and is thus spread over the extensive oyster beds in that body of water.

The extent of the damage done may be judged from the fact that oysters taken in the vicinity of Keyport, on the outer shore of the bay, are affected by the poisonous metal, as was demonstrated by Chemist Baldwin before the board of health.—*Newark News.*

What! No Santa Claus!

The clergyman who gravely recommended the abolition of Santa Claus at a Christian county convention in this city a few days ago, will not secure many adherents to his way of thinking. He thinks that the introduction of such a myth during the advent festivities is calculated to distract attention from the central figure of that celebration. The reverend gentleman should be—but is not—very well acquainted with the psychology of the juvenile mind. He might as well try to eliminate candy and toys for the same expressed purpose.—*Camden Democrat.*

New Jersey Association of Union Ex-Prisoners of War.

The Seventeenth Annual Reunion of the Ex-prisoners of War was held on Thursday, November 19 at Montclair, N. J. The session was opened by a business meeting in the morning; at its close a collation was served. In the afternoon an open camp fire was held with the newly elected Commander, Comrade Cadmus, of Bloomfield in the chair. Addresses were given by three of the local clergymen, one of them being the pastor of the colored church, and whose father served in the Union army during the rebellion. Two patriotic songs were most effectively rendered by Mrs. F. S. Irwin recited "All Quiet along the Potomac to-night." The exercises closed with the singing of "America" by the audience.

A number of people from this borough and Plainfield were in attendance. A notable figure in the gathering was that of the venerable Brigadier General Hayes, of Ohio, now residing at Glen Ridge and a member of the Association.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

IRON BARS HAVE NO TERROR FOR HIM.

The Woodbury county jail has a peculiar prisoner in a man brought there from Glassboro. Fifteen days before the man was sent up for five days. The day he was discharged he was brought back for for ten days. Last week that sentence expired and shortly afterward he was again locked up for thirty days.

FINED $83.40 FOR FOUR RABBITS.

A man giving his name as G. Castelle, but refusing to give his street address in Philadelphia, was sent to the county jail for sixty days in default of a fine of $83.40 by Justice of the Peace Barr, of Camden, for attempting to carry four rabbits out of the State. He was arrested at the Pennsylvania Railroad ferryhouse by Deputy Game Warden Post.

PICKED STRAWBERRIES FOR FIVE MONTHS

With a slight intermission in the summer, Robert K. Burk, of Prospect Station has been picking strawberries continuously since the season opened in June. Last week he took twelve boxes of berries to Philadelphia and readily sold them at sixty cents a box. He says that he is actually tired of handling strawberries, and would not do it if it were not for the fancy price offered.

RECOVERED VALUABLE PAPERS

Richard D. Shafer, of Columbia, in following the New Jersey bank of the Delaware River from Belvidere to Phillipsburg searching for articles he had lost during the recent flood when his home and all its contents were swept away and he and his wife barely escaped with their lives, found at the end of the bridge at Phillipsburg, a piece of Brussels carpet that was in his parlor floor, which he took along home with him. In a pile of debris at Martin's Creek he recovered several valuable papers that were in a bureau drawer at his home; also fragments of his furniture.

LUNCH ROOM IN FACTORY

A notice has been posted in the Cooke shops at Paterson that, beginning December 1, a restaurant will be established in the portion of the plant that was occupied by the old office. The company has found that it pays to have a lunch room in the shops, and will hereafter have restaurants in operation in all of the branch shops. The local restaurant will offer a chance for the employes to get a hot dinner, including meat, vegetables and a cup of coffee, for fourteen cents. Men who still want to bring their own dinners can buy a cup of coffee, for two cents. A full pint cup will be served.

OLD BOATS REQUIRE RED TAPE

When the Long Island Sound steamboat Massachusetts was burned near Boston a few days ago to get the metal out of the heavy timbers of her hull, J. H. Gregory, of Perth Amboy, was relieved of the responsibility represented by a $10,000 bond. He purchased the steamboat more than a year ago and intended to break it up at his wrecking station in the mouth of the Raritan River. He sold it to Boston parties a few days after purchasing it and without bringing it here. Ever since he became the owner of the old vessel he has been under a bond of $10,000, guaranteeing that it would not be used again as a steamboat.

EIGHTEEN CATS KEEP HIM COMPANY

A man by the name of John Couch, who is sixty-five years old, took possession of an old house at Turnersville about fifteen years ago. It is claimed that he is really a "squatter" as he pays no rent, and no one seems to know to whom the property belongs, but the house can be traced back for 200 years. It was originally built for a bakery by some early German settlers and contains but one room with a fireplace seven feet square. It is built of hewn logs, notched on the ends with cracks filled in with mud. The most peculiar thing about the old man is his fondness for cats. He has eighteen cats

MISSING OVER A MONTH

Sensational Disappearance of Edward Wentz, of Virginia.

REWARDS OF $55,000 OFFERED

Wealthy Young Man Vanishes — A Fortune Expended in Fruitless Search — One Thousand Laborers Ransack Every Corner of the Alleghany Mountains—Horse Found Riderless.

Bristol, Tenn.—Outstripping in the magnitude and importance any of the historic cases of kidnaping must be classed the sensational abduction of Edward Leisenring Wentz on the vast Wentz estate in southwest Virginia on October 14 and the most extraordinary search which has followed through a period of one month among the Alleghany Mountains.

The Wentz mansion is located at Big Stone Gap. Here E. L. Wentz had resided the last four years with his married brother, D. B. Wentz, although he was having an elegant home erected for himself when he so mysteriously disappeared one month ago.

At Big Stone Gap the missing young man kept a kennel and a stable of polo ponies.

It was his frequent habit to don a riding costume, mount a saddle horse, call his dogs together, and in company with a friend ride across the rugged country to the home of Charles Wax, the superintendent of the estate, some fifteen miles toward the northern side of the estate.

Contrary to his usual habit, on the morning of October 14, when young Wentz started on the journey to the home of Wax, he securely locked the ponies in the stable and his dogs in the kennel.

Shortly before noon he was seen by several acquaintances riding through Kelleyview. Reining his horse in front of a store there he purchased some cigars and then rode hastily on. In the evening some boys passing along the road one-half of a mile above Kelleyview, at the foot of Roaring Creek, observed a horse a short distance from the road in the small place where the sawmill had been located.

The horse had its feet entangled in its bridle reins and a rain coat was strapped on the saddle. The boys went to the animal which they well knew, and on not finding the rider returned the horse to the home of D. B. Wentz, at Big Stone Gap.

D. B. Wentz, thinking that the horse had run away from his brother at the home of Charles Wax, on the following morning sent a boy back to Wax's home with the horse for his brother. When he reached the home of Wax he was informed that young Wentz had not been there.

Wax mounted a horse and accompanied the boy back to Big Stone Gap, where they were joined by D. B. Wentz, and although it was near night they went to the spot where the horse was found to search for the missing man.

Night fell among the mountains and checked the search. D. B. Wentz returned to his home much alarmed and in the morning called 1000 laborers from the mines and shops, and with the aid of a special train has conducted the greatest search among the mountains that has ever been known.

Every inch of ground for a score of miles around has been searched over. Powell River near by was dredged for many miles and the large caves in the mountains were searched with the aid of electric searchlights, but nothing has been revealed that would tend to show that the young man had been murdered.

Under the incentive of a reward of $55,000 a large force of detectives have been working on the case. The general search that was carried on by laborers from day to day at the cost of a fortune has been abandoned, and the detectives and counsel for the Wentz estate are conducting the investigation.

Fainted in Court.

Alonzo J. Whiteman, alias John Prentiss, ex-State Senator of Minnesota, ex-Mayor of Duluth, a lawyer and college graduate, fainted when taken before Justice Caverly in the Harrison Street Police Court at Chicago, Ill., to answer to a charge of operating a confidence game. The police say Whiteman passed a worthless check, to which his name was signed, and obtained $200 at the Auditorium on Derby Day.

Killed in Feud Fight.

Rube Little was shot to death at Morris, Ala., by Thomas Armour. A feud of long standing led up to the shooting.

Wealthy Young Man Shot.

Irving McDonald, a wealthy young man in St. Joseph, Mo., was shot by a traveling salesman from St. Louis, who says he acted in self-defense.

Recluse Found Dead.

The Chevalier Petich, formerly Minister from Bolivia to Mexico, inventor, archæologist and recluse, was found dead in a room in New York City.

Michigan Village Burned.

A fire almost destroyed the village of New Richmond, Allegan County, Mich. The loss will reach $20,000; partially insured.

Maine Postoffice Robbed.

Burglars entered the postoffice at Berwick, Me., blew open the safe with dynamite and secured $800 worth of stamps and $300 in cash.

Steel Workers Thrown Out.

The steel mills of the Tennessee Coal, Iron and Railway Company, in Ensley, Ala., were shut down. Nine hundred men are thrown out of employment. Officers of the company hope to resume in January.

Museum Freak Dead.

Harry Benn, who as "Benn the Wonder" had made a living for twenty years as a sideshow freak by driving an awl into his head and eating strychnine by the ounce, died at Kansas City, Mo.

PANAMA REJECTS OFFER

Isthmians Offered Concessions by Parent Government.

Threats and Promises of the Colombian Commissioners Unheeded by the Junta's Representatives.

Colon, Colombia. — The Panamese commission, composed of Senors Arias, Morales and Arosemena, which left Panama to meet the peace commission from the Department of Bolivar, held a short conference with the Colombians aboard the Mayflower.

The Colombians asked the Isthmians if they would return to the Republic of Colombia, assuring to them concessions and considerations in the passage of the canal treaty. The Panamese replied that they would not return to the Republic of Colombia, and that the assurances came too late, as Panama's position was so advantageous and strong that they could see no reason for changing their attitude.

Both the Governor and the Commissioners are without credentials or direct instructions from the Colombian government. It is further learned that the Commissioners did not represent themselves to the members of the junta as Bogotan Commissioners, but spoke in their capacity as citizens of the State of Bolivar.

In the course of the conference Nicanor Insignares, a brother of the Governor of the State of Bolivar, who was the spokesman of the Colombians, made a strong appeal to the Isthmians not to disrupt the Republic of Colombia, and added the solemn assurance that Colombia would grant all the rights demanded by the Isthmians and eventually carry out their project of building the canal.

Replying to Senor Insignares, Tomas Arias, representing the junta, said that the Bogota Government and the Colombians generally did not appear to grasp the actual conditions on the isthmus. The revolution, Senor Arias said, was born absolutely of the unanimous desire of the entire people of Panama and was irrevocable. It was the act of a new independent government already thoroughly organized and formally recognized by the United States Government in receiving its representative, Phillippe Bunau-Varilla, as well as by the Governments of France and Italy. Senor Arias then read telegrams which he had sent to General Salazar, former Governor of the Department of Panama and now Governor of Cauca, one of the United States of Colombia, containing statements to the same effect. Continuing Senor Arias said:

"Colombia will always find in this country the most sincere brotherly feeling. The political ties binding the isthmus to Colombia have been broken, but the fault is not that of the isthmus. The ties of affection, however, never can be broken."

Senor Insignares, in answer, expressed his deep sorrow at finding that the hopes of reconciliation were impossible of realization. He declared that all the people of Colombia would unite in an effort to enforce the rights of the republic on the Isthmus of Panama, even at the cost of great sacrifices.

Senors Arosemena and Morales then made addresses in which they expressed views similar to those enunciated by Senor Arias.

The threat of Senor Insignares that the Republic of Colombia would enforce its alleged rights in isthmian territory did not cause apprehension to the Panamese Commissioners, who gave to it no serious consideration.

CONGRESS GETS CUBAN BUDGET.

Income For Fiscal Year of 1904 Placed at $18,895,500.

Havana, Cuba.—President Palma transmitted to Congress the budget for the fiscal year of 1904. The income for the year is estimated at $18,899,500 and the expenses at $17,924,000. The principal items of income estimated are: Customs, $14,746,500; interior taxes, $630,000; postal and telegraph, $560,000. The largest item of expense is that for the Interior Department, which includes military, charities and other services, the estimates for which approximate $4,980,000. The cost of public instruction, much of which, including expenditures for university and technical education, is still paid by the General Government, is estimated at $3,751,000. Public works, inclusive of new roads and bridges, are estimated to cost $2,032,000. Other items of expense include the monthly charge for interest payments on the projected loan of $35,000,000, and also the expense of collecting the taxes for which the loan law provides.

The President says the expenses of the Customs Department are only five and one-fourth per cent. of what it collects. He points out that the imports last year amounted to $4,400,000 more than the previous year, while the exports exceeded those of the year before by $24,000,000. President Palma urges the need of more and better coastguard boats.

NEW LAW URGED.

A Bill Aimed Against Get Rich Quick Insurance Companies.

Washington, D. C. — A bill introduced by Senator Dryden, of New Jersey, applies the Anti-Lottery law to matter sent through the mails by get-rich-quick insurance companies. It denies the use of the mails to companies which are not authorized to do business by the certificate of the insurance commissioner of some State.

The passage of this legislation is urged by the national convention of State Insurance Commissioners.

Half Million Dollar Fire.

Fire practically destroyed the five-story brick building Nos. 127 and 129 North Fourth street, Philadelphia, Pa., occupied by the Philadelphia Strawboard Company and several other tenants. The loss on the building is estimated at $150,000 and on the contents $475,000.

Crime to Give Away Whisky.

The Supreme Court of Missouri held that the statute prohibiting the giving away of liquor in local option counties is constitutional.

COLOMBIA MAKES PROTEST

Says Responsibility For Secession of Panama Rests With Washington.

WANTS WORLD TO BE JUDGE

Formal Protest Cabled to London Blames This Country For Fomenting Revolution and Prematurely Recognizing Republic of Panama—The Movement Called a "Barracks Coup."

Washington, D. C.—The Colombian Government has protested to the United States against the recognition of Panama, and has demanded justice. The protest expresses the surprise of the people of Colombia at the precipitate recognition of a "barracks coup" in the Department of Panama; cites the public treaty obligations of this country, and "the traditional principles of the American Government in opposition to secession movements," and "appeals to the dignity and honor of the American Senate and people." The substance of this appeal was cabled from Bogota by the Minister of Government, Esteban Jaramillo.

The Colombian Government holds that the main responsibility for the secession lies with this country, because:

First, we have fomented the separatist spirit.

Secondly, we have hastily acknowledged the independence of the rebels.

Thirdly, we have prevented the Colombian Government from using proper means to repress the rebellion.

A press dispatch from Colon says that the Hamburg-American steamer Scotia when it arrived there brought several prominent Colombians from the State of Bolivar, forming a peace commission. The dispatch says that American naval officers are boarding all vessels arriving at Colon to see whether they have Colombian troops on board.

A Protest to the World.

London.—The Colombian authorities have cabled to London a lengthy protest against the action of the United States toward Panama. The cable message says that President Marroquin has energetically protested to the United States and wishes that his protest should be known throughout the civilized world. The President contends that the United States has infringed Article 35, of the treaty of 1846, which he asserts implies the duty on the part of the United States to help Colombia in maintaining her sovereignty over the isthmus. He asserts that since 1835 they have granted canal privileges to different parties no less than nine times, and that the treaty concluded with the late General Hurlbut (when he was United States Minister resident to Colombia) at Bogota, July 8, 1870, has been ignored at Washington.

High Feeling in Bogota.

Washington, D. C.—President Marroquin, of Colombia, is in danger of being overthrown by a revolution, and feeling against Americans in Bogota is running so high that United States Minister Beaupre has cabled the State Department for permission to leave his post. This permission has been given him.

LORD KITCHENER HURT.

Leg Broken While Riding Alone in India—His Horse Frightened.

Simla, India.—Lord Kitchener, Commander-in-Chief of the British forces in India, met with a serious accident while riding home alone from a country house near here. As he was passing through a tunnel his horse became frightened by the sudden appearance of natives, and collided with the walled side. One of Lord Kitchener's legs was jammed against a beam and was broken in two places above the ankle. Some time afterward coolies passing through the tunnel—the original coolies having fled—found the Commander-in-Chief lying there helpless, and brought him to Simla. He is now reported to be doing well.

Lord Kitchener was alone for the reason that he told the members of his staff that he did not intend to ride out, but later changed his mind.

PAPER COMPANY ASSIGNS.

Property of the President Attached For Alleged Shortage.

Holyoke, Mass.—Thomas W. Holly, President and Treasurer of the American Pad and Paper Company, is charged with being between $35,000 and $40,000 short in his accounts, and to protect itself the company has assigned.

Holly's property, consisting of a house, horses and carriage and his stock in the pad and paper company, has been attached.

Holly, it is said, has made a statement to the company officials in which he says he has been getting company money on orders for several years. Large numbers of his notes are now held by local banks. His yearly salary has been $3000, but he says it has cost him from $2000 to $4000 a year more than that to live.

Missouri Prosecutor Indicted.

Four indictments have been found by the Cole County Grand Jury against R. P. Stone, the prosecuting attorney of Jefferson City, Mo. He is charged with demanding and receiving illegal fees and accepting a railroad pass from the Missouri Pacific.

Fierce Fire at Pawtucket.

A fire burned the building owned and occupied by the Pawtucket Baking Company, at Pawtucket, R. I. The loss is $30,000.

Dynamiter Asks $500.

Threats to blow up the Plaza Hotel, a large and fashionable hotel fronting Lincoln Park, Chicago, Ill., have been made to William Hall, manager of the building, in an anonymous letter, which names as an alternative the payment of $500.

Shot Six Negroes.

Six negroes were shot and several seriously wounded during a brawl on the Clanton plantation, five miles west of Albany, Ga., by George Peak, also colored.

SEN. DIETRICH INDICTED

Charge That He Accepted Bribe For a Postoffice Appointment.

Federal Grand Jury Indicts Him, With Postmaster of Hastings, Neb., and His Assistant.

Omaha, Neb.—The Federal Grand Jury returned true bills against United States Senator Charles H. Dietrich and Postmaster Jacob Fisher, of Hastings, Neb., charging them with conspiracy and bribery, in connection with the appointment of Fisher to be postmaster. When the indictments were brought into the United States District Court, Judge Munger presiding, the court merely accepted the report of the Grand Jury, making no remarks on the contents, only giving an order to the clerk for the filing of the bills.

The indictment against Senator Dietrich charges that he accepted money and property in consideration of recommending Fisher for appointment as postmaster at Hastings. The one against Fisher charges him with making an agreement with Senator Dietrich by which Fisher was to pay Senator Dietrich property and money to the amount of $1300 for securing the appointment.

The last witness called before the Grand Jury was William Dutton, a hardware merchant of Hastings. According to Dutton's testimony, he acted as intermediary in all the alleged transactions between the indicted men. After hearing his evidence the Grand Jury excused the remaining witnesses who had not testified, and at once prepared its report to Judge Munger. There were three indictments each against Senator Dietrich and Postmaster Fisher.

The jury was composed of twenty members, nineteen of whom are said to have voted for the indictment and one against. The members came from all parts of the State, no two of them living in the same town. The foreman, Frank E. White, of this city, is Secretary of the Grand Lodge of the Masonic Order of Nebraska. The other members are mostly well-known business and professional men.

This indictment is said to be the first ever returned against a United States Senator on charges of this nature, and caused intense excitement in official circles here, and in adjoining towns when it became public.

The law under which Senator Dietrich and Fisher were indicted provides a punishment for the offenses with which they are charged of imprisonment for not more than two years and a fine of not more than $10,000.

Senator Dietrich was elected by the Legislature of 1900-'01 to succeed Senator Allen, who was appointed by Governor Poynter to fill the unexpired term of the late Senator Hayward, who died before taking his seat. His term expires March 3, 1905.

Postmaster Fisher was formerly Mayor of Hastings, and has been prominent in politics of Nebraska for several years. He said: "The indictments against Senator Dietrich and myself are the result of political persecution. There is really nothing in the charges, and my friends will support me in my defense."

CHICAGO STRIKE SERIOUS.

Labor Leaders Plan to Defeat the Chicago City Railway Co.

Chicago, Ill.—The menace of the sympathetic strike in behalf of the street car men, postponed recently, has become real. The firemen of the Chicago City Railway Company's power plants, who quit work recently, were joined by the engineers. The teamsters who haul the coal that supplies the power plants are in an ugly mood, and may refuse to deliver fuel at any moment. Such refusal would amount to a severe blow to the car company.

With police protection and cars actually running over the Wentworth avenue route, at least at intervals, the labor leaders evidently are considering the use of the sympathetic strike as their most available weapon.

YELLOW FEVER IN MEXICO.

Disease Now Beyond Control of the Health Department.

Austin, Texas.—The yellow fever epidemic in Mexico is now beyond the control of the health authorities of that country, according to advices which have reached the Texas State Health Department. It is stated that the unusually long period of warm weather and the failure of the lower class of Mexicans to report cases of the disease to the health authorities, have caused the epidemic to spread to every town between Monterey and Laredo.

The United States Marine Hospital Service is rendering what aid it can to the Mexican authorities in suppressing the disease.

It is estimated that the loss of business in Monterey alone as a result of the epidemic aggregates more than $2,000,000.

More Suits Against Dowie.

The return of Dowie from the East has been signalized by the filing of more suits for debt against him in the Lake County Circuit Court and the Zion institutions at Waukegan, Ill. Most of the firms are Chicago ones. The Weaver Coal Company wants $2900 for coal furnished. W. S. Peck & Co. have a $3500 claim for goods supplied, and Selz, Schwab & Co., $1000 for goods.

Dies in Florida of Mosquito Bites.

Walter Johnson, a flagman of the Florida East Coast Railway, died suddenly at Jacksonville, Fla., from the effect of mosquito bites.

Boy Kills His Aunt Accidentally.

Carroll Bailey, sixteen years old, of Westbrook, Me., accidentally discharged a gun and shot his grandmother, Mrs. Leighton, and his aunt, Miss Lydia Leighton. The latter was killed instantly.

Polish Baron Stabbed.

Waldemar Sorokou Mowski, who says he is Baron von Friessen, of a noble Polish family, and who has been engaged in the cotton business, was stabbed in a saloon brawl at New Orleans, La.

NEW CANAL TREATY SIGNED

$10,000,000 Bonus to Republic of Panama.

RIGHT TO FORTIFY TERRITORY

United States Gets Ten-Mile Strip in Perpetuity, Cities at Both Ends and the Islands in Panama Bay—Annual Rental Payment of $250,000 to Begin After Term of Nine Years.

Washington, D. C.—Secretary Hay and Philippe Bunau-Varilla, the Minister from Panama, signed the treaty providing for the construction of the Panama Canal by the United States. The ceremony took place in Secretary Hay's study. The Secretary informed M. Bunau-Varilla that he was ready to sign the treaty. The Minister read the document carefully, and then he and Secretary Hay attached their signatures to it.

The keynote of the treaty is the provision in one of the very first articles, by which Panama cedes to the United States whatever land or lands throughout the Republic of Panama this Government shall find desirable in connection with the building or operation and maintenance of the canal. In addition the treaty gives to the United States absolute sovereignty over the canal strip, which, it is understood, comprises between eight and ten miles on each side of the canal. Within this zone the power of the United States is as absolute as if the zone were part and parcel of this country.

In general it may be said that while the new treaty contains many of the provisions of the old treaty, it is not based on that convention, but follows not only the spirit, but the letter of the Spooner act. Thus instead of the lease for a fixed period of the canal strip this new treaty permits this Government to exercise the most complete jurisdiction the reupon.

Permission also is given to the United States to fortify the line and the terminals, and it may police it with troops. That portion of the treaty dealing with the fortification of the terminals is rather general, but sufficiently explicit not to be misunderstood.

The cities of Panama and Colon retain their municipal autonomy under the Republic of Panama as long as they maintain public order and sanitary conditions to the satisfaction of the United States. Failure to do this gives the United States, according to the treaty, the right to force strict compliance with the wishes of this Government in this direction, and the United States can even use force to compel obedience to its rules as to public order and public health in these cities.

The money consideration is the same with the exception that the $10,000,000 go to Panama instead of to Colombia.

The treaty further provides that the canal is to be neutral and open to all nations on even terms.

Ten million dollars, the same amount named in the Colombian treaty, is to be paid as a bonus by the United States to the Republic of Panama, the amount to be paid on the exchange of the ratification of the treaty. The Government of Panama is also to receive an annual payment of $250,000 from the United States, beginning nine years after the ratification of the treaty. A similar provision was included in the treaty with Colombia.

The cities of Panama and Colon, except such lands within their limits as are now owned or possessed by the Panama Canal Company, are not to be controlled by the United States Government, its rights within them being limited to canal operations and maintenance. Within these cities police appointed by the Government of Panama are to maintain order, and local native courts are to administer justice, but it is provided that if the United States should deem the administration of police and judicial functions unsatisfactory it may assume police and judicial control.

Under the treaty the Government of Panama authorizes the New Panama Canal Company to sell and transfer to the United States its rights, privileges, properties and concessions and its shares in the Panama Railroad.

The group of small islands in the Bay of Panama, named Perico, Naos, Culebra and Flamenco, are included within the canal zone, and the United States Government is to have the use and occupation of them.

MOODY UPHOLDS ADMIRAL EVANS

Believes He Censured Naval Court Martial For Good of Service.

Washington, D. C.—Secretary Moody has announced his decision in the matter of the protest of Paymaster H. T. Biscoe against the language used by Rear-Admiral Evans, commander-in-chief of the Asiatic station, in reviewing the result of the court martial on Assistant Paymaster Nichols.

After ruling that Rear-Admiral Evans, as the convening and reviewing authority of the court martial, was within the limits of his authority in criticising the finding of not guilty upon the third charge and pronouncing the sentence inadequate, and in criticising the court, Secretary Moody says:

"It is considered that in this instance Rear-Admiral Evans has not shown himself unworthy of the continued confidence of the department. On the contrary, in view of the evidence before the court, without weighing too nicely the terms of his censure, it is believed he was actuated by a high sense of duty and inspired by a regard for the honor and welfare of the service."

Girl Poisons Family.

Because the parents of Emma Munsey, fourteen years old, of Urbana, O., objected to the company she kept she put Paris green in the coffee, poisoning her father, mother, sister and two brothers. Their lives were saved by the prompt work of physicians.

Samuel F. Phillips Dead.

Samuel F. Phillips, Solicitor-General of the United States under Presidents Grant, Hayes, Garfield and Arthur, died at Washington, D. C., aged seventy-nine years.

New York City.—Blouse waists make the favorite models of the season and are worn both for indoor and street costume. This May Manton in-

BLOUSE WAIST.

cludes pleats at the shoulders, that give the fashionable breadth, and sleeves of the latest sort. The model is made of wood brown henrietta, with velvet piped with white and ornamental buttons as trimming, but the design suits almost all seasonable fabrics. The sleeves, with their big puffs at the wrists, are specially worthy of consideration as they lend themselves to remodelling with singular success. The upper portions are not wider than those of last season and are simply shaped to fall over the full puffs.

The blouse is made over a fitted lining that closes at the centre front. On this lining are arranged the plain back and the pleated fronts, that are faced and turned back to form the narrow revers. The trimming is arranged round the neck at the back, to form points at the front. The sleeves are snug to the elbows, but full above the narrow cuffs. At the neck is a collar that combines the two materials.

The quantity of material required for the medium size is three yards twenty-seven inches wide, one and three-quarter yards forty-four inches wide, or one and one-half yards fifty-two inches wide, with one and three-quarter yards of velvet to make as illustrated.

An Extra Wrap.

Little paletots, made in red, violet or puce cloth, are worn as an extra wrap over cloth gowns, says Le Bon Ton. For dressy wear they are made of white cloth. Stitching and gold buttons are all that is used for trimming. They are a smart little wrap. Of course the bolero effect is predominant in these gowns, and the high, tight-fitting girdle is indispensable.

Old-Fashioned Brocades.

Brocades in quaint, old-fashioned designs are much used for evening gowns, trimmed with fine ruchings, says Le Bon Ton. One gown of brocade, on view at a leading modiste's, was made with a Watteau pleat in the back, the front opening over a petticoat of lace.

Crushed Pink Cloth.

For evening wear crushed pink cloth trimmed with lace is very handsome, says Le Bon Ton. Begonia, fushia and clematis shades in cloth are used for evening gowns. White cloth and lace gowns, trimmed with black velvet, a especially charming.

Jackets Are Short.

Nearly all jackets are short, says Le Bon Ton, although a few, a very few long coats are seen. The latter are more on the Russian blouse order. Boleros are the thing, but more than anything else one sees the entire dress of heavy cloths or velvets, corsage and skirt to be worn without a jacket, simply furs or short fur capes. These are to be quite the thing for street wear.

Ostrich Feathers in Two Colors.

Ostrich feathers are displayed, showing two colors, as, for instance, brown and green, royal purple and green. A handsome feather is a combination of ostrich and paradise—an extreme novelty and very expensive.

The Latest in Velvets.

Velvets in blues and browns, with a pin dot of white, have a pressed dot the size of a franc piece, which at first gives the effect of a button.

Charming Kimono.

Kimonos, or negligees which owe their inspiration to the garment of Japan, have taken a permanent hold in Western favor and are constantly appearing in some new form. The graceful, yet perfectly simple May Manton model shown is among the latest and has much to commend it. The original, from which the drawing was made, is of flue soft flannel, with bands of plain India silk, but all the materials used for gowns of the sort are suitable. Charming ones show plain cotton crepe for the foundation, flowered silk for the bands and count-

A Late Design by May Manton.

less other suggestions might be made.

The kimono is made with fronts and backs and is shaped by means of shoulder, underarm and centre back seams. The sleeves are cut in deep points that are eminently graceful, and both their edges and those of the neck and front are faced to form the bands.

The quantity of material required for the medium size is nine yards twenty-

A STRIKING KIMONO.

seven or thirty-two inches wide, or four and one-half yards forty-four inches wide, with one and seven-eighth yards of silk for trimming.

Casting the Minnow

Next to Fly Fishing, the Perfection of Art in Angling

By W. C. Harris

PREVIOUS to the Civil War angling as a pastime was not indulged in, except to a very limited extent, by residents west of the Mississippi River; in fact, it may be said that the country lying between the eastern slope of the Alleghanies and the estuaries of the Atlantic was the broad area, with its almost innumerable fluvial and lacustrine waters, in which the art of angling was nurtured in America.

West of the Alleghanies they have brought to perfection a method of handling the rod in casting the minnow that not one in a hundred Eastern anglers can follow or perform, and next to fly fishing it is the perfection of the art of angling. The angler stands on the bank, or in the stream, and with a swoop of the rod from right to left, or the reverse, and with a spring of the tip impels deftly and lightly a live minnow, weighing an ounce or more, one hundred and fifty or more feet to the dimpling circle made by the rising bass; and the Western angler nine times in ten will strike the spot aimed for, even if no bigger than the crown of a silk hat. How has such accuracy been acquired? Because, as an old Milwaukee angler told me, the practice has been handed down and followed generations before any writing exponent of it was born.

When considering the rapid advance in skill and indulgence in the pastime of angling by Western fishermen, their great advantages in the number and fruitfulness of local fishing waters should not be overlooked. And this condition prevails everywhere in the region north of Milwaukee to the ice line of the Canadian provinces, and from the Mississippi River to the Pacific slope. In every State one or more species of the forty-two varietal forms of bass, native or introduced, will be found, and in those sections north of and east of the Mississippi the black bass, both large and small mouthed, and the pike, the long nose, ravage the lakes and streams of their minor fish life. In Northern Wisconsin the Eagle Lakes and other waters are the home of that giant pike, the muscalonge, with its many variant names and fish-destroying capacity.

So great is the thirst of many fishermen for the blood of this noble game fish that the railroad running into or near its native haunts has, during the fishing season, a special daily train for Northern Wisconsin, to accommodate muscalonge fishers in their journey of over 400 miles to capture often only a single specimen of this kingly species of the great tribe of Esox.—Illustrated Sporting News.

Trade Schools

Month in Trade School of More Value Than Year in Large Shop

By James M. Dodge

IT has been well said that "Time determines all things," and time has evolved a solution which, though but in its infancy, is destined to grow and be the most important development in educational lines that the world has ever seen. I refer to the trade schools. Locally we have some splendid examples—the Drexel Institute, the Williamson Trade School, the manual training school, and others. But scattered all over this country are schools of this character, which undoubtedly will grow more rapidly than any educational institutions of the past.

Within comparatively few years this lack of opportunity for proper training, making itself manifest, and finding the law of supply and demand in good working order, registered its want, and fortunately the method of supply was developed. This training is now being given by many institutions in this country, in shops equipped with the most modern tools and employing up-to-date methods, and supervised by instructors of marked ability and fully imbued with the importance and far-reaching benefits of their calling. The instruction is systematic and individual, and I feel fully justified in saying that a month of such training is of more value than a year's time spent by a young man in a large shop, in which he is as likely to absorb error as truth.

It has been said that a three years' course in a trade school, in which an average of but a few hours a day are devoted to actual manual work, can in no way compare with three years' time spent in actual work in a shop. I feel that this is a popular error. In shop work a man may spend months in repetition of the same task, to no ultimate advantage to the worker. Instead of his skill being quickened, it is dulled. He very quickly acquires the skill which is unconscious in its operation, and, like the old lady with her knitting needle, he can talk to a fellow workman, or think and dream about far-distant places and matters, without in any way lessening the rate of production. In fact, sometimes his pace might be actually quickened by some mental emotion having an exciting effect upon his nervous organization, in the same way that the old lady, in chatting with her friends, will knit fast or slow in harmony with the dullness or animation of the conversation. It is quite obvious that repetitive routine work is not desirable for a young man of natural ambition and aptitude. In the trade school he escapes routine but is instructed in the underlying principles of his work, and does enough manual labor to familiarize himself with the various tools required, and to prove the correctness of the theories in which he has been instructed.—St. Nicholas.

The Farmer in Winter

By E. S. Martin

THE great steady winter jobs on an American farm in the North nowadays are feeding the stock and keeping warm. And keeping warm nowadays means hauling coal. When I lived in the country it meant cutting wood. It meant, for our large family, constant teaming day after day from the woods to the wood yard, and a wood pile that must have covered quarter of an acre. It meant, towards spring, the coming of men with a horse-power and buzz-saw to cut firewood, and that was almost as interesting an operation as threshing.

There were other stirring days when the lake had frozen hard and the ice-house was filled, involving ice cutting, and more teaming, and more precarious hitching on behind loads and going back in empties. And early in the winter there was the momentous and gory killing of pigs. Oh, that was indeed a stirring time! They kill a pig every second, no doubt, in Chicago nowadays, but that is mere mechanical routine with no quality of sport in it.

There was nothing so very slow about the country winter in days as late as the Civil War. I suppose soap-making as a domestic industry is as dead as household spinning. In those times of wood fires and wood ashes all self-respecting families made soap. Our family had an outstanding kitchen expressly for that use, with a big cisternlike hogshead behind it in which ashes were leached, and convenient tubs for holding the soft soap. A very handsome substance is soft soap of the proper consistency and complexion, and a pleasing exercise it used to be for the young to stir it with a stick and watch its undulations. All the superfluous fat of meat from our kitchen was turned into soft soap in those near-by old times.—Harper's Magazine.

Longevity is Increasing

SUCH men as make a study of statistics relating to life and death, say that man's years are gradually growing longer. The fourth convention of these men from all parts of the world is being held in this city this week, and the first general subject discussed was that of increasing longevity.

These actuaries of great insurance companies should certainly know what they are talking about. They are not accustomed to deal in generalizations. When they say a thing it has all the certainty that figures can give it, and figures, according to the proverb, don't lie. Emory McClintock and others of these statisticians declare that a person now living may reasonably expect to have a longer period of life than those of even a decade ago.

Better hygiene, more thorough knowledge of self-care, purer water, more thorough drainage, less drinking of liquor—all these things and many others have combined to make the twentieth century man a finer physical product than existed a generation ago. The American people are becoming more temperate and more intelligent. It is no longer the fad for our women and girls to be puny and delicate. Short skirts, wheeling, riding, golfing, walking, swimming, fencing, even boxing, have contributed to make the coming mothers of the race fit to bear strong sons and daughters. Physical culture is now a part of our public school system and a part of the daily life of most men and women of Europe and America.

Hence, we are gradually beginning to live longer. We may do even better, if we will.

WEAVING AN INDIAN BELT IS GOOD FUN FOR THE BOYS

HE MAY SELECT BEADS, LEATHER, GRASS, SNAKE SKINS OR COLORED STRINGS AS HIS MATERIALS.

There is a great variety of material to choose from when one has in mind the construction of an Indian belt.

There are bead belts, leather belts, belts made of colored strings and belts made of twisted snake skins. No matter which sort of belt is desired the general plan of construction is the same.

It is the material used, not the method of weaving, which changes the aspect of the belt.

The illustration shows what is called a heddle frame, a rectangular piece of wood in which has been cut a series of long, narrow slits.

A small, round hole is bored through each strip of wood between the slits.

In the heddle there are nine openings and eight round holes. The width of the belt will depend upon the number of openings and holes in the heddle.

Run a strong string through each opening and hole in the heddle.

The strings should be about one foot longer than the intended belt.

Collect the strings together at each end, as indicated in the illustration.

Before attempting to make an elaborate belt of beads or skins it will be well to experiment with colored strings in order to understand the principle of weaving.

Lay a piece of colored string between the two rows of strings, then lift the heddle until the strings, which run through the holes are above those which are in the openings.

The belt is woven merely by repeating this process over and over. Care must be exercised to keep the strings close together, so that the belt will be a uniform width.

The strings which run through the heddle have, as a rule, little to do with the pattern.

The character of the belt will depend on the sort of material which is crossed back and forth between the two rows of strings.

When it is desired to keep the two rows of strings separate while both hands are being used to tighten or loosen the woven portion of the belt, place between the two rows of strings a cylindrical piece of wood, as shown.

Instead of the regular tongue and ring buckle which is usually attached to a belt, simply sew a strong ring to each end of the belt and then, in order to put the belt on, lace the rings together with a strip of leather.—Indianapolis News.

If convenient, prepare a small room for testing the sense of touch, so there may be no accidents to mar the evening's pleasure. Remove all furniture except one heavy chair and all pictures or bric-a-brac within reach of the outstretched arms. Beside the chair have a basket and a feather duster, and large tin pan in the chair. In one corner have a broom, a fishing pole and mop-stick, and in another an ironing board, having an old fur cap or box, or sponge fastened to it. A wooden chopping bowl having artificial flowers in may be set on a very firm table if the room is large enough, and over the curtains ropes may be hung. After spending three minutes in the dark room each one must write the names of at least ten objects touched. If such a plan is not feasible, have the company blindfolded, and hand around quickly a clothes brush, shell, sponge, pencil eraser, pin pan, potato, handkerchief, flower, blotter, egg whip, paper cutter and a lump of coal the size of a potato.—Gertrude Gleason, in The Pilgrim.

MAKING THE BELT.

EVENING GAMES.

Guessing games are enjoyed by the older children, and several can be used in an evening. With slight preparation tests of the five senses can be made. On a table in one room have twelve familiar objects, allowing one or two minutes for observation, ask all to retire to another room and write the names of twelve articles without help from each other. An umbrella, flatiron, inkwell, vase, pencil, lemon, teacup, purse, book, slipper, key and scissors are suggested.

Next in very quick succession let them hear sounds made by a saw, hammer, tea bell, triangle, music-box or gramaphone, piano or organ, door banging, tearing paper, cat mewing, sneeze and other causes, not allowing any memorandum to be made till all noises are over and then limiting the time for writing.

For testing the third sense, have small packages as near one size as possible, all wrapped alike, in which there is coffee, tea, cloves, cinnamon, ginger, cheese, soap, mustard, lemon, banana, cabbage and halibut (or any smoked fish) and allow all to sniff at them for two or three minutes and then make out their list.

In dimly lighted room set ten or twelve bowls on a table, supply each guest with a tiny spoon and see how quick they are to discover and remember what they taste. In the bowls have diluted vinegar, coffee, cider, weak peppermint tea, maple syrup, catsup (diluted), water, beef broth or clear soup, salted water and chocolate, all of the same temperature—preferably cold.

THE IRON-WOOD TREE.

There grows in South America a tree, the wood of which is so exceedingly hard that it is known as iron-wood.

Quite a different kind of iron tree, however, is that which once flourished in Vienna, and a remnant of which is still shown as a curiosity. In ancient days, when a youth had grown sufficiently expert in his trade to leave the city and seek his fortune elsewhere, it was the custom for him to repair to this tree and drive a nail into the trunk.

If the nail drove straight into the bark, it was regarded as a good omen, but if it bent or turned away it was held to betoken calamity to the experimenter, who in such a case might be tempted to remain at home.

In the course of time the trunk of the tree was covered with nails, and in the remnant shown to-day there is hardly any wood to be seen.

A CHINESE CUSTOM.

Chinese women never think of taking the hairpins out of their hair when they go to bed. These hairpins are very different from those worn by English women, being from six to ten inches long, of silver, gold or some bright material, and curiously bent and twisted. They are worn night and day, and only removed when the hair is to be newly dressed for some important occasion.

DEPENDING ON YOURSELF.

Do you know how hard it is to learn to depend on yourself? It is so easy to get in the habit of depending on some one else who is quicker or brighter, or perhaps has more confidence in speaking out at the right time, or doing the right thing. This is especially so during your school days.

I know two little girls, Annie and Teresa, who always sat together in school. They prepared their lessons in the same way, and appeared to be making equal advancement. They seemed to be particularly bright, and were noticed on that account by all the teachers who had anything to do with them. They were promoted from class to class together, and managed to sit side by side.

One day it happened that they were separated and then a discovery was made. Teresa continued to do well, but Annie did not show the same proficiency as before, and so it turned out that Teresa, out of mistaken kindness for her friend, had been helping her right along. And Annie had learned to depend on Teresa's assistance, and when she was separated from her scarcely knew how to go on with some of her class.

Do you see how wrong they both were—Teresa in giving help and Annie in accepting it? Then, too, they had made the more grievous mistake of deceiving the kind teachers who had trusted them.—S. Jennie Smith, in Christian Work.

AN ACTRESS' PET MOUSE.

Little Rodent Quickly Tamed and Now Enjoys Being Fondled.

Miss Flora Mitchell, an actress, who has been confined to the Homestead Hospital, in Marion, where she has been an invalid for five weeks, has tamed a mouse, says the Indianapolis News. For more than a week the mouse has been almost a constant companion of the actress, who says that it has greatly helped her to preserve her cheerfulness.

The first week Miss Mitchell was confined to her room she noticed the occasional presence of the animal, and, being lonely, began to lay bread crumbs and other mouse food where it would be handy for the little creature. Soon it became bolder, and after a few days it would come near the bed and eat the mites of bread and meat almost as soon as they were dropped by the hand of the sick woman.

She gradually began to reach toward the animal, until finally she touched it and stroked its furry coat. It has never shown the least fear, and about a week ago Miss Mitchell picked it up and allowed it to run at will over her hands and lap. From that time she has not had the least trouble in picking it up. In fact, it will run toward her, and seems to delight in being fondled. It makes no attempt to bite her, but when others attempt to fondle it there is trouble at once.

WISE WORDS.

Do to-day the best you can.

Be happy to-day; this is heaven.

Yesterday's error cannot be undone.

We learn to know better by thinking.

We can do better only by knowing better.

Are you sick? Repining will not give you health.

Are you poor? Unhappiness will not make you rich.

Are you ignorant? Unhappiness will not make you wise.

Difficulties are meant to rouse, not discourage.—Channing.

Yesterday's misfortunes are but debris in the lap of to-day.

To-morrow's tasks can be but burdens on the back of to-day.

We cannot learn to know better simply by repining or anticipating.

I can possess to-day only what I have brought into it, or what I dig out of it.

Be happy to-day. No matter about yesterday or to-morrow; be happy to-day.

He must be a thorough fool who can learn nothing from his own folly.—Hare.

There is always room for a man of force, and he makes room for many.—Emerson.

Beauty has an expression beyond and far above the one woman's soul that it clothes.

Did you do wrong yesterday? Regretting will not correct the act nor atone for it.

The noblest nature sees the most of this impersonal expression in beauty.—George Eliot.

The Good Spirit never antedates. He never gives us to-day what we shall need to-morrow.—Emerson.

Neither crying over yesterday nor making faces at to-morrow will enable us to do better than our best.

It is no happiness to live long, nor unhappiness to die soon; happy is he that hath lived long enough to die well.—Quarles.

The medicines for the cure of loneliness are portions of generosity, thoughtfulness for others and self-sacrifice, taken in large doses.

Man is not made subservient to an external law forced upon him from without, but is made responsive to a creative light and power within.—Biblical World.

Giants Disinherited.

Giants, as a class, are disinherited, at least in France. It may be remembered that some eighteen months ago, as we mentioned at the time, a M. Pierecourt, of Rouen, had bequeathed to the city a sum exceeding $250,000, to be devoted to giving dowries to couples of "giants" on their marriage. The object of this queer bequest was to counteract the physical degeneration of the human species. However, two difficulties supervened. The family of the testator brought a nullity suit, and no giants could be found. In these depressing circumstances a compromise has just been arranged. The heirs leave $2,000 to the municipality, and the annual income is divided between old age pensions and convalescent homes.—London Globe.

New Orders.

He was a newly made corporal, and the men in his room were a bit slow in answering the parade bugle. "Now, then, you chaps," he shouted, "fall out, inside!" A boisterous laugh from the men was the only response. "As you were!" he continued, noticing his mistake. "Fall outside in!" The roars of laughter which followed this order brought the color sergeant. "What on earth are you fellows grinning at?" asked the latter, testily. "Didn't you hear the bugle? Fall inside out!"

Insects Have Airships.

Insects enjoying aerial navigation by the use of balloons were recently caught by a French naturalist, who noticed them as small, bright objects floating in the air and behaving as if they were being steered. He caught some of them and found them to be viscous air bubbles one-fourth of an inch long, of uniform dimensions, and showing iridescent reflection. Each balloon was suspended by the feet of an insect resembling the hornet fly.

SATURDAY, NOVEMBER 21, 1903.

THANKSGIVING PROCLAMATION.

EXECUTIVE DEPARTMENT,
STATE OF NEW JERREY,
CITY OF TRENTON.

I appoint Thursday, November 26th, a day of Thanksgiving and Prayer, and request the people of the State to assemble in their places of public worship and return thanks to Almighty God for the blessings bestowed upon us as individuals and as a state during the year that is passed.

Life and the blessings of life are still ours. Our state is at peace. Our people are prosperous and we still enjoy the blessings of a free government that grows more enlightened and more beneficent as the years go by. Let us all, young and old, gather together on the day named, and, with humility and thanksgiving, acknowledge the Lord God Almighty as the source from which all our blessings flow.

Given under my hand privy seal, at the Executive Chambers in the city of Trenton, on the Thirteenth day of November, in the year of our Lord [L.S.] one thousand nine hundred and three, and of the independence of the United States the one hundred and twenty-eighth.

FRANKLIN MURPHY, Governor.

Attest: JOHN L. SWAYZE,
Secretary to the Governor.

THE INJUSTICE OF IT.

The granting of a writ of certiorari by the Supreme Court, in the case of John A. Goodwin against the Borough of North Plainfield, is *prima facia* evidence that the judge in issuing the writ had a reason for so doing.

In the case of Goodwin against the Borough of North Plainfield, the Recorder, before whom Goodwin was tried, will be obliged to file with the Supreme Court by or before December 4, next, a complete record of the trial. A review of the case will then be made by the Court, and it is to be hoped that Goodwin will be exonerated and the decision of the lower court reversed.

The injustice of the law which allows a petty officer to try a man charged with a crime or misdemeanor, was never so forcibly illustrated as in this case.

Here we have in John A. Goodwin, a quiet, inoffensive, law-abiding man—a man who tries to the best of his ability to do right by all men; a man who as chairman of a committee of church trustees, is endeavoring to protect the property which is under his care—forcibly arrested, without a warrant, and placed in a dirty cell where the shock almost killed him. He was brought before the borough recorder, with whom there exists more or less political enmity, on one side at least, and tried on a charge of disturbing the peace and interfering with an officer. He was found guilty and fined ten dollars. From the verdict of this court there is absolutely no appeal open to a poor man, as was explained last week in the REVIEW.

But some one erred in supposing that Goodwin would not be able to appeal to the Supreme Court for redress. Some one "over-reached themselves," to use a homely phrase. Not only has Goodwin succeeded in getting his case into the Supreme Court, but he is prepared to follow it up to the Court of Errors and Appeals if the Borough should decide to carry it farther.

But no matter where it may be taken, the people are with Goowin, and the people say they believe he has been wronged, and in nine times out of ten the people are right.

FIREMEN LOSE EXEMPTIONS.

The Supreme Court of New Jersey has declared a large proportion of tax exemptions in the State unconstitutional.

This sweeping decision takes away from the firemen, sailors, militiamen and soldiers' widows $500 exemptions heretofore allowed them, and adds nearly $[illegible],000,000 of taxable property to the State.

There has been considerable dissatisfaction existing regarding such exemptions, and the decision was not unlooked for.

It would appear that a more equitable and satisfactory arrangement could be made to reward firemen and other deserving classes than the practice of exemptions from taxation, which are more in the nature of charity than a recompense for duties performed; therefore the decision should be received with satisfaction by all, provided some other plan is pursued whereby the same object is reached.

No one begrudges the trifling amount allowed firemen, and it is reasonable to assume that it is the desire of a large majority of the people that they should be recompensed for their services, past, present or future, and if the decision of the court is final, it is earnestly to be hoped that some other means may speedily be found to show our appreciation of these brave men.

At any rate the $500 tax exemption is not at all likely to be disturbed this year as the State Board of Assessors has decided that tax collectors have no authority to alter the assessments on tax duplicates at any time. This will allow plenty of time to thoroughly investigate the matter and pass another law to take the place of the old.

A STEP FORWARD.

A special meeting of the Board of Education was held last Tuesday at Madison to take action upon increasing the membership of the board from five to nine, in compliance with the new school law. Miss Wildman, librarian of the public library; Miss Alice L. Greene, Mrs. James A. Webb, Jr., and Stark B. Ferriss were named. The selection of women is an innovation for that neighborhood, but some of the members of the board think the experiment will prove a wise one.

There is no doubt whatever of the advisability of electing women as members of the school board.

For many years it has been tried in Kansas to the entire satisfation of all concerned.

And why not? Who should know better than women the needs of children?

Madison will make no mistake in electing women on the Board of Education, and will take a long step in advance when it has been accomplished.

BOROUGH PAYS THE FREIGHT

Public sentiment is a great thing. Public sentiment is with Goodwin especially, and also with Sebring in a lesser degree. Goodwin, so say the people, committed no crime in trying to protect his property. In this opinion, many lawyers agree, therefore it is quite safe to assume that Goodwin will win his suit.

And the people will foot the bill be it $250 or $2000.

NEW JERSEY CROP REPORT.

Secretary Franklin Dye, of the State Board of Agriculture has filed a preliminary report showing the total valuation of crops in this State to be $35,000,000, which amount is $6,000,000 less than last season. The Secretary's report sets forth that this decrease is due to the rainy weather, by which several crops were ruined. Continuing, the report shows that the cranberry crop this season will be about 400,000 bushels, and this crop will realize at least $1,000,000. Another fact shown in the report is that live stock in the State has suffered not a little during the year through anthrax, but this loss has been made up largely in the increased value of hens and eggs. The price of eggs was higher this year than ever before. The fruit crop alone was a million dollars less than last year, owing to the terrific wind and rains orms.

TO PREVENT DIPHTHERIA.

Diphtheria is now prevalent throughout the state to more or less extent.

As a prevention of this dread disease is much easier than a cure, it would be well to remember that pure air and plenty of sunshine will almost invariable keep it off. Keep your windows open nights, get all the sunshine possible in daylight and keep everything clean. By following this simple rule the danger of contracting this malignant malady would be minimized if not altogether prevented, and is much cheaper than paying doctor's bills, and saves all annoyance from quarantine and much actual sufferings; besides the rule is a good one for all time and all circumstances and should be carried out to the letter whether there is any danger of diphtheria or not.

We hear some favorable comment by taxpayers on the recent decision of the Supreme Court declaring the $500 exemption to firemen. But just suppose that the firemen refused to fight any more fires without being paid for it—what would the taxpayers think then?

Hon. WM. M. LANNING, congressman from this district, has our thanks for a copy of the daily Congressional Record.

Somerset County Roads

NOTICE TO CONTRACTORS.

The Board of Chosen Freeholders of the County of Somerset will meet at the Court House, in Somerville, in said county, on

TUESDAY, THE FIRST (1) DAY OF DECEMBER, 1903,

at ten o'clock in the forenoon, and up to eleven o'clock a. m., on said day, will receive and then and there publicly open and read, bids for macadamizing three roads in said county, as follows:

No. 1, extension of Mountain avenue from Wahnetah Drive in borough of Round Brook northerly through Bridgewater township to Warren township line, a distance of 7,285 feet or 1 39-100 miles. For this road two bids are asked, one for 8-inch macadam and one for 10-inch rock bottom.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 4,890 cubic yards of earth excavation,

Price per square yard for 11,337 square yards of 10-inch rock road complete.

Price per square yard for 11,337 square yards of 8-inch macadam road complete.

Price per lineal foot for 1,500 feet of underdrains.

Price (lump) for the construction of the whole road complete.

No. 2 begins at Blazier's Corners in Bernards township and extends southerly through Basking Ridge to Davidson's bridge over the Passaic River, the county line near Millington, a distance of 16,808 feet or 3 1-5 miles.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 8,165 cubic yards of earth excavation.

Price per square yard for 14,423 square yards of 10-inch rock road complete.

Price per square yard for 9,200 square yards of 8-inch macadam road complete.

Price per lineal foot for 7,500 feet of underdrains.

Price per cubic yard for 500 cubic yards of binding material.

Price (lump) for the construction of the whole road complete.

No. 3 begins at Far Hills in Bernards township and extends northeasterly to middle of North Branch of the Raritan River at Schomp's Mills, thence crossing Bedminster township northerly through Peapack and Gladstone to the Morris county line.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 14,655 cubic yards of earth excavation.

Price per square yard for 5,356 square yards of 10-inch rock road complete

Price per square yard for 26,208 square yards of 8-inch macadam road complete

Price per lineal foot for 8,000 feet of underdrains.

Price (lump) for the construction of the whole road complete.

No bids will be considered in which all items are not filled out.

Bids must be for complete work, including all materials.

No informal or unbalanced bids will be considered.

The price must be written in the bids and stated in figures.

Samples of trap rock to be used by the contractor, and a statement of the place where the same is obtained, must accompany each bid.

Each bid must be accompanied by the name and residence of the bidder, and with an affidavit that no person other than those mentioned is financially interested therein.

Each bid must be accompanied by a certified check of One Thousand Dollars, payable to the order of Wm. J. Logan, Director upon condition that if the contract be awarded to the bidder, he will, when required by the Board, execute an agreement in writing to perform the work according to the specifications.

The successful bidder will be required to execute a bond with two or more sureties to the Board of Chosen Freeholders of said county in the penal sum of the estimated cost of said work within 30 days from the award, or the bid will be declared forfeited. Bidders must satisfy themselves by personal examination or otherwise of the nature and extent of the work and shall not at any time after submission of a bid dispute or complain of errors in estimates, nor assert that there was a misunderstanding in regard to the work to be done or the materials to be furnished.

The Board reserves the right to change a portion of the road from rock to macadam, and from macadam to rock, if it seems advisable, and the price of such work so stated in the bid by the square yard to govern such work.

The right to reject any or all bids is reserved to the Board.

The maps, profiles, specifications and blank bids can be seen at the office of Henry I. Budd, State Commissioner of Roads, Trenton, N. J., and at the office of Joshua Doughty, Jr., County Engineer, Somerville, N. J.

By order of the Board of Chosen Freeholders of Somerset County.

WM. J. LOGAN, Director.

Somerville, N. J., Nov. 3, 1903.

TOWNSHIP OF NORTH PLAINFIELD.

Sale of Lands FOR UNPAID TAXES

Public notice is hereby given by E. S. Ackor, Collector of the Township of North Plainfield, in the county of Somerset, that by virtue of a tax warrant issued on the sixth day of November, nineteen hundred and three, by the Township Committee of said township, he will sell at public vendue all the lands, tenements and real estate herein mentioned, for the shortest time for which any person or persons will agree to take the same and pay the taxes assessed against the same for the year 1901, with the interest thereon accruing, and all costs, fees, charges and expenses in relation to the levy, assessments and collection of said taxes.

The sale will take place at 3 o'clock p. m., on SATURDAY, THE TWELFTH DAY OF DECEMBER, 1903, at Demler's Store, North Plainfield Township.

The said lands and real estate so to be sold and the names of the persons against whom the said taxes have been laid on account of each parcel are as follows:

Fleig Mrs.—Aaron Allen property Washington Valley, 20 acres	$59.00

E. S. ACKOR,
Collector.

SHERIFF'S SALE

IN CHANCERY OF NEW JERSEY.

Between John D. Kirch et al., Ex'rs. etc., complainant, and Walter P. Lindsley et al., defendants.—Fi. Fa. for sale of mortgaged premises.

By virtue of the above stated writ of Fi. Fa. to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE TWENTY-THIRD (23) DAY OF NOVEMBER NEXT.

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit:

All that tract or parcel of lands and premises, situate, lying and being in the township of North Plainfield, in the county of Somerset and State of New Jersey:

Beginning at a stone planted for a corner in line of other lands of Elias Allen and being the southeast corner of lands this day conveyed to said Elias Allen by Aaron Allen, and running (1) thence along the line of other lands of the said Elias Allen in a magnetic course of north sixty-seven degrees and four minutes east (N. 67° 04' E.) a distance of one hundred and twenty-three and no tenths (123.0) feet to a cedar stake where formerly stood a white wood tree; (2) thence still along the line of other lands of the said Elias Allen north fifty-nine degrees and forty-three minutes east (N. 59° 43' E.), a distance of five hundred and ninety-eight and thirty-six one hundredths (598.36) feet to a stake and stone heap by a cedar tree; (3) thence along the line of lands of George Demler, crossing the valley and the valley road, north eighteen degrees and twenty-five minutes west (N. 18° 25' W.), a distance of thirteen hundred and eleven and twenty-three one hundredths (1311.23) ft to an angle point; (4) thence still along the line of land of said Demler up the mountain north no degrees and forty-five minutes west (N. 0° 45' W.), a distance of two thousand and one and seventy-eight one hundredths (2001.78) feet to a point and corner; (5) thence along the line of lands of formerly Dr Corra Osborn on the northerly side of the second mountain south eighty-nine degrees and twenty minutes west (S. 89° 20' W.), a distance of eight hundred and ninety-five and ninety-five one hundredths (895.95) feet to a stone planted for a corner in line of lands of formerly said Osborn, said stone being the northeast corner of lands this day conveyed to Elias Allen by Aaron Allen. (6) thence along the line of lands this day conveyed to Elias Allen by Aaron Allen, running first over and down the mountain (through lands of the grantors), making and establishing a division line for property of Aaron and Elias Allen, south no degrees and nineteen minutes west (S. 0° 19' W.), a distance of thirteen hundred and fifty and no tenths (1350.0) feet, more or less, to a stone planted for a corner; then second along the the edge of woods north eighty-nine degrees and forty-one minutes west (N. 89° 41' W.) three hundred and twenty-five and ninety-five one hundredths (325.95) feet to a stone placed for a corner at the northerly end of the old lane; then third south five degrees and thirty-eight minutes east (S. 5° 38' E.) down the old lane six hundred and three and three tenths (603.3) feet to a stone planted for an angle point; in the old lane, then, fourth, south twenty-eight degrees and fifty-three minutes east (S. 28° 53' E.) across the valley road and the valley, a distance of eighteen hundred and ninety seven and thirty-seven one hundredths (1897.37) feet to the first above mentioned stone and place of beginning. Containing 76 68-100 acres, more or less.

Being the same premises conveyed to the said Walter P. Lindsley by deed of Elizabeth D. Turney (single, bearing date April 10, 1902, and recorded in Somerset County Clerk's office, in Book S No 9 of Deeds for said county, on pages 292, etc.

When Grandma Bastes the Turkey.

TURKEY IS KING This Week

FORTUNATELY, nearly everybody in the United States will eat turkey next Thursday, for Thursday is Thanksgiving Day, and the words turkey and Thanksgiving are, in America, almost synonyms.

To tell a good turkey, D. E. Thomas, who is one of the poultry experts of Philadelphia, says:

"Examine the end of the breast bone—the end that is near the tail. If this is a piece of soft, movable gristle the bird is young. If it is solid, hard bone the bird is old.

"Examine the neck, and open and look into the eyes. Staleness shows itself first in a darkening of the neck. The eyes should be bright and full; dull, sunken, faded, they indicate that the bird has been killed too long. Select a plump turkey, because such a turkey is juicier, tenderer, sweeter.

THE ESSENTIAL QUALITIES.

"Those are the three qualities necessary in a turkey—that it be fat, that it be young, that it be fresh—and there is no reason why any one should be fooled. For it is just as easy to tell a good turkey as to tell a good apple or a good peach."

A turkey is hard to raise. That farmer is a lucky man who, hatching out 100, is able to bring thirty-three to market. For young turkeys are great birds to get sick. They are great birds to roam away and get lost. They are great birds to be slain by other creatures of the countryside.

There is in Trevose a farmer who had last year a fine flock of forty turkeys. These birds, like all of their kind, would start out on their rounds

"His Day."

in the early morning, and all day long they would move in a great circle, through this cornfield, that potato patch—by a regular path that they had marked out—and, late in the afternoon, they would get back home. But sometimes they would be delayed on their tour. Some argument, some feast, would hold them too long, and night would fall upon them still far from home. Immediately, then, their journey would cease; right where they were they would prepare to roost. But the farmer's wife would always, on such occasion, look them up, knowing well where they were to be found, and under her urging they would come home reluctantly.

But one night when they did not return she thought she would let them stay out. What harm could happen to them? Surely they would be all right in the morning. And she left them alone, and the next day only four of the flock returned. The rest were found lying dead about the fence where they had roosted, and in the neck of each dead body, just below the ear, there was a little round hole, the work of a weasel. For weasels kill turkeys in this way to suck their blood. Thus it will be seen that in many ways turkeys are hard to raise.

They are fed upon cracked corn, wheat screenings and mush. If it is cold they will eat a good deal and get fat. But if it is warm, they wander over the fields gobbling up grasshoppers, and such fare does not fatten them. Only when they eat grain do turkeys take on flesh, and they will not eat grain until the weather gets cold, until there is snow on the ground, so that they can find nothing else to eat.

Therefore the Christmas and New Year's turkeys are fatter and better always than the Thanksgiving ones.

HATCH IN FOUR WEEKS.

Turkeys hatch out in four weeks—one week more than the time required for chickens. In May they are born. The Thanksgiving turkey of the first quality is, therefore, from six to seven months old. At that age it is pretty well matured. The big turkeys—the thirty-pound gobblers, the twenty-five-pound hens—that are to be found upon the market are old birds. Prepared properly, however (parboiled first, then roasted slowly, with assiduous basting), they make excellent eating.

The turkey belongs to Thanksgiving because on the original Thanksgiving Day, at Plymouth in 1621, turkey was the feature of the repast. The records of Edwin Winslow describe that old-time feast as follows:

"Our Governor sent four men fowling so that we might, after a special manner, rejoice together. They four in one day killed as much turkey fowl as, with a little help besides, served the company nearly a week. At which time, among other recreations, we exercised our arms, many Indians coming among us, among the rest their greatest king, Massasoyt, with some ninety men, whom for three days we entertained and feasted."

ORIGIN OF THE NAME.

The name turkey is believed to come from the cluck of the bird—"turk, turk, turk." Dr. Samuel Johnson, in his dictionary, thought the name came from the country, and made his definition "Turkey—A large domestic fowl brought from Turkey." The French also have a singular error about this bird, which they call "poule d' Inde," or "dinde," a fowl from the Indies, while the Germans with the same inaccuracy call it "kalekuter," or bird from Calcutta.

As a matter of fact the turkey is indigenous to America, and Europe knew nothing of it until the Jesuits transported it from Mexico to France. They raised it on one of their farms near Bourges, and on this account there are certain French provinces where to this day in honor of its sponsors the turkey is called a "Jesuit."

The English do not know precisely when the turkey came amongst them. They approximate its arrival in the following antique couplet:

Turkeys, carps, hops, pickerel and beer
Came into England all in one year.

COOKING THE BIRD.

An old English magazine, the Perfect Gentlewoman's Delight, gives a quaint recipe for cooking turkey. "Take and clean your birde on the back," it says, "and bruise all his bones; then season with salt and pepper, grosse beaten, and put into him good store of butter; he must have five hours' baking."

But the best way to cook a turkey is to roast it, stuffing it with truffles. The truffle is a subterranean edible fungus, black and warted outside, and pale and veined within. Hogs are trained to root the truffle up. It is at its best in Perigord, and Perigord truffles are the ones that the American cooks use, for there are no native truffles of any sort in this country.

A statistician estimates that on Thanksgiving Day 7,000,000 turkeys will be eaten in the United States. These birds will weigh 63,000,000 pounds, and they will cost $9,000,000.

A Surprise Pumpkin.

This new vegetable will be fun for the youngsters at dinner, or at a party, or to fill up any gap in the Thanksgiving Day fun. Perhaps just at dusk, when the lamps are first lighted, will be the best time to bring in the pumpkin, which may be either a really truly one or one made of pumpkin colored tissue paper. The real one is the best. To prepare the real pumpkin, cut a piece off the top, or stem end, as if it were a lid, leaving the stem on as a handle, and remove the "insides." It if one guesses his second "surprise" correctly, he redeems his forfeit without penalty. This also gives a chance of failure to those who guessed correctly at first.

This "surprise pumpkin" may be prepared without expense if the pumpkin shell is already at hand.—New York Tribune.

When Grandma Bastes the Turkey

When gran'ma bastes the turkey
We children watch to see
The way she pours the basting on,
As slick as slick can be.

We hear the turkey "fizzle,"
An' know it's getting browned;
But when she puts the basting on,
Why then we jus' stan' 'round.

I like the Christmas stocking,
The frosted New Year's cake;
I like the birthday presents
My aunties buy or make;

But jus' the besteat time of al,
Thanksgiving brings to me—
When gran'ma bastes the turkey,
An' we all stan' 'round to see.

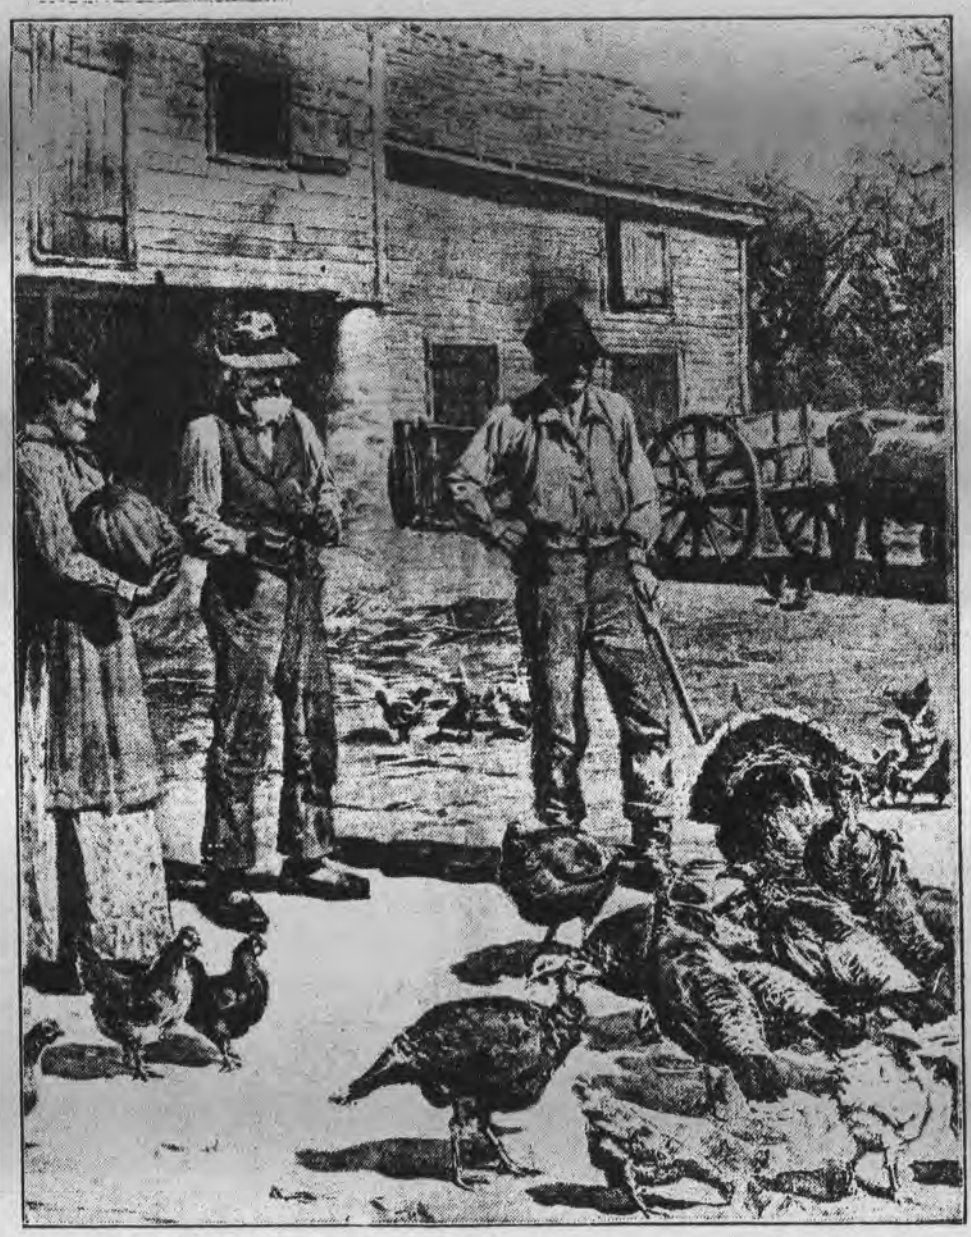
To Carve the Turkey.

Place the fowl on the platter, with the head at the left. Put the fork in across the breast bone. Cut through the skin round the leg joint. Bend the leg over and cut off the joint. Then cut off the wings, and divide wings and legs at the joints. Carve the breast in thin slices parallel with the breastbone. Some prefer to cut it at right angles with the bone. Take off the wishbone; separate the collar bone from the breast, slip the knife under the shoulder blade, and turn it over. Cut through the cartilege which divides the ribs, separating the breast from the back. Then turn the back over, place the knife midway, and with the fork lift up the tail end, separating the back from the body. Place the fork in the middle of the backbone, and cut close to the backbone from one end to the other, freeing the side bone. As soon as the legs and wings are disjointed and the breast from one side sliced, begin to serve, offering white or dark meat and stuffing as each prefers. Do not remove the fork from the breastbone till the breast is separated from the back. Use an extra fork in serving. If all the fowl be not required, carve only from one side, leaving the opposite side whole for another meal.

The pope's nose and the side bone are choice tidbits for some tastes, and these can be removed without cutting up the whole bird. After removing the thigh and the breast meat, press on the edge of the side bone and bend it over toward you, and cut through from the inside. In a young turkey it will separate at the joint easily.—American Kitchen Magazine.

SELECTING THE THANKSGIVING TURKEY

BY A. B. FROST.



—From Harper's Weekly.

A Cause For Thanksgiving.

Give thanks for all your blessings,
For life, for friends, for home,
For all the joy behind you
And hope for days to come.
But when before the altar
Your warmest prayers are sped,
Thank God for the remembrance
Of our illustrious dead.

For every noble impulse
Which comes to you to-day
From lives which now are ended,
Thank heaven when you pray.
—Ninette M. Lowater.

Thanksgiving Jingles.

There came to the feast dressed in state,
A turkey quite stylishly late;
It is said that she boasted
She'd never be roasted—
On Thanksgiving she met with her fate.

The boy with the bottomless pit
Wondered why he could never fill it
He stuffed turkey and pie
Till we thought he would die,
But it troubled him never a bit.

Thanksgiving Week.

"Wot is it, Bill—shotgun?"
"Naw. More turkey and mince pie."
—New York Journal.

A Fortunate Escape.

First Turkey—"You were lucky to survive the season."

Second Turkey—"I should say so. I was so dangerously healthy that I didn't expect to live through it."—Puck.

The Ribbon Fish and the Sea Serpent.

BY CHARLES F. HOLDER.

ONE of the most interesting questions relating to the sea and its inhabitants, and appealing strongly to popular fancy, is that of the sea serpent, which, literally, will never down. Hardly a month passes but some strange creature is seen by the men who go down to the sea in ships; everything that is seen is reported as a sea serpent. It is inconceivable that these people are always mistaken, or that a large percentage are plain prevaricators or that a still larger percentage are practical jokers. In a word, something is observed out of the common, reported as a "sea serpent." Some see a giant squid, fifty, perhaps seventy feet in length, darting along the surface, tail first, the latter out of water at times. I have seen a wounded squid, two feet in length, moving in this way, occasionally projecting it tail a few inches out of the water, its tentacles forming small "undulations" behind, and from a distance of thirty feet presenting a marvelous resemblance to a snake or serpent. A large squid could easily simulate a sea serpent. Some observers see lines of porpoises; others, whales in a line or seaweed, or birds, and the unskilled observer firmly believes he sees something strange and uncanny, which he assumes to be the sea serpent.

That there is a literal sea serpent is not believed by scientists, but that there may be some large and unknown, or uncaught fish, long, slender, and serpent-like, inhabiting the ocean, attaining a large size, is not beyond possibility. An animal that doubtless has figured as a sea serpent is shown in the accompanying photograph. Specimens sixty feet in length have been observed, and if this fish should attain a length of seventy or eighty feet and be seen rushing along at the surface, one could hardly picture a more remarkable "sea serpent." The subject of the illustration is an oar or ribbon fish (Regalicus), and was, possibly, the largest ever taken in American waters. It came inshore at Newport, on the Santa Catalina Channel, opposite the island of that name. An Indian was riding up the beach when he observed a large fish in the surf, and after considerable difficulty hauled out what he supposed to be a sea serpent high on the sands. Not being aware of the value of the specimen, he stripped off some of its beautiful "plumes," or dorsal fins, and carried them to the town. Crowds went down to the shore to see the monster, which was duly reported in the daily papers as thirty feet in length and weighing 1000 pounds. When the excitement had subsided, Mr. Horatio J. Forgy, an attorney of Santa Ana, measured the strange fish. The length was found to be twenty-one feet; its weight was estimated at between 500 and 600 pounds, but judging by the photograph, and an "angler's guess," three hundred pounds would seem ample, though the writer has no desire to trim the wonders of this remarkable fish. The creature was, fortunately, photographed by Mr. G. T. Peabody, and probably this is the only photograph extant of a large specimen of Regalicus. From this photograph the accompanying illustration was made.—Scientific American.

THE RIBBON FISH, OFTEN MISTAKEN FOR THE SEA SERPENT.

A FOLDING CRIB.

The matter of disposing of an infant at night is one which, sooner or later, nearly every one has to struggle with, and, therefore, a discussion of the question has more or less interest to every one. It is not now regarded as safe or sanitary to have the youngster sleep in bed with its elders, and yet in some cases where the luxury of a nurse and a nursery cannot be indulged in, it is desirable to have the infant near at hand, were it may be given such attention as it demands from time to time during the night.

CRIB ATTACHED TO BED.

The invention shown herewith seems to solve the question for persons in the ordinary walks of life, and has the recommendation of having been thought out by a woman, who probably knows what is needed. The arrangement is of collapsible construction so that when there is no demand for its presence it can be folded or packed away in little space. It has also a novel feature, in that it is fastened to the side of the bed, so that it reposes at its mother's elbow and the infant is as conveniently located as though it was in the bed itself.

The Pencil.

The lead pencil so generally used today is not made from lead, but from graphite. It derives its name from the fact that prior to the time when pencils were made from graphite metallic lead was employed for the purpose. Graphite was first used in pencils after the discovery in 1565 of the famous Cumberland mines in England. This graphite was of remarkable purity and could be used without further treatment by cutting it into thin slabs and incasing them in wood.

For two centuries England enjoyed practically a monopoly of the lead pencil industry. In the eighteenth century, however, the lead pencil industry had found its way into Germany. In 1761 Caspar Faber, in the village of Stein, near the ancient city of Nuremburg, Bavaria, started in a modest way the manufacture of lead pencils and Nuremburg became and remained the centre of the lead pencil industry. For five generations Faber's descendants made lead pencils.—Chicago News.

How to Choose a sponge.

"There are a great many differences between good and bad sponges," said a William street importer, "but persons who buy sponges at retail know very little about them. In nine cases out of ten those nice-looking bleached sponges seen in drug store windows are a delusion and a snare. The first requisite of a good sponge is that it shall be dark in color; I don't mean almost black, like a carriage sponge, but dark yellow. A vitriol bath to bleach a sponge white destroys its fibre. Its elasticity is ruined, and it wears out much sooner.

"In choosing a sponge see that it has a velvety touch to the hand and yields readily to a good squeeze. The best and most expensive sponges are the Levant, which come from the Mediterranean. The prettiest and cheapest are the grass sponges, made of numberless small filaments, and which look and feel like a ball of wool. The bulk of sponges used in this country come from Florida and Cuba."—New York Times.

Gutta-Jootalong.

Gutta-jootalong is a new material which is utilized as a substitute for and in conjunction with india rubber. It is a product of the East Indies, chiefly the island of Borneo, and in form in which it is imported is described as "whitish in color, looking something like marshmallow candy, smelling strongly of petroleum and oxidizing on exposure to the air, becoming hard." Its importation has increased from 6,500,000 pounds in 1899 to 14,000,000 pounds in 1903.

Haiti devotes almost one-sixth of its revenues to free schools. N. Y.—47

QUICK RESULTS.

W. J. Hill, Concord, N. C., Justice of the Peace, says "Doan's Kidney Pills proved a very efficient remedy in my case. I used them for disordered kidneys and backache, from which I had experienced a great deal of trouble and pain. The kidney secretions were very irregular, dark colored and full of sediment. The Pills cleared it all up and I have not had an ache in my back since taking the last dose. My health generally is improved a great deal."

Foster-Milburn Co., Buffalo, N. Y. For sale by all dealers, price 50 cents per box.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE BY THE REV. D. D. MacLAURIN.

Subject: Love and the Vision of God—Love is the Only Interpreter of the Kingdom of Heaven, of All the Spiritualities—The Riddle of Self.

BROOKLYN, N. Y.—Sunday morning, in St. John's M. E. Church, the Rev. Dr. Donald D. MacLaurin, pastor of the Second Baptist Church, Rochester, preached to the united congregations the final sermon in a series of eight on "The Greatest Thing in the World." His special subject was "Love and the Vision of God; or, the Eye That Sees All Wonders." The text was from 1 Corinthians xiii:12: "For now we see in a mirror, darkly, but then face to face." Dr. MacLaurin said:

Love is the only interpreter of God. We saw last Sunday that to love only are divine revelations made, and that to perfect love only can perfect divine disclosures be made. The converse truth is equally valuable, namely: "That love is the only interpreter of God, of all in the kingdom of God, of all spiritualities. Nor must you think that this is strange or arbitrary. We have sought in all our services to discover the analogy between the laws of the spiritual realm and the laws with which we are familiar.

You will find that this, namely: That love is the only interpreter, is part of the discipline of life in every direction, as some one has well said: "Love sees farthest, hears quickest and feels deepest."

Two illustrations of that proposition have been given; one with regard to the realm of nature. Let us say that two men are journeying through your beautiful park; one sees the general conformation, the general outline of street and sweep of field and shimmering lake, and he notices that there are trees bordering the drives and walks, but that is all. He has his eyes chiefly on the ground. He does not hear the birds; or, if he does, it is not to discern one songster from another. Now take the other. This man not only sees the general conformation of the landscape, the general plan of the artist who laid it out, but he sees the trees, he sees, he distinguishes one from another. He notes the flowers that spring; he notes not only the songster that sings, but he knows its life and story. He sees the shimmering pond and lake and the reflected overhanging foliage and is ministered to by them. At the end of the journey the latter man is enriched in his mind and heart. What has made the difference between the two men? The one has been and is a lover of nature. He is a student of nature because he loves it. And nature is kind; nature knows her lovers and to the makes disclosures to him that the other man does not get.

Two men visit the Metropolitan Museum of Art; and let me say to those who may not have seen those art treasures, it is worth a visit and much study. One of these men hurries through it in a perfunctory way. O, he notices there are large pictures and small ones, but he has no time for those little bits of paintings that adorn the walls. If there is a big gilt frame on one of the pictures, he admires it greatly, but it is a bore, and he hurries out, and wonders why people find so much in the art galleries of the world. The other man discovers in some small piece the product of a master, and he stands entranced before it for hours; and you will see his eyes suffused with tears, and if you notice you will see his lip is tremulous. He pays no attention to the frame; he sees the soul of the artist, and he is profoundly stirred. I have seen men all [illegible] masterpiece in the [illegible] soul finds the interpret him in [illegible] we come to know

Such men come nearest to interpreting the Creator, Himself; for of all the sons of men none stand higher than the artist. He who can take a piece of raw material, a piece of ordinary canvas, and make it ripple like a river, make it roar like the mighty ocean, carrying a ship full rigged upon its bosom; a man who can make it blossom into a rose, or who can paint upon it a battle scene, preserving the heroism and valor of men; a man who can, by color, lay before you all that is beautiful, all that is divine in the world, surely stands first among the sons of God, and nearest to the Maker Himself in that he is a creator.

The lover of art sees this. To him these things are disclosed, while the man who does not love sees little. The same is true between men. To whom do you disclose yourself? Who is able to interpret you? The man who hates you? Surely not. He is always misreading you, misinterpreting your motives. It is the man who loves you. He interprets you, he knows you.

So I think the proposition is justified that love is the only interpreter of God. This brings me to the first point I desire to bring to you this morning, namely, this: That there is a time in the life of every man when he has no vision of God and spiritual realities. I wish you to mark that. There is a time in the life of every man when he has no vision of God and spiritualities. It covers all that period of his life during which he is unregenerate, when there is absolutely no vision of God and spiritual realities. The Apostle Paul will justify that assertion, for you will find him saying in this same epistle, that "the natural man perceiveth not the things of the spirit of God, for they are foolishness unto him, and he cannot know them because they are spiritually judged." The natural man is not in the realm in which he can interpret spiritual realities.

This mysterious force in the organic kingdom we call life. Who knows the organic kingdom we call life? Who knows what it is? But we know it is there, and we know it weaves bodies in which it dwells; that it is a miracle and that it performs miracles of transformation. We are acquainted with it. They would not call it a miracle were they to know what it is. When life is busy, it is performing these transformations, but the atom cannot understand the results of life forces; they are foolishness unto it. They are utterly contrary to all it knows of the operation in its kingdom.

Now, do you know there is another kingdom? A third kingdom, which is above the organic and in which all higher life forces dwell; a third kingdom whose force is the spirit of the living God. And until a man has come into the life of that kingdom everything that we say transpires in it is foolishness to him in the natural kingdom, just as Paul says, "For the natural man receiveth not the things of the spirit of God, for they are foolishness unto him, and he cannot know them, for they are spiritually judged." He has not entered that third kingdom. He does not know its law. He does not understand its phenomena; in fact, he does not see them. Which things? "Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things"—What things, Paul? "The things that God has prepared for them that love Him." So there is a time when there is absolutely no vision of God, and no vision of spiritual realities, and it is vastly valuable that men both in the church and out of it shall recognize that great fact. Had men out of the church discovered that great fact, they would have been saved from many failures, as Bobby Burns in another connection says: "It wad frae mony a bluder free us, and foolish notion."

Not until a man has been touched by the finger of God will his ears be opened to the harmonies of the third kingdom; not until his eyes have had the vision of that kingdom and his heart made capable of receiving that kingdom—not until these transformations have come to him, can a man know spiritual realities at all. So I affirm that there is a time in the life of every man when there is absolutely no vision of God and no vision of spiritual realities.

Let me now notice in the second place that there is a time when the vision of God and spiritual realities is enigmatical, "for now we see in a mirror darkly." That word "darkly" is a translation of a Greek phrase meaning, "in a riddle," and thus you, who have a revised Bible, will find that the phrase "in a riddle" is placed in the margin, for what Paul meant is this, "For now we see in a mirror, in a riddle." Of course, they did not have the mirrors which we have now in the apostolic age. Him forevermore.

Beloved, we will never all meet together here, but we may all meet together yonder. We will never all see each other, therefore, here. Let us so live that we shall all see each other yonder, when we have come up, like Him, to meet the hosts out of great tribulations, it may be, having our robes washed and made white in the blood of the Lamb. Till then, good-bye.

Why, the gospel itself, is as a camera obscura, in which we see reflected the things of eternity. What we see is not the thing itself, but only the reflection of it. What we see cannot be the thing itself, but only the reflection of it. That is what the gospel is. The fourfold gospel does not give us the living Christ; it only gives the image of the living Christ. It is imperfect in so far as man has had part in it, and in so far as the reflector will give only an imperfect image of the reality, and we must never forget the fact that what we are looking upon in spiritual things is not the objects themselves, but only the reflections. Nor must we forget that the definition is made enigmatic, that the objects look like riddles to us also, because the eye of the soul has not a clear vision. What we see, depends on what our heart is. How often we are troubled by the mists and fogs that arise from the lower levels of our own lives. How often you and I know what it is to be lost in the fogs that settle down upon us as the racing yachts were lost the other day in their final reach for the goal; utterly lost, hidden themselves and hidden from all about them; and like the challenger, we are apt to get out of our course and lose time in the race for the goal. So we must not forget that both the mirror and the eye that sees contribute toward the enigmas of our life and the enigmas that surround us.

Let us look for a moment or two at life's riddles as they relate to God Himself. Now, I have a deal of sympathy for the multitudes of men who find it hard to see God. They hear from the pulpit of "God's omniscience, His omnipresence, His eternity, He fills immensity, God is spirit." Now, what sort of an idea can a man get from these descriptions of the Eternal? And he hears, "You must love God," that the sum total of the gospel in a word, so far as duty is concerned, is this, "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind." And he says to us, "How can I love Him? He is inconceivable to me. I cannot form an image of Him. I cannot see Him to know Him, to love Him."

Now God understands this a heap better than many theologians do. So He said, the "Utterance of God," the Word, shall come into human relations; He shall take on Him the nature of man; He shall descend the ladder of divinity, emptying Himself, until He reaches the lower rungs of humanity, until He shall move in the valley of human life so that men can touch Him, so that men can hear His voice, so that men can look upon His face and in hearing Him and in touching Him and in seeing Him, they shall hear and touch and see the living God.

God cannot be seen by any eye; there is no mirror large enough to reflect Him, and even in that which is "the express image of His person," the Christ I have been talking about, we have been seeing, as I said only a moment ago, only the reflection of Him. We do not see Jesus; we only see the image of Jesus in this fourfold or fivefold mirror, the New Testament. I am saying this in order to relieve skeptic minds of real difficulties. I am saying this to relieve Christians of real difficulties.

The one thing we need to cultivate above all else is sincerity. We should not say that we see God when we do not. We should not pretend to have larger visions than we possess. When it is impossible for us to have a clean, clear cut definition, we should simply wait and realize with the Apostle Paul that what we see is really in a mirror, and makes it look like riddles to us very often.

We are puzzled over the mystery of the incarnation. How could God come down and clothe Himself in an infant of days. Our unenlightened friends are trying hard to eliminate the miracle of the incarnation from theology. They had better realize their limits; there are lines in the image we cannot understand. The mystery of the Trinity. Who can comprehend that august doctrine? We must simply wait. There are so many things we cannot compass that if we try to we shall find ourselves hopelessly landed in the fogs. We just want to remember that what we have, even in the Bible, is only a mirror in which we see, as only in a riddle, the realities.

Now let us notice again life's riddles as they relate themselves to ourselves. What strange creatures we are. What strange things you and I sometimes do! How unaccountably we sometimes act! What riddles we are to ourselves! Can you understand why you took a given course the other day? You step aside from your own ideals and your own predeterminations, as to what your career should be. Can you understand why you said those things the other day? Why you were so blind as to do those things? How often men have said to me, "I cannot understand myself; I do not understand why I did that thing. Why, really, I cannot explain it." You cannot, unsaved person, you cannot explain why you remain in a state of alienation from God. If what the Bible says is true, there is pending over you an endless hell, or there is awaiting for you an endless life of bliss. Now, would you not think that such alternatives, "a kingdom or wrath," open to you, you would settle the great question? Why, some of you have lived for sixty years with the greatest problem in the universe still unsolved. It has been my privilege to deal with a great many men who had lived until they were thirty or forty or fifty years old, and many of them have said, I cannot understand why I did not yield before. What riddles we are to ourselves! How strangely we act!

How often men fail in their strongest point! Why, you would say, for instance, that an Elijah would never be found a quaking coward, whining under a juniper tree; a man who could defy the king and, what is worse, defy the woman, the wife of the king, falling down and asking that he might die. Elijah is not the only one. Some men that you know have failed, when they failed, in their very strongest point. What an enigma we are to ourselves. Who can understand himself? I would give more to know my own self than all else beside, save God and Jesus Christ.

But look at the enigma of so many lives. Take, for instance, the problem of personal suffering. Why is it that there is so much suffering? Why is it that some of the best people are crucified so awfully? Why is it that some of the most refined souls have the arrows driven furthest into their quivering hearts? Do you know why? Can you explain it? Can you explain the reverses that come, and come to the very best of people? Do you know why some of the noblest of men and women are reduced from comfort, from affluence, through the meanness of their own children or through the rascality of trusted friends, to almost penury?

I know a woman of a refined, sensitive spirit, who has been for more than a third of a century crucified to a wooden man. Some preacher, of course herself consenting, more than a third of a century united her to that wooden man. I am not drawing upon my imagination; I have them right in my mind; I know them. Not only a blockhead of a man, but a man with a wooden heart. Just the opposite of his wife in her aspirations, refinement and sensitiveness. It was hard for me all the time I knew them not to despise him as I would a dog, and I think the only son and daughter did almost despise their own father as they would despise a cur. Now, why was that woman crucified to that man?

Here is a young woman with two or three bairnies, wee bits of toddling things, clinging to her skirts, and that man is stricken down in the prime of manhood just when he is needed. How can we talk of the consolation of the gospel in such a case. I have not spoken at funerals for years; I only read the word of God and try to pray, bearing up to God the hearts that are before me. I will not attempt to explain what is inexplicable to myself. All I can say is what Jesus said, "What I do thou knowest not now; but thou shalt understand hereafter." And behind that I stand, waiting. It is mockery to undertake to explain to the soul in such a position the enigma that appals and overwhelms her.

I said a moment ago, for I must not leave you under a dark cloud; I said a moment ago, of this woman who was crucified for thirty years, that she was one of the saintliest and noblest women I have ever known, and what I have said of her is true. One of the most faithful in the church, loyal to the pastor, foremost in missionary work and one of the most noble souls I knew, and I am not sure but that there is the relation of cause and effect. Is not that wooden man the cause of the beauty of her character? Has not his imperfection of nature, his coarseness, driven that soul to communion with Him who is the chief among ten thousand and the One altogether lovely? And has not her contact with His transformed her into His likeness, whom she loves, not having seen?

May it not be that we grow in spite of our weights, and that these deprivations, these afflictions, this hard disposition, if you please, may it not be that they are weights intended to develop us into the larger manhood and the greater nobilities of the soul? Look at Jesus Christ. The story in brief is the incarnation, is the ministry, is Gethsemane, is the cross, is the grave. Would Jesus ever have become the world's Saviour had He not known Gethsemane and the agony of the cross? Could He have touched the heart the sore heart of the world, had He not gotten down to the very lowest depths and felt again and again the iron in His sensitive soul?

It may be, fellow sufferer, it may be gentle woman, that your deprivation, that your losses, your heart disappointments will minister to your transformation and to your final exultation, until you shall be in spiritual stature able to stand even shoulder to shoulder with the Man who was acquainted with sorrows and griefs.

Now, in conclusion, there is a time coming when we shall have the perfect vision. "For now we see in a mirror darkly, but then face to face."

A young girl fifteen years of age, a laughter loving, happy Christian girl, was suddenly thrown upon a bed of severe sickness; indeed, all one side was totally paralyzed and she was stricken into almost total blindness. Her family physician, after making a very careful examination, said to the sorrowing friends, "She has seen her best days, poor child." And this laughter loving maid responded, "Doctor, now that is not true; my best days are to come when I shall see the King in His beauty." And so, beloved, our best days are to come. Your best days and mine, the days when all the mists have rolled away, when all the clouds have been dissipated by the shining of His face, the day when all the enigmas of life shall be solved, the day when we shall see the King in His beauty.

John says, "Beloved, now are we the children of God, and it is not yet made manifest what we shall be." We know that if He shall be manifested we shall be like Him, for we shall see Him even as He is. You and I to be like Him who needeth not to be told about man, for He knew what was in man. You and I to be like Him, who was independent of gravity, of all material substances and forces? You and I to be like Him who on the Mount of Transfiguration shone so that the disciples were dazzled even of the splendor of His garments? You and I to be like Him whom John saw in that divine theopany recorded in the last book of the Bible, yonder in glory. You and I to be like Him who has overcome and is now sitting on the throne of the universe. That is what He has said. "He that overcometh will I give to sit with Me on My throne, even as I also overcame and am sat down with My Father on His throne." We shall see Him. We shall see Him face to face. Every problem will be solved. We shall be with Him forevermore.

Beloved, we will never all meet together here, but we may all meet together yonder. We will never all see each other, therefore, here. Let us so live that we shall all see each other yonder, when we have come up, like Him, to meet the hosts out of great tribulations, it may be, having our robes washed and made white in the blood of the Lamb. Till then, good-bye.

Truth.

Many men are false who never tell lies in the ordinary acceptation of that term. Their whole life may be a lie, they may never breathe anything but falsehood, and yet they could defy the judges of the land to convict them upon the charge of ever having told a lie. Truth is a matter of the inward parts; truth relates to spirit, purpose, what we would do if we could; and no man knows what he would do if he could. We are the victims of our own ignorance; we cannot measure ourselves. A man shall say, "I know I should never do that." He may be talking the language of a fool; the adequate temptation has never assailed him, he has never been locked within the environment which means failing in that particular direction. Truthfulness is a matter of tone as well as a matter of words; vocal color may tell a lie without the words themselves being false. What is truth? That is the old and ever-present and deeply penetrating question. Men laugh lies, shrug lies, attitudinize lies, suggest lies. A man may tell lies to himself. Where is this perfect man who needs no gospel, no divinity of ministry, no appeal from heaven, no tragic cross? — Joseph Parker.

Alone With God.

Your life and mine, the life of every man and every woman, however different they are from one another, they are all in Him. In Him there is the perfectness of every occupation; the perfect trading, the perfect housekeeping, the perfect handicraft, the perfect school teaching, they are all in Him. In Him lay the completeness of that incomplete act which you did yesterday. In Him lay the possible holiness of that which you made actual sin. In Him lies the absolute purity and loftiness of that worship which we this morning have stained so with impurity and baseness. To go to Him and get the perfect idea of life, and of every action of life, and and then to go forth, and by His strength fulfil it, that is the New Testament conception of a strong, successful life. How simple and how glorious it is!—Phillips Brooks.

Our Daily Life.

A few people live their lives like a novel, knowing that every chapter has a bearing on the wheels and that a continuous thread runs through all. But most of us pass our days as if we thought them a volume of short stories, which have not necessarily any connection with each other.—James Weber Linn.

SCIENTIFIC & INDUSTRIAL

The air of a room of ordinary size contains a quart of water, and about the same proportion exists in the general atmosphere, so that the air is really a great sponge, which sops up the water from the earth and the sea by evaporation, and redistributes it in the form of rain upon proper squeezing.

Twelve million bacteria inhabit the skins of half a pound of cherries, according to a German scientist who has made extensive experiments in regard to the infection of fruit with bacteria. Currants come next, with 11,000,000 to every half pound, and grapes next, with 8,000,000. All fruit should be cleaned by peeling or washing before eaten.

The earth contains an abundance of water, even in places like some of our great Western plateaus, where the surface is comparatively arid. The greatest depth at which underground water can exist is estimated to be six miles. Below that the cavities and pores of the formation are completely closed. The amount of water in the earth's crust is reckoned at nearly one-third of that contained in the oceans, so that it would cover the whole surface of the globe to a depth of from 3000 to 2500 feet.

In the new method of the study and photography of birds, instead of attempting to go to the bird, the bird is brought directly before the observer—nest, young, branch and all. The nest, whatever its original position, is moved with its support to a favorable place of study. A green tent is then pitched beside it, and under this perfect screen the observer can watch by the hour and accurately record the shifting panorama scenes of nest life. One might suppose that birds would desert their homes under such conditions, and thus promptly end the matter; but, instead, they forget the old site, adopt the new one, and defend it with all their customary vigor and pertistence.

The new incandescent electric osmium filament lamp is reported to have a much higher efficiency than the present carbon filament lamp. A life of more than 1000 hours at a nearly uniform economy of a trifle less than 1.5 watts per candle is claimed for it. Such a lamp at a reasonable first cost would, says the Electrical World, entirely change the situation in electric lighting. A detail of importance in the commercial value of the new lamp is the great scarcity of osmium. It occurs in platinum ores in the form of an alloy of iridium. It is about 100 times as scarce as platinum. It is at present used in small quantities as a chemical reagent. If an increased market were made for it by the new lamp its price would almost immediately become prohibitive unless a new source of supply could be discovered.

Property Found on Criminals.

"The question as to what final disposition is made of money and jewelry found in the possession of criminals was frequently asked when I was on the force two years ago," said an ex-captain of the New York police force. "As a rule, everything found on an arrested criminal which obviously is not his lawful property is held in trust, as it were, by the police for possible claimants. If no claimants turn up the property is returned to the criminal on being released from his term of imprisonment, provided the commissioner of police is perfectly satisfied that the property actually does belong to him. If the commissioner has reasons to think otherwise, however, the articles, often valuable, are held indefinitely or until it is certain that they will never be claimed by their rightful owners, when the stuff is finally disposed of and the proceeds handed over to benefit one or another of the various police funds. There are certain things, however, which the police never return to those on whom they have been found, such as burglarizing tools, firearms, gambling devices, begging letters—anything, in fact, that might be used by criminals again in their nefarious occupations."

Business Men as Advertising Experts.

It is impossible to build up any large business in trade nowadays, says the Oakland Tribune, without advertising. This fact is so patent as to require no demonstration; but advertising cannot make a man successful who does not know how to manage his business.

Advertising cannot make successful a business that is improperly run, any more than it can change bad goods into good goods. It is simply a selling agent if the goods are what the advertisement represents them to be.

Everything else being equal, the man who advertises will sell his goods, while the man who does not advertise will not sell his, or at most will sell only a small portion compared with the sales of his advertising competitor.

The Lebel Rifle.

Emile Massard, editor of the Paris Patrie, who has just finished his term of service as an officer in the reserve, asserts in his paper that the French army is the most formidable in the world because it is armed with the best rifle—the Lebel. By reducing the weight of the bullet and lengthening it slightly, and by increasing the powder charge, the rifle has the flattest trajectory of all. The Germans, M. Massard says, although they have stolen models of the new cartridges, cannot produce anything equal to the French for two or three years.

Mrs. Anderson, a prominent society woman of Jacksonville, Fla., daughter of Recorder of Deeds, West, who witnessed her signature to the following letter, praises **Lydia E. Pinkham's Vegetable Compound.**

"DEAR MRS. PINKHAM:—There are but few wives and mothers who have not at times endured agonies and such pain as only women know. I wish such women knew the value of **Lydia E. Pinkham's Vegetable Compound.** It is a remarkable medicine, different in action from any I ever knew and thoroughly reliable.

"I have seen cases where women doctored for years without permanent benefit, who were cured in less than three months after taking your Vegetable Compound, while others who were chronic and incurable came out cured, happy, and in perfect health after a thorough treatment with this medicine. I have never used it myself without gaining great benefit. A few doses restores my strength and appetite, and tones up the entire system. Your medicine has been tried and found true, hence I fully endorse it."—MRS. R. A. ANDERSON, 225 Washington St., Jacksonville, Fla.

Mrs. Reed, 2425 E. Cumberland St., Philadelphia, Pa., says:

"DEAR MRS. PINKHAM:—I feel it my duty to write and tell you the good I have received from **Lydia E. Pinkham's Vegetable Compound.**

"I have been a great sufferer with female trouble, trying different doctors and medicines with no benefit. Two years ago I went under an operation, and it left me in a very weak condition. I had stomach trouble, backache, headache, palpitation of the heart, and was very nervous; in fact, I ached all over. I find yours is the only medicine that reaches such troubles, and would cheerfully recommend **Lydia E. Pinkham's Vegetable Compound** to all suffering women."

When women are troubled with irregular or painful menstruation, weakness, leucorrhœa, displacement or ulceration of the womb, that bearing-down feeling, inflammation of the ovaries, backache, flatulence, general debility, indigestion, and nervous prostration, they should remember there is one tried and true remedy. **Lydia E. Pinkham's Vegetable Compound** at once removes such troubles.

The experience and testimony of some of the most noted women of America go to prove, beyond a question, that Lydia E. Pinkham's Vegetable Compound will correct all such trouble at once by removing the cause and restoring the organs to a healthy and normal condition. If in doubt, write Mrs. Pinkham at Lynn, Mass, as thousands do. Her advice is free and helpful.

No other medicine for women in the world has received such widespread and unqualified endorsement. No other medicine has such a record of cures of female troubles. Refuse to buy any substitute.

$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness. Lydia E. Pinkham Medicine Co., Lynn, Mass.

BEST FOR THE BOWELS

Cascarets

CANDY CATHARTIC

GUARANTEED CURE for all bowel troubles, appendicitis, biliousness, bad breath, bad blood, wind on the stomach, bloated bowels, foul mouth, headache, indigestion, pimples, pains after eating, liver trouble, sallow skin and dizziness. When your bowels don't move regularly you are sick. Constipation kills more people than all other diseases together. It starts chronic ailments and long years of suffering. Take our advice, start with Cascarets today under absolute guarantee to cure or money refunded. The genuine tablet stamped C C C. Never sold in bulk. Sample and booklet free. Address Sterling Remedy Company, Chicago or New York. 502

Missionaries are well treated in Siam and the King, a Buddhist, is giving the site for a new Protestant church in Bangkok.

F. G. Moore, of New York, has bought a portion of the Beaverkill (N. Y.) waters for fishing purposes, paying $1000 a mile.

CAPSICUM VASELINE
(PUT UP IN COLLAPSIBLE TUBES)
A substitute for and superior to mustard or any other plaster, and will not blister the most delicate skin. The pain-allaying and curative qualities of this article are wonderful. It will stop the toothache at once, and relieve headache and sciatica. We recommend it as the best and safest external counter-irritant known, also as an external remedy for pains in the chest and stomach and all rheumatic, neuralgic and gouty complaints. A trial will prove what we claim for it, and it will be found to be invaluable in the household. Many people say "it is the best of all of your preparations." Price 15 cts., at all druggists or other dealers, or by sending this amount to us in postage stamps we will send you a tube by mail. No article should be accepted by the public unless the same carries our label, as otherwise it is not genuine. CHESEBROUGH MFG. CO., 17 State Street, NEW YORK CITY.

DROPSY NEW DISCOVERY; gives quick relief and cures worst cases. Book of testimonials and 10 days' treatment Free. Dr. H. H. GREEN'S SONS, Box B, Atlanta, Ga.

2 25 1905 PISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes Good. Use in time. Sold by druggists. CONSUMPTION

If afflicted with weak eyes, use Thompson's Eye Water

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

of all colors and sizes, some with long tails, others with bobtails and two have no tails at all. Couch feeds his cats on boiled potatoes, of which he cooks large quantities at a time, and takes his own share out of the pot. He is still hale and hearty, is able to do a good day's work and seems to enjoy life with his feline friends.

VALUABLES IN A FEATHER BED

While rummaging in his attic last week, Dr. A. M. Pierson, proprietor of the Baker House Pharmacy, of Vineland, discovered a pair of gold earrings and a handful of small five cent pieces in a feather bed. The earrings were of the pattern made forty years ago, and, together with the coins, had been secreted in the feathers for many years. The bed came from the Pierson homestead a short time since, where $580 in gold was found securely stored away in secret places.

FEARS COMPLETE OSSIFICATION,

It is feared by the friends of John M. Vreeland, of 119 Water street, Paterson, that the gradual stiffening of his joints, which has followed rheumatism, will result in complete ossification. Already the hinge joints, like the knee and elbow refuse to respond to his will, and the ball and socket joints, the hip and upper arm are moved slowly and with difficulty. The disease began at the hips and has extended gradually to every part of the bony structure. The fingers of the sufferer are rigid and his wrists are no longer pliable. If the drying up of the lubricating processes continues, and the doctors have no hope of retarding it, Vreeland's body will in time become rigid and immovable.

GREAT DEMAND FOR CRANBERRIES

Cranberry growers in Vineland say that while their crop this year is large, there was never before such a demand for berries both in this country and abroad. Buyers are in such straits that they visit all the small growers with whom they never dealt before. The ruling price is $2.10 a crate. It costs forty five cents to get them picked, and something to clean, box and ship them, but there is a good profit left. One reason why the acreage is not larger is that it costs $150 an acre to prepare a bog in the right way, but a bog carefully laid out will generally pay for itself on the fourth year. It is predicted that there will be more cranberries grown in the near future.

PASSING OF TOLL BRIDGES

Free bridges across the Delaware River have been desired for along time by residents of both New Jersey and Pennsylvania, and now an attempt to secure them has been inaugurated. The Warren County Board of Freeholders has adopted a resolution asking members of the New Jersey Legislature, which convenes in January to take the matter up in an official way. A committee of the Freeholders has been appointed to confer with commissioners from Pennsylvania, and ascertain for what amount the bridge of the Lackawanna Railroad, near Delaware, N. J., can be purchased. This is considered a favorable time to urge the free bridge project, as most of the old toll structures were washed away by the recent flood.

See Coupon on First Page.

Thoughtful buyers will do well to look over the the many things Harry Feinberg, the popular priced outfitter has to offer in clothing, furnishing goods, hats and shoes. Be sure and see the flannel shirts he is offering, also the initial hemstitched handkerchiefs at five cents.

You can save 10 per cent on your purchases if you will cut out the coupon on first page of the REVIEW and bring it with you.

A Trip to Berkley Heights.

Leaving Homan's Blacksmith shop at 1 p. m. for our outing, in a well equipped buckboard we started for the wilds of Berkley Heights. Our first glimpse was of the new engine house now being built by the tax — no, I mean the 'Powers that be," for the tax-payers only pay the bills. It will be an ornament when finished. The younger members of the company expect to live long enough to witness its completion, but the older members have about lost hope of the event taking place in their day.

Passing up Somerset street we come to a large gap in the mountain through which the road extends. Side by side with the road flows Stony Brook on one side while on the other is a large quarry where steam drills are cutting into the solid rock which is carted to the stone crusher, where it is broken into assorted sizes to be used later on our macadam roads. Next comes the old Inn situated in the most picturesque spot in the notch.

As we turned into the road which lies in the valley between the two mountains our eyes soon espy a castle built of cement and steel nestled on the side of the Watchung Mountain. This Castle called "Elsinore" is owned by Dr. Richard Moldeuke. The castle is not yet completed, but when it is and the grounds laid out as contemplated by the owner, it will seem like a bit of the Old Country transplanted in the new.

As we passed along we came to a turn of the road which lead to the old Guerrier Hotel with its vineyards, where in days gone by song and jest were often heard in its halls and where pretty French maids were wont to skip and dance. Now, we were informed, Divine services are held there every Sunday by some Christian workers from the borough.

A more beautiful or wilder bit of scenery will be hard to find anywhere than the glen beyond this Hotel. Stopping and looking at this wild spot one cannot but wonder that some one has not made use of this water power instead of letting it run to waste.

Further along we came to a small brick Catholic Church and still further along a quaint little school house where perhaps a future president of the United States is being taught his A. B. C's.

Only a little further and we had reached Berkley Heights with its single track rail road. The people are mostly engaged in either farming or brick-making. We were informed there that the clay is from 38 to 40 feet in depth, perfectly free from any small stones or pebbles.

We returned home thoroughly pleased with one of the most picturesque trips we ever took, and we would suggest the taking of the trip to anyone interested in wild and beautiful scenery. If you cannot go by carriage, go by wheel, if you can ride one.

"A SUBSCRIBER OF THE REVIEW."

The Companion as a Christmas Gift.

The Youth's Companion is one of the few gifts that are always appropriate and yet within reach of the smallest purse. It brings to every member of the family something of interest, something of value— a story that cheers, an article that carries the reader into far-off countries or among men who govern, a sketch that amuses, a poem that puts a bit of truth into new and convincing way, a page of pictures that holds the children spellbound. It is America's home paper, a paper received weekly in more than half a million households in the United States.

If you desire to make a Christmas present of the Youth's Compaion, send the publishers the name and adress of the person to whom you wish to give THE COMPANION, with $1.75, the annual subscription price. They will send to the address named The Youth's Christmas Packet, all ready for Christmas morning, containing the Christmas number, the Companion Calendar for 1904, lithographed in twelve colors and gold, and subscription certificate for the fifty-two issues of 1904.

The new subscriber for 1904 will receive all the issues of the Companion for the remaining weeks of 1903 free from the time of subscription, also The Companion Calendar for 1904, lithographed in twelve colors and gold.

Annual Announcement Number fully describing the principal features of The Companion's new volume for 1904 will be sent to any address free.

THE YOUTH'S COMPANION,
144 Berkely Street, Boston, Mass.

It is for Mr. Martine to Explain.

Five days have gone by since the great jubilation spread given by the victorious Union County Democrats, and still not a word of explanation has been vouchsafed as to why Farmer Orator Martine was not in attendance. It is now time to call upon him to explain his understanding of the reason he is never invited to help harvest a political crop, and that his services are dispensed with after he has done the sowing.—*Newark Evening News.*

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address.
Rev. EDWARD A. WILSON, Brooklyn, N. Y.

Thanksgiving.

For God's bounty through the year,
Thank the Lord!
Use the gifts some heart to cheer,
Thank the Lord!
Has He blessed you, richly blessed?
Is it your most honored "Guest"?
Have you in and outward rest?
Thank the Lord!
Are you blest with best of health,
Thank the Lord!
If you daily gain in wealth,
Thank the Lord!
Many a sorrowing heart can't lift
If you kindly send a gift;
Up to heaven the deed goes swift,
Thank the Lord!
For the sunshine, for the rain,
Thank the Lord!
For the fruit and for the grain,
Thank the Lord!
For the singers in the air,
For the flowers sweet and fair
Gladly offer praise and prayer
To the Lord!

SOPHIE STAHL.

Deposits, $700,000.

It was but a month ago that we announced that our deposits had reached the $600,000.00 mark. Since then we have added another $100,000.00 to the total. The number of depositors now represented on our books is over 1,400, which means that nearly one hundred accounts have been added during every month the Company has been in existence. Such a record demonstrates in an able manner that our broad and far-reaching facilities are meeting a definite need.

We continue to invite new business subject to the following liberal terms;

On accounts of $200 or more, subject to check, 3 per cent. is paid.
On accounts of $5.00 or more 3 per cent. interest is paid, provided the money is left on deposit for three months or longer.

Last Tuesday afternoon Somerset County Collector Allen, gave a dinner to the Board of Freeholders, County Clerk, Sheriff, Surrogate, Judge and other county officials.

Rev. Dr. Shumkoff, of Macedonia and a graduate of the University of Pennsylvania, spoke on Macedonia at the meeting held in Grace M. E. Church last Wednesday evening.

Mrs. Mary H. Hunt, of Boston, the well-known temperance speaker will deliver a lecture in the Seventh Day Baptist Church, Thursday night, December 17 at 8 o'clock. A silver offering will be taken.

E. W. Embury, Miss Mary Embury, his sister, who have been visiting friends in Plainfield, returned to Germantown, Pa., Wednesday. They will soon go to Tryon, N. C., where they will spend the winter.

At a meeting of the Plainfield Board of Trade, Thursday night a resolution was passed to get full details of a system and plant for making thirty-five cent gas such as Atlantic City is intending to have installed there.

Suit for Miss Mabel Conover, of this borough, who was hurt in the Westfield [redacted] by her lawyers, Codrington [redacted] Shreve.

Mrs. Ella Boole, secretary of the Women's Board of Home Missions who made an address before the Plainfield members of the Women's Home and Foreign Missions at the Crescent Avenue Presbyterian Church last Thursday afternoon, was the guest of Mrs. W. E. Honeyman, of Lincoln place, this borough.

A meeting of the Women's Home and Foreign Missionary Society was held in the parlors of the Crescent Avenue Presbyterian Church last Thursday afternoon. The president of the local board, Mrs. Israel Pierson presided. Rev. W. E. Honeyman made the opening prayer. Addresses were made by Mrs Ella Boole, secretary of the Women's Board of Home Missions and Rev. J. S. Zelie, pastor of the Church.

Isaac Vanderveer Bond, a former resident of Plainfield died at his home in Newark last Wednesday. Interment will be made in the North Plainfield Cemetery this morning. Two years ago while Mr. and Mrs. Bond attempted to cross the tracks at the Plainfield station, the latter was killed and the former received injuries from which he never recovered. His death though was directly due to pneumonia.

Officers Elected at Reform Club.

At the regular monthly business meeting of the Reform Club, Tuesday evening one new member was admitted and the following officers were elected: President, W. C. Smith, Sr.; first vice president, B. W. Hand; second vice president, Edward J. Smith; financial secretary, Charles H Stephens; treasurer, J. W. A. Bauersachs; recording secretary, E. P. T. Smith; chaplain, Eden Boice. Installation of officers will take place January 7, when a special program consisting of music and addresses will be given.

Mr. Brown who has been so earnestly working at the club for several weeks past, will be present at the meetings tomorrow afternoon and evening.

Union County Newspaper Men Formally Organize.

The Union County Press Club was formally organized last Saturday afternoon at a meeting held in the Lyceum theatre building, Elizabeth. A constitution was adopted and the following officers elected for the ensuing year: President, Joseph Louden; vice president, H. S. Barnes; secretary and treasurer, Ralph L. Morrow.

The following list compose the board of governors: W. W. St. John; Charles B. Morse, John A. Potter; Henry S. Altat.

On the enrollment committee are: G. A. V. Hankinson; J. W. Clift, Thomas M. Muir, H. S. Barnes, John A. Potter and H. McGowan.

First Real Snow Storm.

The first snow this winter began falling early Wednesday morning and continued all day and far into the night, assuming blizzard proportions. When the storm was over about four and one-half inches of snow covered the ground. On account of drifting, the sleighing was not first class, but many sleighs were out. Yesterday was quite warmer and the sun melted the snow somewhat.

Revival Meetings at the Rescue Mission

Great success has been met with in the revival services held in the Rescue Mission during the past week. At nearly every meeting some one has accepted Christ as their Savior and Redeemer and many have raised their hands for prayers.

The meetings are under the leadership of Mrs. O'Brien and Miss Sutton, evangelists.

Last evening Howard T. Scheckler, of Elizabeth, assisted Mrs. O'Brien. Tomorrow afternoon at 4 o'clock there will be a special Holiness meeting in charge of the evangelists. Every one welcome to all the meetings.

SUBURBAN NOTES.

WATCHUNG.

Elsie and Anna, daughters of Dr. Richard Moldenke and wife, have returned to the Mary Drexel Lutheran School for girls at Philadelphia, after spending Thanksgiving week at home.

The Christmas Committee of the Mary Wilson Memorial Chapel, gave a sociable Monday evening. Speir Bros. furnished the music. Cake and coffee were served free. A collection was taken to defray the Christmas tree expenses which amounted to about $15.

The many friends of Mrs. John L. Shank are pleased to see her at home again after a six weeks' stay at the Well's Memorial Hospital at New Brunswick.

Miss A. G. Higgins spent Thanksgiving at Hopewell.

Edward Cantwell and wife have moved to New York City. Chris H. Blume now [redacted] residence they vacated here.

[redacted] Education met last week [redacted] the usual routine business. [redacted] that as many of the members of the Board as possible would attend the County Board meeting at Somerville on Saturday, December 12th.

The Township Committee will hold its regular monthly meeting next Tuesday afternoon. A committee will be on hand with the necessary documents for the Board to sign, when it is hoped the good work will go on without any more delay.

Roll of Honor for November.—Grammar Grade: Tessie Schmidt, George Schmidt, Clara Wersing, Eda Wersing, Charlie Wersing, Clara Kelm. Primary Grade: Tiny Texier, Lillian Willis, Adele Herrmann, Gusta Troiano, John Blumetta, Elsie Schmidt, Helen Schmidt, Eddie Wersing, Theodore Wormser, Minnie Blume, Alice Willis, Isabel Deats, Swift White, Hippolite Texier, Roy Herrmann, Daisy Schmidt.

* * *

LIBERTY CORNER.

Ira Burnett one of the four typhoid patients of Liberty Corner, who were sent to the Somerville Hospital, died last week of pneumonia. His remains were removed to Liberty Corner for interment.

Christmas Entertainment Committees.

The following committees have been appointed for the Christmas entertainment at Hope Chapel: Ira W. Travell, chairman; the Misses Marie Newman, Grace Hazen, Eleanor and Margaret Vandeventer, Mary Dennis, Grace Burke, Alice Lansing. Mr. and Mrs. Noble King, on the entertainment committee. John Cose, chairman; George Firstbrook, Benjamin Evans and T. M. Muir on the decorating committee.

Y. M. C. A. Auxiliary Officers Elected.

The Ladies' Auxiliary of the Young Men's Christian Association, which was organized recently, held its second meeting Monday. The following officers were elected: President, Mrs. Henry M. Maxson; vice president, Mrs. Stephen Cahoone; second vice president, Mrs. J. D. Phillips; secretary, Mrs. J. W. Gavett; treasurer, Miss Lena Boss.

A public meeting will be held December 14.

An Example Worthy of Being Imitated.

If the total abstainers on the dinner committee continue to have their way there will be no strong drink or light wines served at the annual banquet of the Board of Trade, of Bayonne.

When the dinner committee was appointed James S. Coward was selected as chairman, but he is opposed to having any liquor served, and he informed the members that if wine was to be served at the banquet he would not serve on the committee. The other members voted to have a "dry" dinner, and now the members who were not at the meeting and who favor wine are indignant.

BOROUGH BOARD OF EDUCATION.

New School House Recommended, Grove Street Location Favored.

The Borough Board of Education held its regular monthly meeting Monday evening. The session lasted until near midnight, much business being transacted.

The holiday vacations, as arranged by Superintendent Wightman, were adopted and are as follows:

For the Christmas holidays, the schools will close Wednesday December 23, and reopen Tuesday, January 5. The Easter vacation April 3 to 9. The summer vacation schools will close on June 17.

An invitation was received from County Superintendent Kretchmer for the Board to attend a meeting of the Somerset County school boards at Somerville on December 12.

A communication was received from the Plainfield City Board of Education relative to the consolidation of the borough and city high schools which stated that no action would be taken until the new building in the city was finished, which would be in about two years.

A matter was discussed which has caused some comment and criticism from several parents regarding a temporary recitation room in the Training School. The principal objection to the room was on account of poor ventilation. It transpired during the discussion that the room was originally intended for a storage room, but on account of the unusual increase in the number of pupils, it became necessary to utilize the room for recitation purposes. It was hastily prepared as temporary quarters, but the Board decided to have duly put in rotary ventilators so that no objection can be raised after the improvement is installed.

Miss Clara Plume, Miss Bauerhite, teachers, having resigned, Miss Kathryn Buell and M. K. B. Heiker were appointed in their places. Miss Edna French was assigned to the kindergarten department.

The question of mechanical drawing instruments came up again. Five sets of instruments were recently purchased for children who could not afford to purchase sets for themselves, but this number was not sufficient. The Board did not feel able to purchase sets for all the pupils who wished to study and in order to accommodate all of them it was decided to purchase one more set and have two classes on different days, so that the twelve pupils enrolled may continue the study.

The question of a new school house for the borough was brought up. Mayor Smalley spoke on the urgent need of such a building and recommended that it be placed in Prideville, and offered to give a lot free for the purpose. He said among other things that a school house in that section would result in many houses being built there and a general improvement in the neighborhood and tend to increase the population. He also said that he would like to say some things to the Board at a public meeting when the matter was ready for public discussion.

The Board did not consider the Mayor's offer as the location was not thought at all advisable.

After routine business had been transacted, the Board went into executive session when it was decided to recommend as the location for the new building a lot on the upper end of Grove street near the corner of Rockview avenue. This lot is offered very reasonably and with some filling in, can be utilized. The location is considered the best available, being near Prideville as well as to the borough proper. At a public meeting to be held as soon as the Board has arranged the details, this location will be voted on in connection with a school building of eight rooms, the cost of which will be about $25,000.

The financial report showed total receipts of $11,377.75; disbursements, $6,166.23.

I. C. T. Club Fair.

The I. C. T. Club of Plainfield has been holding a fair all this week in their club rooms, corner North and Park avenues. It has been even a greater success than the one held last year. Prof. Suhr's Imperial Orchestra repeated its success of last year making decided hits with music from the following operas "Prince of Pilsin," "Mr. Pickwick," from Paris, "Babes in Toyland," and "Red Feather."

William Jeffery and City Judge W. N. Runyon, sang Thursday night. Although not definitely decided as yet, in all probability the fair will be continued on Monday night until two o'clock. Chairman J. William Waters and the rest of the committee deserve a great deal of praise for their work.

Left $6,000 Pastorate For $2,500 One.

Believing that he could accomplish more work in Plainfield than where he was then located, a certain preacher gave up a pastorate which was paying him $6,000 a year and came to Plainfield for $2500 a year.

But for an earnest desire that his name should not be made public the REVIEW would like to publish it in letters an inch long.

It is such unselfish acts as this that tend to inspire men Godward and upbuild our churches.

Entertainment at St. Peters.

At a musicale and entertainment held at St Peter's German Lutheran Church, this borough, last Wednesday evening, the following program was rendered: Violin and organ selections, Speir brothers, of Watchung; duet, Miss Clara Kelm and Theresa Schmidt; song by the Watchung Quartette; solo, "Out in the Cold" by Theresa Schmidt.

A silk quilt donated by Mrs. John H. Koch, was chanced off and won by James Hansen. The amount realized on the quilt was $54 75. Refreshments were served by the Ladies Aid Society of the Church.

The Elks Establish a Lodge.

A lodge to be known as Plainfield Lodge, No. 885, Benevolent Protective Order of Elks was established in Plainfield last Wednesday evening. About 500 members of the order from different parts of the state were present. The New Brunswick Lodge conferred the degree upon the Plainfield candidates.

A dinner was served at Saengerbund Hall during which time music and speech-making were in order.

Freedom Castle in Its New Home.

Last Tuesday night, Freedom Castle, No. 42, Knights of the Golden Eagle held its first meeting in its new home in the Babcock building. An entertainment was given at which the wives and friends of the members were present. The program consisted of piano, violin and vocal music, an address by the Grand Vice Chief, Dr. J. Hervey Buchanan, recitations, dialogues, and a farce entitled "Rooney's Restaurant." Refreshments and a social time concluded the evening's entertainment.

Concerning Proctor's.

Special preparations have been made at all the theatres on the Proctor's circuit for an appropriate observance of the Christmas holidays. Not will theatres themselves have an outward resemblance of the Yuletide season, but the stage shows have been carefully prepared so as afford pleasure, especially to the little folks. It is quite an art, indeed it is almost a science, to know how to prepare programmes which will appeal to theatre patrons at timely periods of the year, but Mr. Proctor, with his many years of experience, has become a past master of the art of amusement catering, and it is a small wonder that his holiday bills are exactly what is required and expected of him. For the little folks there will be at each of his theatres acts especially calculated to delight them. At one house a set of nimble monkeys will disport themselves; at another a troupe of trained dogs will go through tricks that are truley wonderful; at still another house marvelous Holden Marionettes will be worked by invisible wires, to the intense mystification and amusement of both young and old folks, and to these always attractive features the ever new Moving Pictures, with their constantly varying surprises, and one who seeks for seasonable amusement is sure to find it in a visit to the Proctor theatre.

American Progression.

The secret of nearly every American success is, of course, directly due to American superiority, but the great underlying cause of this degree of perfection is "progressiveness."

As a notable instance, the recent international rifle match in England, for the Palma trophy, stands out supreme. Here the American Rifle Team was pitted against the best picked marksmen of the world, and they came away victorious. As a disinterested writer in the London Saturday *Review* says: "The success of the Americans in the Palma competition, at Bisley, was due in the main to the perfection, we may say the excessive perfection, of their weapon." The eye of the winner sighted along a Stevens-Pope barrel to fire the champion bullets. The J. Stevens Arms & Tool Co., of Chicopee Falls, Mass., are naturally proud of the result. This shows the mark of American progression in the matter of firearms, and in which the "Stevens" products have again shown themselves leaders.

Lately the "Stevens" people have been educating the fathers of the country to equip their sons with some sort of firearms and teach them its uses and abuses, and in this movement they have the commendation and support of prominent educators the country over.

Scotch Plains Man Accidentally Shot

While John Reick and his son, Squire Reick, of Scotch Plains, were in the act of shooting an old hound last Saturday afternoon, the latter received injuries which will cost him a leg, and perhaps his life. The father used a double-barreled shotgun and fired one load into the dog. Both then went to see whether the animal had been killed. As they bent over, the second barrel was discharged. The contents entered the son's left leg. He was removed to Muhlenberg Hospital, Plainfield, where the limb will be amputated.

Wardens and Vestrymen Chosen.

The annual meeting of the Church of the Holy Cross was held Monday night, when the following wardens and vestrymen were chosen for the ensuing year: Senior warden, Dr. J. H. Carman; junior warden, Charles L. Nichols; vestrymen, John L. Watson, T. U. Dudley, Jr., Chas. L. Holstein, Mr. Whittingham and Mr. Clark. George P. Dupee, J. L. Watson and Frank Brown were chosen delegates to the annual convention to be held next spring.

The Correct Answer to "How Old is Ann?"

One of the best; in fact, the only reasonable solution we have read of the problem "How old is Ann," appeared in the Hunterdon *Republican* this week, proposed by Jared D. Wolfe, Jr., of Flemington. He starts out with the reasonable assumption that when Mary was one year old it was doubtful if Ann was born, he then goes on to say: "If Mary was six years old when Ann was born, when Mary was eighteen years old Ann was twelve. If Mary at the present time is twenty-four years old and twice as old as Ann was when Mary was as old as Ann is now, Ann's age must be eighteen years at the present time; and when Mary was eighteen years old, Ann's present age, Ann was twelve years old, which makes Mary twice as old as Ann was when Mary was as old as Ann is now."

Lakewood's Fall Season.

With the passing of the summer and the farewells to September there comes as a ruling thought in the minds of resorters, the choice of a point of healthful and advantageous location for the winter, and, more immediately, for the months of early fall, when summer places of entertainment are closed and cold weather resorts have not yet opened. To the family the problem is a particularly weighty one for the schools all over the country are opening for the year, and it is time the little people took up the business of childhood. And in making choice there are to be considered as factors, healthfulness, accessibility to business centers, the character of diversions, and social surroundings.

It is true that Lakewood very largely owes it leading place among resorts to the peculiar points which are most valued at midwinter—warmth, shelter and mildness of climate—and yet, in all its eight months' season, from fall to spring, there are no more perfect months than October and November.

For more than twenty years the first day of October has been the date on which Lakewood has opened its doors to the outside world, and that first day's registrations have been uniformly large, including travelers from mountain and seashore, and returning cottagers anxious to get settled again in their Lakewood homes after a summer's wanderings. All through the above named months the habit of out-door life which governed the hot weather season is prolonged in Lakewood, and the golden days of color which imperceptibly pass into frosts and chill of winter are rich in opportunities for sport and exercise on the golf links, the lake and in the woods. If you have never enjoyed the experience, try Lakewood early in its season.

A booklet on Lakewood will be sent free by C. M. Burt, G. P. A., New Jersey Central, New York City.

A Bargain for Farmers.

The New York Tribune Farmer, a national illustrated agricultural weekly of twenty large pages, has no superior as a thoroughly practical and helpful publication for the farmer and every member of his family, and the publishers are determined to give it a circulation unequalled by any paper of its class in the United States.

Knowing that every enterprising, up-to-date farmer always reads his own local weekly newspaper, The New York Tribune Farmer has made an exceedingly liberal arrangement which enables us to offer the two papers at so low a price that no farmer can afford to lose the opportunity.

The price of The New York Tribune Farmer is $1.00 a year and The *Weekly Review* is $1.00 a year, but both papers will be sent for a full year if you forward $1.00 to The *Review*, Plainfield, N. J.

Send your name and address to The New York Tribune Farmer, New York City, and a specimen copy of that paper will be mailed to you.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

TURKEY IN HIS THROAT TWO DAYS.

Physicians last Saturday succeeded in dislodging a piece of turkey from the throat of Louis Davis, a son of Grant Davis, which has defied all efforts of removal since the boy ate his Thanksgiving dinner. During the time he took no nourishment, and there was constant fear he would choke to death. The trouble is ascribed to a weak throat and contraction of the muscles.

INDIVIDUAL PENCILS FOR PUPILS.

Precautionary measures, with a view to eliminating all possibility of a spreading of contagious diseases among the pupils in the public schools at Phillipsburg, have been carried to what is considered the extreme limit of safety by the school trustees in ordering the teachers to see that each scholar hereafter has an individual pencil, so that children who are in the habit of putting pencils to the mouth absentmindedly may not convey diseases. The method used will be the numbering of each pencil, pen, etc., and each scholar will be given a corresponding number.

OFFERS ISCHOOL BUILDING RENT FREE.

Unable, because of lack of funds, to longer pay the rent for a temporary school building in use for several years on Cortlandt street, Perth Amboy, the Board of Education recently notified the owners of that building that the school would be abandoned. The structure was erected by St. Peter's Episcopal Church for use as a mission school. Rev. J. L. Lancaster, rector of the church, immediately notified the school authorities that the building could be used rent free until the end of the fiscal year, March 1. The school will be continued, as the Board of Education has accepted the offer of the church.

COMPTROLLER HOLDS UP BIG BILL.

A bill for school desks amounting to $2,200 has been held up by Comptroller W. D. Voorhees, of Perth Amboy because bids were not asked for before the desks were purchased. The school authorities claim to have legal authority for buying new desks as they did, and Comptroller Voorhees has asked City Attorney C. C. Hommann for an opinion as to the legality of the School Board's action. The desks were purchased by a committee of three members of the board after written bids had been obtained, without advertisement, from three furniture houses.

POSTAGE STAMPS DECORATION.

Carpenters who are overhauling and repairing the house formerly owned by Mrs. Elizabeth Cady Stanton have made an interesting discovery. The house is large, and is on the line of the New Jersey and New York Railroad at Woodcliff. The place is now owned by J. L. Geddes, of Nyack. The carpenters found the walls and ceiling of one room completely covered with postage stamps of various denominations and from many different countries. There were fully 18,000 of them, and so far no two have been found to be alike.

It must have taken the greater part of Mrs. Stanton's life to collect these stamps and place them on the walls. The stamps are all canceled.

A TAX DUPLICATE OF 38 YEARS AGO.

An interesting relic in the shape of the tax duplicate for Bernards Township for the year 1865 has recently come to light and is in the possession of James E. Ballentine, the venerable district clerk of the Board of Education, who was born there and has been a lifelong resident of that section. Peter Z. Smith, the originator of the Smith family picnic, which has been held annually since 1876 on the Smith picnic grounds, near Peapack, was the assessor, and Ira Pruden, of Madisonville, the collector. The book, which is 5½x7¾ inches in size and containing 132 pages, is about one-fourth the dimensions

GOOD UNTIL DEC. 12, 1903.

POSTAL FRAUD REPORT

Government Robbed of Millions by Conspiracy.

PRESIDENT APPROVES REPORT

Profits of the Conspirators Estimated at Between $300,000 and $400,000—Tyner, Machen and Reavers Named as Chief Offenders—President in Memorandum Urges Punishment.

Washington, D. C.—The report of Fourth Assistant Postmaster-General Bristow on the postal investigation, given out, shows that in 1903 a great conspiracy to loot the Government was started in the Postoffice Department. It shows that that conspiracy spread into division after division, until wholesale robbery of the people became a regular and recognized feature of the letting of contracts.

Attached to the report of Fourth Assistant Postmaster-General Bristow was a memorandum written by President Roosevelt, in which the President stated that he approved of Mr. Bristow's findings and in which he declared that the prosecution of those officials found guilty of corruption must be pushed with the utmost vigor.

Perhaps the most amazing feature of General Bristow's report is the disclosure that while the Government was defrauded out of millions on a single deal, the aggregate amount received by all the *official conspirators combined* did not amount to over $200,000 or $400,000. In other words, the public money was thrown away in so reckless a fashion that the robbers themselves did not get more than a small percentage of the golden stream.

A striking illustration of this is the fact, cited by Mr Bristow, that Harrison J. Barrett received only $6000 from the Arnold Turf Investment scheme, "yet that company defrauded the people out of over $3,000,000."

The President expresses *no opinion* as to the guilt or innocence of Perry S. Heath, formerly First Assistant Postmaster-General, contenting himself with calling attention to the fact set forth in the Bristow report that Beavers, the former Chief of the Salaries and Allowance Division of the Fourth Assistant Postmaster-General's office, who is now under indictment, made a direct charge that in at least one instance he was compelled to share bribe money with Heath, a statement that, it is admitted in the report, Heath denies, and the evidence in support of which was not regarded by the District Attorney as sufficient to warrant his *indictment*.

The President expresses regret that the statute of limitations expires at the expiration of three years from the time of the wrongdoing of officials, and urges that the time limit be extended to at least five years, as recommended by the Attorney-General.

One somewhat surprising feature of the President's memorandum is his accusation against General Tyner, who was summarily removed from the office of Attorney for the Postoffice Department and who the public has heretofore believed was the victim of dishonest and designing subordinates. The President, however, says Tyner *was knowingly and wilfully corrupt*. He promises to use every endeavor to convict the indicted men, and in closing his memorandum uses this phrase: "The toleration of the wrong, not the exposure of the wrong, is the real offense."

The so-called Tulloch charges, relating chiefly to the lax methods employed in the Department when Heath was First Assistant Postmaster-General, are not referred to in the report now made public.

CAPTAIN CARTER SET FREE.

Former Army Officer's Sentence Expires at Fort Leavenworth.

Leavenworth, Kan.—A few minutes before 4 o'clock the morning of November 28 Oberlin M. Carter, formerly Captain of the Engineers, walked out of the portals of the Federal Prison at Fort Leavenworth, a free man. At the gates he was met by his uncle, L. D. Carter, and immediately driven in a hack to the Union Station in this city. This last movement was a ruse to throw the newspaper men, whom he wished above all things to avoid, off the track.

While awaiting his train the former army officer conversed freely on a large number of subjects, but always skillfully avoided the introduction of anything in regard to his conviction or his plans for the future.

BOY BANDITS INDICTED.

Three Young Desperadoes Held by Chicago Grand Jury For Murder.

Chicago, Ill.—Indictments were voted by the Grand Jury against Harvey Van Dein, Peter Neidermeier and Emil Roeski, the three young bandits who were arrested at the close of a spectacular man-hunt in Indiana. An indictment was also voted against Gustave Marz, who murdered Officer Quinn, and who was with the others in the majority of their crimes.

Against Van Dein indictments were voted charging him with complicity in five murders, against Neidermeier indictments in connection with four murders, and against Marx indictments for four murders. Roeski will stand trial for one murder.

Blood Cattle Killed.

About $20,000 worth of blood cattle on the way to the fat stock show of Chicago were slaughtered in a railway wreck at Crown Point, Ind.

Boy Robbers Trapped.

John Keating and Barton Shipley, messenger boys, who were with George Reynolds, sixteen-year-old son of Police Captain Reynolds, of Chicago, Ill., when he was killed while attempting robbery, were arrested and confessed.

Thirteen Miners Killed in Arkansas.

By an explosion of gas thirteen miners were killed in Coal Mine No. 20, at Bonanza, Ark. The explosion occurred when there were about 175 men in the various shafts.

CRANK MEETS PRESIDENT

Crazy Man Slips Through Police Guarding Church.

Police Commissioner Angered by Blunder of Detectives and Will Place a Captain and Five Officers on Trial.

New York City.—Despite the fact that more elaborate police precautions were taken than ever before on the occasion of a Presidential visit, over 300 uniformed men and scores of plain clothes detectives being on guard, a crank who carried a satchel succeeded in reaching President Roosevelt and placing in his hands a letter. One police captain and five officers will have to stand trial for allowing the man to reach the President.

The incident occurred while the President was leaving the Church of the Holy Communion, where he attended the funeral services of his uncle, James King Gracie. Mr. Roosevelt took the letter without comment and handed it to Police Commissioner Greene. He seemed to think but little of the affair, but Mrs. Roosevelt was much agitated, as the many attempts made by cranks to see her husband have filled her with the fear that he will be assassinated.

The crank, who was arrested, was Arthur P. Deming, and his letter was a request that the President persuade the German Emperor to use a medicated charcoal which Deming declares will cure any disease. He also declared, while in custody, that the charcoal would cure the President of stupidity. Deming was sent to Bellevue Hospital for examination as to his *sanity*.

After completing an investigation into the manner in which Deming gained entrance into the church and reached the side of the President, Police Commissioner Greene announced that he was not satisfied with the explanation made by the police who were in charge at the church, and that he would place Captain Cottrell on trial on charges of failing to make proper arrangements.

Three detectives and two policemen, *who were on guard at the church*, will also be placed on trial.

Deming is regarded by the police as a harmless lunatic. He had an office at No. 150 Broadway for the sale of his charcoal, and says that he came from California.

It is said that Deming is the man who on May 19, 1900, appeared at the House of Representatives in Washington and startled the House by preaching from the gallery.

And then, having secured the desired attention, proceeded to make a speech to that branch of the United States Congress. Three or four policemen finally hustled him away and escorted him outside the building.

COLD FIND IN NEW MEXICO.

Excitement of Natives Over Discovery of New Bonanza.

Hillsborough, N. M.—The greatest excitement within the knowledge of this part of New Mexico exists over the new gold field in Apache Canyon, in the Cebolla Mountains, east of Hillsborough.

News first came in less than a week ago, and now 500 people are on the ground and coming in every day.

Mexicans, guided by an old Mexican chart, who have been prospecting the *locality for some time, struck what* proved to be the bonanza. They secured a bottle of gold nuggets as the result of a few hours' work in cleaning bed rock and blowing the dirt away with their breath.

Report of a new bonanza strike more extensive than the first is keeping up the excitement.

NEBRASKA AUDITOR ARRESTED.

Charged With Doing Illegal Banking Business in Wyoming.

Casper, Wyo.—Charles Weston, Nebraska's State Auditor, and N. S. Bristil and W. A. Denecke, who operated a grocery store here under the name of N. S. Bristil & Co., and a bank under the name of W. A. Denecke & Co., are all under arrest, charged with receiving money, knowing they were insolvent.

Bristil & Co. and Denecke & Co. have suspended, and their property is in the possession of the Sheriff. The liabilities are $75,000 and the assets small. The money, it is stated, was all borrowed by the bank owners. Every fraternal order in town is affected, the *Masonic societies to the extent of $3800.*

CUBANS WANT A LOTTERY.

Bill For National Gambling Institution Passes the Island Senate.

Havana, Cuba.—The Senate passed the National Lottery bill by a large vote.

The measure, as amended, directs that the lottery's functions shall begin within seventy days after the law authorizing it is promulgated, and authorizes the President to issue instructions and regulations for the carrying out of the lottery plan.

A majority of the Senators are said *to believe that the establishment of a* lottery is the most reasonable way of obviating the tax difficulties in accordance with the wishes of the people.

THREE BROTHERS DROWNED.

The Boys Broke Through the Ice While Attempting to Cross the River.

Blackstone, Mass.—The three sons of Mrs. Nellie J. Read—John, seventeen; William, fourteen, and George, eight years of age—were drowned in the *Blackstone River. They broke through* the thin ice above the channel while attempting to cross the stream.

Searchers found a cap and mitten, with the hand-sled taken by the boys.

Police Charge Rioters.

The striking dock laborers at Bordeaux, France, made a demonstration in front of the town hall. The police drew their swords and charged upon the rioters, wounding a number of them. Several of the officers also were *wounded*.

Bradstreet's Weekly Failure Report.

Bradstreet's reports 234 failures in the United States during last week, against 250 for the previous week, and 201, 223, 215 and 202 for the corresponding weeks of 1902 to 1899.

ELIJAH DOWIE A BANKRUPT

Federal Court Names Receivers to Seize Zion City.

WRECK OF HIS GREAT FORTUNE

Officers Invade Precincts of Religious Town While Its Founder Denies His Inability to Meet Debts in Time—Industries Are Not Profitable and Business Affairs Are in Bad Shape.

Chicago, Ill.—Financial difficulties which began at the time of the crusade of John Alexander Dowie—"Elijah III."—and his Restoration Host to New York a month ago, and which have *been rapidly increasing since his re*turn, culminated in the Federal Court taking possession of all the property controlled by Dowie in Zion City, Ill. This town, which was founded two years ago by Dowie, has a population of more than 10,000, is the general *headquarters for Dowie's church*, and is said to represent an expenditure of $20,000,000.

Frederick M. Blount, cashier of the Chicago National Bank, and Albert D. Currier, a law partner of Representative Boutell, were apointed receivers of the property. Their bonds were fixed at $100,000 by Judge Kohlsaat, of the United States District Court, who made the appointment on the petition of several creditors.

The receivers, with their attorneys and Custodian Redieske, *with six deputy* marshals, went to Zion City to serve on Dowie the notice of the receivership. Redieske and his deputies *went* to the bank, while the others called on Dowie at his house. As the officers were about to demand admission to the bank, a man ran from a rear door. One of the deputies overtook him, and a second man came running from the bank, shouting:

"Let me have those papers. I will get away with them."

Redieske threatened to arrest them unless they returned at once to the bank, which they did. He then placed the bank and the three men in it under *a guard*.

While this was taking place at the bank the receivers and their attorneys called on Dowie and read to him the petition and order of court which placed Zion in the hands of a receiver. After hearing the petition Dowie locked himself up with several of his leading subordinates. He refused to allow himself to be seen, or to make any statement, merely sending out word that he had nothing to say.

The bankruptcy proceedings were based on the allegation that Dowie is insolvent, and that while in this condition he committed an act of bankruptcy by making a preferential payment on *November 2 to the E. Streeter Lumber* Company for $3770. Dowie has been hard pressed by his creditors, especially since it was announced that his recent mission to New York had proved unsuccessful financially.

Dowie's first confession of weakness was made last Wednesday at a rally in the Tabernacle at Zion City. He wept as he told of the financial straits in which the Zion industries found themselves. Instead of frightening many into depositing, this appeal sent a long *line of people to the bank to draw out* their money.

In the efforts to remedy the condition of affairs at Zion City hundreds of letters were sent out daily to Dowie's followers in other parts of the country. In these letters, in which glowing prospects of Zion City's future were painted, and in which Dowie was quoted as praying that all those who believed in him would "follow the Lord," all Dowieites were urged, almost commanded, to sell their farms, stores and everything else and come at once to Zion City and take up the work of the church. All those having money *in* banks near where they lived were *asked to draw that money* out and send it for deposit at Zion City.

Dowie is known to have accumulated a large sum as the head of the Christian Catholic Church, the assets of the organization being estimated at between $20,000,000 and $30,000,000. There was a large outlay of money, however, when Zion City was started. Then lace and candy industries were tarted, and, as neither of these ventures has ever paid, a great deal more money was tied up. Dowie's differences with his *brother-in-law*, Stevenson, over the management of the lace factory cost more than $100,000, and other suits recently begun in Lake *County* by creditors are said to aggregate a large sum.

RANCH FENCE CASES HEARD.

Millions of Acres in Nebraska Said to Be Illegally Inclosed.

Omaha, Neb.—The alleged illegal fencing of several millions of acres of Government land by extensive cattle owners and ranchmen of Western Nebraska is occupying the attention of the Federal Grand Jury.

Several prominent men, among them State and United States officials, are said to be among those whose cases are under *investigation*. Although not officially given out, it is stated that one extensive cattle owner and a leader in the movement to keep the fences standing, *has* already been indicted.

Among the cases now being considered are those against Bartlett Richards, of Ellsworth, and R. M. Allen, the latter concerned in a large cattle company. It is estimated that the lands said to be illegally fenced in Western Nebraska approximate 7,000,000 acres, occupied by between 700 and 800 ranchmen.

Made Sane by a Blow.

Charles E. Libby, of Scarboro, Me., for two weeks wandered through the woods demented, was hit on the head by a pile of wood, which dissolved a blood clot on his brain and restored him to sanity.

Dr. Jay Gets Thirty Years.

Dr. J. V. Jay, a prominent physician *of Asheville, N. C.*, was found guilty of murder in the second degree and sentenced to thirty years at hard labor. He murdered his three children.

BIG FIRE IN BROOKLYN

Historic Theatre Building Destroyed Within an Hour.

Brooklyn Library Threatened—Firemen Hampered by Poor Water Pressure—Bad Wiring the Cause.

New York City.—Brooklynites of two generations felt a distinct sense of personal loss when they knew that the historic Academy of Music had been totally destroyed by fire. General relief was expressed that the old building was gone, for it had all but outlived its usefulness, was no longer centrally located, and had long been under grave suspicion as a fire trap, and the manner of its destruction showed that had it befallen while a crowded au*dience was within its walls, the horrors* of the Brooklyn Theatre fire of December 5, 1876, would have been eclipsed.

Insurance rates had been advanced upon it from $36.40 to $47.40 per $1000 of insurance in 1902, which the directors refused to pay, and the corporation carried its own risk since the policies lapsed on June 15 of that year.

It was one of the swiftest destructions that Brooklyn has ever known, the whole great auditorium being a seething sea of flame within twenty minutes of the time *the first* spark was seen, while panicky scenes were taking place in the near-by financial institutions and the row of dwellings from 147 to 167 Remsen street, in the rear, which were separated from the fire only by their back yards.

Though the flames roared high above the doomed structure as its roof fell in, its massive walls stood to the end, and the only building to go with it was the three-story cafe and billiard rooms of John McGroarty, at 196 Montague street, adjoining on the east, which was totally destroyed. No one was reported missing to the police and no body was found up to 4 o'clock in the *afternoon*, when the nearly completed work of searching the saloon ruins was abandoned because of a tottering front wall.

Electricity is believed to have caused the fire. A fuse connecting a big sign in incandescent lights had blown out, but the men were testing the temporary wiring when a burst of flame appeared over the stage and immediately ran along the festooned draperies as though they were powder trains designed to carry them to all parts of the building. An attempt was made to bring the fire hose into service, but the volunteer firemen quickly dropped it and ran for their lives.

Great anxiety was felt at one time for the Brooklyn Public Library in Montague street, opposite the Academy, where many priceless books and manuscripts are stored. Several windows were here broken by the intense heat, as in other buildings along the block.

THREE NEGROES LYNCHED.

They Shot [illegible] Man to Test Their Weapons.

Shreveport, La.—In the presence of a crowd of about 1200 whites and negroes, Phil Davis, Walter Carter and Clint Thomas, all negroes, were lynched within a short distance of Belcher, which is twenty miles from Shreveport.

The men were executed for participating in the fatal shooting of Robert Adger, one of the most popular business men in North Louisiana. The negroes confessed their crime.

No shots were fired at the lynching, *the negroes all being hanged to a single* limb of a tree. Two of the negroes under arrest, Sam Lee and Peter Thomas, were released. Lee proved that he had attempted to prevent the negroes from shooting Adger, and Thomas established the fact that he was too frightened to shoot.

MICHIGAN RAILWAY TAX VALID.

Supreme Court Sustains the Decision of State Tribunal.

Washington, D. C.—In the Supreme Court of the United States an opinion was delivered by Justice Holmes in the case of the Wisconsin and Michigan *Railroad Company vs. Auditor-General* Powers, of the State of Michigan.

The case involved the laws of Michigan relative to the right of that State to tax railroads lying north of the forty-fourth degree of north latitude. These roads were exempt prior to 1897, when the State passed a law repealing the statute of exemption.

The railroad company contended that the passage of this act was a breach of contract, but the court held that such was not the case, and affirmed the opinion of the court below.

HAS MURDERED EIGHTEEN.

Prisoner at Greensburg, Pa., Confesses Killing Policemen.

Chicago, Ill.—Chief of Police O'Neill said that Charles Kruger, in jail at Greensburg, Pa., had confessed the murder of Policemen Fennell and Devine in Chicago.

According to Chief O'Neill, Kruger has confessed the murder of sixteen other persons in Kentucky and the East. The prisoner was arrested on the charge of burglar originally. He has been sentenced to be hanged on January 14, 1904.

PARIS UNDERGROUND ACCIDENTS.

Two Cars on the Metropolitan Electric Road Burned.

Paris, France.—There were two accidents on the Metropolitan Electric Underground Railroad, somewhat similar to the great disaster of August 10, but there was no loss of life.

In each case a car was burned between stations, causing the passengers to seek for escape along the tracks.

Dakota Divorce Void.

Judge James A. Howe, of the Iowa *District Court, held that a decree* granted under the Dakota divorce statutes, if it is proven the non-resident litigant resides there merely to secure a divorce, is null and void.

Fire in an Iowa College.

The main building of the Jewell Lutheran College at Jewell Junction, Iowa, was destroyed by fire. Students had narrow escapes. The loss on the building is estimated at $25,000.

PANAMA TREATY RATIFIED

Government Decree Adopted to Complete the Act.

Members of the Provisional Government Sign With a Gold Pen Especially Bought For the Purpose.

Panama.—The Canal Treaty with the United States has been ratified by the Panama Republic without amendment.

When every preparation had been completed for the actual signing of the treaty a Government decree, No. 24, was adopted, setting forth that:

"Whereas, a guarantee of the inde*pendence* of the Isthmus has been obtained, and

"Whereas, celerity is indispensable to secure an efficacious and immediate fulfillment of this obligation on the part of the United States, the Junta of the Provisional Government, formed by the unanimous will of the people of the Isthmus and possessing full sovereign powers over the Isthmus territory,

"Resolves and decrees that the treaty be approved in all its parts."

Minister of Foreign Affairs Esprilla arrived here from Colon with the treaty. Rear-Admiral J. G. Walker arrived on the same train. Senors Arango and Arias, with some of the Ministers of the new republic, met the party at the railway station.

Senor Esprilla drove immediately to the Government Palace. The members of the Junta and of the Ministry assembled in the grand salon of the palace. The chest and two small tin boxes, addressed to the members of the Junta and *bearing the seal of* Minister Bunau-Varilla, were placed on a table in the centre of the room.

Surrounded by the spectators, who were seated about the table, Senor Esprilla opened the chest and withdrew the cotton wrappers, finally bringing to light the treaty, enveloped in the Panamanian flag. The document was addressed to the members of the Junta by Minister Bunau-Varilla.

Senor Arias then broke the seal and formally handed the paper to the members of the Junta. There was only one copy, in the English language.

The Ministers and members of the Junta all signed the document with a *special gold pen purchased for the oc*casion.

Washington, D. C.—Two telegrams, one from the Junta and the other from the Minister for Foreign Affairs of the Republic of Panama, announcing the ratification of the Hay-Varilla treaty were received by Minister Bunau Varilla.

AURORA HODGE DEAD

Girl Charged With Murder Succumbs to Effects of an Operation.

Salt Lake City, Utah.—Aurora Hodge, the handsome young woman awaiting trial for the murder of William X. Regan, is dead from the effects of an operation.

A few months ago [illegible] police authorities of [illegible] Mich., by appearing at p[illegible] ters in that city and a[illegible] she wished to be arrested for the murder of a man in Salt Lake. She said *she shot a man named Ryan in a fight* when he attacked her in a lonely gulch. Ryan was murdered, but it was believed that he was slain by a man and that Aurora gave herself up to save the guilty.

At her preliminary hearing she pleaded not guilty, however, and was taken ill while awaiting trial. The operation was to save her life, but it failed.

BLACKMAILER SHOT

Three Hundred Armed Citizens Do Battle With Four Robbers.

Akron, Ohio.—Armed to the teeth 300 citizens of Hudson lay in wait for blackmailers. A few days ago Mrs Jacob Neibel, a wealthy widow, received word that unless $1000 was left at a certain spot her son would be kidnaped.

The letter was turned over to the town marshal and a posse organized. Early one morning they caught sight of the blackmailers, four in number, driving toward the spot where the money was to be left. They challenged and then the blackmailers turned their *horses and opened fire*. The posse pursued, firing, and wounded one man.

MAFIA RAID

Fifteen Armed Italians Arrested in Philadelphia For Blackmail.

Philadelphia, Pa.—A tenement house on Carpenter street in the Italian quarter was raided by the police, who captured fifteen supposed members of the Mafia. The raid was the result of complaints made by Italian merchants and bankers, who said they had received blackmailing letters and been threatened with death should they refuse to comply with demands for *money*.

Each of the fifteen men arrested was armed with two revolvers and a stiletto. In the room were a number of pistols and a store of ammunition.

NAPHTHA CAR BLOWS UP

Two Dead and Many Injured as Result of Delaware Freight Wreck.

Harrington, Del.—By the explosion of a tank car of naphtha two people were killed, a score injured and Greenwood, Del., was practically wiped off the map. The dead are Edward J. Roach of Georgetown, and an infant, who died from the shock.

The accident happened shortly after noon, at the junction of the Pennsylvania and the Queen Anne's railroads. The entire population for miles about was thrown into a panic.

Superintendent of Police Dismissed.

John P. McTighe, who has held the *office of Superintendent of Police of* Pittsburg, Pa., since Mayor Hays' inauguration, was summarily dismissed by the Mayor on the charge of "conduct unbecoming an officer."

Honor Thirty Dead Heroes.

At the National Cemetery at Arlington, near Washington, D. C., the bodies of thirty private soldiers who lost their lives in the Philippines, were buried with impressive military honors.

MICHIGAN BOODLE SCANDAL

Testimony in the Grand Rapids Water Deal.

EXAMINATION OF SEN. BURNS

Former City Attorney L. K. Salsbury Makes Startling Accusations—Six Separate Water Conspiracy Deals Calling For Bribe Money—Prominent New York Men Named.

Grand Rapids, Mich.—The confession of former City Attorney L. K. Salsbury in regard to the notorious water scandal in that city, which was told in court at the preliminary examination of State Senator David Burns, has created a tremendous sensation on account of the number of prominent persons it implicates, in addition to the seven [illegible] officials and former officials who were arrested on bribery charges some days ago.

The persons implicated by Salsbury and the amounts he alleged they received are as follows:

George R. Perry, ex-Mayor, $13,725; J. Clarke Sproat, manager Grand Rapids *Democrat*, $3333; R. A. *Cameron*, New York, $500; State Senator David E. Burns, $200; Aldermen McCool, Ellen, De Pagter, Muir, Kinney, Donovan, Phillips, Johnson, Stonehouse, Lozier, Shriver, Mol, Ghysels, Hodges, Slocum, from $350 to $500 each; Corry P. Bissell, $500; J. Russell Thomson, reporter on Evening Press, $500; Isaac Lamoreaux, ex-City Clerk, $1500; State Representative Van Zoeren, $350; State Representative Vandercook, $60; E. D. Conger, manager Grand Rapids *Herald, $10,000*; Thomas F. McGarry, a prominent attorney now in Florida, $7500; C. S. Burch, manager of the Evening Press, $5000.

Salsbury also implicated in water deals Dudley E. Waters, former President of the Board of Public Works; De Witt de Vries, former City Physician; George Ellis, a local broker; Samuel M. Lemon, Collector of Internal Revenue, and William H. Anderson, President of the Fourth National Bank.

Six separate water conspiracy deals were on in Grand Rapids at one time, according to Salsbury, each gigantic in its size and all calling for the use of a *boodle fund. In addition to the Henry* Taylor $100,000 Lake Michigan deal he testified that there were five other strings out, from each one of which thousands of dollars were hanging. Every one of these six sets of men, who put up or offered to advance a corruption fund, were, so Salsbury says, of himself, Perry, McGarry and Sproat.

Pat Flynn, of New York, he names as one of those at the head of one scheme. The men interested in the Hydraulic Water Company are named as the backers of another deal in City [illegible] Rosatres are said to have put up $50,000, and the Gillespie deal.

On top of these Salsbury implicates Revenue Collector Samuel M. Lemon with a deal, charging Lemon with coming to him with a proposition to buy the Council after having bought the Mayor for $10,000.

The recent acquittal of ex-Senator George Nichols on the charge of bribery was brought up, and in reply to the Prosecutor's questions Salsbury declared that Nichols really was guilty. He said the money was turned over to William Leonard, exactly as the *prosecution claimed, and* that Leonard gave it to Frederick H. Garman, the people's star witness.

State Representative Henry B. Vandercook, implicated by Salsbury, has issued a statement, in which he asks suspension of judgment, declaring that he emphatically refused to introduce a water bill in the Legislature and that he never accepted a favor in connection with the water deal.

Salsbury testified that he intended to bleed all the outside parties, and then *go before the Common Council*, expose them, and keep the money.

LORDS BAR WOMEN AS LAWYERS.

British Peers Decide They Cannot Be Admitted to Inns of Court.

London, England.—The House of Lords finally has decided that women are debarred by their sex from becoming qualified lawyers in this country. The question arose on the appeal of a Londoner, Miss Bertha Cave, against *the decision of the Benchers of Gray's* Inn not to admit her as a student for the purpose of being called to the bar.

The Court decided there was no precedent for a woman's admission to the Inns of Court and no reason to create a precedent. The benchers assert the statutes of Gray's Inn ignore women so absolutely as to leave them no power to admit a woman.

REPORT OF YEAR'S COTTON CROP

Census Bureau Says Total Gained Was 7,070,437 Bales.

Washington, D. C.—The Census Bureau has issued a report on the quan*tity of cotton ginned from the growth* of 1903 up to and including November 14, showing total commercial bales to be 7,070,437. Of these 6,519,332 were square bales, 510,550 round bales and 40,555 sea island cron bales.

The cotton ginned in 1902, as reported by the Census Bureau, was 5,925,872 commercial bales up to October 18, and 9,311,835 commercial bales up to December 13. Counting round bales as half bales, the number this year is 6,815,162.

Safe Blowers Frightened Away.

A stick of nitro-glycerine fitted with an electrical explosive appliance was discovered just outside of the door of the National Bank at Des Moines, Iowa. It is supposed that safe blowers had attempted to effect an en*trance, but were frightened* away, leaving the explosive behind.

Snow Caused Car Crash.

Snow caused a collision between electric cars at Chicago, Ill., in which thirteen persons were injured.

"The Funny Side of Life."

A COMPARISON.

Most gossips like an auto are,
Deserving of our scorn;
For while they run their neighbors down
They also blow their horn.

END OF THE ARBITRATION.

He—"And at last they agreed to marry."

She—"Yes, and it was the last thing they agreed on."—Denver Republican.

PROTEST.

Doctor—"I should say you have about three months to live."

Patient—"Make it longer, doctor; I *can never pay your bill in that time*."—Life.

TOOK NO CHANCES.

Edith—"Dearest, I have graduated from a cooking school."

Wise—"That don't make any difference. After we're married we can board."

PLACING THE RESPONSIBILITY.

"'Hamlet' drew a rank house last night."

"It did. Rantington doesn't know whether to blame it on Shakespeare or the public."—Puck.

WORSE.

Belle—"What could be made worse than being made love to by the wrong man?"

Nell—"Not to be made love to by the right man."—Town Topics.

GOING BACK.

Cora—"Kipling must be a very difficult writer to imitate."

Merritt—"It would seem so, my dear; of late he doesn't appear to be able to imitate himself."—Town Topics.

WHERE SHE SCORED ON HIM.

The Man—"Didn't you promise to *love, honor and obey me?*"

The Woman—"Didn't you promise to endow me with all your worldly goods?"—Chicago Record-Herald.

FRANK CONFESSION.

Teacher—"Come here, Johnny. Who helped you with your lesson?"

Johnny—"Didn't nobody help me."

Teacher—"Be careful and tell the truth. Didn't Willie Jones help you?"

Johnny—"No, ma'am, he didn't help me. He did it all by himself."

EXERCISE.

Cleverton—"For a man who has been in love with ten girls in three weeks you look pretty well."

Dashaway—"Yes, I've been getting regular and systematic exercise."—Life.

THE BALLOON WEDDING.

Sharpe—"I wonder why that girl wished to be married up in a balloon?"

Wheaton—"Probably she boasted she wouldn't marry the best man on earth."—Chicago News.

ONE FOLLOWS THE OTHER.

Subbubs—"Friday is always our servant girl's off day."

Citiman—"You mean her 'day off,' don't you?"

Subbubs—No; Thursday is her day off. That's why Friday is her 'off day.'"—Philadelphia Press.

THE BRUTE.

Mr. Hannijar—"Why isn't this hat good enough to wear to the horse show, I'd like to know?"

Mrs. Hannijar—"Because it is old-fashioned, and a fright. It will make people talk."

Mr. Hannijer—"Not if you get started to talking first."—Chicago Tribune.

WHAT SHE THOUGHT.

He—"Often when I look up at the stars in the firmament I cannot help thinking how small, how insignificant I am after all."

She—"Gracious! Doesn't that thought ever strike you except when you look at the stars in the firmament?"—South African.

PERVERSE.

Subbubs—"Come out to-night, and I'm sure you'll get a good dinner.

Citiman—"I thought you had no cook now."

Subbubs—"She doesn't leave till to-morrow. She'll do her best to-night just to make us realize how much we'll miss her when she's gone."—Philadelphia Press.

New Problems of the Universe

By Prof. Simon Newcomb.

WE all know that the nineteenth century was marked by a separation of the sciences into a vast number of specialties, to the subdivisions of which one could see no end. But the great work of the twentieth century will be to combine many of these specialties. The physical philosopher of the present time is directing his thought to the demonstration of the unity of creation. Astronomical and physical researches are now being united in a way which is bringing the infinitely great and the infinitely small into one field of knowledge. Ten years ago the atoms of matter, of which it takes millions of millions to make a drop of water, were the minutest objects with which science could imagine itself to be concerned. Now, a body of experimentalists, prominent among whom stand Professors J. J. Thompson, Becquerel, and Roentgen, have demonstrated the existence of objects so minute that they find their way among and between the atoms of matter as rain-drops do among the buildings of a city. More wonderful yet, it seems likely, although it has not been demonstrated, that these little things, called "corpuscles," play an important part in what is going on among the stars. Whether this be true or not, it is certain that there do exist in the universe emanations of some sort, producing visible effects, the investigation of which the nineteenth century has had to bequeath to the twentieth.—Harper's Magazine.

"The Man Behind the Desk."

By Major-General Corbin.

COMING to the duties of the Adjutant-General just in time to meet the responsibilities incident to a foreign war, I was fortunate in having the aid of the best assistants and of a most competent and efficient clerical force, Particularly was this true of the Chief Clerk and of the chiefs of divisions.

The work of mustering, organizing, and mobilizing nearly 300,000 troops, completed in less than eight weeks, is a record without parallel. That a task of such magnitude was accomplished in so short a time is evidence that those who directed so well the multitude of details were energetic and efficient. Only those having experience can appreciate all that it meant, and this was only a small part of the work you were called upon to do.

There is little glory ever given the man behind the desk, and yet if this work is not well done no army can be efficient. The man behind the desk in a sense enlists, pays, transports, mounts, arms, equips, feeds, and provides surgical and medical treatment for the men behind the guns.

That you, with other staff departments, did your full share in this great work of creating the army that acquitted itself in the war with Spain with so much honor is now history. This work, when once fully understood, will be appreciated.

With you, as with the army, many of the deserving are without special reward. Where there were so many that did well and so few positions to be given, only a few of the many could receive even well-earned recognition.

Those receiving promotions had without exception given good account of themselves, which is evidence that their efficiency records were well sustained. While such records are not infallible, they furnish the best possible guide for promotion, and, as you know, on these reports all promotions have been based—and I feel it deserving of mention that during the five years of my service at the head of the Adjutant-General's Department no one has ever appealed from the ratings of his efficiency records and but one has ever importuned me for promotion.

"God-Forgetting, Pleasure-Seeking Rich"

[redacted] Pittsburg—odes of Luxort."

By Col. Henry Watterson.

SOMETHING over a year ago a most lamentable tragedy, taking for its mise-en-scene the very vestibule of the temple of fashion—the sanctum sanctorum of the Four Hundred—led me in the line of my duty as a writer for the press to say some exceeding plain and, it may have been thought, some very harsh things about the nouveaux riches—the idle rich, the God-forgetting, world-defying, pleasure-seeking rich—who set themselves as a law unto themselves, who submit to no restraints except those fixed by nature and the surgeon's knife, who [redacted] no intellectual perspective except that the longest purse [redacted]s down the biggest titles, nor rule of conduct except that [redacted]pelling them to eat, drink and be merry, for to-morrow it may be some one else's turn—a code which I am told became altogether the rage in Babylon some centuries ago.

The society? Has Caliban grace? Is Tom Thumb manhood? Must the monkey and the swell be accepted as interchangeable types, as alternating measurements of human breeding and beauty? Indeed, one would think so, reading some of the reports that come to us from the inner circles of that apothesis of boredom, that incarnation of stupidity and affectation which takes its cue from Leicester Square and the Corinthian Club in London, which emulates the demi-mondaine of Paris, which eddies around the abodes of luxury and alimony at Newport and thinks no more of running down an ordinary pedestrian in its automobile than you and I would think of brushing away a spider or a fly.

Sursum corda! Lift up your hearts! I at least have never wasted many thoughts or nursed any serious fears about such cattle, nor shall I do so until monkey dinners become as popular in Pennsylvania as they seem to be in Rhode Island. I know that in each of our centres of population and wealth there is a little coterie of silly women and simpering Johnnies which would imitate the imitators, but they are too shallow and too scattered to make much headway against society, and by society I mean that noble American commonalty, clear of birth and clear of grit, whose cultivated men and women, who live without scandal and travel without adventure.

Things That Science Cannot Explain

By Prof. Simon Newcomb.

WHEN the number and violence of magnetic storms are recorded and compared, it is found that they correspond to the spots on the sun, and go through the same period of eleven years. The conclusion seems almost inevitable; magnetic storms are due to some emanation sent out by the sun, which arises from the same cause that produces the spots. This emanation does not go on incessantly, but only in an occasional way, as storms follow each other on the earth. What is it? Every attempt to detect it has been in vain. Professor Hale, at the Yerkes Observatory, has had in operation from time to time, for several years, his ingenious spectroheliograph, which photographs the sun by a single ray of the spectrum. This instrument shows that violent actions are going on in the sun, which ordinary observation would never lead us to suspect. But it has failed to show with certainty any peculiar emanation at the time of a magnetic storm or anything connected with such a storm.

A mystery which seems yet more impenetrable is associated with the so-called new stars which blaze forth from time to time. These offer to our sight the most astounding phenomena ever presented to the physical philosopher. One hundred years ago such objects offered no mystery. There was no reason to suppose that the Creator of the universe had ceased His functions; and, continuing them, it was perfectly natural that He could be making continual additions to the universe of stars. But the idea that these objects are really new creations, made out of nothing, is contrary to all our modern ideas and not in accord with the observed facts. Granting the possibility of a really new star—if such an object were created, it would be destined to take its place among the other stars as a permanent member of the universe. Instead of this, such objects invariably fade away, after a few months, and are changed into something very like an ordinary nebula.

A question of transcendent interest is that of the cause of these outbursts. It cannot be said that science has, up to the present time, been able to offer any suggestion not open to question.—Harper's Magazine.

SCIENTIFIC & INDUSTRIAL

A scheme has been prepared for carrying out an underground railway in Manchester, England, with connections with the principal out districts.

The United States is now the greatest coal-producing country in the world, the output of 1903 reaching 300,000,000 tons. This is four tons of coal for every man, woman and child in the United States.

With 385 pounds of smokeless powder the new forty-calibre, twelve-inch gun will send an 850-pound armor-piercing shell through nineteen and five-tenth inches of Harveyized nickel-steel armor at a distance of a mile and a half.

Hundreds of electricians are at this moment striving to construct lamps in which nothing is consumed save the electrical energy applied to them—lamps that have the radiance of the sun and the coldness of the moon.

Erith's Engineering Company, London, have got possession of an automatic stoker as a specialty, and as it is certain to come largely into use, it will effect that great improvement in smoke consumption and fuel economy which has been so desired.

For high-grade work requiring precision and excellence there is to be found in nearly every machine shop in Germany a group of American tools—a silent tribute to the remarkable position held in the world to-day by the American machine tool's work.

Animals have a language made up of signs or inarticulate sounds expressing impressions, sensations, passions, but never ideas. So this language excludes conversation and is limited to interjections or signs of movements expressing joy, grief, fear, anger, all the passions of the senses, but never more.

A novel watch in Zurich is in the form of a ball which moves imperceptibly down an inclined plane without rolling. There is no spring, the sliding giving motion to the hands, and the trip from top to bottom of the inclined surface, a distance of sixteen inches, requires twenty-four hours. The ball is then lifted again to the top.

A tree using aluminum almost to the exclusion of other mineral elements has been reported in New South Wales by H. G. Smith, of Sydney. It is known botanically as Orites excelsa, R. Br., and the aluminum is deposited as a basic succinate. Other flowering plants show only a trace of aluminum, although it seems to serve as a food of cryptograms.

Ranavalona and the Soothsayer.

The ex-Queen Ranavalona, of Madagascar, who has just arrived in France from Algiers, where she spends the years of her exile, and who is going to Vic-sur-Cene simply to take the waters for the benefit of her health, must reflect in these clouded days that the third and to her most important part of the prophecy of the old soothsayer in her last days of queenship is not working out exactly. On the same day that the French took the city of Antananarivo, and only a few hours before the Queen was dethroned, this old may was admitted to her palace to forecast the future, and the burden of his prophecy was that several years of greater happiness than she had ever enjoyed before would follow upon a visit to Paris, if ever she made one. "And what of me?" said Raisimamangha, the Queen's uncle, who was standing by. "You will die in less than a year!" was the answer. "Take care that I don't kill you before that time," was the angry retort, whereupon the soothsayer quietly responded: "There is no necessity for that, for I am doomed to die to-day!" The man passed out from the audience into the courtyard, and he had no sooner done so than a French shell fell at his feet, killing him instantly. Raisimamangha died within the year, and two or three years ago the ex-Queen visited Paris and had a pleasant stay, the main object of the visit, it was said, being to set the prophecy to work.—Men and Women.

A Doglike Cat.

The cat is usually so self-centred an animal that its regard for man is seldom greater than a kind of supercilious toleration. For that reason, perhaps, it is a matter of considerable difficulty to conceive of any rightly constituted feline tagging along the street in doglike fashion at her master's heels. Visitors in the neighborhood of North Clark and Chestnut streets at a certain hour, however, will be introduced to a novel and wholly unexpected aspect of cat nature. Any evening about 8 o'clock a stately white cat may be seen following a stalwart colored man up Chestnut street from a restaurant on State street.

"Come along, Johnson; come along!" is all the man says, and his faithful companion obeys explicitly. When the master boards a Clark street car for home Johnson stealthily departs and spends the rest of the night after the noisy and unmusical manner of its tribe.—Chicago Tribune.

Civilian Generals.

In the long line of men who have been and who will be at the head of the army until the retirement of Wood, in 1924, none since Schofield has been or will be West Point men. Neither Miles, Young, Corbin, Chaffee, MacArthur nor Wood is a graduate of the famous Military Academy. All except Wood came over from the Civil War.

ANIMALS WITH HANDS.

Kangaroos Use Theirs to Put Food Into Their Mouths.

Kangaroos use their hands very readily to hold food in and to put it to their mouths. As their forelegs are so short that they have to browse in a stooping position, they were pleased when able to secure a large bunch of cabbage or other vegetable provender and to hold it in their hands to eat. Sometimes the young kangaroo, looking out of the pouch, catches one or two of the leaves which the old one drops, and the pair may be seen each nibbling at the salad held in their hands, one, so to speak, "one floor" above the other. In "Alice in Wonderland" the lizard is always making notes on a slate and then trying to rub them out again with his fingers. Many lizards' feet are so like hands that it is rather surprising that they are only used for running and climbing. But that is the main purpose to which lizards apply them. The slow, deliberate clasping and unclasping of a chameleon's feet look like the movements which the hands of a sleep walker might make were he trying to creep down the banisters. The chameleon's are almost deformed hands, yet they have a certain superficial resemblance to the feet of the parrots, which more than other birds use the foot for many of the purposes of a hand when feeding.

To see many of the smaller rodents—ground squirrels, prairie dogs and marmots—hold their food, usually in both paws, is to learn a lesson in the dexterous use of hands without thumbs. Rats and mice do not as a rule "clinch" what they hold, but merely support it in their paws, their movements being much less human than they appear. Nothing more readily suggests the momentary impression that a pretty little monkey is remotely "a man and a brother" than when he stretches out his near little palm, fingers and thumb, and with all the movements proper to the civilized mode of greeting insists on shaking hands. But no one feels in the least inclined to grasp the clawed digits of any of the rodents which use their paws to hold food. They are only "holders," not hands.—Spectator.

WISE WORDS.

To fail at all is to fail utterly.—Lowell.

It takes a strong man to stand success.

The better the man the worse his enemies.

The wise man is like the good farmer; he keeps the barn of his mind full

Difficulties are meant to rouse, not discourage.—Channing.

He must be a thorough fool who can learn nothing from his own folly.—Hare.

There is always room for a man of force, and he makes room for many.—Emerson.

Next to acquiring good friends the best acquaintance is that of good books.—Cotton.

Fire and sword are but slow engines of destruction in comparison with a babbler.—Steele.

Prosperity is no just scale; adversity is the only balance to weigh friends.—Plutarch.

Our duty is to be useful, not according to our desires, but according to our powers.—Amiel.

A lie has always a certain amount of weight with those that wish to believe it.—E. W. Rice.

A thankful man owes a courtesy ever; the unthankful but when he needs it.—Ben Jonson.

"A man, Philpotts, is never beaten till he has said in his heart, 'I am beaten.'"—Sir Christopher.

Men who think of life in terms of stock raising are working hard to turn this world into a barnyard.

Be not so severe that you are blamed for it, nor so gentle that you are trampled upon for it.—Mary A. Mason.

Even with his wonderful memory the oldest inhabitant is apt to forget that he has inflicted his reminiscences on everybody he knows.

Husbands are like new boots—you can't tell where they're going to pinch till it's too late to change 'em.—E Thorneycroft Fowler.

The Snapshot.

The recent fatal eruption of the Waimaangu geyser in northern New Zealand will be of interest, particularly to those who have seen the geysers of the Yellowstone. A party of thirty-two excursionists were making the tour of the geysers under the control of an experienced guide. Four of them—two ladies and two gentlemen—advanced within twenty feet of the Waimaangu geyser basin. The guide shouted to them to come away from such a dangerous position, and so did the mother of the two girls. One of the latter replied: "In a moment, mother; when I have taken this snapshot." The next instant there was a terrific eruption of stones, mud and boiling water to a height of 800 feet. When the steam had cleared away the unfortunate four were nowhere to be seen. They had been hurled into a river of boiling water and their bodies, fearfully battered, were found a mile away.—Chicago News.

Really Antique.

An excellent plaster of paris cast may now be seen in one of the Egyptian Galleries of the British Museum of the famous sycamore statuette known as the "Sheikh-el-Beled," or "Village Sheikh." The original dates from 3900 B. C., and is still in perfect condition, although it is the oldest known specimen of wood carving. It represents an overseer of the workmen engaged in building the Pyramids close to Sakkarao, where it was discovered.—London Daily News.

HOUSEHOLD AFFAIRS

MONOGRAMS ON GLASS.

There is a sort of revival of the fashion of having the family cipher or monogram on china and glass. Elaborate gold traceries are preferred for china, but the monograms are often done in colors, such as green or blue. These decorations are done to order, and are very durable.

BREAD STICKS.

Take a pint of raised bread dough and work it into the well-beaten white of an egg. This makes the sticks nice and crisp. Mould into little sticks and place in pans which come for the purpose—pans with little troughs in which the dough is placed. Let rise to double their bulk, brush with water, milk, or diluted white of egg and bake for fifteen minutes in a very hot oven.

TO WASH BLANKETS.

Now, if one lives in the country, where a garden or field or good drying ground is close by an excellently appointed laundry, a big annual orgie of blanket washing may be advantageous, though "I hae me doots" about that.

To the ordinary housewife, who has neither the space nor the appliances nor the necessary number of servants, it is a far wiser plan to send one blanket to the wash every week, or two if the washing is a light one, and it is always necessary only to wash one at a time, otherwise blankets shrink.

They cannot be treated en masse as linen or cotton things are, but must be done speedily and thoroughly, and dried on a fine hot day, out of doors, but not in the hot sun.

CAULIFLOWER A L'ITALIENNE.

For the above dish a nice compact cauliflower is required, which has been boiled until it is just tender, and very carefully drained on a cloth. Place it in a round fireproof china dish and pour over it with a spoon, so that every part of it may be coated, a breakfastcupful of warm butter, which has been mixed with a large tablespoonful of tomato conserve and seasoned with salt, pepper, and a very little powdered mace. Then mask the cauliflower with very fine dry bread crumbs seasoned with salt and pepper, and bake in a quick oven until the crums are a golden brown. It should be carefully basted once or twice while in the oven with warm butter, and should be served in the dish in which it is cooked.

CARAMEL SHORTCAKE.

Caramel shortcake is a pleasing variation from the ordinary varieties and is especially good at this season, when fresh fruit suitable for filling is not in market. Make a caramel by dissolving first a teacupful of brown sugar with a spoonful of water, then add a teaspoonful of butter and a few drops of brown coloring. Stir till it boils and is quite clear; then allow to cool. Make a simple layer of cake, using rather more butter than usual, and spread between the layers a chocolate cream or some fruit preserves, then pour the thickening caramel evenly all over the top, doing this more than once, giving it time to set in between. When cold, ornament with candied fruits. If chocolate is chosen for the filling add a little grated chocolate to the caramel before it boils.

HOUSEHOLD RECIPES.

Tomato Juice Bottled—Slice a number of tomatoes; add two tablespoonfuls of water; salt, pepper and sugar to season; put in an agate pan over the fire; when the tomatoes are very tender rub them through a fine seive; return to the fire and cook until quite reduced and thickened; fill bottles and seal.

Bombay Toast—Beat two eggs; add one level teaspoon of salt, one teaspoon of chopped capers and a dash of cayenne; put one tablespoon of butter in a pan; when hot stir in one tablespoon of Anchovy paste and the egg mixture; when it has thickened take from the fire, spread on thin slices of buttered toast and serve very hot.

Apple Ginger—Wipe, quarter, pare and chop two and one-half pounds of sour apples, put them in a stew pan, add one and one-half pounds of light brown sugar, rind and juice of one and one-half lemons, half ounce of ginger root and enough water to prevent burning; cover and cook slowly four hours; add some water while cooking if necessary; when cool, put into glass jars.

Onion Stuffing for Duck of Goose—Three large onions, two tablespoonfuls of dried sage, two ounces of butter, four ounces of bread crumbs, one egg, salt and pepper. Peel the onions, put them into a saucepan and cook for ten minutes. Drain away the water and chop very fine. Mix the onions with the break crumbs, butter and sage. Season with salt and pepper and moisten with the yolk of egg.

Baked Eggs—Eggs au gratin in French roll—make a delicious luncheon course. Use the small French rolls. Cut off the tops and scoop out the crumbs. Brush them with melted butter and fill with a mixture of eggs slightly beaten, seasoned with cream, grated cheese, salt and a trace each of mustard and paprika. Bake until the eggs are set. It is well to have the rolls hot to begin with

Long distance and local telephone : : : 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, DECEMBER 5, 1903.

BUT WERE WE WRONG?

For several days the Plainfield daily papers have been advertising a minstrel show to be given by young men who belong to the association connected with Hope Chapel.

It is a matter of deep regret to many earnest Christian people that for three nights members of a church dedicated to the worship of God should indulge in break-downs, guffaws, slang, doggerels, etc., for the purpose of raising funds to carry on the church work.

Can a church grow spiritually that approves and accepts funds raised in this manner? Will such funds eventually prove a blessing or contrarywise? These questions are being asked by many Plainfield people.—NORTH PLAINFIELD REVIEW.

This statement made by the borough editor today is wrong in several respects. In the first place, the funds are not used for church work but to carry on an athletic association which has for its object the upbuilding of young men, physically and morally. Again, the affair does not take place in the church and past performances have met with the approval of religious workers, who are competent to discriminate.

The work being done at Hope Chapel is not to be questioned. Its labors are principally confined to a field not touched by the Y. M. C. A. and brings good, wholesome influence to bear upon young men whose natural tendencies are to spend their evenings on the streets. The Y. M. A. is a distinctive organization, maintains its own gymnasium and has done more to build up the Hope Chapel Sunday School than any other means. If any one sees fit to discourage the Y. M. A. minstrel show—then let him go down in his pocket and contribute to one of the worthiest institutions in the city and make minstrel shows unnecessary.—Courier-News.

It is an easy matter for the editor of the *Courier-News* to say that the "editor of the REVIEW is wrong in several respects," but let us see wherein he claims we are wrong.

The Association of Hope Chapel known as "Y. M. A.," is as much a part of the church work as its Ladies' Aid Society. What was claimed in the REVIEW article was that many Christian people objected to advertising a minstrel show in connection with Hope Chapel.

We do not claim to be infallible, nor do we pretend to set the pace for a code of morals. We do claim, however, in this connection that several influential, prominent, earnest christian men, connected with the parent church of Hope Chapel—men who give of their means in support of the church—have expressed themselves as very much opposed to the minstrel show being advertised in connection with Hope Chapel and requested us to publish an article to that effect.

No mention was made, nor was it hinted at in the REVIEW news item that the show was to be given in the Chapel, for it was not known where it would take place, and the only answer to the inquiry as to whether it would be held in Hope Chapel again this year was that it was feared the chapel would not be large enough to hold the people who would undoubtedly attend. But now that the *Courier-News* editor has introduced that phase of the question, we can say that each year for two years, under the same management, similar minstrel shows have been held in the Sunday School room of Hope Chapel.

No one questions any good work being done by Hope Chapel and least of all the editor of the REVIEW. We recognize its worth and the good it should accomplish and we wish it God-speed. But the question that has been asked is. "Can a church grow spiritually and increase its membership that will sanction its name being used in advertising minstrel shows?" The consensus of opinion of all the prominent church men who have expressed themselves to the editor, is that it cannot.

If the members of the Y. M. A. want to run a minstrel show, conducted on clean lines, and do not advertise it in connection with Hope Chapel, or hold it in said edifice, we would suppose no serious objections could be made by anyone; it is because the church is connected with it, as we understand, and the proceeds given either directly or indirectly to it, that objections are raised.

BOYS SCIENTIFIC UNIVERSITY.

The scientific university for country boys so successfully established by Mr. George Robley Howe and his associate, Mr. George Noyes, of Norway, Maine is attracting the attention of educators and thinking men all over the United States. The *Youth's Companion* gives the following interesting synopsis of their plan of work: "They have taken the country boys as raw material, and created therefrom a scientific university, in which all the sciences which can have a local interest and foundation are learned by the young pupils. Attendance is voluntary, tuition is free.

"The boys themselves, as they grow older, become the instructors of their younger companions, and all alike go, not to books, but direct to nature. They have their camp kit,—blanket, hatchet, knapsack and such other things as make them independent in the woods, and either by themselves or with their older advisers they tramp the surrounding country and study the plants, animals, insects and minerals.

"Not only do they form collections, but they classify them, accurately and scientifically, each boy working in the department which he has chosen for himself. From the surrounding hills they have taken mineralogical specimens for which natural history museums have offered large prices, and from neighboring streams have gathered valuable pearls.

"The most important thing of all is the mental and moral training they get. The intelligent study of nature implies constant association with absolute truth and the comradeship of beauty. Under these influences the "tough" boy and the incipient loafer clarify themselves. The dregs of their nature settle, the life becomes purer and better."

May the time soon come when similar universities will be found all over the United States!

CLEVELAND POSITIVELY DECLINES

Grover Cleveland, in a letter to the editor of the Brooklyn *Eagle*, has positively declared that he will not be a candidate for re-election. In part the letter reads:

"You can never know how grateful I am for the manifestation of kindly feeling towards me on the part of my countrymen which your initiative has brought out. In the midst of it all and in full view of every consideration presented I have not for a moment been able, nor am I now able, nor am I now able, to open my mind to the thought that under any circumstances or upon any consideration I should ever again become the nominee of my party for the Presidency. My determination not to do so is unalterable and conclusive."

From the above it would appear that all doubt is now removed, and that Mr. Cleveland is positively out of the race.

THE Cranford (N. J.) *Chronicle* recently celebrated its tenth anniversary, and starts out on its eleventh year with the support and good wishes of the people of Cranford who appreciate the value of a good local newspaper to their community.

THE destruction by fire at Roselle of the public school building this week is a great loss to that community, and yet it may after all prove a blessing. The building was old and inadequate, but it served its purpose, and would sooner or later have been replaced by a modern structure. Its destruction will call for a new building as soon as it can be erected, and while the children will be put to some inconvenience in temporary quarters, they can look forward to the new building, and their parents can console them by relating what discomforts they had when they went to school. The comparison will doubtless be in favor of the children in what they term their present misfortune.

Is it possible that Mayor Smalley was desirous of booming his real estate holdings in Prideville when he so "generously" and "public spiritedly," as a Plainfield newspaper puts it, offered at a meeting of the Board of Education Monday evening, to donate a lot on which to locate the proposed new school building? The Mayor is quoted as saying that he favored the idea of locating the proposed new building in that locality, claiming it would result in many houses being built and a general improvement in the neighborhood, hence our question.

WELL, if this don't settle it, nothing ever will! A girl shoplifter has been arrested in New York, and on being searched by a detective it was found that the girl's clothing consisted of a long cape which came to her knees, a white overdress underneath, and beneath that a brown dress. In the two latter garments the detective found *thirteen* pockets. Just think of the nerve of it to engage in such a precarious occupation handicapped with that unlucky number!

IT IS to be regretted that outsiders should get the erroneous idea that the borough of North Plainfield is financially unable to provide proper school facilities for its children. Such a statement is untrue in every sense, as will be demonstrated as soon as the people are allowed to vote for a new building. The unprecedented increase in people moving into the borough so taxed the school facilities that it became necessary to provide temporary quarters for the children. Then politics entered into the question and a consolidation with the Plainfield High School was suggested. This gave rise to the false idea that the borough was not able to provide schools for its children. As soon as a new building can be erected it will be done.

A New Duel Story.

An Englishman and a Frenchman, both duelists of some note, about to encounter each other in a duel, chanced to meet at the ticket office of the station en route for the appointed field when the following dialogue took place:

Frenchman (loftily)—Return ticket to B——.

Englishman—B—— single.

Frenchman—Ha! you fear you will never come back; I always take a return.

Englishman—I never do; I always take my return half from the corpse.—Tit-Bits.

SHERIFF'S SALE.
IN CHANCERY OF NEW JERSEY.

Between John D. Kirch et al., Ex'rs, etc., complainant, and Walter P. Lindsley et al., defendants.—Fi. Fa. for sale of mortgaged premises.

By virtue of the above stated writ of Fi. Fa. to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE TWENTY-THIRD (23) DAY OF NOVEMBER NEXT.

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit:

All that tract or parcel of lands and premises, situate, lying and being in the township of North Plainfield, in the county of Somerset and State of New Jersey:

Beginning at a stone planted for a corner in line of other lands of Elias Allen and being the southeast corner of lands this day conveyed to said Elias Allen by Aaron Allen, and running thence (1) along the line of other lands of the said Elias Allen north fifty-nine degrees and forty-three minutes east (N. 59° 43' E.), a distance of five hundred and ninety-eight and thirty-six one hundredths (598.36) feet to a stake and stone heap by a cedar tree; (3) thence along the line of lands of George Demler, crossing the valley and the valley road, north eighteen degrees and twenty-five minutes w st (N. 18° 25' W.), a distance of thirteen hundred and eleven and twenty-three one hundredths (1311,23) ft to an angle point; (4) thence still along the line of la d of said Demler up the mountain north no degrees and forty-five minutes west (N. 0° 45' W.) a distance of two thousand and one and seventy-eight one hundredths (2001.78) feet to a point and corner; (5) thence along the line of lands of formerly Dr Corra Osborn on the northerly side of the second mountain south eighty-nine degrees and twenty minutes west (S 89° 20' W.), a distance of eight hundred and ninety-five and ninety-five one hundredths (895 95) feet to a stone planted for a corner in line of lands of formerly said Osborn, said stone being the northeast corner of lands this day conveyed to Elias Allen by Aaron Allen. (6) thence along the line of lands this day conveyed to Elias Allen by Aaron Allen, running first over and down the mountain (through lands of the grantors), making and establishing a division line for property of Aaron and Elias Allen, south no degrees and nineteen minutes west (S. 0° 19' W.), a distance of thirteen hundred and fifty and no tenths (1350.0) feet, more or less, to a stone planted for a corner; then second along the the edge of woods north eighty-nine degrees and forty-one minutes west (N. 89° 41' W.) three hundred and twenty-five and ninety-five one hundredths (325,95) feet to a stone placed for a corner at the northerly end of the old lane; then third south five degrees and thirty-eight minutes east (S. 5° 38' E.) down the old lane six hundred and three and three tenths (603.3) feet to a stone planted for an angle point; in the old lane, then, fourth, south twenty-eight degrees and fifty-three minutes east (S. 28° 53' E.) across the valley road and the valley, a distance of eighteen hundred and ninety seven and thirty-seven one hundredths (1897,37) feet to the first above mentioned stone and place of beginning. Containing 76 68-100 acres, more or less.

Being the same premises conveyed to the said Walter P. Lindsley by deed of Elizabeth D. Turney (single, bearing date April 10, 1902, and recorded in Somerset County Clerk's office, in Book 8 No 9 of Deeds for said county, on pages 292, etc.

CALVIN D. McMURTRY, Sheriff
CONINGTON & SWACKHAMER, Solicitors.

Somerset County Roads

NOTICE TO CONTRACTORS.

The Board of Chosen Freeholders of the County of Somerset will meet at the Court House, in Somerville, in said county, on

TUESDAY, THE FIRST (1) DAY OF DECEMBER, 1903,

at ten o'clock in the forenoon, and up to eleven o' lock a m., on said day, will receive and then and there publicly open and read, bids for macadamizing three roads in said county, as follows:

No 1, extension of Mountain avenue from Wahnetah Drive in borough of Bound Brook northerly through Bridgewater township to Warren township line, a distance of 7,285 feet or 1 38-100 miles. For this road two bids are asked, one for 8-inch macadam and one for 10-inch rock bottom.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 4,890 cubic yards of earth excavation.

Price per square yard for 11,337 square yards of 10-inch rock road complete.

Price per square yard for 11,337 square yards of 8-inch macadam road complete.

Price per lineal foot for 1,600 feet of underdrains.

Price (lump) for the construction of the whole road complete.

No. 2 begins at Blazier's Corners in Bernards township and extends southerly through Basking Ridge to Davidson's bridge over the Passaic River, the county line near Millington, a distance of 16 898 feet or 3 1-5 miles.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 8,165 cubic yards of earth excavation.

Price per square yard for 14,423 square yards of 10-inch rock road complete.

Price per square yard for 9,300 square yards of 8-inch macadam road complete.

Price per lineal foot for 7,500 feet of under. drains.

Price per cubic yard for 500 cubic yards of binding material.

Price (lump) for the construction of the whole road complete.

No. 3 begins at Far Hills in Bernards township and extends northeasterly to middle of North Branch of the Raritan River at Schomp's Mills, thence crossing Bedminster township northerly through Peapack and Gladstone to the Morris county line.

Bids for this road will be received under the specifications as follows:

Price per cubic yard for 14,655 cubic yards of earth excavation.

Price per square yard for 5,366 square yards of 10-inch rock road complete

Price per square yard for 20,208 square yards of 8-inch macadam road complete

Price per lineal foot for 8,000 feet of underdrains.

Price (lump) for the construction of the whole road complete;

No bids will be considered in which all items are not filled out.

Bids must be for complete work, including all materials.

No informal or unbalanced bids will be considered,

The price must be written in the bids and stated in figures.

Samples of trap rock to be used by the contractor, and a statement of the place where the same is obtained, must accompany each bid.

Each bid must be accompanied by the name and residence of the bidder, and with an affidavit that no person other than those mentioned is financially interested therein.

Each bid must be accompanied by a certified check of One Thousand Dollars, payable to the order of Wm. J. Logan, Director, upon condition that if the contract be awarded to the bidder, he will, when required by the Board, execute an agreement in writing to perform the work according to the specifications.

The successful bidder will be required to execute a bond with two or more sureties to the Board of Chosen Freeholders of said county in the penal sum of the estimated cost of said work within 30 days from the award, or the bid will be declared forfeited. Bidders must satisfy themselves by personal examination or otherwise, of the nature and extent of the work and shall not at any time after submission of a bid dispute or complain of errors in estimates, nor assert that there was a misunderstanding in regard to the work to be done or the materials to be furnished.

The Board reserves the right to change a portion of the road from rock to macadam, and from macadam to rock, if it seems advisable, and the price of such work so stated in the bid by the square yard to govern such work.

The right to reject any or all bids is reserved to the Board.

The maps, profiles, specifications and blank bids can be seen at the office of Henry I. Budd, State Commissioner of Roads, Trenton, N. J., and at the office of Joshua Voughty, Jr., County Engineer, Somerville, N. J.

By order of the Board of Chosen Freeholders of Somerset County.

WM. J. LOGAN, Director.
Somerville, N. J., Nov. 3, 1903.

Somerset County Orphan's Court
Administrator's Sale.

In the matter of the Insolvent Estate of Francis S. Runyon, deceased. | Order for sale of land.

By virtue of an order entered in the above stated matter on the twentieth day of November A. D. 1903, I shall sell at public vendue on the premises hereinafter described known as No. 151 Grove Street, in the Borough of North Plainfield, Somerset County, New Jersey, on Monday the twenty eighth day of December A. D. 1903, at 2 o'clock in the afternoon, all the following described land and premises, with the appurtenances, being the same described in said order, that is to say: All that certain tract or parcel of land and premises, hereinafter particularly described, situate lying and being in the Borough of North Plainfield, in the County of Somerset and State of New Jersey. Being Known and designated as Lot No. 1, on the Map of W. H. McMahon's land, made by N. Vars, Surveyor.

Beginning at a point at the intersection of the centre line of Grove Street and Linden Avenue thence running a South Westerly course along the middle of Linden Avenue One Hundred fifty-five (155) feet to a stake and corner of Lot No 14; thence running in a northwesterly course along the line of lot No. 14, seventy-five (75) feet to a stake and corner of lot No. 2, sold to Peter Hansen; thence running in a northeasterly course along the line of lot No. 2, one hundred and fifty-five (155) feet to a point in the middle of Grove street; thence running along the middle of Grove Street in a south easterly course seventy five (75) feet to the place of beginning.

Subject to the restrictions recited in a certain agreement made between John Tappen and others, dated May 12th, 1868 recorded in Book X No. 3 of Deeds for Somerset County, on page 383 &c., respecting nuisances. Being the same premises conveyed to said Francis S. Runyon, by deed of Mary R. Loomis, dated July 16th, 1901, recorded in Book Z. No. 9 of Deeds for said County of Somerset, on page 381 &c;

Dated November 23rd, 1903

NELSON RUNYON, Administrator &c,

A QUEER PLOW.

Primitive Implement Occasionally Seen in New Mexico.

It is a far cry from an up-to-date steel sulky plow to the antiquated wooden object pictured in the accompanying drawing; yet, strange to say, in this twentieth century of grace the latter represents an implement which may still be met with occasionally in

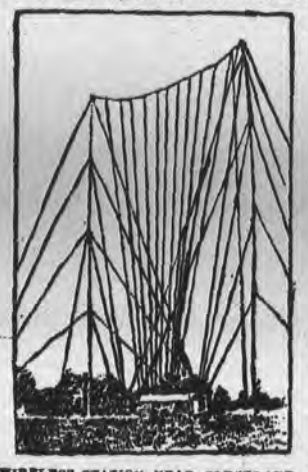
the remote parts of the Southwestern United States.

Rude as it is, however, and quite inadequate to the requirements of the best farming, a wooden plow of this type is not without its interesting features, one of which is the extreme simplicity of its structure combined with great strength. Three pieces of timber suffice for its construction. Thus the handle and the share are in one, being fashioned from a tree trunk and one attached branch. In the obtuse angle of the juncture of this trunk and limb a hole is dug and into this is mortised the long shank piece, which serves the purpose of beam and of tongue to fasten the ox yoke to. A smaller stick skewered through share and beam and holding these together completes the work.

CHAIN OF WIRELESS STATIONS.

Several of Them Are Now in Commercial Operation.

A test was made on Lake Michigan recently of the proposition to maintain connection with the steamers of the great lakes from stations along the shore. The experiment was made at



WIRELESS STATION NEAR CLEVELAND.

Chicago. The land tower was erected on one of the tall buildings of the city and communication was successfully maintained with the steamer City of Milwaukee until she was twenty miles away, after which the vibrations became quite weak. While this was considered satisfactory, some improvements have been made by which this range has been greatly increased.

It is proposed to establish a complete chain of stations along the great lakes, which work is now being done by one of the most energetic of the wireless companies. That at Cleveland has just been completed, and is shown in the accompanying cut from the Western Electrician. It is situated not directly at Cleveland, but at Irvington, located ten miles east of the city on a bluff thirty feet above the water.

Two large masts have been erected 100 feet apart and at right angles to the shore of the lake. Suspended between the tops of these masts is a large copper wire, hanging from which are about twenty smaller wires, which form the screen or antenna, which is used in sending and receiving messages. The wires of this screen converge to a point before entering the station house, which is a small cottage directly between the two masts. The masts are among the tallest of their kind in America, being 207 and 209 feet high, respectively.

The station is in direct connection with the Western Union Telegraph, and also telephone lines, so that a person at any place will only have to telephone or telegraph to the station and the message will be at once repeated to its destination. This does away with having the message repeated through the city office.

The steamer City of Erie is to be equipped with space-telegraph apparatus at once, and the City of Buffalo immediately after. These boats will be in touch with the shore at all times, and will be the first to be equipped on Lake Erie.

The first message from Cleveland to Buffalo was sent on August 6, the distance being 180 miles, partly overland.

The company engaged in establishing these stations now have in commercial operation, it is said, stations at Hamilton, Toronto, Cleveland and Buffalo, and to complete this chain it is proposed to establish stations at Port Huron, the Soo, Mackinac, Duluth, Milwaukee, Grand Island and Muskegon.

A Thousand Years Ago.

Russia, which tried to rescue the people of Macedonia from the power of the devastating Turk by the treaty of San Stefano years ago, but was prevented by the British, and which now declines to rescue them, has had relations with the Bulgarians for nearly 1000 years. The first appearance of the Russians in Bulgaria was in August, 967, when a Russian fleet arrived with 10,000 men at the mouth of the Danube, in response of an invitation from the Greek monarch Nicephorus, who, having conquered Crete and Cyprus, was determined to subdue the Bulgarians. The Russians were led by Sviatoslav, whose food was horse flesh and whose couch was a bear skin laid upon the ground. The Greeks and Bulgarians soon afterward united to drive away the northmen, who had apparently come to stay. After an interval of nearly 1000 years the Greeks and Bulgarians are again bitterly opposed and the Russian Czar holds aloof.

The forty-five national banks of New York City hold from $400,000,000 to $500,000,000 deposits of other banks.

Only sixteen to 100 victims of Bright's disease are under forty-five years of age.

A free Pasteur institute is to be established in New Orleans in connection with the charity hospital.

NEW BRITISH AMBASSADOR.

Great Britain's Ambassador to the United States has come to be a very important personage among us, and apparently the British Government thoroughly realizes this fact, for she has now for the first time sent a full-fledged Ambassador to Washington, Sir Henry Mortimer Durand, who has represented his country at Madrid since 1900. Heretofore the practice has been to elevate a minister to the Embassy here, and while this has resulted in the choice of excellent men for the post, it gratifies us to observe that Washington has come to be regarded as a diplomatic station quite as important as most if not all of the European capitals.

Whistling Oil Can.

Gives Alarm When the Lamp Reservoir is Filled.

The light from a good oil lamp is regarded by many as far superior to any other means of illumination for many purposes, and oil would be more generally used if it were not for the dirt and inconvenience attendant upon it, such as filling the lamps and trimming the wicks. If these processes could be simplified there is no doubt that coal oil would enjoy a greater popularity, even in these days of improved gas burners and electric lights.

One of the most disagreeable features of the use of oil is the tendency to overflow the lamp reservoir while endeavoring to fill it. With the ordinary arrangement of oil can and lamp reservoirs which are now in use it is impossible to stop the flow of oil just at the proper time, and a very disagreeable mess is the result of the accident. While it is possible to clean up the oil, the odor cannot be so easily disposed of, and this is particularly offensive to many persons.

A new oil can, which gives an alarm when the top of the oil in the reservoir has reached a point very dangerously close to the top of the can, has been recently put on the market. This

WHISTLING OIL CAN.

has a second spout extending from the tip of the emptying nozzle through the top of the can and into the interior, its end terminating into the upper part of the can. This acts as a vent under ordinary circumstances. As the oil is poured out the air necessary to take its place passes into the interior of the can through this pipe. In its passage it is compelled to pass through a sphere of metal which is supplied with a whistling device, and as long as the level of the oil in the lamp reservoir is below the filling nozzle a whistling is audible, but the instant the oil level reaches nearly to the danger mark the flow of air into the reservoir is interfered with and the whistling stops, giving the signal that the lamp is filled. It also cuts off all further flow of oil.

Window in the Umbrella.

Frequent annoyance and inconvenience arises to persons carrying umbrellas, from the fact that when a strong wind is blowing the umbrellas are held in such a position to shield

WINDOW IN THE UMBRELLA.

off the rain, that when two persons approach each other from opposite directions there is grave danger of collision when the umbrellas often sustain damage, if some more serious injury is not sustained by one or the other of the pedestrians.

To avoid such accidents it is necessary on the part of persons carrying umbrellas under these circumstances to repeatedly raise their weather shields so that they may be enabled to look under them and to look out for objects ahead.

Pedestrians picking their way through the rain are relieved of this bother and care by the use of the umbrella shown herewith, which is provided with a window, through which the pedestrian may pick his way in absolute freedom from accidents of this character.

The invention consists of a circular frame of metal sewed into the centre of one of the panels of the umbrella, and this holds a sheet of celluloid, or other transparent material, through which the pedestrian can have a constant view of the path in front of him.

Germany's Navy.

At the beginning of this winter Germany has eighteen warships under construction. Six are on the stocks, and twelve have been launched, eight of them this year. Of the eight battleships, two are nearly ready for service, three are receiving their internal fittings and three are not yet launched. Three large cruisers are nearly completed, and one is soon to be launched. Four of the six small cruisers are completing for service.

The $2,142,207 worth of platinum extracted in the Gorotiagodatski district of Russia last year is practically the world's supply of that metal.

CRANKLESS CLOTHES WRINGER.

Its Place Taken by a More Convenient Lever.

The comfort and convenience derived from the use of a clothes-wringer is somewhat interfered with by certain features which have restricted its application and use in a measure. For in-

CRANKLESS CLOTHES WRINGER.

stance, because of the space required for the operation of the crank handle it is not always convenient to put the machine at the point on the tubs where it is most desired. This trouble particularly applies to the use of the wringer on stationary tubs, which, because of their size, often interfere with the complete revolution of the handle.

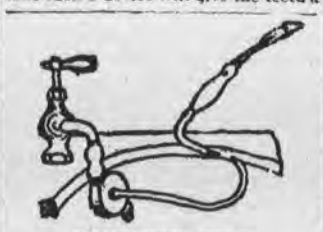
A reciprocating handle for the wringer has been brought out—the design and invention of a woman—which has the advantage of making the wringer very flexible in its application. The new feature consists of a mechanical movement which is separate from the wringer fame and rails, the connection being made by means of a link chain. The driving mechanism, instead of being a revolving handle, is a reciprocating wheel which imparts a continuous motion to the rolls by a very ingenious spring contrivance. The arrangement of the intermeshing teeth now existing in the wringer is preserved and the power-transmitting chain passes over one of these gears and under the other. As the handle is pressed down the chain is in action with the gear of one roll, and as the handle is brought up the spring referred to throws the chain on the teeth of the other roll, and so on continuously. It will be readily seen that by this arrangement a regular and continuous motion is given to the wringer rolls.

ROTARY TOOTH BRUSH.

Driven by a Water Power Device on the Spigot.

It is a generally conceded fact that the price of good teeth is exceeding great care. It is now urged by all dentists and others who have given the matter any special attention that the care of the teeth cannot begin too early or be too thorough, as long as injurious preparations are not made use of. Those who are regarded as authorities on the subject practically agree that the tooth brush drawn back and forth over the surface of the teeth is inadequate for a thorough cleansing, and it is now recommended that an up-and-down motion be adopted. By this means the bristles get into the crevices and surfaces between the teeth, which can be done in no other manner, thoroughly dislodging all particles that might otherwise remain there and cause considerable trouble. The very latest thing in this line is a machine by which the teeth are given this rubbing in the most approved manner, and the necessary power for the purpose, instead of emanating from the elbow, is supplied by the steam from the bathroom spigot.

In a few words, the apparatus consists of a wheel properly encased and adapted to fit over the spigot, and to be driven by the jet of water. A flexible shaft is mounted on this power generating device, and has a rotary tooth brush on its other end. Means are also provided for the conveyance of a certain amount of water from the spigot to the brush. It will be readily seen that such a device will give the teeth a



ROTARY TOOTH BRUSH.

most thorough brushing in the best possible manner, and portions of the teeth which are frequently slighted by the use of the brush of the ordinary type are easily reached and properly treated.

The brushes supplied with the apparatus are interchangeable, so that the power generating portion of the apparatus may be availed of by an entire family simply by the substitution of different brushes.

The Causes of Death.

Only 900 persons in 1,000,000, according to a medical authority, die from old age, while 1200 succumb to gout, 18,400 to measles, 27,000 to apoplexy, 7500 to consumption, 48,000 to scarlet fever, 25,000 to whooping cough, 39,000 to typhoid and typhus, and 7000 to rheumatism. The averages vary according to locality, but these are considered pretty accurate as regards the population of the globe as a whole.—Tit-Bits.

The Seven Stars Inn, at Manchester, England, boasts of having been licensed for 550 years.

HOW UNCLE SAM TEACHES HIS BOYS TO BE SAILORS

The Great Training Schools in Which American Lads Receive a Naval Education.

A bright, ambitious boy, who wants to be a sailor and a good one, need not stay in the newcomers' squad at the training station more than two, or, at most, three weeks. By that time the novelty of his surroundings has worn off and he knows a lot of things he did not know before, notably how to keep himself and all his belongings scrupulously clean.

He has been instructed in the manual of arms, has had plenty of exercise in the gymnasium, and if it is summer, has been exercised and instructed in swimming.

A dentist has examined his teeth and repaired them if they needed it.

Finally, the day comes when the chief boatswain's mate, who has charge of the squad, recommends a lot of them for promotion to the battalion.

Bearing his hammock and his clothes bag and his other belongings, the new boy is marched over to the big building in which he is to make his home henceforth while he is at the training school.

He is like any other boy at a big boarding school now — a young cub with his troubles all before him—yes, and his pleasures, too.

He will have his friends and enemies and possibly his little "scraps," but he learns to rely upon himself and to become strong and manly.

He swings his hammock that first night in the big building in a great room with hundreds of other boys, and, as the waves on the beach lull him to sleep, he feels that he is already a sailor.

When he is taken over to the big building in the morning he is told that he now belongs to such and such a section of such and such a division, and realizes that he is a part of the regular battalion.

He gets his full outfit of clothing and is told where to stow it in a big room full of hundreds of other clothes bags. He is also taken to a locker where he is to keep his hammock, and he gets a new lot of orders and instructions which soon come to be to him only a part of the daily routine of his life.

The boys are supposed to be half dressed, with shoes shining like their faces, their hair combed and brushed and generally in "ship shape and Bristol order" by the time the bugles blow for breakfast formation at 7.50.

The new boy has a hard time of it, for he is nervous with so many other boys pushing and crowding, all talking at once, and he has not yet quite got the hang of his sailor togs and the knack of getting into them quickly.

His knife halyard refuses to hang with just the same graceful and abandoned air as that of the older boys, and when it comes to tying his black silk neckerchief he despairs of producing anything in the way of a sailor knot that will not be a disgrace to the battalion. But some good natured fellow helps him out and he is back in the great hall with the rest of them and in his place in the formation before the bugles have ceased announcing that breakfast is ready.

If the weather is good this formation is held out of doors. At its close a gun is fired and the station flag hoisted to the top of the lofty staff in front of the commandant's office, with proper ceremonies. This is "colors," and a formal notice that the navy is "at home" for the day.

At this gratifying intelligence the entire battalion marches off to breakfast. The breakfast formation has been held in the great hall with the gallery around it. In the gallery there are signal flags and, inlaid in the stone floor, is a compass card with all the points marked in brass.

It is an imposing place, and this being the first time the new boy has taken part in any formation in it, he feels a new sense of belonging to a vast system in which flags and stately officers, orders and uniforms play a part.

At 9 o'clock all assemble in the big hall again at "quarters," and from there the different divisions are marched to the places where their real work for the day begins.

With the exception of half an hour for dinner and half an hour's time for recreation after it, the rest of the day, up to a quarter of 5 in the afternoon, is taken up entirely with the instructions and exercises, which transform the boy into the man-o'-waraman.

From a quarter of 5 until supper time the band plays and the boys can dance and play about the building and the grounds, or read and write and play games in the library.

After supper there is nothing to do but to enjoy oneself until hammocks are "piped down" at 8.35.

Then, at the order, he hooks up his hammock and prepares for bed. When the lively notes of "taps" at 9 o'clock a silence falls over the great building and the day's work and pleasures are done.—Indianapolis News.

HOW UNCLE SAM TEACHES HIS SAILORS.

BIRDS FLOCK TO THIS CHURCH.

Probably the most popular church with one class of life in New York is the Little Church Around the Corner, in Twenty-ninth street, near Fifth avenue. Hundreds of sparrows have their homes in the grounds. The queer little church itself, with its low eaves and tiny doorways, reminds one almost as much of a bird house as of a building for human use. But the church authorities wished the birds to make no such mistake as this, so they nailed from two to six small sparrow houses to nearly every tree in the grounds. Not only these, but every other promising hole and cranny is utilized by the sparrows for residence purposes. The whole neighborhood is filled with the sound of their chirping from early morning until dark. Their antics are frequently watched by the passers-by, whom they entertain with all the stunts birds are capable of, from fighting to nest building.—New York Press.

HIS PREFERENCE.

"Well, Bobby," asked the jolly sea captain of one of his small passengers, who stood in shrinking fright close to his mother, "aren't you glad you are going to cross this great, big ocean, and see all the pretty sights on the other side."

Bobby gazed back at the rapidly disappearing shore, then at the wide expanse of water ahead.

"Ye'es," he said, tearfully, trying to be brave, "but—but I'd rather go 'round by the road."—Nellie G. Coleman.

JOLLYKINS AND JELLYKINS.

Jollykins and Jellykins live in one house together,
And Jollykins is cheery as the brightest summer weather;
Jollykins believes in smiles—a smiling boy is he,
While Jellykins—a glummer boy you couldn't find or see.

Jollykins is flabby as the mud that lies so brown
In the hollows and the ditches when you travel out of town;
But Jollykins is like the fields, all shining, smooth and bright,
That make the summer cheerful and the country a delight.

And it's all that trick of smiling, just the being brave, you see,
Just the never, never grumbling, or consenting sad to be;
Jollykins and Jellykins live in one house together,
But their souls are just as far apart as snow and summer weather.

—Ethel M. Colson, in the Chicago Record-Herald.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free. Dr. R. H. KLINE, Ltd., 931 Arch St., Phila.

Historic Thimbles.

Thimble collecting is one of the latest fads. Mrs. Vanderbilt is extremely proud of possessing a thimble which originally adorned a finger of Queen Elizabeth, one very small and pretty silver specimen belonging to Queen Victoria when a girl of fourteen, another used by Princess Alice and much worn, and a most dainty gold and enamel thimble once owned by the Princess of Wales.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & Co., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by their firm.

WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c. per bottle. Sold by all Druggists.

Hall's Family Pills are the best.

Jains Discard Feathers and Shells.

At a meeting in Bombay it has been resolved by the Jains, one of the most influential communities in India, to discontinue in future the use of feathered caps and all tortoise shell articles on account of the cruelties involved in the trade.—Humanitarian.

Health in Lakewood.

A score and more of years ago Lakewood secured its first notice from the outside world as a health resort. It has long since outgrown, or rather improved upon, that classification, having secured recognition as the chosen rallying point for those seeking rest, change, exercise and open-air life, or social pleasure and relaxation. But there are yet many of her older citizens who can recall the long-ago presence of invalids who spent hours among the pines, whittling pine branches and chewing pine shavings, invariably crediting their return to health to such processes.

While it is true that Lakewood air is a most pleasant blend of temperate mildness and balsamic fragrance, it would probably be going too far to claim for it any particular medical properties. The place is laid out upon a light and sandy soil which speedily absorbs all moisture; the air is dry and untainted; the system of drainage is modern, and the water supply is from artesian well six hundred to seven hundred feet deep. As to temperature, there is a comparative warmth of eight to ten degrees over New York City, sixty miles away, doubtless due to the shelter of the pine forests which surround the place for miles.

What is a more direct factor of healthful conditions found here by visitors is a total variance of habit which in Lakewood keeps out of doors people who live indoors when at home. The world is not roofed over here. Men and women who come here physically out of tune, play at golf, drive, ride or walk; breathe pure air, exercise comfortably and sleep well.

And good health comes as a logical result. Life in the open air was ever a healthy life, and the man or woman of the city, tied down to a daily regime of close office hours [illegible] Lakewood—Send for it, it will be worth your while.

Only one out of every 1000 married couples live to celebrate their golden wedding.

I do not believe Piso's Cure for Consumption has an equal for coughs and colds.—JOHN F. BOYER, Trinity Springs, Ind., Feb. 15, 1900.

The Stings in Little Things.

We call him strong who stands unmoved—
Calm as some tempest-beaten rock—
When some great trouble hurls its shock,
We say of him his strength is proved.
But when the spent storm folds its wings,
How bears he then life's little things?

And I can tread beneath my feet
The hills of passion's heaving sea,
When wind-tossed waves roll stormily;
Yet scarce resist the siren sweet
That at my heart's door softly sings;
"Forget, forget life's little things."

I can forgive—'tis worth my while—
The treacherous blow, the cruel thrust;
Can bless my foe as Christians must,
When patience smiles her royal smile;
Yet fierce resentment quickly slings
Its shots of ire at little things.

But what is this? Drops make the sea;
And petty cares and small events,
Small causes and small consequents,
Make up the sum for you and me.
Then, O for strength to meet the stings
That arm the points of little things!

Holland's Irrigation Works.

Holland has 10,100 windmills, each of which drains 310 acres of land, at an average cost of 25 cents an acre a year.

ANOTHER LIFE SAVED.

Mrs. G. W. Fooks, of Salisbury, Md., wife of G. W. Fooks, Sheriff of Wicomico County, says: "I suffered with kidney complaint for eight years. It came on me gradually. I felt tired and weak, was short of breath and was troubled with bloating after eating, and my limbs were badly swollen. One doctor told me it would finally turn to Bright's disease. I was laid up at one time for three weeks. I had not taken Doan's Kidney Pills more than three days when the distressing aching across my back disappeared, and I was soon entirely cured."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, N. Y.

Pretty Things to Wear

New York City.—Blouses shirred to give a broad effect at the shoulders make one of the features of the season, and are shown in many variations.

SHIRRED BLOUSE.

This May Manton one is peculiarly chic, and forms a yoke of shirrings and lace that is exceedingly smart. In the case of the original the material is gray-blue colored crepe de chine combined with chiffon velvet of the same color and cream lace, but all materials soft enough for shirrings are appropriate. The narrow vest, covered with frills of the chiffon edged with ruches, is a noteworthy feature and the sleeves are among the most graceful of the season, while the wide belt is both new and becoming.

The waist is made over a fitted lining that closes at the centre front. Both the fronts and back are shirred to yoke depth and are combined with the lace to give the effect of straps over the shoulders. The vest is narrow, faced with lace to form the square, and covered with frills below. At the edges of the fronts, which are outlined with ruches of chiffon, are narrow extensions of velvet that give the effect of a plain waistcoat over the full frills. The sleeves are shirred to fit snugly below the shoulders and include shirred cuffs, but form full puffs between the two. The belt is wide, shirred at the centre front.

The quantity of material required for the medium size is six yards twenty-one inches wide, five yards twenty-seven inches wide or three and a quarter yards forty-four inches wide with one-half yard of bias velvet, three-eighth yards of all-over lace, three-quarter yards of chiffon or lace frilling and one and a quarter yards of ruching to make as illustrated.

Moleskin For Winter Wear.

Moleskin is the latest fur craze for the coming winter. It has all the soft, smooth becomingness of sealskin, and a quiet unobtrusiveness when unmixed with another fur commends it. While as a foil to ermine, it not only is itself beautiful, but adds to the whiteness of ermine in a most attractive way. Moleskin also enters into millinery trimmings with great success and is used for the foundation of fur hats, relieved by ermine brims and aigrettes of tails of the same.

An Evening Gown.

A charming evening gown is of heliotrope crepe de chine, only slightly trained. The skirt is accordeon pleated, the edge of each plain lined with iridescent beads. The low-necked waist is also pleated, and there is a deep bertha of yellow lace combined with an iridescent galloon.

Skin Bags.

The reindeer skin bags, which look like suede, come in tan, gray and black, and the watch is set at the top on one end. Watches are also to be seen in the walrus bags. Long purses with a flap instead of a clasp also have watches set in one end.

Reversible Garments.

Another new and ingenious idea is making reversible garments of a dark fur lined with a light-colored one, in order that they may serve in the double capacity of day and evening wraps.

Blue Lynx.

Blue lynx is of a very beautiful gray blue shade, has long, fluffy, silky hair and is quite delicate. The black has a brilliant jet black lustre.

Wraps Are Shorter.

The loose coats are all shorter than of late years. Three-quarters, or an even shorter length, seems to be popular.

Tiger Skin.

The newest importation in dress and millinery velvet goes by the name of "tiger skin."

Blouse With Cape Collar.

Cape or yoke collars and all devices that give a broad shoulder line are to be noted on the latest waists and are singularly graceful. The May Manton model shown is extended to form a narrow plastron and is among the best seen. The waist, as illustrated, is of striped French flannel stitched with corticelli silk and trimmed with small buttons, but the design is suited to all the materials of the season, and to both the odd waist and the gown. The full, soft fronts are peculiarly becoming, and the cape collar is shaped to fall well over the sleeves where it is open to allow perfect freedom of movement.

The waist consists of the fitted lining, the fronts, back and cape collar. The portions of the waist are arranged over the lining and the cape collar over both. At the neck is a standing collar that is closed with the waist at the centre front. The sleeves are the new ones with the deep pointed cuffs and are arranged over fitted linings. To the lower edge of the waist is attached a basque portion that extends below the belt and serves to keep it in place, so avoiding all bulk beneath the skirt.

The quantity of material required for the medium size is four and three-quarter yards twenty-one inches wide, four and a quarter yards twenty-seven inches wide or two and five-eighth yards forty-four inches wide.

A Late Design by May Manton.

BLOUSE WAIST WITH CAPE.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "DAVID AS A RULER."

The Rev. Dr. Edward B. Thurber, Pastor of the American Church in Paris, France, Describes the Life of the Psalmist From Sheepcote to Throne.

PARIS.—The Rev. Dr. Edward B. Thurber preached a sermon in the American church here which has attracted considerable attention. His subject was "David as a Ruler; or, From Sheepcote to Throne." The text was taken from I Chronicles xvii:7: "Thus saith the Lord of Hosts, 'I took thee from the sheepcote, even from following the sheep, that thou shouldst be ruler over My people Israel.'" Dr. Thurber said:

What a great distance from the pastures in Bethlehem to the throne in Jerusalem. The contrast between the shepherd boy and the King of Israel is one of the marvels which human history presents us. It is certain that no one is able to bridge such distances without the intervention of assisting conditions and forces. There must be acting factors in the life if the great results are secured. A man becomes a debtor to so much, to his environment, to favoring conditions, to friendly agencies, and sometimes to seemingly adverse circumstances. His own powers are stimulated, directed and assisted toward the good that is to be reached.

The American Revolution had something to do in advancing Washington to his position in history; his early education, his ancestry, his religious feeling, the people among whom his lot was cast, were all factors in his career. The French Revolution was the great opportunity which the genius of Napoleon could seize and utilize. Many a man fails to come conspicuously to the front because the times are not ripe for a dramatic career.

The wise man studies and understands how varying factors may be made to contribute to his progress and welfare. He comes to know how much depends upon the interest and services of one whom he may seek and serve, and who may seek and serve him.

David's open soul called a multitude of agencies into service, for his career and their employment made his history possible, and gave to it that peculiar color and variety which charm us.

The stars spoke to him, and through him they speak to us, as his thought and feelings are reported in the music of the Psalms, which have been such a solace and inspiration to multitudes since his time. The fields, flowers and forests, the streams and scenes of nature, bird and beast, had their part in the poetry he felt and expressed in a literature that will last as long as language endures. His friendships, that ideal one with Jonathan, his associations with all classes and conditions of men, give us a unique and interesting personality.

You cannot understand David until you take into consideration the nature of the tendencies within him, and measure the degree of the influences which entered into the formation of his character and career. There is a large mixture of contrasting and contradicting tendencies in him. These are manifested through the years of his eventful history. He was like a city that is being builded. The original low, marshy places must be drained and filled up, rough paths must give place to well paved streets, rude huts will be superseded by well constructed houses, palaces and public buildings; the crude and inartistic will be replaced by the work of architects and artists, before the city can become beautiful and healthful.

Through all the period of construction there will be present the contrasts and contradictions that mar and qualify the glory of the city. There are two things that would be apparent to a candid critic: that progress is being made, and that the issue of endeavor will be sure and satisfactory.

This contrast is presented through the course of David's life. If we look at some features which come before us consciously we will judge him severely; if we look at others we will say how admirable! and at the same time we will perceive that his way is onward from the sheepcote to the throne. At times David is as humble as a child that feels his weakness and need, and yet stands before his father, that he may be taught and led, and again he is as haughty as a man who counts no one his superior. He upholds truth and righteousness as essential to manhood, and then under the influence of fear he deceives King Achish, who has befriended him. He shows a wonderful spirit of forbearance and forgiveness toward his enemy, Saul, and then he puts his friend Uriah to the peril of certain death. His love for Jonathan is wonderful and ideal, and then he yields himself to degrading loves. He needed to be taken out of these conditions of selfishness, sensuality, pride and the evil of a wrong life, if he was to become "a man after God's own heart."

We would miss all, however, unless we knew about the sovereign influence which pervaded, arranged, employed and directed all factors and conditions which entered into and contributed toward David's career. Without this dominating influence Jerusalem would never have been related with Bethlehem. We must also remember that the fruition of a great character would have been impossible without the presence of God. While all this is true we must bear in mind even the divine power did not contradict the choice of David or force his voluntary action. God dealt with him as a free and intelligent soul. He was called to enter into partnership with God, and he in turn prayed that God would be with him. He cried out for the living God, as the thirsty land cries out for the life-giving water, that it may blossom as the rose and rejoice in the beauty and bounty of fruitfulness.

It is with such an interpretation and qualification that we listened to, and understand, what is intended when God is represented as saying, "I took thee from the sheepcote, even from following the sheep, that thou shouldst be ruler over My people Israel." God entered into and interested Himself in David's life, even as He would in our lives. God directed and utilized circumstances, made use of environment, employed the stars that spoke to David's soul, was in the blue sky of Palestine, and amid the clouds that at times darkened the heavens and pervaded with His purpose and power all the forms of nature in Bethlehem that spoke so inspiringly to the soul of the young man. God utilized the strength of body and soul, employing all the powers and faculties and opportunities in the interests of his progress. He made use of discipline, disappointments and apparent failures, of his sins and errors; in no way condoning them, but with a purpose to make them serve Him and work for David's promotion.

Life takes on larger meaning, and that meaning is better understood when God is in our life.

The little fountain up the slope of some Alpine peak has its significance, but when we connect its ceaseless flow and contribution with the Rhine, which gives a waterway to a large country, it seems more important to us.

When the Rhine flows onward, bearing the contribution of a multitude of rivulets and rivers through a wide domain, and gives its varied service to the wealth and welfare of an empire, we give the noble river larger consideration. It means much more to us. The coming of the King of Italy to France and Paris is something more than a personal visit. The King brings the good will of a kingdom. He represents the desire of rapprochement of two nations into reconciliation and friendship. The decoration of a city, the splendor of illumination, the march of soldiers, the manifested good will of a people, are the emphatic expression of the value of fraternity between nations.

These and recent movements of a similar kind are the utterances of that longing for the federation of nations in a spirit of adjustment which will make for the prosperity and progress of all people. The movements in themselves may seem simple, but they are not child's play, when we recognize what large designs and hopes they express.

This little life of ours takes on greatness and grandeur when we recognize that God enters into it, with His wisdom, His love, His purpose and His power. David was to carry all these with him through the long and trying way that led from the sheepcote to the throne of Israel. That life was big with the plan and power of God in it. It had all the meaning and dignity which these factors could give it. When we take a comprehensive look we will see that the expansion of Christianity is connected with the sheepcote.

It was this fact and sense of the Divine Presence that brought to David inspiration and strength. We take our inspiration partly from ideals, but also from co-operative agencies that help us to translate ideals into life. God took David from humble beginnings and led him away, little by little, from the sheepcote toward the throne. The boy was to come into possession of thoughts, ideals and purposes that would force him onward from point to point; so many things are to be expected from the company a man keeps, the friends he chooses, the great souls he permits to influence and help him. David chose God, God chose him, and a fellowship was formed that determined a career. How much is to be expected from such an association!

This was a real presence. It is a real presence which God desires us to know and realize. One says of a great statesman: "He habitually practices the presence of God and lives under Him to Christ." The doctrine concerning the Holy Spirit is a teaching about the real presence of God with man. The words of our Lord in the parable of the vine and the branches represents the relation between Him and His followers. It is more than any earthly love, fellowship or friendly relation. How much these contribute to make our lives purer, better and longer. You and I evermore think we could have been, because we have had those who loved us, and gave to us the ministry of their love. How much it means when the soul is related with God by His abiding presence! How much more comes out of our lives because of this union! Mr. Hurley is quoted as saying of Mr. Gladstone in his remarkable biography: "Life is a great and noble calling; not a mean and groveling thing that we are to shuffle through as we can, but an elevated and lofty destiny." The man begins more fully to understand himself and the good he should strive to reach when he adopts to his mind and heart a stream of new perceptions, feelings and influences which must come, when he allows God to take him out of the crude, the sinful and lead him forward. Thus God shapes life and destiny.

The great poet represents Hamlet as taking in this thought and saying: "Let us know, our indiscretions sometimes serve us well, when our deep plots do pall; and that should teach us,

There's a divinity that shapes our ends,
Rough hew them how we will."

Were it not for the intervention of the divine wisdom and will how all of our plans and purposes would fail, just for the lack of the wisdom, goodness and power which they require!

David was only rich and sure of the best, as God was with him; this presence involved a glory, blessedness and fruition beyond the measure of man's mind. The shepherd boy, with all his limitations, is so reinforced by God that he comes to royal position and power.

This divine presence is not only with David at the sheepcote. It continues through the long way of his varied and checkered career, toward the good which is in God's thought. The Heavenly Father never left or forsook him. There were great difficulties to face, such as belong to every strenuous, religious life, and they needed to be surmounted. Many a man may stand before a mountain, but one must climb the steep ascent and make use of the means that are to be taken if he reaches the height and the other side. The difficulties which David must meet and master are great. There were episodes and experiences in his life which to human view seemed to say: "Give up expectation and endeavor, for you cannot win the crown." It is true that he had been called of God and anointed by the prophet Samuel when he was a lad, but he afterward left the sheepcote, so that he became a tried and successful soldier; the plaudits of the multitude had rung in his ears, but his apparent success excited the anger and envy of Saul. David became an outlaw, a hunted fugitive, and his life was in direct peril. How could he become a king! Yet God was with him; this was his assurance of success. God was with him in his darkest night, in his deepest distress, in his most difficult and dangerous experiences, when friends were hopeless and no words of assurance and cheer came from any human source, but amid all this he was making progress, amid the labryinth of a mysterious providence, toward the throne he was to occupy.

This, then, is the word for us to-day. The God of David will be with every one who consents and covenants with Him. In His wisdom we shall be wise; in His strength we shall be strong. In His love we shall find our love will live and grow. When He is our life we will know how much life means. In the outlook which Jesus Christ presents to us we will know that we are going forward to a wisdom, love and life that are immortal.

God waits to make Himself known in all of the relations of life where His presence can be of service. That of which He desires of every one of us is a more unrestricted yielding to His presence and power.

Pride vs. Progress.

Without humility religious progress is impossible. Pride is the destruction of the principle of progress; it whispers to us continually that we are all that could be desired, or it points our attention to high positions and ambitious efforts beyond the scope of other men. Yet the true growth of the soul is not to be measured by our attempting many extraordinary duties, but by our power of doing simple duties well, and humility, when it reigns in the soul, carries this principle into practice. It bids us hallow our work, especially whatever may be to us hard or distasteful work, by doing it as a matter of principle. It enriches common acts of neighborly and social kindness with that intensity of moral effort which is due to every act of which the deepest moving power is the love of God.—F. D. Huntington, D. D.

Honoring the Father.

I saw a beautiful thing not long ago. It was a brilliant, successful man, widely known, paying honor and giving loving attention to his father. The father had always been a man of humble parts; he had never been known as a brilliant or particularly successful man. But he has been a good man, and a good father, and, now that the son has come to honor, there is nothing that he can do too good to show his gratitude to and respect for his father. It is a beautiful sight.—Sunday-School Times.

"Keeping Still."

Many a man whose life has had in it a good deal of trouble and opposition would have saved much if he had learned in his childhood the lesson of "keeping still." If the hard word hurts it will not make it easier to make an angry reply. If you do not answer at all, it stops right there; if your tongue cannot be restrained nobody knows what the result may be. Patience sometimes serves a man better than courage. You will find again and again that the way to keep out of trouble is to keep still.—The Christian.

COULD NOT BE DECEIVED.

Russian Peasants Did Not Understand a Polite Conductor.

An Englishman traveling in Russia furnishes the following incidents to a London paper—an incident which he personally witnessed and which he says "shows better than volumes of description the customs and social conditions of Russian peasants: "At a railway station the train is on the point of starting. As usual in Russia the bell rings three times before departure, to warn the passengers to take their seats. At the first ring the chief conductor, seeing on the platform a group of peasants standing humbly and cautiously together, says very politely to them: "Gentlemen, the first signal is given; please take your places."

One of the peasants, turning to his comrades, says: "Dimitri, Ivan, Steven, do you hear? The master tells us to enter the train." "Oh, you stupid," says another. "Are you a gentleman? You heard him say 'gentlemen.' He invited the gentry." There is a second ring of the bell. The conductor calls, hurriedly and angrily: "Please, gentlemen, take your seats; you hear the second signal."

The same peasant says to the others: "It is for us. We must take out seats. The train will start." "You ass!" says his companion. "Do you think you are called a gentleman? Were you ever a gentleman?" The third ring of the bell is heard. The conductor, losing his temper and hustling the peasants forward cries: "Idiots! Pigs! Beasts! Do you hear or not? He off and take your seats!" "That is for us," say the peasants. "Dimitri, Ivan, hurry up. We must take our seats."

Smart Man Was Fooled.

"There is less in a name than most people think," remarked big "Jim" Kennedy at the Old Guard fair the other evening. "I have a friend whose mania is the subject of names. He declares that if you put six men in front of him and tell him their names, without saying to which man each name belongs, he can fix the right name to the right man in five out of six cases. He boasts of this so much that I was glad the other evening to turn him down. We were sitting at a table in a cafe when a tremendously big, husky looking chap came in. I scribbled six names on a paper and passed it to my friend.

"That big chap's name's on the list," I said. "Pick it out."

"'The name is Sullivan,' he said promptly, after scanning the list.

"'You lose,' said I. 'He has the most fragile name that ever happened. That's Glass, the great ex-guard at Yale.'—New York World.

Cow Bells.

Scarlet, purple, orange light
Fades to palest green;
Farmhouse windows grow less bright
Where the glare has been.
Dusky lie the fields about.
And, faintly heard again,
Far-off, thro' the mist and dew,
Cow bells down the lane,
Tinkle, tinkle, clink-a-clink,
Cow bells down the lane.

Swallows cheep on circling wings;
Winds have chilly grown;
And the cricket shriller sings;
Trees look strange and lone.
Nearer, clearer, past the woods,
A silvery refrain,
Winding slowly up the hill,
Cow bells down the lane,
Tinkle, tinkle, clink-a-clink,
Cow bells down the lane.

Bess and Brindle, Snowflake, Jet,
Breaths like new-mown hay,
Dewy noses, trickling wet,
Barnward wend their way.
One by one, faint, pearly stars
Watch the twilight's wane,
And the pot-cup bars shut out
Cow bells down the lane,
Tinkle, tinkle, clink-a-clink,
Cow bells down the lane.

Most of the things that are going to happen tomorrow miss their connections. N. Y. 49.

Asthma

"One of my daughters had a terrible case of asthma. We tried almost everything, but without relief. We then tried Ayer's Cherry Pectoral and three and one-half bottles cured her."—Emma Jane Entsminger, Langsville, O.

Ayer's Cherry Pectoral certainly cures many cases of asthma.

And it cures bronchitis, hoarseness, weak lungs, whooping-cough, croup, winter coughs, night coughs, and hard colds.

Three sizes: 25c., enough for an ordinary cold; 50c., just right for bronchitis, hoarseness, hard colds, etc.; $1, most economical for chronic cases and to keep on hand.
J. C. AYER CO., Lowell, Mass.

DROPSY NEW DISCOVERY; gives quick relief and cures worst cases. Book of testimonials and 10 days' treatment Free. Dr. H. H. GREEN'S SONS, Box B, Atlanta, Ga.

A Gift Worth Giving and A Present Worth Having

GRATEFUL, HAPPY WOMEN

Miss Muriel Armitage.

Thank Pe-ru-na for Their Recovery After Years of Suffering.

Miss Muriel Armitage, 36 Greenwood Ave., Detroit, Mich., District Organizer of the Royal Templars of Temperance, in a recent letter, says:

"I think that a woman naturally shrinks from making her troubles public, but restored health has meant so much to me that I feel for the sake of other suffering women it is my duty to tell what Peruna has done for me.

"I suffered for five years with uterine irregularities, which brought on hysteria and made me a physical wreck. I tried doctors from the different schools of medicine, but without any perceptible change in my condition. In my despair I called on an old nurse, who advised me to try Peruna, and promised good results if I would persist and take it regularly. I thought this was the least I could do, and procured a bottle. I knew as soon as I began taking it that it was affecting me differently from anything I had used before, and so I kept on taking it. I kept this up for six months, and steadily gained strength and health, and when I had used fifteen bottles I considered myself entirely cured. I am a grateful, happy woman to-day."—Miss Muriel Armitage.

Peruna cures catarrh of the pelvic organs with the same surety as it cures catarrh of the head. Peruna has become renowned as a positive cure for female ailments, simply because the ailments are mostly due to catarrh. Catarrh is the cause of the trouble. Peruna cures the catarrh. The symptoms disappear.

Female Weakness is Pelvic Catarrh.

Always Half Sick Are the Women Who Have Pelvic Catarrh.

Catarrh of any organ, if allowed to progress, will affect the whole body. Catarrh without nervousness is very rare, but pelvic catarrh and nervousness go hand in hand.

What is so distressing a sight as a poor, half-sick, nervous woman, suffering from the many almost unbearable symptoms of pelvic catarrh? She does not consider herself ill enough to go to bed, but she is far from being able to do her work without the greatest exhaustion. This is a very common sight, and is almost always due to pelvic catarrh.

It is worse than foolish for so many women to suffer year after year with a disease that can be permanently cured.

Peruna cures catarrh permanently. It cures old chronic cases as well as a slight attack, the only difference being in the length of time that it should be taken to effect a cure.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

BEST FOR THE BOWELS
Cascarets
CANDY CATHARTIC
THEY WORK WHILE YOU SLEEP

GUARANTEED CURE for all bowel troubles, appendicitis, biliousness, bad breath, bad blood, wind on the stomach, bloated bowels, foul mouth, headache, indigestion, pimples, pains after eating, liver trouble, sallow skin and dizziness. Address Sterling Remedy Company, Chicago or New York. 502

PAXTINE TOILET ANTISEPTIC

FOR WOMEN

A Boston physician's discovery which cleanses and heals all inflammation of the mucous membrane wherever located.

In local treatment of female ills Paxtine is invaluable. Used as a douche it is a revelation in cleansing and healing power; it kills all disease germs which cause inflammation and discharges.

Thousands of letters from women prove that it is the greatest cure for leucorrhœa ever discovered.

Paxtine never fails to cure pelvic catarrh, nasal catarrh, sore throat, sore mouth and sore eyes, because these diseases are all caused by inflammation of the mucous membrane.

For cleansing, whitening and preserving the teeth we challenge the world to produce its equal.

Physicians and specialists everywhere prescribe and endorse Paxtine, and thousands of testimonial letters prove its value.

At druggists, or sent postpaid 50 cts.

A large trial package and book of instructions absolutely free. Write

The R. Paxton Co., Dept. 25, Boston, Mass.

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

SILOS, LUMBER, BOXES, CRATES.

You cannot afford to do without a SILO. If you want one (or more), or need any lumber, timber, mill work to repair or build, or Boxes, or Crates, write

G. ELIAS & BRO., Buffalo, N. Y.,

and get the best for the least money, direct from the stump. Catalogues FREE. Silo agents wanted.

Prospectus ready, means GOLD for you. 82 Arizona claims. Float Assay, $4.83. Monthly payments Guaranteed. Write Gladys Mining Co., Big Springs, Tex.

PISO'S CURE FOR
CURES WHERE ALL ELSE FAILS.

WHEN PAIN AND ANGUISH WRING THE BROW, A MINISTERING ANGEL THOU: BROMO-SELTZER 10¢ SOLD EVERYWHERE.

CAPSICUM VASELINE
(PUT UP IN COLLAPSIBLE TUBES)
A substitute for and superior to mustard or any other plaster, and will not blister the most delicate skin. The pain-allaying and curative qualities of this article are wonderful. It will stop the toothache at once, and relieve headache and sciatica. We recommend it as the best and safest external counter-irritant known, also as an external remedy for pains in the chest and stomach and all rheumatic, neuralgic and gouty complaints. A trial will prove what we claim for it, and it will be found to be invaluable in the household. Many people say "it is the best of all of your preparations." Price 15 cts., at all druggists or other dealers, or by sending this amount to us in postage stamps we will send you a tube by mail. No article should be accepted by the public unless the same carries our label, as otherwise it is not genuine. CHESEBROUGH MFG. CO., 17 State Street, NEW YORK CITY.

HAPPENINGS IN NEW JERSEY.

Continued From First Page

of the duplicate in present use. The perpendicular lines show artistic hand ruling, and the customary column headings are written in with ink. The book bound in sheepskin, is in a state of perfect preservation and the paper is of an exceptionally quality.

The taxable values aggregate $1.403,530 as against $2,949,410 now. The rate then was $3.05 on $100, while the present rate is $1.74. The amount of taxes raised in 1865 was $42,814 49, of which sum the bounty fund, $34,115.80, played a prominent part. The other taxes were: State, $1,364 17; county, $1,481 47; road, $1,700; poor, $1,500; township debt, $1,500; schools, $500, and incidentals, $653.05. The number of polls, militiamen and dogs was, respectively, 551, 331 and 307. Of the 551 polls 122 were double, which is explained by the fact that those who were not owners of real estate were assessed double poll.

SEASHORE MAYORS ORGANIZE LEAGUE.

The New Jersey Seashore Municipal League was organized at Cape May last week at a meeting of the Mayors of seashore municipalities held at the Windsor Hotel. Mayor Stoy, of Atlantic City, was elected president; Mayor Millet, of Cape May, secretary, and Mayor Champion, of Ocean City, treasurer.

The president was authorized to appoint a committee to formulate a plan of procedure and to describe the purposes of the organization, for presentation to the next meeting, which is to be held at Atlantic City on December 8.

The object of the new organization is to secure a union of seashore interests in matters requiring legislation and in the solution of municipal problems peculiar to the seashore.

A SERIES OF LUCKY "13."

A colored man of Bloomfield by the name of Moses DeWitt, so the story goes purchased a ticket for a raffle for a turkey November 13 and paid 13 cents for it. At 13 minutes after 11 o'clock Thanksgiving eve, he threw 13 with the dice and that won the bird, which tipped the scales at exactly 13 pounds.

De Witt shouldered the turkey at 13 minutes before midnight and was passing the bridge at Henry street, where he was stopped by two men, one of whom asked him for the time.

He informed him, and was about to pass on when when the men endeavored to take his watch. De Witt gripped the tuskey by the legs and laid about him right and left, and thinks he made 13 swings with the bird. Whatever the number, the thieves fled, and the turkey graced the table at the De Witt home Thanksgiving Day.

Those Dripping Days.

Protect your nose with one of those hemmed stitched initial handkerchiefs for 5 cents or those Japanettes at 10 cents to be had of Harry Feinberg, the popular priced outfitter, located at 329 West Front opposite Grove street.

MIGHTY HUNTER OF MAINE.

Nathan B. Moore at 85, Planning to Go into the Woods This Fall.

Nathan B. Moore of Bingham is one of the few old-time trappers and woodsmen remaining in Maine. In his eighty-fifth year, he is still hale and hearty and is now busy making birch bark canoes, in which fast disappearing art he is an adept.

Ever since the age of 14, when he killed his first moose and began his career as a trapper and woodsman, he has spent most of his time in the woods, depending upon the forest for his support. Many of his conclusions based on his long experience contradict common beliefs.

For instance, he asserts that caribou did not leave Maine because of scarcity of food, as is commonly supposed, but rather because they were driven away by the pugnacity of the buck deer. The caribou, he says, is a peaceful animal, while the buck deer is just the opposite. As the deer increased, they pestered the caribou more and more until, finally, the latter sought another home.

Then, again, Mr. Moore says there are four distinct varieties of moose in Maine, a fact not generally known—the long-legged moose, the gray moose, the black moose and the bell moose—and a record of 276 moose killed has given him somewhat of an opportunity to investigate. Most of these moose were run down on snowshoes, and Mr. Moore says he has never seen a moose that he could not catch with right conditions on the first trial, although some would run five and some twenty miles.

And, finally, Mr. Moore believes the bull moose to be the most dangerous animal in the woods.

"I can truthfully say," he says, "that the danger of a conflict with a bull moose has not been magnified. They are the most dangerous animals in the Maine woods.

"The moose is not only cunning, a vicious fighter and revengeful, but, combined with this, he has enormous power and the quickness of a cat. He can kick with his hind feet, strike with his front feet and wield his head like an Indian war club when opportunity offers. Even the cows should be avoided."

Here is a piece of advice from him to hunters and sportsmen as to being careful about shooting in the woods:

"I have hunted the forests for over seventy years, but I never allowed myself to take my rifle to my face until I saw enough to know whether it was man or wild animals that I was preparing to shoot at.

"Often when I was away in the wild forest, where I could not think of a man's being, I would hear something coming that I was sure was a wild beast, and I would pull back the hammer of my rifle and step behind a tree and wait, and presently the boughs would part and out would step a man."

He gives his game record as 276 moose, 200 caribou, 100 bear and small game without number.

The Flood of Immigrants.

The remedy is to be found in a wider distribution of the flood. Scattered throughout the union a million foreigners would exert but little influence, and in the course of a few years they would acquire a knowledge of American ways and institutions. Their children would grow up in the midst of an American environment, and, learning the English language and attending public schools, they would become American in every sense. The country is big enough and has sufficient resources to accommodate many more people than will come, even though they come at the rate of a million a year for the next half century.—Denver Republican.

Lots of people would rather die a natural death than send for a doctor.

LAWLESS AT HEAVY COST

Louisiana Whitecappers to Pay $5000 to Each of Three Men.

MAY STOP SUCH DISORDER

Louisiana's Supreme Court Increases Damages From $500 to $5000 in Each Case—Thirty Citizens of Dodson Involved—Their Cruelty Expensive—Judge's Bitter Denunciation.

New Orleans, La.—The Louisiana Supreme Court gave damages for $5000 each to Peter Warner, Reuben Brown and Edward Warner against thirty citizens of Dodson, Winn parish, who had whitecapped them. The jury in the District Court gave each of the victims $500. The Supreme Court increased the amount of damages and expressed in emphatic language its opinion of whitecapping and similar acts of violence.

Several business houses were burned recently in Dodson and there were threats that the entire town would be destroyed. Peter Warner, Kube Brown and Edward Warner were suspected of being implicated in the fires. A committee decided to punish the men. It was divided into three branches, each of which was authorized to punish one of the three suspects. They were taken to a lonely place in the woods beaten, abused and maltreated and hanged until unconscious. Confessions were extorted from them and they were then ordered to leave the town.

What particularly incensed the Supreme Court was the fact that the Grand Jury of Winn parish was in session at the time these outrages were committed and was engaged in investigating the Dodson fire. The whitecappers not only refused to await its action, but prevented witnesses who were summoned by the Grand Jury from going before the body, taking the law entirely into their own hands.

"This," says the Supreme Court in its decision, "is not only illegal, but it reduced the community of which they professed to be the representatives to the level of a lawless and ignorant horde of savages. While, therefore, their professions are those of law-abiding citizens, their conduct was that of Anarchists, recognizing no governing power save unbridled passion.

"Torture is no longer permitted in civilized countries, even as a punishment for crime, and still less can it be tolerated upon the bare suspicion that a crime has been committed or to extort a confession thereof or an accusation against others."

The Grand Jury, after investigating the case, refused to find indictments against the prisoners. The decision will break up whitecapping in Louisiana. It has prevailed only to a limited extent in the western part of Louisiana, where there are a number of lumber camps and some disorder. The governor on several occasions has been called on to interfere, but the damages assessed by the Supreme Court against the whitecaps will, it is thought, have even a more beneficial effect.

COLLINS SWEEPS BOSTON.

Present Mayor Re-elected by Largest Majority in City's History.

Boston, Mass.—The Democrats won a victory in the municipal election, Mayor Patrick Collins being re-elected by 26,565 plurality, the largest ever given a Mayoralty candidate in the history of the city.

The vote was: P. A. Collins (Dem.), 48,851; G. N. Swallow (Rep.), 22,286.

The Board of Aldermen next year will be solidly Democratic, and that party will have a large majority in the Common Council.

James A. Gallivan, the Democratic candidate for membership on the Board of Street Commissioners, was also successful in defeating Isaac B. F. Allen (Rep.), a colored man and formerly a member of the Governor's council.

The city as usual favored licensed liquor selling by a large majority.

TO SAVE GREAT SALT LAKE.

Utah Officials Talk of Letting One-third Go and Raising Level of Rest.

Salt Lake, Utah.—At a conference attended by Governor Wells and other State officials, plans were formulated for saving Great Salt Lake, which is gradually disappearing. The plan is to utilize the Lucin cutoff, built by the Union Pacific, as a dam to separate the upper part of the lake from the lower and let the upper part go back to the desert. The area of the entire lake is 21,000 square miles; one-third can be cut off by this plan. By this means the remaining two-thirds can be saved.

Experts are of the opinion that with the upper third cut off the level of the balance could be raised six feet if necessary by the saving in evaporation.

INNOCENT MAN PARDONED.

Girl Writes Confession From France, and Governor Toole Pardons Him.

Helena, Mont.—Governor Toole has granted an unconditional pardon to Camille Peres, who was serving a five-year sentence for criminal assault on *Adrienne Baque, a fifteen-year-old* French girl. A short time ago the girl returned to France, and wrote to Governor Toole that she gave perjured testimony against Peres. She said she was soon to be married, and wanted to right the wrong she had done an innocent man.

DYNAMITERS CONFESS.

Two Men Tell of the Blowing Up of the Vindicator Mine.

Denver, Col.—General Bell said that Charles McKinney and Charles Foster, who were arrested at Cripple Creek, *had confessed that they had taken part* in the blowing up of the Vindicator mine, which resulted in the death of Superintendent McCormick and Foreman Rice. It is said they implicated twenty other persons in their confession.

CUBAN BILL IS PASSED

The Joint Resolution Carried in the Senate.

Provides for Mutual Admission of American and Cuban Products at Tariff Reductions.

Washington, D. C.—The bill making effective the Cuban reciprocity treaty was passed in the Senate by a vote of fifty-seven to eighteen, seven Democrats voting with the majority and one Republican with the minority.

There now remains only ceremonial acts to be taken before the new tariff law shall go into effect. Under the resolution, the President, when he shall receive evidence that the Republic of Cuba has given effect to the treaty by declaring the lower rates of duty on our goods entering the island republic, will issue a proclamation declaring the fact of Cuba's compliance, and thereupon, by operation of law, on the tenth day thereafter the new rates of duty are to go into effect.

The last hours in the Senate preceding the final vote were occupied in a spirited debate between Senator Bailey on the minority side and Senator Spooner on the majority, mainly on the constitutionality of the procedure under which the treaty came into existence.

Senator Spooner urged with great force that there was no violation of the constitutional powers of the House in the matter of originating bills of revenue when the President and the Senate negotiated a tariff treaty, provided the vitality of the treaty depended on the approval of Congress. He pointed to the presence in the resolution of an explicit clause saving to the House its prerogatives as the body originating revenue legislation.

Senator Bailey, in the course of his argument, uttered a defiance to the majority, declaring that hereafter the Democratic Senators would stand together with an unbroken front. When the vote was taken Senators Gorman, Cockrell, Clay, Blackburn, McCreary, Overman and Simmons voted in the affirmative with the Republicans, and Senator Bard left his Republican colleagues and voted in the negative with the Democrats.

The bill passed carries into execution the treaty between the United States and Cuba which provides for a reduction of twenty per cent. from the rates of duty under the Dingley law on sugar and all Cuban articles imported into the United States, and a varying reduction of from twenty to forty per cent. from the established Cuban duty on articles imported into Cuba from the United States. After the passage of the Cuban bill the Senate agreed to the House resolution providing for a holiday recess from December 19 to January 4.

MET MANY PRESIDENTS.

Tennessee Man Dies Who Shook Hands With All Save Washington.

Johnson City, Tenn.—Major William H. Garland, aged ninety-four years, is dead at the National Soldiers' Home here.

He had shaken hands with every President of the United States except Washington.

He was on the naval cadet detail that welcomed Lafayette on his second visit to America in 1824, and at one time conversed with Napoleon on the Island of St. Helena.

Major Garland's wife and children were drowned in the Evansville (Ind.) flood in 1884. He was for many years a Baptist minister.

FORGER GETS TEN YEARS.

Casper J. Ernst, St. Paul Banker, Sentenced to Ten Years' Imprisonment.

St. Paul, Minn. — Casper J. Ernst, banker, investor and capitalist, was sentenced to ten years in the penitentiary on a plea of guilty of forgery. Ernst is the owner of two business blocks in St. Paul, has conducted a banking and brokerage business here for two years and numbers among his victims seventy-five Catholic priests, who have lost money through him.

It is estimated by the receiver appointed by the court that the Catholic priests have lost no less than $275,000 in the purchase of forged mortgages and forged securities.

CROWD SEES ROBBERS WORK.

Thieves Explode Seven Charges of Dynamite in Vain.

Indianapolis, Ind. — Three robbers stood guard in the office of the Star Building with drawn revolvers while three of their companions worked for an hour and exploded seven charges of dynamite. The heavy explosions raised the roof of the building.

Terrified people in the neighborhood stood at a distance and watched the operations of the robbers, who finally became discouraged at their repeated failures to reach the inside of a burglar-proof strong box inside the safe and left a few minutes before the police arrived. Only a small sum of money was taken.

MRS. DOWIE LIVING WELL.

Financial Troubles of "Elijah III." Did Change Her Plans.

Cannes, France.—Mrs. Dowie and her son Gladstone Dowie are following the usual habits of the visitors here. They have fine apartments and take their meals in a restaurant. They have a carriage and enjoy every comfort.

The hotelkeeper was anxious over the first news of the financial trouble of "Elijah III.," but he seems to be satisfied now that his clients have plenty of money.

Used Mails For Fraud.

Julius M. Nisson and Arthur J. Herbst were found guilty at Chicago of using the mails to defraud. They used the name of a reputable firm, ordered goods worth in all about $30,000, reshipped them to New York and disposed of them there.

Florida Oranges Best.

The only oranges that satisfy buyers are Floridas. They are coming in fair condition, most of them well ripened and well colored.

PACIFIC COAST LAND FRAUDS

Report of the Secretary of the Interior.

PENSIONS COST THREE BILLIONS

Secretary Hitchcock Says Three Persons Have Been Indicted in Oregon—Widespread Conspiracy to Obtain Title to Public Lands—Total Indian Population Now About 270,000.

Washington, D. C.—The most significant feature of the annual report of the Secretary of the Interior is the discussion of the land frauds. The estimates of the Interior Department for the expenses of protecting the public domain during the next fiscal year call for $250,000, a large increase over the amount asked for and appropriated by the Congress last year.

"It is the purpose of the Department to pursue with unflagging zeal," says Secretary Hitchcock in his report, "until justice is meted out to all persons shown to have committed frauds against the Government by unlawfully acquiring any portion of the public domain."

A United States Commissioner (a woman) and three others have been indicted in Oregon on charges of fraud. "Suits have been brought," says the Secretary, "in a number of instances in the Federal courts to vacate patents and to restore to the public domain the lands acquired by alleged fictitious entrymen.

So widespread has been the conspiracy to obtain title to the public lands in violation of law that there are now 20,000 entries suspended on charges of fraud.

Busy as the Interior Department has been in ferreting out evidences of fraud and preventing dishonest practices by land speculators, there has been time for the administration of a large volume of routine business in connection with the disposal of the public domain and other matters. There were disposed of during the last fiscal year public lands aggregating 22,824,299 acres, classified as follows: Cash sales, 3,073,896 acres; miscellaneous entries, embracing homesteads, land warrants, scrip locations, State selections, swamp lands, railroad and wagon road selections, Indian allotments, etc., 19,577,631 acres, and Indian lands, 173,371 acres, showing an increase of 3,335,764 acres as compared with the aggregate disposals for the preceding fiscal year. The total cash receipts during the fiscal year from various sources, including disposal of public land ($10,557,618) and Indian land ($308,939), from depredations on public lands ($95,251), from sales of timber on forest reserves ($31,966), from sales of Government property ($849) and for furnishing copies of records and plats ($30,118), aggregate $11,024,743, an increase of $4,762,816 over the preceding fiscal year.

The disbursements for pensions from July 1, 1790, to June 30, 1865, were $96,445,444.23. Since 1865 the disbursements for pensions were $2,942,178,145.93, and for maintenance and expenses $95,647,934.71, a total of $3,037,826,080.64 making the entire cost of the pension system since the foundation of the Government $3,134,271,524.87.

During the fiscal year ended June 30, 1903, the total number of pensioners on the roll was 1,043,533, and the number remaining on the roll at the close of the year was 996,545.

The gains to the rolls during the year were 40,086 new pensioners and 4401 restorations and renewals, a total of 44,487. Of this number 131 were pensioned by special acts of Congress. The losses to the rolls during the same time by death were 40,907, and from other causes 6481, a total of 47,388, a net loss for the year of 2901. The number of deaths of soldier pensioners for the year was 29,481, and of this number 27,842 were volunteers of the Civil War. The pension roll at the close of the year contained the names of 728,732 soldiers, 267,189 widows and dependents and 624 army nurses.

The total Indian population of the United States, the report says, remains about the same as last year, approximately about 270,000, of which the five civilized tribes and New York Indians embrace about 90,000, leaving about 180,000 occupying 156 reservations, containing 55,127,000 acres outside of the Indian Territory and the State of New York.

The New York Indians number 5232 and occupy eight small reservations of about 88,000 acres in the northwestern part of the State of New York. These Indians receive small annuities in money and goods under treaty stipulations. The Cherokee, Chickasaw, Choctaw, Creek and Seminole, known as the five civilized tribes, located in Indian Territory, including freedmen, number about 84,500, and occupy reservations whose aggregate area is 19,475,614 acres.

CONFESSED TO FREE WOMAN.

She Was on Trial For Arson When the Firebug Owned Up.

Attleboro, Mass.—Philip Heitchman, a hostler, confessed that he set fire to the Salamon Hospital several days ago. Mrs. Margaret Giles, a cook employed at the hospital, was under arrest charged with the crime, and the firebug's confession freed her. The hospital barn was set on fire, and it was shortly after the discovery of this fire that Heitchman was arrested.

In ordering the discharge of Mrs. Giles, Judge Byham said that he would have discharged her in any event on the evidence presented at the trial.

For a New $6,000,000 Line.

The Wichita, Oklahoma and Indian Territory Company, of Perry, Oklahoma, with a capital stock of $6,000,000, was chartered at Guthrie, Oklahoma, to construct a line from Wichita, Kan., through Oklahoma and Indian Territory to Fort Smith, Ark.

Ended Life to Avoid Capture.

John Haskin, aged twenty-seven, of Elwood, Ind., cut his throat to avoid capture for stealing a horse and buggy. Five minutes after his death the officers arrived.

BANK CASHIER A SUICIDE

Trusted New Haven Official Short in His Accounts.

Went to Cellar, and Put a Bullet Through His Heart, After Meeting the Government Examiner.

New Haven, Conn.—Within five minutes after the unexpected arrival of A. D. Burrows, national bank examiner for Connecticut, at the Yale National Bank, A. C. Bushnell, cashier of the bank, committed suicide by shooting. The bank examiners of the State were summoned at once by Mr. Burrows and a rigid investigation of Bushnell's books commenced.

President Greely issued the following statement:

"A. C. Bushnell, our cashier, has taken his own life. It is evident that Mr. Bushnell has been speculating in stocks to a limited extent and was indebted to this bank for a small amount, which is amply covered by surety bonds."

It was said that the loss would not exceed $15,000. The bond is $25,000.

Cashier Bushnell was in the best of spirits when he arrived at the bank at his usual time. The bank examiner had just arrived and was sorting the counter change. Mr. Bushnell, attracting no attention, immediately went to the drawer of the cashier's desk, took out the bank revolver, went to the basement of the bank and shot himself through the heart. The examiner and bank officers at once went to him, but he was unconscious. He died later at Grace Hospital.

Cashier Bushnell was forty-six years of age, and was held in the highest regard in the community. He was in the best of health. He was very active in numerous social, religious and philanthropic organizations here. He was connected with one of the oldest of New Haven families, and leaves a widow and three children.

He had been an officer of the Yale National Bank for twenty-five years. Inquiry among Mr. Bushnell's closest friends failed to elicit any reason for his suicide. It was not known that he had become entangled in losses by speculations of any kind, although it was understood that he had been worried over the recent $50,000 failure of the E. S. Wheeler Company, of this city, which caused a considerable loss to the Yale Bank.

DID NOT SAY "WAR SOON."

Mr. Root's Prediction Was Entirely Indefinite, He Declares.

Washington, D. C.—In the speech he delivered at a banquet of army and navy officers, Secretary Root says he did not predict that war "will soon come" between the United States and some foreign power. Mr. Root said in denial:

"I used exactly these words: 'When the time comes, as we know it will come, though we do not know when or whence—but we do know it will come some time—when you are called on to defend your country, you will do it with mutual helpfulness and comradeship.' I have said the same thing at least a dozen times before."

Mr. Root told the young officers who graduated from West Point last summer that they would live to take part in a great war for their country. In private conversation Mr. Root has said that it is simply a common-sense deduction that every generation produces a war, and that on account of the growing importance of the United States in world affairs it is natural to assume that the next war will be a great struggle.

MURDER IN CHINESE THEATRE.

Member of the Orchestra Shot in Full View of the Audience.

San Francisco, Cal.—While a play was on in a Washington street Chinese theatre before an audience which packed the house, a Chinaman, with a revolver in his hand, stepped out on the stage from a side door and fired four shots at Gee Ah Gong, who was in the orchestra beating the cymbals. Gong died half an hour after.

Several hundred citizens who had been enjoying the play made a mad rush for the door when the shots were fired. The murderer disappeared.

The audience thought that the highbinders had entered the place to work a wholesale destruction of lives. The police have no clue to the assassin, as the victim belonged to no society and was not involved in the feud now raging in Chinatown.

E. E. HALE CHAPLAIN.

The Eminent Preacher and Writer Chosen by the Senate.

Washington, D. C.—The Senate has elected as Chaplain, to succeed William H. Milburn, the blind chaplain, who died last spring in California, the eminent Unitarian minister, Edward Everett Hale, of Massachusetts.

Edward Everett Hale is now in his eighty-second year. He has been since 1856 the pastor of the South Congregational (Unitarian) Church in Boston. His home is in Roxbury. He was graduated from Harvard in the class of 1839. He is the author of several books, one of the best known of which is "The Man Without a Country."

Cracksmen Get $2500.

The vault in the office of the Courtenay Manufacturing Company, at Newry, Oconee County, S. C., was blown open with notro-glycerine, the safe being torn to pieces. The cracksmen secured $2500 and escaped.

Wedded Her Uncle.

At Stamford, Conn., Judge Gager has annulled the marriage of Anna Stahleberg to Herman D. Stahleberg on the ground that the husband was his wife's uncle. The wife alleges that neither was aware of the relationship when they married in 1889.

Slain by Maniac.

Superintendent William Mayme, of the Insane Asylum at Lancaster, Wis., had his brains beaten out with a poker by Thomas Fox, a patient.

JAPANESE KILL KOREANS

Marines Quell Strike Riot at Mok-Phe.

Reply to Japan's Proposals Not Believed to Be Final—Complications Not Feared.

Seoul, Korea.—The Japanese landed marines at Mok-Phe, on the southwest coast of Korea to suppress rioting in connection with a strike among laborers. It is reported that they fired upon the mob, killing several people.

The strike was among Korean coolies employed in the foreign concession, and it precipitated clashes between the Koreans and Japanese.

London, Eng.—Telegrams from Japan concur in declaring that the position of the Ministry has been rather improved than otherwise by the dissolution of the Diet. The terms of Russia's reply to Japan have been communicated to the Japanese Minister here, Baron Hayashi, by his Government. He said the negotiations were incomplete, but significantly added he saw no reason to change his opinion that a peaceful issue would result therefrom.

After a careful examination of the Russian draft of the agreement the Foreign Office here doubts Japan will accept the terms immediately.

Great Britain and Japan are bound by treaty to keep each other fully informed, and any prospect of a critical outcome of the Russo-Japanese negotiations would necessitate a Cabinet council.

Paris, France.—Dr. Motono Ichiro, the Japanese Minister, in the course of an interview, expressed the firm belief that a peaceful solution of the Russo-Japanese differences would result from the negotiations between the two nations, adding:

"All depends, however, upon the attitude of Russia. Our Emperor is animated by pacific sentiments, and the Czar's love of peace is universally known, and the peaceful dispositions of the two sovereigns give a solid guarantee that war will be avoided."

NINE CONVICTS GET AWAY.

Big Jail Breaking Accomplished Under the Noses of the Guards.

Philadelphia, Pa.—Nine convicts, led by Harry Sifton, who is chief of the "Battle of Waterloo" gang, an organization of thugs, escaped from the House of Correction. All the men wore striped suits.

They were occupants of the third tier at the prison.

A few minutes after the morning "wake up" whistle had sounded one of the guards noticed that Sifton was missing. A glance at the washroom showed that a bar was gone from the window. A glance showed misty figures disappearing over the racetrack.

The work of cutting the bar had taken several days. A rough saw had been made out of a butcher knife. The cuts in the bar had been filled up each day with soap and iron filings.

The removal of the bar left an opening only twenty inches wide. Through this the men squeezed, dropping twenty-five feet to the ground. They then scaled a picket fence ten feet high guarded by sentries.

UNION MAN ARRESTED.

Miners' Committeeman Placed in Military Prison.

Cripple Creek, Col.—Union circles were greatly disturbed when D. C. Copley, one of the Executive Committee of the Western Federation of Miners, was arrested at his home, in Independence, by a squad of militiamen and landed in the military bull pen.

The reason given by the military authorities for Copley's arrest is military necessity. The union men invariably believe that he is being detained without warrant of law, and those who are opposed to union ideas assert that they are glad that the strike question has come to a focus.

The only known charge against Copley is that of complicity in the explosion at the Sun and Moon Mine, in Clear Creek County. He appeared to answer recently and is out on bond.

MURDERER ELECTROCUTED.

Two Great Shocks Needed to Kill Patrolman Ennis.

Ossining, N. Y.—Two tremendous shocks were needed in Sing Sing prison to kill William H. Ennis, the former Brooklyn policeman who had murdered his wife.

The first shock of 1800 volts and eight amperes continued for six seconds. Apparently there was something wrong with the electrode pressed to the right side of the forehead, as the flesh was burned and an electric light sprang from the living tissue that had been turned into carbon. Then the current was reduced to 200 volts and ran through the man for thirty seconds.

Surgeons then examined the body and apparently were not satisfied, as another shock of 1800 volts was given, when Ennis was declared to be dead.

MAD MULLAH'S MEN CANNIBALS.

One Captive and Several Women Eaten by Camp Followers.

London, Eng.—Advices from Somaliland, East Africa, say that the Mad Mullah's camp followers have taken to cannibalism, owing to shortage of supplies. The body of a captive recently executed by the Mullah was immediately carried off and eaten by the followers.

The feast was participated in by women, whom the Mullah subsequently ordered to be executed. These were, in turn, cooked and eaten by their late comrades.

Germans Repulsed.

The Germans in German East Africa have not yet succeeded in putting down the Hottentot rising in their territory. An official telegram from the Hartebeest River states that the Hottentots have repulsed a German patrol, wounding two of them.

Two Bankers Held.

J. L. Broderick and W. L. Collins, President and cashier of the defunct Indiana National Bank, at Goshen, Ind., were bound over to the Grand Jury.

LABOR UNION PUNISHED

A Chicago Judge Fines Press Feeders $1000.

GUILTY OF CONTEMPT OF COURT

Judge Holdom in His Decision Holds the Union Responsible For Violating an Injunction by Acts of Violence—The Decision is the First of Its Kind Rendered in This Country.

Chicago.—For illegal acts as a corporate body $1000 fine was imposed upon Franklin Union No. 4, Press Feeders, by Judge Holdom. The court found the union guilty of contempt of court for violating an injunction restraining it as an organization from interfering with the business of employes of ten printing firms, members of the Chicago Typothetae. An immediate appeal was taken from the action.

Judge Holdom's action creates a precedent, it being the first time in the history of trades unionism in this country that a court has fined a union as a corporation.

Judge Holdom in his decision said: "There is no reported case that I have been able to find of a fine having been imposed upon a labor union. Probably this is the reason that few of them are incorporated. It appearing that Franklin Union No. 4, as a corporation is liable to a fine for violation of the injunction in this case, it but remains for the determination as to what the amount of that fine shall be. Punishment is meted out in accordance with the gravity of the offense committed.

"The consequences of violation of the injunction by the union have been many assaults on innocent persons seeking to work under contracts satisfactory to themselves and their employers.

"There has been no discrimination between the sexes. Women have been assaulted and terrorized and followed to their homes and their families intimidated. Murder has even resulted from the unlawful acts of the union and its striking members.

"From affidavits in evidence in this case it appears that more than fifty people have been, since the inception of the difficulties set forth in the bill, assaulted, intimidated, called opprobrious epithets, and threatened with harm simply because they worked in a place voluntarily vacated by members of Franklin Union No. 4, all the alleged aggressors, with the exception of John Mucher, being members of the union.

"John Mucher, condemned twice for assault and unlawful picketing in company with members of the union, in violation of the injunction, has been defended by the la[illegible]

"It would seem [illegible] facts that the a[illegible] the establishing o[illegible] the payment of [illegible] strike headquarters by the union, Treasurer with the union money, and the fact that no discrimination was made against the members of the union known to be guilty of acts in themselves criminal, establish the union as co-conspirator with its offending members, party and privy to the violations of the injunction of which some of its members stand convicted, and therefore guilty of violation of the injunction and amenable to discipline for such violation providing it can be disciplined under the law.

"Such warfare cannot, and will not, be tolerated by the courts in a land of peace, where people are governed by the law, and the law would be lacking in one of its most necessary attributes if it was impotent to punish for such violation.

"The court is impressed with the utter impossibility in this particular case of attaining the ends of justice by the imposition of a nominal fine, and that the duty resting upon the court impels a fine somewhat measured by the gravity of the offenses committed."

RUNAWAY TRAIN KILLS FIVE.

Air Brakes Didn't Work and Train Plunges Oven an Embankment.

Cumberland, Md.—The most serious freight wreck on the Baltimore and Ohio Railroad in this region occurred on the seventeen-mile grade forty miles west of here. While a train consisting of forty-five cars and two engines was coming down the grade the air brakes refused to work, causing the train to rush down the mountain at a frightful rate and to plunge off an embankment, killing five persons, injuring three others and piling twenty-five cars into a ruined heap. The dead are: Engineer E. D. Irvin and his father, G. E. Irvin, who was riding on the engine; Fireman J. B. Carter, Cumberland; Brakeman John Hayes, Cumberland, and Michael Gobbons, Lonaconing, Md.

The track was torn up for a long distance. The dead and injured were taken to Keyser, W. Va. Some of the dead were hurled 200 feet. The two large engines were completely wrecked.

THREE KILLED IN WRECK.

Train Derailed Dashes Into the Girders of a Bridge.

Albia, Ia.—There was a wreck on the Chicago, Burlington and Quincy Railroad near here. Three persons were killed—two of them burned to death—and ten injured. A passenger train was derailed while running onto the Cedar Creek bridge and five cars were wrecked by collision with the steel girders of the bridge. The wreckage immediately took fire.

BANKING MEN ARRESTED.

President and Cashier of a Suspended Indiana Concern Taken Into Custody.

Elkhart, Ind.—Deputy United States Marshal Boyd arrested President Broderick and Cashier Collins, of the suspended Indiana National Bank, of this city, on the charge of violating the national banking laws.

The deposits when the bank failed were almost $600,000, with hardly anything on hand as assets.

BANDITS TERRORIZE TOWN

Burglars Use Dynamite at Pavonia, and Secure Money.

More Than a Hundred Shots Fired in the Attack by Police, But Bandits Finally Get Away.

Camden, N. J.—Professional cracksmen, who are supposed to be the same men who blew up the safe in the Clarksborough Postoffice, wrecked the safe in the office of the Pennsylvania Railroad at Pavonia, a suburb of Camden. The burglars opened fire on the operator in the signal tower and he narrowly escaped with his life.

Ralph Hines, the night operator in the signal tower, which is directly opposite the railroad station, saw a man standing on the platform of the station. The man's face was partly covered with a handkerchief and the operator's suspicions were at once aroused. He called to the stranger and asked him what he was doing there, and the man made no reply. Hines then asked him why he had his face covered, and the stranger shouted back that he had a toothache.

At the same instant there was a tremendous explosion inside the railroad station, and the man on the platform drew a revolver and opened fire on the operator. The latter was disarmed and was compelled to seek refuge inside the tower from the fusillade of shots directed at him. Looking from the window of the tower he saw two men carry off the booty they had secured from the safe, while the third man, with the revolver, brought up the rear. All of the men were masked.

Hines had managed to send a telegraph message to this city for help. The police immediately responded, arriving on the scene just as the robbers were holding up a freight train. The robbers compelled the engineer to cut loose from the train, and then steam away with his engine. The police opened fire on the robbers, which they returned. This running fusillade was kept up for a mile, but the robbers eventually escaped into the swamp.

Before blowing open the safe in the station the robbers held up Night Watchman Oscar Till at the point of a revolver and took his watch and what little money he had. Then they cut the telephone wires, thinking they were the telegraph wires. The station building was badly damaged by the [illegible]sion. The safe, which was co[illegible] destroyed, contained a few [illegible] dollars.

Another gang blew open the [illegible] the Pennsylvania Railroad st[illegible] Marlton, nine miles further [illegible] road. They got away with t[illegible] tents of the safe. The robbery [illegible] discovered until the station wa[illegible] in the morning.

HELD UP PRISON CHE[illegible]

[illegible]

[illegible]ernor Beckham, charges [illegible] Coulter with holding up check[illegible] Frankfort Chair Company ag[illegible] $53,000 in payment for convict[illegible]

The checks are dated at th[illegible] each month from February to [illegible]clusive. The Auditor turned [illegible] other revenues from the prison [illegible] as presented, but laid aside [illegible] checks which, he says, he still h[illegible] says the company notified [illegible] they had no money in banks to pay [illegible] checks.

The Inspector notified the bo[illegible] of Martin, the manager of th[illegible] pany. The Prison Commissioners [illegible] quire a settlement for prison l[illegible] the end of each month.

DROWNED AFTER A R[illegible]

Men Taken From Floating [illegible] Ice Meet Death.

Middleboro, Mass. — After being blown more than half a mile over the surface of Lake Assawampsett on a piece of ice which had broken away from the shore while the men were standing upon it, Harry Haskins and Frank Allen were rescued from their precarious position by S. A. Lewis, who rowed out to them, only to lose their lives by drowning when the boat was swamped by a squall.

Lewis managed to grasp one of the gunwales and hold on until rescued, but the others, weighted down by their heavy clothing and benumbed by cold, sank and did not reappear.

TO JAIL FOR POSTAL FRAUDS.

McGregor and Upton Get Two Years and a Fine of $1000 Each.

Baltimore, Md.—Thomas W. McGregor and C. Ellsworth Upton, the clerks in the rural free delivery division of the Postoffice Department who were convicted in the United States District Court of conspiracy to defraud the Government on a postal contract, were sentenced by Judge Thomas J. Morris to serve two years in the Maryland Penitentiary and to pay a fine of $1000 each.

The men were found guilty after a trial which lasted six days. Motion for a new trial came up for argument, but Judge Morris refused it.

Storm Kills Two in Ohio Town.

Two persons were killed and several seriously injured during a severe wind, rain and hail storm at Akron, Ohio. In less than half an hour nearly every trolley, telephone and light wire was down, leaving the city in total darkness. The streets were piled high with debris.

Mine Owner Acquitted of Murder.

Ben C. Aylor, the Webb City mine owner, who shot and killed Gordon Allen, a wealthy Joplin man, two months ago, was acquitted by a jury in the Circuit Court at Carthage, Mo. Aylor's plea was self defense.

A Better Feeling.

Bradstreet's Review says: "Better feeling—approaching optimism in some lines—is due to improvement in retail trade, stimulated by cold weather, the advent of the holiday season and the more normal tone of public sentiment."

Uncle Sam's Mails

They Can Follow a Traveler All the Way Around the World

By George Ethelbert Walsh

THE United States mails are carried everywhere. It would be almost a physical impossibility for a man to hide himself in any remote corner of the world without being discovered at last by some insignificant agent of a world-wide service, the machinery of which operates quietly and with clock-like regularity. If a bird's-eye view of the different railroad and steamship lines which carry the mails could be taken, the giant spider's web thus formed would appear woven in a pattern so intricate that the mind would balk at the mere suggestion of unraveling it. And besides the regular steamship and railroad threads of this maze would appear tens of thousands of cross-lines, representing pony routes, dog-sled tracks, swift courier and runner "trails," and even reindeer, whaling ship and canoe lines. Every sort of vehicle and beast of burden, and nearly every contrivance of man for quick transportation, have been pressed into the postal service, and it is possible for a letter to go around the world under conditions so strange that the mere history of its journey would form a story of thrilling interest.

If a man should start from New York and travel northward to Alaska, then down the coast to California and take ship to Manila, and follow the lines of travel to Hong Kong, to Singapore, to Canton, to Tokio, to Vladivostok, to St. Petersburg, to Vienna, to London, to South Africa, and finally to South America, touching on the way at several Pacific and South Atlantic islands, and thence back to his starting point, he could travel a distance several times greater than the circumference of the globe. If he ordered his mail forwarded to him, and left correct addresses at each place, the letters would dutifully follow him, and be delivered to him in New York a few days after his own arrival there. All that he would have to pay extra for this remarkable journey of his mail would be a dollar or two in tolls, which would represent the charges for forwarding exacted by some of the countries through which it passed. There is in the Postoffice Department at Washington the envelope of a letter which traveled in this way 150,000 miles, and another which came safely through a trip of 125,000 miles. Both are marked and stamped in a way to baffle any except a very expert decipherer of puzzles.—St. Nicholas.

Farming as a Business

Farmers Should So Regard It, and Demand the Respect Their Calling Merits

By E. J. Waterstripe

WE often hear men say that they are going to stop farming and go into business. They do not know what they say. This expression is very common, and can be heard every day. Why is farming not a business, and why should it not be classed as such? I go further and say that farming should be classed as a profession, and one of the highest and most honorable in the professional line.

Some time ago I told some of my friends and neighbors that I was going to an agricultural college, and you know what followed. You know how I was laughed at and how they ridiculed the idea. But I was not discouraged at this; for all good things have been strongly talked against. If I can leave, I will take a short course this winter. I would like to know more of my business. This country needs farmers who are more highly educated and prepared for the work.

Farming as a *business* is the highest occupation that a man can fill, and every farmer should think so. He should know that farming is the most independent of all trades. The farmer feeds the whole population of the globe, and so all are depending upon him for food; and if agriculture supplies food for all the vast number of people in the large cities, is it not worthy of being called a business?

Many times the farmers themselves give their business a low name, and then the people of the city are not going to praise it when the farmers are running it down. We farmers should know that we are engaged in the most important work and business on the earth, and while we are farming we should not say, "We have no business, we are only farming." By this some might be led to believe that farming is a sort of slavery, as it is when done as many farmers manage it. When done in an up-to-date way and by the latest methods and improved machinery it is a pleasure. Why do we consider ourselves so low? Let us look a little higher and know that we have a business which is worthy of the highest honor. Above all, let us consider our work as a business. It is a business, and we should know and realize it.

A Sermon on the Sunrise

By "El Comancho"

MY peak rested on darkness and towered into the twilight of early morning. The east grew light—lighter; and then I thought there was the faintest tint of color in the sky—the color on the soft cheek of a sleeping babe. Now it was the color of a young girl's blush—now the sun-kissed side of a ripe peach—now the warm glow of a dying fire. And the world that was below had only darkness still, but it was blue—the dark heavy blue of the deep sea when I looked down from the Country of Silence. The giant peak of Mt. Rainier came out of space now, burning, blazing—a column of fire—an opal that changed before your eyes until it was molten silver and pure gold, rimmed with all the lights of precious stones. The Cascade range stood hard and black across the east—a silhouette against the blaze of the rising sun that was still below the edge of the world. Other peaks reached up into the warm light of the coming day and burned red hot against the blue sky while they floated above the purple mantle that would soon develop into a busy world. The sky blazed like a white-hot furnace now behind the curtain of the eastern range, and below me the purple mantle faded and dropped further down, until the bottom seemed miles and miles away.

Then the sun burst suddenly up from behind the rim of the east, and it was day where I sat in the Country of the Silence—warm, full day there on the highest peak in the range, and I watched the sunlight rush downward along the mountain sides until the purple curtain was melted and the sun shone in the low valleys.

That *was a sermon such as no man could preach, and it is free to all who* wish to see and hear, for it happens every clear day in the year. The place is the top of Mt. Constance in the Olympic range in Washington, and there is no fence around, no "Keep off the grass" signs, and the trail to the top begins at the little steamboat landing called Brinnon, on Hood's Canal.—*Field and Stream.*

The Revolution in Chemistry

By W. E. Garrett Fisher

THERE is nothing too great, nothing too small, for the measuring rod of modern science. On the one hand we have astronomy, which revels in magnificent distances. On the other we have the new chemistry which deals with the infinitely little and investigates the inexpressibly tiny constituents that make up ordinary matter. Lord Kelvin gave us a popular idea of the size of atoms when he said that if a single drop of rain could be magnified up to the size of the whole earth we might reasonably expect to find that the atoms which composed it would be somewhere between cricket balls and footballs in size.

The new chemistry suggests that matter and electricity are one and the same; that what we call atoms consist of systems of far tinier bodies, the ions, or electrons, which are simply charges of electricity. Sir Oliver Lodge suggests that the typical atom may be similar to a stellar system, consisting of a definite number of these electrons moving in rapid orbits just as the planets move round the sun. The simplest atom, that of hydrogen, is believed to consist of about 700 electrons in regular orbital motion, under laws closely akin to those which keep the earth in its course round the sun.

The electrons are assumed to be all exactly alike, so that an oxygen atom would consist of sixteen times as many, a gold atom of 196 times as many, and so forth. The chief fascination of this theory lies in its reduction of all matter to modifications of one original substance—probably the same as what we call electricity. If that is so, the old alchemists were right after all, and there is no reason in the nature of things why we should not one day transmute lead into gold by a suitable arrangement of its electrons.

THE FLY.

A fly,
To my eye,
Is a wonderful thing.
He buzzes about all the day on his wing—
A gossamer, flibberty, gibberty thing.
You wouldn't surmise
A thing of his size
Had strength for all of the tasks that he tries.
For instance, to-day
I was reading away
Of fairies and gnomes and the pranks that they play,
When a fly
Came by,
And then he began
On a horrible plan
Of worrying,
Flurrying,
Scurrying in,
And flicking the ends of my nose and my chin,
Until I'd
Like to died
With wrath and chagrin.
Now I'm a big thing—
The fly he was small.
He'd flop and he'd fling,
He'd buzz and he'd sing,
While I would do nothing at all
But whack at that fly
Each time he came by,
Deep wrath in my eye;
I never could hit him however I'd try.
I whacked for two hours
With all of my powers,
And when it was done
I sat weary
And teary—
While he was as fresh as when he had begun.

—John Kendrick Bangs, in St. Nicholas.

THE ORIGIN OF PUMPKIN PIE.

Once upon a time—a long while ago, children—there lived a wise old man who was always trying to see what he could discover.

Having made several perpetual motion machines and one or two airships, he was walking through the fields to avoid his creditors, when he came upon a pumpkin.

"This," he said to himself, bending down and feeling of the yellow orb, "is a vegetable growth; but I firmly believe that it acquires its hue from small particles of gold which it extracts from the earth."

So he took the pumpkin on his shoulder and took it home, telling all anxious inquirers that he was going to discover how to extract gold from it.

At home, in spite of all his wife said, he cut the pumpkin up and put it in a pot and boiled it—only he argued that he was melting it.

When at last it was a pulpy mass he poured it out of the pot and right on top of a pan of dough that his wife had rolled out for the purpose of making a dried apple pie.

Now, you know the kind of wife he had, do you not? A woman who will feed her husband on dried apple pie deserves to be married to two or three inventors, doesn't she?

And so he put the pumpkin and the dough into the oven, asserting that he would harden it with the heat and produce a solid sheet of gold, and be so rich that he could run for office.

But, bless you! when the pumpkin and the dough came out of the oven it was not a solid sheet of gold at all, but a rich, golden, tantalizing section of goodness.

And the poor inventor was hungry, so he bit into it.

A few moments later several of his creditors broke into the house and came upon him, saying: "Look here! Where is all that gold you were going to get for us?"

"And he never even looked up at them, but kept right on eating, saying: "Who cares for gold? Men, I have discovered pumpkin pie."

And the creditors sat down also and ate, and they, too, were happy ever after.

So, now, when you eat pumpkin pie, you should be glad that the poor inventor did not succeed in making gold of the pumpkin. For if he had the pumpkin might never have gone further than to fill your teeth.—Judge.

THE MYSTERIOUS TUMBLERS.

Here is a very pretty experiment illustrating the principle of air pressure, which may be tried by a boy or girl, and which may be made quite entertaining at a gathering of little ones. It will interest even the older folks if *any are present.*

Take two tumblers of the same size. Be careful that they fit closely when

one is placed on top of the other. Light a piece of wax candle and place it within the tumblers on the table. Place on top of it a piece of rather thick paper saturated with water. Then place upon it the other tumbler, as in illustration. The tumblers will then be found to adhere closely. The candle will be extinguished, but while burning it has dilated the air contained in the lower tumbler, and the air has therefore become rarified. The exterior pressure of the atmosphere will fix the tumblers as closely together as the classical Madgeburg hemispheres are united. It is possible to raise the undermost tumbler by picking up the upper one. The paper may be scorched on the under side, but the success of the experiment is not thereby imperilled.

COMIC PUZZLE PICTURE.

Find the farmer and his dog, who are chasing the apple thieves.
—From the Brooklyn Eagle.

BANK OF ENGLAND'S MUSEUM.

The Bank of England has a curious museum in which the principal exhibits are its own notes.

Among them is a note for a penny, which was issued by mistake and brought back to the bank for $25. Another is a note for a million pounds.

A third is a banknote, which was found inside a codfish caught off the Newfoundland Banks, and a fourth is a note which was in circulation for over a century and a half before it was presented for payment.

There are many forged notes in the museum, their value aggregating many millions of dollars, and there are also some notes which were recovered by divers from the sunken wreck of the British warship Eurydice.

THIS HEN WAS FAITHFUL.

A hen owned by John J. O'Brien, a liveryman, of Norfolk, Conn., passed through fire, smoke and water to hatch a brood of chickens. O'Brien's stable was on fire, with the hen "setting" in a barrel inside the building.

The upper part of the structure was soon a mass of flames, but "Biddy" refused to move. The top of the barrel next took fire, and burned half way down, but the faithful hen stuck to the nest. A stream of water accidentally hit the blazing barrel, extinguishing the flames in it and deluged the hen, but she held her post. In the morning eight "peeps" came forth, and then she left the barrel.

Russia takes nearly half the agricultural machinery that the United States exports.

A WONDERFUL LIGHT.

The Largest Beacon in the World Installed on the German Ocean.

A first-flashing beacon light that can be seen in favorable weather for more than forty miles has just been installed by the German Government upon the island of Helgoland, in the German Ocean. It is the most wonderful in the world.

The light used equals 30,000,000 candle-power. The light lasts one-fifth of a second and repeats itself in five seconds. It illumines the entire horizon in that period. At forty miles' distance the pencil of light flashes over the sea at the rate of 180,000 miles an hour.

The German parabolic mirror reflector is used.

About the middle of the nineties says Ueber Land und Meer, German experts were sent to France by the German Imperial Government to study flashlights. They were convinced that by means of two or more reflectors erected upon a reflector with Schuckert's glass parabolic mirror, results equal to those of France could be produced.

Experiments were made in Nuremberg. The revolving reflector of the German apparatus was found equal to the Frenchman's revolving light. As soon as the experts had demonstrated their point, work was begun on a light-reflector equal to the largest ever used.

In normal weather the light may be seen twenty-three sea miles (twenty-three leagues). When the weather is favorable the beams go far beyond the central fires or light rays. *On the first* night that the new light was used its peculiar, flashing beams were seen by people standing on the mole at Busum—a distance of sixty-five kilometres, or a trifle over forty miles.

The watchers in the light-house at Amrum, about the same distance, were able in unfavorable weather to see the same beams as they rapidly appeared and disappeared. It was noted that the otherwise bluish-white light of the electric arc appeared red.

WISE WORDS.

The way of the world, Cordelia, is around the sun.

Of all games of chance matrimony is the most hazardous.

Old age either brings experience or is brought by it.

Some people seem to enjoy making fools of themselves.

Too many cooks spoil the policeman's digestive apparatus.

A girl isn't necessarily timid because she jumps at a proposal.

The trials and temptations of life are the tests of character.

Pride often lifts a man up by the handle attached to his name.

It is impossible for a woman to preserve a secret so it will keep.

Wisdom is the name by which some men apply to their self-conceit.

It keeps a lot of people moving to get enough money to pay rent.

Women are more forgiving than men because men need more forgiving.

The dark ages are those pertaining to women of unquestionable years.

His Satanic Majesty takes off his hat every time he meets a hypocrite.

Successful political orators say things that sound well and mean nothing.

Great names debase instead of raising those who know not how to use them.—Rochefoucauld.

The size of a man's mental capacity can usually be told by the size of the stripes in his clothes.

Character, like marble, must be chiseled and polished into beauty by the hand of the sculptor.

It is a good hostess who never inclines her guests unconsciously to look at the clock.—"The Damsel and the Sage."

Very few of us will have the chance of heroic self-devotion; but every day brings the petty, wearing sacrifice which weighs full weight in God's scales.—Samuel Osgood.

Grain Elevators.

The American elevator systems, whereby the product of the wheat fields is cared for until required by the world for grinding, are elaborate and cover every section in which wheat is grown. Terminal elevators of enormous capacity are situated in the great centres of distribution and points of export. These elevators are of distinctively American construction, economical in cost, yet models for effectiveness and utility.

They mark a complete departure from European methods of elevator building, and are the result of practical experience in the handling and storage of wheat. The wooden structures once used for this purpose are being rapidly replaced by elevators of steel, concrete or tile, which being fireproof accomplish a large saving in insurance.—From Story of a Grain of Wheat.

Men For the Submarines.

One of the questions which has come up in connection with submarines and submarine weapons is the effect this type of armament will have on the enlisted force. It is reckoned that with every additional hazardous factor in naval life there must be an increased demand for the personally courageous, adventurous or reckless, according to the degree of risk imposed. It is likely that officers and men for submarines must be obtained from volunteers. It is not the risks incurred, they say, so much as the humdrum element of life on board ship which makes it difficult to obtain and more difficult to keep men in the service. The desertions have increased recently, but it is by no means certain that this creditable statistical record will be maintained.

North Plainfield Weekly Review.

Founded March 24, 1900.

An Independent Republican Newspaper published every Saturday at 33 Somerset Street, North Plainfield, N. J.

HARRY H. WEBB, Editor and Proprietor.

TERMS OF SUBSCRIPTION:

If paid in advance $1 per year; if not paid in advance $1.25 per year. The REVIEW is delivered by carrier in Plainfield and North Plainfield, and is on sale at news stands

Long distance and local telephone : : : 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, DECEMBER 19, 1903.

TO ADVERTISERS.

Frequent changes of advertisements is one of the main requisites for a successful result; we therefore urge our advertisers to change their ads at least once a month. Try and get such changes to us as early in the week as possible; never later than Thursday noon.

The REVIEW is on sale at the Union News Stand, east bound railroad station, and at E. M. Laing's, 149 W. Front St.

MORE INTIMIDATION.

The action of the North Plainfield Council at the special meeting held Wednesday evening, in passing a resolution to take the best portion of the new engine house for council chambers, and then because the firemen objected to such high-handed proceedings, decide to get rid of them and substitute a paid department, is nothing but petty spite which is too transparent to be misconstrued.

The question of whether the borough council shall go back on their expressed purpose to occupy the old Warren engine house and demand the best portion of the new house has nothing whatever to do with a paid department, and the object in combining the two questions is plain enough.

The Mayor is quoted as having said that the action of the firemen in protesting against the taking of their house was absurd and ungrateful, as it would be a saving to the tax payers to use the new house for the council meetings.

We would like to ask where the economy is displayed in altering the plans of the new fire house now that it is almost completed, and substituting a paid department which would probably cost ten times as much as the present volunteer department?

The new firehouse was intended for our volunteer firemen. It is due to their efforts that it was built. Had it been supposed for an instant that it was the intention to do away with the present department the new house would not have been built.

A question arises in this connection whether the public money which was appropriated for the specific purpose of building a fire house for a volunteer department, and then before the building is completed, diverted to an entirely different use, would not render the whole proceedings illegal, if not unconstitutional. This phase of the matter should receive more than passing consideration.

Admitting, however, that the council may have the right to use the new engine house as proposed, yet so long as it was understood and agreed that the new building was to be used by the volunteer firemen and that the council was to occupy the rooms over the old engine house at present occupied by the firemen, it was perfectly right and proper for the firemen to protest against the council taking the best part of the new building for their meeting place and relegating the firemen to a room very little if any larger than their present quarters. A committee from the Mayor and Council made an appointment with the firemen and requested an opinion from them as to their feeling about giving up part of the new building. The unanimous opinion of the firemen was that they did not wish to do it. But realizing that it would be done in any event, 9 voted to allow the council to come, while 16 voted against it. And because the firemen had the manhood to stand up for their rights and voice their honest opinion, which they were asked to do by the Mayor and Council, the same Mayor declares their action absurd and scores them severely and threatens to discharge every one of them.

The protest of the firemem to such outrageous and unfair treatment was gentlemanly and properly within their rights. It acknowledged the power of the council to use the building if they wished, but at the same time protested against it. In other words, the firemen said, "Come if you must—you have the power—but we don't want you. If you do come, however, we will acknowledge ourselves whipped, but will accept our defeat with good grace and and treat you rightly."

Things have come to a pretty pass here in North Plainfield if a trustee cannot protect property for which he is held responsible without being thrust into jail; or if our fire laddies are to be kicked out of a house which was built expressly for them because they protested against allowing others to usurp them in occupying the same. And yet just these things have occurred within a few weeks of each other. The Goodwin case is still fresh in our minds. Goodwin, in the endeavor to protect his own, was arrested by the Mayor and Council and thrust into jail. The firemen, representative men of our borough, including lawyers, doctors, merchants, mechanics—men from all trades and professions, are bound together with the lofty object of preserving their own and their neighbor's property from destruction by fire. The organization is also a social club and members point with satisfaction and pride to the many pleasant occasions which they have enjoyed in visiting other departments near by and in entertaining them here. The old quarters being too cramped and not suitable for the needs of our fast-growing borough, it was decided to ask for a larger and up-to-date fire house. A committee was appointed and the men worked with might and main and after many difficulties, which were successfully overcome, an election was held and it was decided that a new building should be built purposely for them—a building that should remain a monument for the men who had so freely and bravely for the past fifteen years protected the lives and property of our citizens, and at the same time add to the facilities for still further protecting the borough.

One of the strongest arguments used by the firemen in obtaining signatures to the petition calling for the election was that the new building would actually save the taxpayers money, as the upper part of the old engine house would be used as council chambers, thereby saving $300 per year rental which the present chambers cost the borough. This would offset the interest on the bonds issued in payment of the new house. In addition, the lower story of the old engine house would be used as an office for the Borough Collector and the rear portion for other needs, thus saving another large item of expense. Such arguments as the foregoing induced many tax payers to sign the petition calling for an election, and most of the voters voted for the building with this understanding. After the election was held, plans were drawn for the new house and were accepted by the Mayor and Council. Everything was arranged for the building to be used exclusively by the firemen. Wires were arranged, pipes put in position, bath and battery rooms planned, sliding poles arranged for—in fact the plans and work to date contemplated that the volunteer firemen should have exclusive use of the new house. And the firemen watched the building grow as a young married couple watches the mechanics erect their first home. Friends were taken to the new fire house and shown this point and that point. A grand housewarming was planned for and committees appointed. Then, at the twelfth hour, when the house is enclosed and almost completed, the Mayor and Council discover that they want the best portion of the new house for their own use! Naturally the firemen object. Who wouldn't? The Mayor and Council seem to forget all about the old engine house, and try to show how the borough will save money by changing the plans of the new house, discharging the volunteer men and substituting a paid department!

ANNEXATION "ARGUMENT."

WE had hoped this week to be able to present to our readers the official cost of the public roads of Somerset County, and, the proportion North Plainfield has paid toward building the same, but the report has been delayed in reaching us, hence we will be obliged to still further delay publishing the details in full.

The commissioner's report for 1902 furnishes some facts which may be interesting to our readers and will help bridge over the delay while waiting for the report for 1903.

In 1895 the State Aid Law was passed, which law provides that the state shall pay two-fifths and the county three-fifths of all county macadam roads built. Since the passage of that law Union County has built only 5.57 miles of road, while Somerset county has built 40.51 miles. The report also shows that Somerset county has paid for every mile of road built, while Union county has not.

Union county has a few more miles of road than Somerset, but such roads were built prior to the enactment of the State Aid Law, and, according to statistics, Union county issued bonds in payment of such roads, which bonds, of course will have to be paid some day. Not only this, but Union county had to pay (or will pay some day) the full cost of the roads, an average of about $5000 per mile while Somerset pays only $3000 per mile.

The county engineer's report shows that it is costing Union county $17,000 per annum to keep her roads in repair.

The figures given above are official and therefore cannot be gainsaid.

We hope next week to be able to refute a statement made in a Plainfield newspaper recently whereby it claimed the borough of North Plainfield had paid nearly one half of the cost of all roads built in Somerset county, and used that argument as a reason why this borough should come over into Union county and become a part of Plainfield.

THE Republican National Committee met in Washington last week and decided to hold the National Convention in Chicago, June 21st. The sentiment favored President Roosevelt as the candidate, and he will doubtless be nominated unanimously. The candidate for Vice President will probably be taken from one of the Western States.

A PAID fire department for the borough is doomed! Sixteen firemen and one councilman voted against it. Our readers will recall how 16 and 1 killed the annexation boom, as the REVIEW said it would, and here the prophetic figures bob up again!

A Knockout.

A young lawyer was engaged in a case not long ago when a witness was put in the box to testify to the reputation of the place in question.

This witness, a stage driver, in answer to a query as to the reputation of the place, replied, "A poor shop."

The lawyer inquired, "You say it has the reputation of being a 'poor shop?'"

"Yes, sir."

"Whom did you hear say it was a 'poor shop?'"

The witness did not recollect any one he had heard say so, says the Portsmouth Times.

"What!" said the lawyer. "You have sworn this place has the reputation of being a 'poor shop' and yet cannot tell of any one you have ever heard say so?"

The witness was staggered for a moment at the words of the lawyer. The lawyer was feeling triumphant when the witness gathered himself together and quietly remarked, addressing the lawyer:

"Well, you have the reputation of being a poor lawyer, but I have never heard any one say so."

COULD NOT KICK.

Father Advised Young Man to Elope and He Did.

The proprietor of one of the principal firms in Birmingham had remarked that his head clerk, for whom he had a real liking, had for some reason fallen into a melancholy state, and though he tried his best, he could not find out what was the matter with the young man. One day at last the sufferer owned that he was in love.

"Well, marry her," said the chief.

"Oh, but"—here the young man nearly broke down—"she belongs to one of the best families in the town—the parents will never consent."

"Pooh. Your position is good, your name honorable they won't refuse. I will demand the girl for you. Does she love you?"

"Yes, but its no use, her parents won't listen."

"Well, then, elope with her. Do I know the girl?"

"Yes, she will be at your ball next Tuesday."

"Now, listen to me," said the employer. "Leave the ball quietly with her. Joseph, my coachman, will wait for you at the door and drive you to the station. He will ask you no questions. When you are out of the way I will see the father and settle everything for you."

"Is that really your advice?" gleefully exclaimed the youth. "Do you want me to do it"

"Yes. I command you to do it. Now cheer up."

The next day the clerk proposed the plan to his sweetheart, who made some objections at first, but, overcome by his reasons, she said at last:

"Well, if he really means it I must obey."

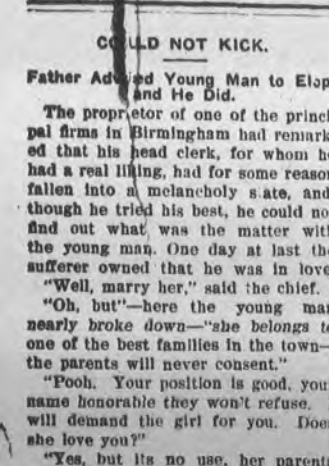
What was the general stupefaction when after the ball, the daughter was missing?

"Mad fool that I was," exclaimed the enraged parent; "it was my own daughter!"

The next day he wrote: "Come back; all will be forgiven."—Birmingham Age-Herald.

Always Useful.

Lady—No! I say. We never eat breakfast foods.



Agent—But, ma'am, tuis also makes excellent stuffin' for pincushions.—New York Journal.

Odds.

Alicia was positive.

"I'll bet you that I'm right," she concluded, tossing her head.

"What will you be?" we inquired, looking facetiously at Alicia's pocketbook. We have never yet seen Alicia without a large pocketbook in her chatelaine bag, and we have never yet seen more than four pennies in that pocketbook either. "What will you be?" we repeated.

Alicia blushed furiously.

"I'll bet you a kiss," she mummured, regarding us demurely from the corner of her eyes.

And right here we played foxy.

"But you are entitled to odds," we objected, in a matter-of-fact tone. "That's a 100 to 1 shot, if ever there was one."

Of course Alicia doesn't want us to take advantage of her, and so she took us upon that basis. We often smile gently when we think how hard we tried to lose that interesting little wager and what a glorious time we had when Alicia cashed in her bet.

Her Little Joke.

They were in the studio. Artists' trappery and bohemian paraphernalia were placed about the room with studied carelessness.

Heavy tapestries and portieres choked the walls. Costly statuary, mediaeval firearms, poniards, yataghans and priceless and historic armor were ranged idly about the room.

Seated on a heavily upholstered divan, eying the American heiress at work on an intricate landscape, was the Duke.

"Bah Jove," he ejaculated suddenly, "do you know, Miss Millyins, I'm wrapped up in you and—"

"Huh!" interrupted the wealthy maiden with Yankee sarcasm "I don't see why you should be wrapped up; I haven't bought you yet."

The Duke sat dumfounded, wondering what there was in her remark to cause a smile to break out over her sweet visage.

Value of Coins.

There seems to be a great deal of misapprehension in regard to the value of certain coins here in America. The Columbian half dollar of 1902, which is the rarest of the two Columbia half-dollars struck, is worth to dealers only fifty-five cents. Occasionally dealers ask as high as seventy-five cents for them, but they will not pay that much. The half-dollar of 1820, if in what is called the "mint state," would perhaps be worth as much as $1, not more. If the coin is much worn by circulation the value would be less.—Woman's Home Companion.

Somerset County Orphan's Court
Administrator's Sale.

In the matter of the insolvent Estate of Francis S. Runyon, deceased. | Order for sale of land

By virtue of an order entered in the above stated matter on the twentieth day of November A. D. 1903, I shall sell at public vendue on the premises hereinafter described known as No. 51 Grove Street, in the Borough of North Plainfield, Somerset County, New Jersey, on Monday the twenty eighth day of December A. D. 1903, at 2 o'clock in the afternoon, all the following described land and premises, with the appurtenances, being the same described in said order, that is to say: All that certain tract or parcel of land and premises, hereinafter particularly described, situate lying and being in the North Ward of North Plainfield in the County of Somerset and State of New Jersey. Being Known and designated as Lot No. 1, on the Map of W. H. McMahon's Land, made by N. Vars, Surveyor.

Beginning at a point at the intersection of the east side of Grove Street and Linden Avenue hence running a South Westerly course along the middle of Linden Avenue One Hundred fifty-five (155) feet to a stake and corner of Lot No 14; thence running in a northwesterly course along the line of lot No. 14, seventy-five (75) feet to a stake and corner of Lot No. 2, sold to Peter Ansel; thence running in a northeasterly course along the line of lot No. 2, one hundred and fifty-five (155) feet to a point in the middle of Grove street; thence running along the middle of Grove Street in a southeasterly course seventy-five (75) feet to the place of beginning.

Subject to the restrictions recited in a certain agreement made between John Tappen and others, dated May 12th, 1868 recorded in Book X No. 3 of Deeds for Somerset County, on page 383 &c., respecting nuisances. Being the same premises conveyed to said Francis S. Runyon, by deed of Mary E. Loomis, dated July 16th, 1901, recorded in Book Z. No. 9 of Deeds for said County of Somerset, on page 384 &c;

Dated November 23rd, 1903

NELSON RUNYON, Administrator &c,
of FRANCIS S. RUNYON, deceased

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who call on him at his residence, which is in the village of Williamsburgh, Orange County, New York, he will cheerfully give the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address,

Piles permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free. Dr. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa.

Siberian railway trains, under new schedule, cover the distance from Moscow to Port Arthur, 5388 miles, in thirteen days, the fare, including sleeper, being $134. The globe trotter can have a special train of three cars for $1.03 a mile.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address F. J. CHENEY & Co., Toledo, O.

Sold by Druggists, 75c.

Hall's Family Pills are the best.

The Pennsylvania terminal to be erected in Manhattan will be the biggest railroad station in the world, with accommodations for handling 200,000 passengers a day, or about 70,000,000 or 80,000,000 a year.

Mrs Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c. a bottle

The population of Detroit is thirty-one per cent. German, while that of Boston is but five.

Any one can dye with PUTNAM FADELESS DYES; no experience required.

Piso's Cure for Consumption is an infallible medicine for coughs and colds.—N. W. SAMUEL, Ocean Grove, N. J., Feb. 17, 1900.

The manufacture of high power incandescent oil lights is making progress at Coventry, England.

Points on Panama.

Panama has an area of 31,571 square miles—nearly the size of the State of Maine.

Its population is 285,000, almost the same as that of the District of Columbia.

Its commerce, including both imports and exports, amounts to about $3,000,000 a year. This is about $11 for each inhabitant. The rest of Colombia has a foreign trade of less than $1 a head.

Colon and Panama, its principal ports, have mixed populations of 3000 and 25,000 respectively.

The United States leads all nations in the amount of its trade with Panama.

A weekly steamer connects Panama with San Francisco.

Cable lines connect both Colon and Panama with the United States.

Between Panama and Colon two passenger trains run daily; distance forty-seven miles, time three hours.

Silver is standard Panama money.

Names For the Left-Handed.

In London the term for a left-handed person is kack-handed, the word being an equivalent to awkward; in Lancashire it is k-pawed; in Yorkshire, gallock, or gawk-handed, an expression dating back to at least the seventeenth century. In Derbyshire are used the terms keg-handed, cork-handed or corky-handed, while in the Teesdale district cuddy-handed is common, and in Nottingham cochy-handed. In Dorset it is scrame-handed, and in Devonshire coochy-handed. In Scotland we find gawk-handed and in the west cawry-handed. In Ireland a left-handed man is called a kithogue. Not many years ago Mr. Tim Healy used this work in a speech at East Wicklow, in which he said that Mr. O'Kelly could fight with his left hand, and had already given his opponent some "kithogues" that would spoil his political beauty during the contest.—London Chronicle.

Miss Whittaker, a prominent club woman of Savannah, Ga., tells how she was entirely cured of ovarian troubles by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—I heartily recommend **Lydia E. Pinkham's Vegetable Compound** as a Uterine Tonic and Regulator. I suffered for four years with irregularities and Uterine troubles. No one but those who have experienced this dreadful agony can form any idea of the physical and mental misery those endure who are thus afflicted. Your **Vegetable Compound** cured me within three months. I was fully restored to health and strength, and now my periods are regular and painless. What a blessing it is to be able to obtain such a remedy when so many doctors fail to help you. **Lydia E. Pinkham's Vegetable Compound** is better than any doctor or medicine I ever had. Very truly yours, MISS EASY WHITTAKER, 604 39th St., W. Savannah, Ga."

No physician in the world has had such a training or such an amount of information at hand to assist in the treatment of all kinds of female ills as Mrs. Pinkham. In her office at Lynn, Mass., she is able to do more for the ailing women of America than the family physician. Any woman, therefore, is responsible for her own trouble who will not take the pains to write to Mrs. Pinkham for advice. Her address is Lynn, Mass., and her advice is free.

A letter from another woman showing what was accomplished in her case by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM: I am so grateful to you for the help **Lydia E. Pinkham's Vegetable Compound** has given me that I deem it but a small return to write you an expression of my experience.

"Many years suffering with weakness, inflammation, and a broken down system, made me more anxious to die than live, but **Lydia E. Pinkham's Vegetable Compound** soon restored my lost strength. Taking the medicine only two weeks produced a radical change, and two months restored me to perfect health. I am now a changed woman, and my friends wonder at the change, it is so marvellous. Sincerely yours, MISS MATTIE HENRY, 429 Green St., Danville, Va."

The testimonials which we are constantly publishing from grateful women prove beyond a doubt the power of Lydia E. Pinkham's Vegetable Compound to conquer female diseases.

$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness. Lydia E. Pinkham Med. Co., Lynn, Mass.

HANDLING NEW YORK'S IMMENSE IMPORTS OF TEAS

EVER since our doughty forefathers tumbled King George's chests of East India tea into Boston Harbor—and thereby started a revolution—the American people have been very partial to the aromatic beverage. It has been estimated that this year nearly 100,000,000 pounds of the eastern leaf will be brewed in various parts of our land.

WEIGHING AND SAMPLING TEAS FOR GOVERNMENT INSPECTION.

The shy Mongolian was wont, in times gone by, to send us all sorts of dried things for tea—dried leaves of any old plant, with plenty of bluestone or soapstone sprinkled on to give color, and a few decayed tea leaves thrown in for conscience sake—until Congress took a hand in the matter in 1897 and directed the Secretary of the Treasury to appoint a board of tea experts, to consist of eight men learned in tea growth, who were to determine standards of quality.

Last year there were thirteen standards decided on. These, of course, were of as low a grade of tea as they thought should be imported into this country. Any tea which the inspector deems below the standard is rejected. The importer—or would-be importer—is ordered to remove the stuff from "the land of the free." If he fails to do so in six months it is destroyed—history thereby repeating itself.

In the office of the tea inspector—where the kettle is always chirruping cheerily—in the assessors' storehouse, Washington and Christopher streets, high on a shelf, sit the stern tea tribunal—thirteen austere judges, clad in judicial robes of tin.

The taster selects three samples, which have come in for examination, and takes them to a big round table with a revolving top. Beside each sample he places a standard—Oolong beside Oolong, Ceylon by Ceylon, Japanese by Japanese, and so on. Before each sample and each standard he puts a handleless cup—the kind they give us to drink from in Chinatown—and into each he places exactly the weight of a half dime of tea. The table is revolved around, and an attendant pours in boiling water. When tea is boiled it draws out the tannin, so the taster is careful only to steep it. After four minutes he begins the examination. The dregs are lifted up on a long spoon and smelled. That is generally sufficient to the sensitive olfactory nerves of the experienced inspector. If he is not satisfied with this, however, he takes a thoughtful sip, holds it in his mouth for a few moments, and spits it out. "Why, if we should swallow all the tea we taste in a day," one of them said, "it would kill us."—New York Commercial Advertiser.

The Brute.

At a recent divorce trial in Topeka, Kansas, brought by the wife, the husband introduced seven doctors, who swore that, although the wife had long pretended to be sick, there was nothing the matter with her. The husband swore that he had spent $18,000 in doctor bills. The jurymen gave the wife everything the husband had; they said he was brutal.—Atchison Globe.

Japanese Laws.

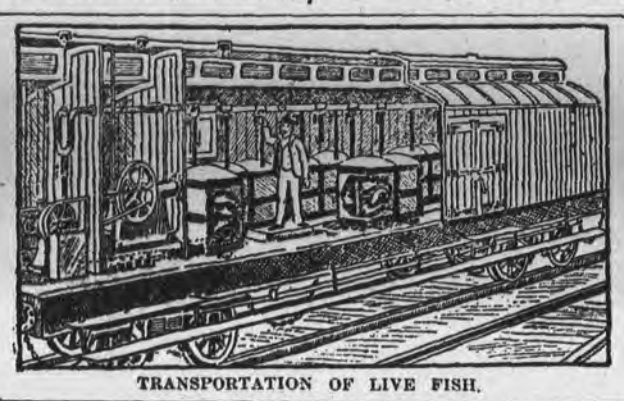
During the twelve last sessions of the Imperial Diet altogether 500 new laws, 3500 new regulations and 2000 minor decisions were passed and signed by the Mikado.

SHIPPING LIVE FISH

Getting Sea Food to the Residents of the Inland Cities.

There was recently reference made in these columns to the proposition which has been lately agitated, looking to the furnishing of fish from the Pacific Ocean to the residents of the cities of the Atlantic Coast. The originator of this subject claimed that it was entirely feasible to take the fish from the waters of the Pacific, and while they were yet alive freeze them in blocks of ice, and in this form ship them across the continent. On their arrival at the Eastern markets the fish were to be thawed out, whereupon they would be restored to their former activity and would be sold alive. The success of this plan is said to be wholly dependent on the manner of the freezing and the subsequent thawing out operations which, if performed properly, would not do the fish the slightest injury.

The subject has the greatest interest especially to the residents of the inland cities, who in this, or some similar manner, would be enabled to enjoy the luxury of fresh fish, whereas at present they are limited to the canned varieties.



TRANSPORTATION OF LIVE FISH.

This problem has been successfully met by a Berlin merchant, Herr Krantz, who has designed and is operating a car by which he is enabled to place before his customers live fish from the Mediterranean. This is described as follows in a recent issue of the French publication, La Nature.

UNLOADING A CARGO OF TEA.

The principle of this arrangement consists in placing the water tanks containing the fish along the sides of the car and connecting them together by means of rubber pipes. These latter are in turn connected with a suction pipe ending at a pump which, by means of a force pipe, sends the water into the various tanks through nozzles. In this way there is obtained a continuous renewal of the water of the tanks, with an aeration of the latter through its contact with the external air.

The accompanying figure shows the internal arrangement of the car, the jacketed wooden body of which, forty-one feet in length, nine feet in width and 9.34 in height, is supported by an iron frame 42.6 feet in length and nine feet in width. This body is divided into three compartments, one containing the tanks, another the engine for driving the pumps, and the third the pump itself.

The tanks, twenty-four in number, are placed in two rows of twelve each along the sides of the car, and separated by a longitudinal passageway. Each of the tanks is connected, by means of a small pipe, with a conduit placed on a level with the floor and divided into two parts connected in front and ending through one pipe in common at the pump. This latter forces the water into a pipe placed at the upper part of the car above the tanks. Upon this pipe, opposite each tank, are three branches consisting of vertical tubes provided at the lower part with nozzles through which the water is introduced into the tanks at an inch or so above the level of the liquid. Each of the tanks, of a capacity of 132 gallons, is capable of holding 330 pounds of fish, which makes a total capacity for the twenty-four tanks of 7920 pounds. The tanks are closed at the upper part by a rounded cover of galvanized iron, containing an aperture for the passage of the nozzle.

A Smuggler's Nest.

Arundel was once a prosperous seaport. In the time of the Fitzalan earls it was a kind of little Portsmouth and one of the southern gates of the kingdom. The earl, who fought at Crecy, was thus able to land his prisoners and his loot at his own door. By the way, it was out of the ransom obtained for these prisoners that the original great hall at Arundel Castle is said to have been built. Arundel in those days looked upon piracy with a lenient eye, unless the pirates happened to be aliens, when retribution sudden and severe fell upon them. Later in the centuries it was a nest of smugglers. Indeed, it is scarce fifty years ago that a cargo of contraband was successfully landed close by.

The particular "Smuggler Bill" who ran it came in the guise of a peaceful collier captain, and when the coast guard boarded him at the river mouth a well-planned squabble with the cabin boy about his light refreshments threw him off the scent. A regular pilot worked the vessel up the Arun, but at Ford, where the water was slack, the captain himself took a turn at the wheel and accidentally ran her aground. As she could not float again till next high tide the pilot went home for the night, and by the time he returned next morning the "stuff" was safe ashore. He noticed that the vessel was higher in the water, but he could prove nothing, though he suspected much. The clever captain had outwitted the customs.—London Tatler.

A DRIPLESS TEACUP.

No Longer Need One Soil Cloth or Clothes.

An improvement in teacups has been patented by an English jewelry concern, and consists of a serrated eight-pointed base instead of a continuous rim, as ordinarily used. The patentees call it the "dripless teacup," as, owing to the fact that the bottom of the cup does not touch the saucer, no liquid that may be spilled will be carried up when the cup is lifted. The illustration herewith is taken from the Jeweler and Metalworker, of London.

NO DRIP FROM THIS CUP'S BOTTOM.

SCIENTIFIC & INDUSTRIAL

The amount of gold in the United States Treasury exceeds that in the banks of Russia, Germany, Belgium and the Netherlands combined.

The experiments of Muller prove that if microbes be placed in a gun barrel the wound made by a bullet fired from it would be infected by the microbes.

The Canadian paper industry is seventy-five years old. There are forty mills, and the production of about 1,100,000 pounds every twenty-four hours is looked for in the near future.

Flax is raised freely in Japan, but the importation of flax, hemp, jute and china grass during the first six months of this year amounted to 5227 tons, a considerable increase over that of the same period last year, which was 3250 tons.

The telephone system of Ugandia, in darkest Africa is, with its branches, 1034 miles in extent, the poles being living trees. The charge is thirty-two cents for each conversation over any distance.

The United States uses more than five-eighths of the diamond output of the world. In two years the total advance on small stones has been twenty per cent., and on large stones twenty-five per cent.

For the first time in the history of the United States, the production of coal has reached a total of over 300,000,000 short tons, showing an actual output of 300,930,659 tons of 2000 pounds, valued at $373,133,843.

With 385 pounds of smokeless powder, the new forty-calibre twelve-inch gun will send an 850-pound armor-piercing shell through nineteen and five-tenths of Harveyized nickel steel armor at a distance of a mile and a half.

The twin tunnel under the Capitol, at Washington, which the Pennsylvania Railway has been given permission to bore, will be 3000 feet long, cost $800,000, and electricity is to be exclusively used for handling trains through it.

It is calculated that the number of timber sleepers on the railways of the world does not fall far short of 1,405,000,000, and a low estimate of their value is $900,000,000. This alone constituted a serious drain on the timber supplies of the world.

For two years the oil consumption has exceeded the production. The stock of crude Pennsylvania petroleum above ground in December, 1900, was 13,174,717 barrels, while in December, 1902, the amount thus stored was only 5,699,127 barrels. Pennsylvania has the greatest American oil field.

The new Springfield rifle is probably the most effective military arm in the world. At a distance of fifty feet it penetrates fifty-five one-inch pine boards placed one inch apart. It has a muzzle velocity of 2300 feet a second and carries a ball five miles, although one mile is the greatest distance that any rifle can be effective, even with telescopic sights.

Why Irish Linen is Best.

Whether Ireland is the finest country in the world for growing flax, it is beyond dispute the finest in the world for bleaching linen—an operation which requires from six to eight weeks, according to the nature and weight of the fabric. Nowhere else can the snow-white finished fabric be turned out to rival the Irish bleach. France, Belgium, Germany and America have all entered into competition with the Emerald Isle, and retired unsuccessfully.

At the present time a large quantity of foreign linen, principally Belgian, is being bleached and finished on various greens near Belfast. The quality of the water, the climate and the inherited experience of the Irish bleachers must all contribute to the result, which has had abundant practical demonstration, that Ireland now occupies, and has occupied, the first place in the whole world for bleaching and finishing linen.

Lean Statesmen in Luck.

The members of the House are complaining a good deal about the crowded condition of the hall since the seats for the accommodation of the increased membership were placed, but they are informed by Elliott Woods, the Superintendent of the Capitol, that the best thing possible was done. The lean members will be able to endure it, but the fat men will be obliged to spend much of the time in the smoking room. The seats have ben placed so close together that men of average girth cannot sit side by side without touching elbows.—Indianapolis News.

Pie Perfection.

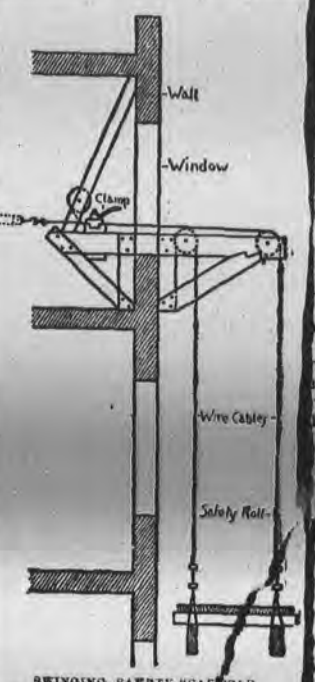
In Chicago, says What to Eat, we learn of the wife of a railroad man who has a most enviable reputation as a baker of pies. Her pies are not "the kind mother used to make." They are sui generis. They are the kind she bakes herself. There are no others like them. Her apple pies are filled with the apples that made Adam forget he was in the Garden of Eden. It is claimed she make a huckleberry pie so ambrosial that it does not stain the teeth! First thing we know someone will make a mince pie that does not give one "that pious feeling."

SAFETY SCAFFOLD

Swinging From Above; It Has Many Advantages Over the Old Type.

The day of the old-fashioned wooden scaffold for building construction is rapidly passing, at least on high work, says the Engineering Record. Instead of the once familiar staging of slender wooden posts, X-braced with boards, with its put-logs and loose board platforms, several forms of working stages have come into use which can be more rapidly erected and removed, are safer and more economical, and have other advantages. A safety swinging scaffold designed particularly for use in the facing of big buildings of steel frame or ferro concrete construction which have an outside covering of brick, terra cotta or stone has recently been patented by a construction company of Cincinnati, Ohio, and successfully used by them on the fifteen-story concreted steel Ingalls Building, now nearly completed.

The new scaffold consists substantially of a platform in sections, suspended by wire cables from brackets supported by the walls of the building at window openings in an upper story, as indicated in the drawing. Each pair of cables supporting the platform sections passes over two sheaves in the horizontal member of a bracket and are held by a clamp inside the building. The platform may be raised or lowered by means of a block and tackle attached to the cables and may be held at any height convenient for the work. The platforms have solid floors, preventing the dropping of materials and an iron rail insuring the safety of the workmen. Preferably the sections are placed end to end, so as to form a continuous staging along a whole side or clear around the building, so that the work may be completely finished to any given level before raising the scaffold. Other advantages of this scaffold besides those indicated are that the sidewalk and the portions of the building below it are not obstructed and the work below may be left completely finished instead of having put-log holes to be filled afterward.



SWINGING SAFETY SCAFFOLD.

SELF-CLEANING SWITCH.

Its Operation Cannot Be Interfered With by Snow or Dirt.

Some of the rail street railway companies in different parts of the country are experimenting with a self-cleaning switch, which in many respects is a great improvement on anything which has yet been used. It is shown in the accompanying cut. Instead of there being a casting or solid bed for the point to travel back and forth, it appears as though constructed of two pieces of rail, with cross-bars placed between them as support for the travel. Underneath is a reservoir which is connected with a sewer which permits of continuous drainage, keeping the switch clean of all accumulations at all times. The switch can be either turned by hand or mechanically. If desired the switch can be fitted with an electrical device by which it is possible to throw it from the platform of the car while the latter is in motion.

SELF-CLEANING SWITCH.

While the openings in the cut under the point are sufficient to keep the action free at all times under ordinary circumstances, an additional provision is made to meet the conditions in cities of the North, where the snowfall may be unusually heavy. This is an electrical heating device which is placed in a waterproof compartment and which will keep a current of electricity moving through the working parts of the switch of sufficient volume to melt the snow and ice which may fall on it. The invention is that of P. J. Ramion.

Pretty Things to Wear

York City.—Shirrings continue the smartest of all smart things ppear to increase in number week ek. This attractive May Manton

SHIRRED WAIST.

t shows them used in both waist sleeves, so managed as to give the ionable broad effect, and again in deep corselet belt. The model is e of cream crepe de Chine, with yoke of tucked chiffon and the ming of cream Venetian lace, but material soft enough to admit of ring can be substituted. The gar- re of lace is specially to be noted. t combines a bertha of novel shape shoulder straps that fall well over sleeves. These last are full and , but are shirred to fit the arms ly for several inches below the

be transformed, and this is often done, or a deep cape collar can be worn over the shoulders. But, as a rule, it is better to have the two separate waists, for then the style of each can be so marked as to give the appearance of another gown even with the one skirt. —Harper's Bazar.

A Striking Gown.

A very striking gown in a "sunset" arrangement of pinks and reds had a foundation of pink silk over which was an interlining of white chiffon. All lacey and transparent gowns have such interlinings. The upper half of the full skirt was of the palest pink chiffon, and the skirt shaded from this pale tint to a deep cerise around the hem, bands of velvet marking the increasing depth of tone. The waist was similarly treated, all the tones appearing in the folded girdle.

When Velvet is Preferred.

For the short walking suit velveteen is a smarter and more fashionable material than velvet, though for carriage or reception toilets long, sweeping gowns made of velvet are preferred.

Blouse Waist.

All berthas are exceedingly fashionable, and one is met with fresh variations at every turn. The smart May Manton waist illustrated shows one that gives a distinct cape effect and combines with it the new sleeves with deep gauntlet cuffs. The model is made of maize peau de cynge with the yoke of heavy cream net, overlaid with medallions of lace joined by strips of black velvet ribbon and trimmings of

A Late Design by May Manton.

oulders. The corselet is made of eam panne velvet and adds a touch brilliancy to the whole.

The waist is made over a fitted lin- g and is closed invisibly at the back, is lining is faced to form the yoke, d can be cut away beneath whenever transparent effect is desired. The st is shirred at its upper and gath- d at the lower edge and the bertha shoulder straps is arranged over whole. The corselet is shaped to the figure and is kept in place by ans of strips of bone. The sleeves mounted over smoothly fitted lin- s that serve to keep the shirrings the full puffs in place.

he quantity of material required for medium size is four and a half ds twenty-one, three and a half ds twenty-two or two and a half ds forty-four inches wide, with one a quarter yards of all-over lace, e-eighth yards of tucking for yoke three-quarter yards twenty-one s wide for corselet belt.

Lace Gowns.

wns of Chantilly lace with the s of applique work and flounces still being made up over black, e or colored linings. These also ire some brightening, and jet or ornaments, and some very costly are used. Artificial flowers made lk or chiffon are embroidered on to the net and satin gowns in a most active manner, and pale pink, yel- or white and mauve also help to ten the sometimes too sombre ef- t.

White net gowns with lace applique white lace gowns are always most ful, as they can be made with two sts, a high and a low one, and then be worn for many different occa- ns.

With a guimpe a low waist can easily cream lace, but combinations without number might be suggested. The deep corselet belt is of chiffon velvet which matches the silk in color, but the material used for the waist can, with propriety, make the belt also when preferred.

The lining for the waist is smoothly fitted and is faced to form the yoke. The waist proper is laid in one box pleat at the centre back and in two at the front, the closing being made beneath the pleat at the left side and diagonally through the yoke. The bertha is in two portions, the edges being cut to form points. The full puffed sleeves with the gauntlet cuffs are mounted on smoothly fitted linings, and are shaped to extend over the hands.

The quantity of material required for the medium size is five yards twenty-

BLOUSE WAIST.

one, four and three-eighth yards twenty-seven or two and five-eighth yards forty-four inches wide, with one-half yard of net and five yards of applique.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "THE CHRISTIAN'S MISSION."

The Rev. T. J. Villers, One of the Most Popular Clergymen in Indiana, Delivers a Strong Sermon, the Theme of Which is Evangelism.

INDIANAPOLIS, Ind.—The Rev. Thomas J. Villers, pastor of the First Baptist Church, of this city, preached Sunday morning a strong sermon, the theme of which was evangelism. His subject was "The Christian's Mission to the World." The text was chosen from John xvii:18: "As Thou hast sent Me into the world, even so have I sent them into the world." Mr. Villers said:

The farewell discourses to the disciples were ended. Gethsemane with its mental anguish and bloody sweat was but a step in the distance. The shadows flung from the cross were deepening and darkening. Jesus knew that before another sun should set His work on earth would be done. In t se last moments He betook Himself to prayer. Dying words are undying words. We embalm them in fragrant memories. With eyes uplifted toward the Father, the divine Suppliant first reviewed His own ministry. "I have glorified Thee on the earth; I have finished the work which Thou gavest Me to do." Then His mind turned toward His disciples; He prayed for them, declaring their mission to be a continuation of His own. This thought He emphasized before His death, on the eastward side of Calvary, while standing in the deep shade and gloom. "As Thou hast sent Me into the world, even so have I also sent them into the world." The same thought emerged with Him from the tomb, and dropped from His lips on the heavenward side of the cross, while standing in the light reflected from the crown. "Then said Jesus to them again, Peace be with you; as My Father hath sent Me, even so send I you." Thus with the emphasis of repetition our Lord announces the Christian's mission to the world.

Jesus is called the apostle of our confession. He is God's sent one, whom we confess. He repeatedly laid emphasis on this fact, declaring Himself to be the one whom the Father sanctified and sent into the world. In John's Gospel alone He speaks of Himself thirty-six times as being sent of God. He was sent to preach good tidings to the poor, to proclaim release to the captives and recovering of sight to the blind, to set at liberty them that are bruised, to proclaim the acceptable year of the Lord. Having finished the work which God gave Him to do, He formed a new apostolate, dignifying all disciples as His apostles; for while His commission "even so send I you" may have primary reference to the twelve, it applies with equal force to all who have obtained a like precious faith. God sent Him; He sends us. In the Acts we read that when Stephen suffered martyrdom there arose that day a great persecution against the church at Jerusalem. And they were all scattered throughout the regions of Judea and Samaria, except the twelve. They, therefore, that were scattered abroad — not the twelve, for they stayed at Jerusalem, but the laymen, the rank and file of the church —they that were scattered abroad went about preaching the word.

Do you plead your lack of eloquence, affirming that you are slow of speech and of a slow tongue? Listen! The gospel is good news and good news does not need ornamenting, it needs telling. Listen! One night at Corinth, after a day of depressing toil, when there had been little to cheer Paul's soul, Jesus appeared to him in a vision, saying: "Be not afraid, but speak." The word which Christ used is significant. It is not the term for a formal set discourse. It suggests the simplest form of human language. It means merely to talk. Our Lord did not want Paul to sugarcoat his message with poetic, rhetorical descriptions of the glory of Corinth's two seas, flecked with white sails from many lands—did not want him to wax eloquent amid that pageant of islands and mountains and groves of cypress and pine bathed in the glow of Grecian sunsets. Jesus wanted Paul just to talk the gospel. At the apostle's feet lay the blue waters of the Aegean. Jesus did not want Paul to prepare learned disquisitions, whose profundity would equal the unplumbed sea, like the preacher who was said to be invisible six days in the week and incomprehensible on the seventh. Christ only wanted Paul to talk the gospel. In the distance gleamed the snowy summit of Helicon, whose muses had inspired Hesiod and his school of writers. Jesus did not want Paul, with a head as cold and a vocabulary as icy as Helicon's summit, to show the rhetoric loving Corinthians that he was as cultured as themselves. He wanted Paul just to talk the gospel. Towering within sight stood two-peaked Parnassus, whose side poets had climbed for inspiration. Jesus did not want Paul to give the impression that his inspiration had been kindled on Parnassus, lest, coming with the enticing words of man's wisdom his message should be made of none effect. He wanted Paul simply to talk the gospel.

O beloved, this is what the church and the world need to-day—not more clergymen to expound the gospel, but more men and women to talk the gospel: talk it in the home, talk it in the office, talk it in the shop, talk it in the factory, talk it in the store, talk it on the farm, talk it on the streets, talk it on the trains—talk it everywhere. Suppose people call us babblers. That is what the Athenians called Paul. Jesus says: "Be not afraid; keep talking." Suppose they say that our speech is contemptible. That is what the Corinthians said of Paul. Jesus says: "Be not afraid; keep talking." Suppose they affirm that the old gospel will not do in these modern days, that it must be refined and intellectualized, trimmed and lopped and polished and perfumed. Jesus says: "Be not afraid; keep talking."

It is profoundly significant that when the Holy Ghost came on the day of Pentecost He appeared in the shape of a tongue, which sat not only on the twelve, but on each member of the church, and when that tongue of fire touched them they began to speak as the Spirit gave them utterance. It is by the tongues of God's people that His gospel must be published. We may try to excuse our silence by saying that actions speak louder than words, and so if our life is right, speech is unnecessary. It is true that the life may be eloquent, and ought to be. It is true that words without works are like faith without works —dead. But no excuse that we can frame will satisfy Christ for our dumbness. More than once He healed men who were possessed by dumb devils, and it must grieve Him that so many of His people in our day are similarly afflicted. My brother, if you have a dumb spirit, let Christ cast it out, that the string of your tongue being loosed, you may speak the reconciliating word.

A commercial traveler recently stood in my study and gave me a chapter in his history. Ten years ago he had fallen so low through sin that he was utterly forsaken, cast out even by his own wife. One night he wandered into a Chicago mission, where he heard something about the love of God. He went back every night for a week and listened. Chords that were broken began to vibrate once more. On the seventh night, after the mission service, he groped his way through the darkness to an old board fence near the house where his wife lived, and there behind that fence threw himself down, hoping that when morning dawned he might peep through the cracks, and see at the window yonder his little child, whom he was no longer permitted to visit. As the eastern sky began to flush with promise of the dawn, weary and hungry and lonely and heart-sick, he crept up to the feet of Jesus. "And greatly to my surprise," he said, "Christ didn't scold me. He knew I'd been scolded enough already. And He didn't give me any advice, either. I'd long ago had plenty of that. No," he added, with trembling voice, "Jesus just loved me." And when the sun got above the horizon that morning a brighter light was filling all the chambers of his heart. He has a beautiful home now, and everywhere he goes is telling what a dear Saviour he has found. Are some of you out in the darkness—homesick and sin-sick? Creep up to the pierced feet. He'll not scold you. He'll not advise you. He'll just love you—love you out of your shameful failure and loss, into the glorious gain of His cross, out of earth's sorrows into His balm, out of life's storm and into His calm, out of distress to jubilant psalm.

Children of God, apostles of Jesus, as love was the master passion of Him whom the Father sent, so must love be the constraining motive of us whom the Son sends. Humanity responds to the touch of love. Around on the sunny side of even the most frigid man there is always a door that opens to the pressure of a loving heart. "Thou hast loved my soul from the pit," exclaimed Hezekiah, as he looked back at his alarming illness; as if God, bending over His prostrate servant, had used His great heart as a magnet to lift the sufferer from the grave. Love magnetized Hezekiah from death. Be ye, therefore, imitators of God. Paul urges, and walk in love even as Christ also loved you. As His sent ones, we are to go about loving people out of sin into forgiveness, out of unrest into peace. Constrained, impelled, urged on, held irresistibly to one aim by the love of Christ, we are sent to those yet in enmity against God, to love them into fellowship with Him.

Continuing, as we do, Christ's mission, our parish is the world. As He was sent into the world, even so has He also sent us. His command to make disciples of all the nations has never been repealed. Within every Christian church I wish there hung a chart, constructed on the basis of Acts i:8: "Ye shall be witnesses unto Me, both in Jerusalem, and in all Judea, and in Samaria, and unto the uttermost part of the earth." Four concentric circles. A picture of the local church at the centre. The inner circle at the top, "In all Judea:" at the bottom, "State's Missions." The third circle at the top, "In Samaria:" at the bottom, "Home Missions." The outer circle at the top, "Unto the Uttermost Parts of the Earth;" at the bottom, "Foreign Missions." Across them all in the shape of a cross, "Preach the gospel to every creature;" "The Field is the World."

A sinful world, where men and women are dying without God and without hope. A sorrowful world, where bleeding hearts need bandaging, where many a man never sees the stars shine through his cypress trees. A covetous world, where greed supplants creed, where the book of truth and the bottles of hell are struggling for the supremacy; where, with eyes blinded by the god of this age, many are hastening to become rich, falling into temptation and a snare and into many foolish and hurtful lusts which drown men in destruction and perdition. Into such a world are we sent, yet must we keep ourselves unspotted from the world. His figure of the salt Jesus immediately followed with His figure of the light. While mingling with people as salt is mixed with that which needs preservation, we must be as lights, above and shining down upon the world. Some times in the holy mount with the transfigured Christ, then down among the people with the demoniac boy; keeping close to the Master while keeping touch of the world; laying hold of sinful man with one hand and the sinless Man with the other and bringing them face to face.

It is profitable to note Christ's interpretation of His own mission, and to read our mission in the light of that interpretation. Hear His words: "I came down from heaven, not to do Mine own will, but the will of Him that sent Me. As My Father hath sent Me, even so send I you. I came not to call the righteous, but sinners to repentance. As My Father hath sent Me, even so send I you. The Son of man came not to be ministered unto, but to minister, and to give His life a ransom for many. As My Father hath sent Me, even so send I you. The Son of man came to seek and to save that which was lost. As My Father hath sent Me, even so send I you."

He came to minister, and He ministered to all classes. He welcomed influential Nicodemus, and explained to him the new birth. He took equal pains with the despised woman of Samaria, and drew for her the living water. The two accounts are placed side by side. During His life He mingled with the poor; in His death He made His grave with the rich in order that He might save both. So is the will of God in Christ Jesus concerning us. We are saved to serve. With hands full of helpful charity, with a word in season to him that is weary, with a heart at leisure from itself to soothe and sympathize, we are sent to bring ourselves into contact with humanity at the point of need.

Ourselves, mark you, not merely our substance. The human soul is cavernous in its hunger, not for things, but for folks. It is easier often to give money than self. It takes less prayer, and necessitates less nervous expenditure. Jesus touched men, and virtue went out of Him. He gave His life. As a ransom that gift was unique in its value and effect. As an offering for sin it can never be duplicated. Yet may we, in some true sense, give ourselves, as He gave Himself. We may present our bodies a living sacrifice. We may pour out our lives on the altar of the church's faith, and count it a joy, as Paul did. We may imitate the devotion which burned in the bosom and blazed in the life of my revered teacher, Martin Brewer Anderson, who used to say: "It has been the purpose of my life to live as far as I might for others; like my divine Master, to give myself for them, and so far to renew in myself that perfect life."

In view of our mighty mission, are we in weakness, and in fear and in much trembling? Let us be comforted by our Lord's intercessory prayer. He guarantees a complete equipment. When He speaks of sending us into the world, His word means more than a mere sending. It implies an official, authoritative commission, together with the necessary equipment. As the Father equipped Him for His ministry, so He thoroughly furnishes us unto every good work. He was anointed with the Holy Ghost and with power. Ye shall receive power, said He, when the Holy Ghost is come upon you, and ye shall be My witnesses. For witness-bearing the gift of the Spirit is absolutely essential. We must tarry until we are endued. We may be richly endowed without being endued at all. Once, we are told, it took one sermon to convert 3000 souls; now it takes 3000 sermons to convert one soul. If the statement be true, the reason is clear.

Equipped with power, we are given a message. Jesus went about teaching and preaching the gospel of the kingdom. As the Father sent Him even so sends He us. When a man gets the tongue of fire his theme is not politics or sociology, not literature or science, not the popular topics of business or society, but the mighty works of God. Paul told Timothy that the time would come when men would not endure sound doctrine, but, having itching ears, would heap to themselves teachers after their own lusts. If churches have itching ears they can always find teachers and preachers who are willing to scratch their ears. But ear-scratchers are not ambassadors. In our ministry of reconciliation we have but one message—the word of reconciliation. God has committed it to us; or, as Paul says, God has deposited it in us; as if it is a sacred treasure which we are to preserve carefully and bear faithfully to others.

Parents and teachers and fellow workers unto the kingdom of God, while continuing the mission of Jesus who came to seek and to save that which was lost, may God give you and me the unspeakable joy not only of turning men and women from darkness to light, but also of leading many of the little ones to Him who carries the lambs in His bosom.

ADMIRAL SCHLEY ENDORSES PE-RU-NA.

Pe-ru-na Drug Co., Columbus, Ohio:
Gentlemen: "I can cheerfully say that Mrs. Schley has taken Pe-ru-na and I believe with good effect."
W. S. SCHLEY.—Washington, D. C.

ADMIRAL SCHLEY, one of the foremost notable heroes of the Nineteenth Century. A name that starts terror in the heart of every Spaniard. A man of steady nerve, clear head, undaunted courage and prompt decision.

Approached by a friend recently, his opinion was asked as to the efficacy of Peruna, the national catarrh remedy. Without the slightest hesitation he gave this remedy his endorsement. It appeared on later conversation that Peruna has been used in his family, where it is a favorite remedy.

Such endorsements serve to indicate the wonderful hold that Peruna has upon the minds of the American people. It is out of the question that so great and famous a man as Admiral Schley could have any other reason for giving his endorsement to Peruna than his positive conviction that the remedy is all that he says it is.

The fact is that Peruna has overcome all opposition and has won its way to the hearts of the people. The natural timidity which so many people have felt about giving endorsements to any remedy is giving way. Gratitude and a desire to help others has inspired thousands of people to give public testimonials for Peruna who heretofore would not have consented to such publicity.

Never before in the annals of medicine has it happened that so many men of national and international reputation have been willing to give unqualified and public endorsements to a proprietary remedy. No amount of advertising could have accomplished such a result. Peruna has won on its own merits. Peruna cures catarrh of whatever phase or location in the human body. That is why it receives so many notable and unique endorsements.

Address The Peruna Drug M'f'g Co., Columbus, Ohio, for free literature on catarrh.

Some Hope For Nevada.

Though one of the largest States in area, Nevada is the smallest in population. It contains only 40,000 people, nearly all of whom live along the chief railway. Like other pocket boroughs, Nevada has not been well governed, but its opportunities in all directions have been limited.

The new irrigation law gives it fresh hope. Chief Hydrographer Newell, of the Geological Survey, predicts that Nevada will have a population of 500,000 people within fifty years. One of the State's most serious drawbacks has been the selection by the State of all the springs and water courses in the national grant of 2,000,000 acres for school purposes, and the subletting of these natural water advantages to large cattle companies. For lack of water migrating farmers have kept out of Nevada.

Railroad grants of land in the State have also worked against seekers of homesteads. Nevada is the scene of the first work to be performed under the irrigation law passed by Congress last year. Construction has been begun on what is called the Truckee Dam and the first contract calls for an expenditure of $900,000. The Government policy will be to push forward with works on which it can get its money back within ten years.—St. Louis Globe-Democrat.

To Detect Women Smugglers.

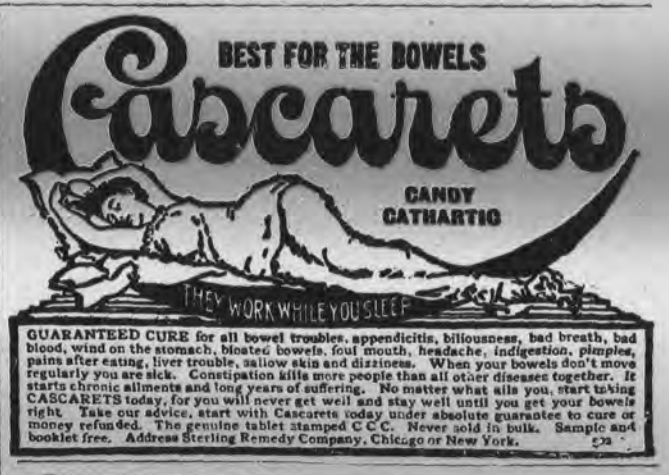
Uncle Sam has seven women inspectors at the port of New York to make things disagreeable for women who would smuggle. Whenever a passenger ship arrives there is a woman inspector at the gangplank. If the vessel is one of the big popular liners there are two or three. The women inspectors do their work as quietly as possible. In the bustle and confusion on the pier just after the ship has been tied up the little scenes in which they play leading parts pass almost unnoticed, but without this work the revenue from customs would be less every year by many thousands of dollars. Sometimes tearfully, but oftener in a state of indignation, the woman who is suspected of trying to smuggle follows the inspector up the gangplank of the steamer that has just arrived and into a stateroom, where the thorough search of her clothing usually brings to light valuable articles that are dutiable. It is usually found that the women smugglers are connected in some way with wholesale milliners and fancy goods dealers.

The Missing Link.

Some interesting people have been come across in the process of exploring British New Guinea. The full report of the expedition that recently visited some of the northern districts, never before traversed by white men, has been published as a Parliamentary paper by the Commonwealth government. A tribe that lives in swamps and morasses, and can hardly walk on dry land, was encountered, and one of its members is described by Mr. Robinson, the leader, as "the most ape-like human being, in figure and carriage, I have ever seen." A tribe of pigmies, "intelligent looking and pleasant faced," was also met with. Its chief was gracious enough to allow himself to be measured. He was four feet three inches in height and twenty-three inches around the waist.—Westminster Gazette.

'A Sensitive Searchlight.

Science gives its votaries many surprises. A writer in the North American Review says that when a warship was exercising with searchlights it was observed that one of the lights began to wink, or flicker. Presently it was discovered that it was recording a signal in the Morse alphabet. Afterward it was found that the signal had been sent from one foreign warship to another by wireless telegraphy. Neither of the foreign vessels was in sight from the ship which caught the message. The searchlight happened to be "in tune" with the wireless apparatus, and became a receiver of the message.



GUARANTEED CURE for all bowel troubles, appendicitis, biliousness, bad breath, bad blood, wind on the stomach, bloated bowels, foul mouth, headache, indigestion, pimples, pains after eating, liver trouble, sallow skin and dizziness. When your bowels don't move regularly you are sick. Constipation kills more people than all other diseases together. It starts chronic ailments and long years of suffering. No matter what ails you, start taking CASCARETS today, for you will never get well and stay well until you get your bowels right. Take our advice, start with Cascarets today under absolute guarantee to cure or money refunded. The genuine tablet stamped C C C. Never sold in bulk. Sample and booklet free. Address Sterling Remedy Company, Chicago or New York. 592

A Curious Story of a Crime.

Ten years ago a ten-months-old child who had been left in the care of a woman in Kent, England, died one morning in great agony. The post-mortem revealed that she had choked to death over pieces of cork in her gullet. The jury returned an open verdict, and the case was forgotten. Recently Scotland Yard began to receive anonymous letters which said the child had been murdered, and finally came one saying that the murderer could be found if the handwriting could be identified. Ultimately the husband of the woman who had charge of the child was arrested. He denied he had tried to kill the child, but had merely put corks in its throat to stop its crying. He was found guilty and sentenced to five years' penal servitude.

Queer Trade Commodities.

Most people nowadays hear a lot about the conservation of waste, but looking through the catalogues of traders of various kinds it is astounding what a number of eccentric commodities are utilized for trade purposes. The skins of millions of eels are tanned and used as leather for bootlaces; frog-skin has become one of the most beautiful and useful articles known to the binders of fancy books and the makers of fans; walrus whiskers provide the most elegant toothpicks known to the modern man of fashion; and beetles of a certain kind are exported by the hundred weight for use on theatrical dresses.—Tit-Bits.

Great aches from little toe corns grow. N. Y.—51

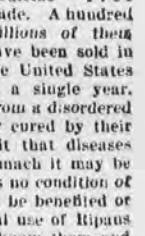
Long Hair

"About a year ago my hair was coming out very fast, so I bought a bottle of Ayer's Hair Vigor. It stopped the falling and made my hair grow very rapidly, until now it is 45 inches in length."—Mrs. A. Boydston, Atchison, Kans.

There's another hunger than that of the stomach. Hair hunger, for instance. Hungry hair needs food, needs hair vigor—*Ayer's.* This is why we say that Ayer's Hair Vigor always restores color, and makes the hair grow long and heavy. $1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

PAXTINE TOILET ANTISEPTIC



FOR WOMEN

A Boston physician's discovery which cleanses and heals all inflammation of the mucous membrane wherever located.

In local treatment of female ills Paxtine is invaluable. Used as a douche it is a revelation in cleansing and healing power; it kills all disease germs which cause inflammation and discharges.

Thousands of letters from women prove that it is the greatest cure for leucorrhœa ever discovered.

Paxtine never fails to cure pelvic catarrh, nasal catarrh, sore throat, sore mouth and sore eyes, because these diseases are all caused by inflammation of the mucous membrane.

For cleansing, whitening and preserving the teeth we challenge the world to produce its equal.

Physicians and specialists everywhere prescribe and endorse Paxtine, and thousands of testimonial letters prove its value.

At druggists, or sent postpaid 50 cts.

A large trial package and book of instructions absolutely free. Write The R. Paxton Co., Dept. 25, Boston, Mass.

CAPSICUM VASELINE
(PUT UP IN COLLAPSIBLE TUBES)

A substitute for and superior to mustard or any other plaster, and will not blister the most delicate skin. The pain-allaying and curative qualities of this article are wonderful. It will stop the toothache at once, and relieve headache and sciatica. We recommend it as the best and safest external counter-irritant known, also as an external remedy for pains in the chest and stomach, and all rheumatic, neuralgic and gouty complaints. A trial will prove what we claim for it, and it will be found to be invaluable in the household. Many people say "it is the best of all of your preparations." Price 15 cts., at all druggists or other dealers, or by sending this amount to us in postage stamps we will send you a tube by mail. No article should be accepted by the public unless the same carries our label, as otherwise it is not genuine. CHESEBROUGH MFG. CO., 17 State Street, New York City.

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

If afflicted with weak eyes, use **Thompson's Eye Water**

HAPPENINGS IN NEW JERSEY.

Continued From First Page

engaged as one. In the Seven Days' Fight the colonel of her husband's regiment, Dr. Pratt, of Brooklyn, was seriously wounded, being shot in the mouth. Mrs. O'Hagan nursed him until he completely recovered. All through the war Mrs. O'Hagan accompanied her husband and endured many of the hardships. In the battle of Gettysburg a man who was thought to be her husband was brought to her tent dead. The body proved, however, to be that of a stranger.

Mrs. O'Hagan was born in Ireland, and came to this country with her parents when twelve years old. After the war, with her husband, she settled in Belleville.—*New York Tribune.*

BOY CONSTRUCTS TOY THEATRE.

Samuel Briggs, Jr., eleven years old, of Burlington has won the reputation of being a genuis, by constructing a toy theatre. With remarkable ingenuity, the little fellow has constructed a stage two feet high, two feet deep and three feet wide, on which are presented plays ranging from a minstrel performance to a drama.

The stage is fitted with an automatic rolling curtain, and the scenery and appropriate stage settings can be quickly altered. Some of the landscape and background scenery is hand-painted, while more is cut from the illustrated advertising posters of the show presented. Miniature figures of paper and wax represent the actors.

In the orchestra pit the gaudily dressed musicians are represented as rendering the music, and a mechanical doll plays a noisy accompaniment on a toy piano. The most novel feature, however, is a huge and hidden phonograph, which sings, talks or plays the parts of the paper actors with an effect that causes the spectator to almost imagine the little figures to be alive.

Visitors to Lakewood.

Recalling the epigram of olden days, when all roads led to Rome, a similar though might easily be applied to Lakewood as a point of rendezvous for the world's celebrities and men and women of mark in various walks of life.

In the relative location of a suburb for two great cosmopolitan cities, it is a matter of course that at one time or another during the season the passing throng in Lakewood should include the most highly honored representatives of public or private life. From season to season the list of such visitors would be an interesting one, including what may be termed "the home guard" of those who have chosen Lakewood as a winter home.

The cottage list of the place carries the names of students and workers; people whose accomplishments have been notable in the world, and whose interest in their surroundings guarantees continued improvement. And when the casual visitors to Lakewood are considered the list might stretch out indefinitely. In the corridors of these hotels during a season, one touches elbows with grave college professors, eminent clergymen, learned doctors of law and letters and abtruse sciences of all classifications. Government attaches and ambassadors, prominent politicians who are readily marked, and quiet ones unsuspected as the actual power behind many a petty throne. The great song birds of the operatic and concert world come here for occasional rest, and artists and literateurs and scientists are noted in the crush.

While millionaire operators, successful business men, and women of the first social prominence, make up the resort's guest list. And Lakewood receives them all with ready welcome. She opens her doors and invites them in for the rest they need; proffers them either the peace and quiet of the wood, where none intrude, or the pleasant associations to be found in club society or hotel and cottage circles, as their preferences may turn.

If you wish to know about Lakewood, send postal to C. M. Burt General Passenger Agent, New Jersey Central, 143 Liberty Street, New York City, for Book.

Concerning Proctor's.

The theatrical manager who can please the children is the one who unfailingly wins success. These are the jolly days (as well as the holidays) when the little folks are especially eager to be amused by visits to the threatres, and in the Proctor theatres above all others are they catered to intelligently and effectively. Ever since the holidays came near, Mr. Proctor has modeled his programs with a keen eye to the delighting of his school-children patrons, whom he numbers in the thousands. On any of his bills these days, the "kids" are sure to be tickled by clever trained dogs, grotesque and solemn-faced monkeys, cutely educated cats, or beautiful trained horses; while the marionette shows, the funny moving pictures with their thrilling portrayal of Santa Claus' midnight chimney visit—all contribute to send the little ones home simply delighted. These are great days for the Proctor child-visitor.

A recently introduced (and very successful) innovation at the Proctor theatres is that by which all patrons, whether near at hand or far away, can have their choice seats reserved for them three weeks in advance. They can be ordered by mail, by telegraph, by telephone, or in person, at almost any hour of the day or night; for the Proctor box offices are now kept open from 9:30 in the forenoon until 10.30 at night. Better than all, one is invariably certain of courteous treatment in ordering his seats. And this is a great treat, when one bears in mind that incivility is too often met with in the box office of many metropolitan playhouses.

TRAGEDY OF AN INSECT.

The Sand Fly Lives but a Day After Coming into the Light.

Here is the tragic story of the sand fly.

It has but a day to live in the light. In order to earn the right to that day of life it lives from one to three years in darkness, down in the mud at the bottom of lakes or rivers. Moreover, the sand fly is perfectly harmless. It does not bite. It has no sting. It cannot even eat. All it can do is to flit about for a few hours, enjoying the light of day or the glare of an electric lamp.

Prof. C. B. Davenport, of the University of Chicago, tells about the delicate, beautiful little insects.

The sand fly is known to scientists familiarly as the May fly. In scientific terms, it is called ephemerida. This name is taken from the Greek word ephemeros, which means lasting only for a day. To the scientists the sand fly is one of the most interesting and beautiful of insects.

The fly lives but a day at most, but before it sees the light it has lived for from one to three years under the water in the form of what the scientists call a nymph. This nymph can both walk and swim. As it grows it molts, and after about the ninth molting wings appear on its thorax. These grow larger until the insect comes forth from the water a sand fly. It then has but one duty—to lay its eggs. This done, the sand fly zigzags through the air until its brief life is ended.

It is rather doubtful consolation to tell a widow that her "husband is very much better off."

THE AMERICAN MONTHLY REVIEW OF REVIEWS

THE NECESSARY MAGAZINE IN THE PRESIDENTIAL YEAR

The Review of Reviews is often called a necessity, in recognition of its usefulness in keeping readers "up with the times."

In Presidential election years the REVIEW OF REVIEWS is more than ever "the necessary magazine." Everybody wants to be truly and quickly informed about this or that public question that has forged to the front; to know about the new candidates and personal factors in politics, to have a complete picture at hand of the current movement of history.

In Dr. Shaw's editorials, in its authentic and timely contributed articles, in its brilliant character sketches, in its condensations and reviews of all the important articles of other magazines, and in its hundred a month of valuable portraits, witty cartoons, and interesting views, the REVIEW OF REVIEWS gives the much desired news of the world's and our own progress. "The World under a Field-glass" is the way one subscriber describes it.

Men in public life, like President Theodore Roosevelt the members of Congress, and the great captains of industry, who must keep "up with the times," intelligent men and women all over America, have decided it is "indispensable."

MATTERS OF LOCAL INTEREST.

Live Local Paragraphs Occurring in North Plainfield and and Plainfield.

The Plainfield Board of Trade will have its dinner January 28.

There will be a special Christmas service at the First Baptist Church, Sunday morning.

A little girl has come to make her home with Mr. and Mrs. Stein, of Grandview avenue.

Brooks Carson, the florist, has taken the store on Park avenue formerly occupied by Miss Lincoln.

Joseph D., the four year old son, of Mr. and Mrs. John Harkins, of Pearl street, died last Monday. The funeral was private.

A petition signed by 1000 residents of Plainfield urging the reappoint of Joseph A. Hubbard a member of the Board of Assessors, has been presented to Mayor Jenkins.

An investigation will be made by the Borough Board of Health regarding the failure of a Plainfield physician to report a case of diphtheria which occurred on Pearl street this week.

Heidelolf's hardware store, on Somerset street, presents a handsome appearance, lighted up with dozens of miniature incandescent lamps. Of interest to many people, in the same window is a set of wireless telegraph instruments.

While two grandchildren of Thomas D. were visiting at his house on Grove st[illegible] this borough, Wednesday, one was taken very ill. Dr. Buchanan called in, [illegible] case as scarlet fever. [illegible] went home to its parents on Sandford avenue, [illegible] portion of the Fil[illegible] Monday. The minister is charged with a serious charge and [illegible] trial by the Grand Jury.

Mrs. G. Van Zandt, wife of J. R. [illegible] after an illness of six weeks, died last Monday. Funeral services were held from her late home [illegible] morning. Interment was made at the Bloomsburg cemetery, this county. She is survived by her husband and two daughters.

Golden Wedding Anniversary.

Isaac T. Runyon and wife celebrated the golden anniversary of their wedding by giving a dance and reception at their residence on Somerset street Wednesday evening. About thirty guests were present.

Knights of the Golden Eagle Elect.

The following officers were elected at the district meeting of the Knights of the Golden Eagle Tuesday night: Noble chief, Horace J. Martin; vice chief, William Allen; high priest, Dr. C. M. Luckey; venerable hermit, L. A. Hummer; master of records, H. J. Martin, Jr., and A. R. Vail; clerk of the exchequer, R. V. Kenny; master of the exchequer, W. Randolph; trustee, R. V. Kenny, Ray B. Carver was nominated delegate to the Grand Castle.

Commuters Remember Trainmen.

Plainfield's Commuters' Club, has remembered the trainmen on the Central's express es which leave for New York daily at 7:55 and 8:30. Christmas presents in cash amounting to over $300 were presented to the railroad men. This is an annual custom inaugurated some years ago by Plainfielders who rent the club cars Plainfield and Netherwood.

Honors for Company K.

Company K, Second regiment, of Plainfield, should not be mistaken for Company K, Third Regiment, of Long Branch. The latter company has been ordered out of service. Our local company has again captured the regimental prize, for marksmanship as a result of the shoots at Sea Girt during the summer of 1903. The Plainfield military devotees are particularly proud of the honor, inasmuch as it is the youngest company in the entire regiment.

$200 Reward.

By recommendation of the Board of Chosen Freeholders of the County of Somerset, a reward of TWO HUNDRED DOLLARS is hereby offered for information which will lead to the arrest and conviction of any person or persons who have stolen, since December 8, 1902, or who may hereafter during the next two years steal, any horse or horses in the County of Somerset.

JAMES L. GRIGGS,
Prosecutor of the Pleas,
Somerville, N. J. Dec. 15, 1903. 3-19 04.

Fearful Wreck on B. & O.

The Duquesne limited, the fastest passenger train on the Baltimore and Ohio Railroad, running between Pittsburg and New York, plunged into a mass of timber, eight miles west of M'Connellsville, Pa., at 7.45 o'clock Wednesday night, and was completely wrecked. A great many persons are known to be dead and many are missing.

The list of known injured totals twenty, but it is believed that not one of the 150 passengers on the train escaped without injury, and the number killed is estimated from 35 to 65.

The wreck was caused by some heavy timbers falling on the track from a freight train ahead of the passenger train.

Somerset Courts.

The December term opened Tuesday and closed the following day, being the shortest term in its history.

The grand jury brought in six true bills.

The trial of jury appeals will be taken up on January 11, and criminal cases will probably begin January 18.

Somerset County Revolutionary History.

The Somerset County Historical Society which met at Somerville this week was a most interesting meeting. A large number of persons were in attendance, and the address of Rev. T. H. Davis of Plainfield, was very instructive and entertaining. He dwelt mostly on the part Somerset county played in Revolutionary history.

Somerset County Man Honored.

Dr. Richard Moldenke, of Watchung, has just returned from a tour of the principal cities of the middle west in the interests of the Foundry exhibits to be held next Spring at the World's Fair in St. Louis.

All the large foundries of the country have combined to make this one of the finest exhibits ever attempted. There will be no "make-believe" business, but the work of casting and finishing, will be shown just as it is done in the foundry.

Dr. Moldenke has been [illegible] important position, and while he cannot devote much of his time in St. Louis to actual details, he will appoint assistants to see that his plans are carried out.

Preaching at Wilson Memorial Chapel.

Rev. George Shaw, will preach a Christmas sermon in the Wilson Memorial Church, Sunday evening. Service commences at 8 o'clock. All are cordially invited to be present.

Sunday school will be held at 2.30 p. m.

Gesang and Turn Verein Reception.

The members of the Gesang and Turn Verein are making great preparations for their reception and dance to be held on New Year's Eve. Prof. Suhr's Imperial Orchestra has been engaged to furnish music for the occasion.

Fire in First Presbyterian Church.

A lot of young men and women engaged Wednesday evening in decorating the First Presbyterian Church for Christmas, were suddenly called on to form themselves into a fire brigade. A large ornamental torch, made of crepe paper and evergreen, caught fire from a burning gas jet near the organ, and in an instant was ablaze. The young folks worked heroically, but $500 damage was done. Particles of the flaming torch dropped here and there, damaging the church furniture. At one time the main part of the edifice was threathened with destruction.

Object to Proposed Colored Home.

The proposition to establish a home in Plainfield, for colored orphans on the Darling property, corner of Prospect avenue and Rahway road, has aroused protests among the residents. Rev. Scott Wallace, pastor of the Calvary Baptist Church, a colored man, is at the head of the movement. The plan is to form a home for colored orphans and working girls who are out of employment.

The support of the orphanage is to come from those seeking servants, as well as from those securing employment. Mr. Wallace says that he will have no trouble getting money to start the home, as several substantial contributions have been promised. It is estimated that at least $20,000 will be needed.

Make the Children Happy.

Christmastide this year should bring joy to the hearts of all but the most poverty-stricken, for never before were gifts of all kinds more abundant and offered for sale cheaper. By the expenditure of comparatively a small sum almost any child can be made happy—for to the childish mind it is not the cost, but the adaptability to its desires, that makes the Christmas present welcome. And even when parents are too poor to provide for their little ones, the various church, charitable and social associations take pleasure in seeing that none are neglected.—Hoboken Observer.

Christmas Exercises at the Borough Schools.

Christmas was observed in the North Plainfield schools Wednesday. The primary pupils held their exercises, commencing at 12:30 o'clock. The following program was given:

Santa Claus—Wesley Messersmith.
Mrs. Santa Claus—Mary Robley.
Fairy Overcome—Edith Taft.
Fairy Content—Mary N[illegible]
Sir Sue All—Ralph Kut[illegible]
Singing—Ring Out, O Bells

Fire Destroys Catholic Church.

METUCHEN, Dec. 21—St. Francis church, the only Roman Catholic place of worship here, burned to the ground this afternoon as the result of the overturning of a lamp by a choir girl. Father Graham, who was lying ill in the priests' house at one side of the church, was carried out before the flames got to his home.

The choir girls, ten or fifteen in number, were in the choir loft rehearsing the music arranged for the Christmas celebration, when one of the girls, Lizzie Geary, overturned a lamp that she was using to light up her music. The oil caught fire and the whole choir loft was soon in flames. The girls took off their coats and used them to beat out the flames, but the fire soon got the better of them and they were forced to run down stairs.

The church, which was built largely of wood, was soon burning all over. The local fire department was called out, but was unable to check the fire. The flames soon spread to Father Graham's house and he was carried to a nearby house. The rectory was threatened with destruction at one time, but the firemen managed to put out the fire there before it got very far. The estimated damage is $15,000 to $20,000.

Stocking New Jersey With Fish and Game.

The State Fish and Game Commission has caused streams in Morris, Sussex, Warren, Passaic and Bergen counties to be stocked with trout during the last week and about 10,000 of the fish have been put in the various brooks. The fish were brought to this State from a hatchery near Stroudsburg, Pa., and they are said to be the finest specimens of their kind ever put in New Jersey streams.

Culver's Lake has been recently stocked with small-mouth black bass. About 1,000 of them were put in the lake in fine healthy condition. A lake near Madison has also been stocked with about 500 pickerel and perch taken from the Raritan Canal. During the latter part of next month Lake Hopatcong will be stocked with a large number of bass and pickerel.

Word has been received from Indian Territory, that arrangements are being made with Secretary of the Interior Wilson for the shipment of a large number of quail to New Jersey for propagation purposes. One thousand dozen of birds have been ordered by the New Jersey commission, and these will be distributed throughout the state. Quail have been very scarce in New Jersey during the last three years, but it is expected that within a couple of seasons they will be fairly plentiful again. The fish and game commissioners have been very active of late in the performance of the duties devolving upon them.

WATCHUNG AND VICINITY.

WATCHUNG.

The Christmas entertainment will be held in Wilson Memorial Chapel Christmas eve.

Work on the new sidewalk has been commenced.

Gerald Underhill's little boy, who has been very ill, is improving.

Ice on the Lake is ten inches thick, but no effort has been made yet toward harvesting it.

Dr. Chas. Moldenke will preach a Christmas sermon and give communion at St. Peter's Lutheran Church, Christmas morning, at 10:30.

To close the estate of Israel Coon, James A. Havey will sell at public auction next Tuesday, 29th instant, all personal property of the late Mr. Coon at the farm near Stirling. Sale to begin at 10 o'clock a. m.

SCHOOL ENTERTAINMENT.

In the point[illegible] enjoyment [illegible] Wednesday [illegible] entertainment [illegible] Watchung.

The buildi[illegible] crowded and the children acqui[illegible] themselves splendidly, and there was [illegible] pleasant an entertainment b[illegible] there.

At the co[illegible] the exercises handsome pre[illegible] presented by the pupils to Mrs. [illegible] and Miss Ada Grace Hi[illegible] popular Watchung teachers.

Singing by Sc[illegible] "Winter Time"
Welcome.....[illegible] Charles Wersing

LIBERTY CORNER.

Mrs. John Happy is quite ill.

We were pleased to see Frank Apgar with us on Sunday.

The annual election of officers in the Christian Endeavor Society will take place next Sunday night.

Owing to the stormy weather the attendance at the church has been very small for the past two Sundays.

Mrs. Emma Apgar has returned home after a two months' visit with her daughter, Mrs. Harry Acken, of Plainfield.

The infant son of Samuel Love, who broke his collar bone last Friday, is doing very well. Dr. F. L. Field is in attendance

Charles Wood, of Bedminster and Miss Elizabeth Schomp of this place, were united in marriage at the parsonage on Thursday afternoon, December 17 by Rev. C. B. Coudit.

Mr. and Mrs. Charles P. Bird celebrated the twentieth anniversary of their wedding day last Saturday evening by entertaining about seventy of their friends, who came from Bernardsville, Plainfield, New Vernon and Millington. The rooms were decorated with holly and evergreen. A bountiful collation was served. Professor Hammond added to the enjoyment of the occasion by the music furnished. Many handsome and useful presents were received by Mr. and Mrs. Bird.

Jersey Odd Fellows Must Retain Present Membership.

Lewis Parker, for 33 years grand secretary of the Independent Order of Odd Fellows of New Jersey, says that no action will be taken by the New Jersey Grand Lodge to expel saloonkeepers from membership. The law of the Sovereign Lodge excluding saloonkeepers and bartenders from membership was passed about eight years, and is being complied with in this State, but Mr. Parker, who is a lawyer, says that the law is not retroactive, and cannot be made to apply to men who were members of the organization at the time it went into effect.

Odd Wreck Near Somerville on Lehigh Valley

A serious freight wreck occurred Monday on the Lehigh Valley Railroad at Woodfern, nine miles from Somerville as the result of the shifting of iron bridge trusses loaded on a flat car. The beams slipped from their fastenings and swung crosswise of the car as the train was going around a sharp curve at a high rate of speed.

A freight train running in the opposite direction crashed into the projecting trusses with a force that derailed and wrecked the engine and piled up ten freight cars. The engineer and fireman of the wrecked freight had hairbreadth escapes, but were only slightly injured. Both tracks were completely blocked and traffic was stopped for several hours.

Woman Thrashes two men for Stealing her Wood.

A news item reads that for taking the law in her own hands and thrashing two men whom she caught at her woodpile, Mrs. Stephen Oler, of Woodbridge, N. J., on Monday paid $2.50 to a justice of the peace.

Her conduct was termed disorderly, for was not the thwacking administered with the thick end of an axe helve about 1 o'clock last Sunday morning, as the neighbors were greatly disturbed and could not sleep.

It was no concern of theirs if fagots had dropped one by one from the cordeu riches which Mrs. Oler had gathered. Perhaps the men did take a little wood, but was that any reason why the neighbors should be routed from their beds into carpet slippers and dressing gowns? They would not have disturbed the peace if the woman in a fit of anger had not chased them over a ten-acre lot, pounding them like rag carpets, while she applied titles to them which were painful to the ears of half a township.

Mrs. Oler had supposed that there were property rights vested in stove wood. She gathered fagots all last summer. Recently she observed that the sticks were disappearing from the pile in the back yard more rapidly than she was [illegible] she doused the lights [illegible] midnight when she saw [illegible] ing stealthily around the corner toward the woodpile. Mrs. Oler says that she saw two persons filling gunnysacks with her billets. She also stole stealthily around the corner of her cords.

There followed sounds similar to those heard on a frosty morning when ice is being broken in a horse trough.

"There, take that, will you!" cried a shrill feminine voice. "Will take my wood, eh? Drop that sack! Let up! Don't put out your eyes? Who cares!"

Quick, energetic strokes were heard, like blows delivered on rag carpets in the spring, and the two forms which had arrived with gunnysacks and hopes of cordwood disappeared with blackened eyes and mashed hats.

Mrs. Oler was still felicitating herself on the incident when she was summoned Monday morning before R. J. Wiley, a justice of the peace, at Woodbridge, to explain why she should not be punished for maltreating her neighbors, Joseph Williams and Morton Burke.

The men were in a battered condition; their eyes were ringed with black to such an extent that they looked as though they were wearing goggles, and their cheeks were crisscrossed with strips of court plaster.

"I had been missing my wood, Your Honor," declared Mrs. Oler, "and last Saturday night I saw these persons taking it."

"You had no right to beat them," said the justice, "for if they were stealing wood it was your duty to appeal to the court instead of taking the law into your own hands.

Mrs. Oler paid the fine with alacrity.

"While I don't agree with the stand which the justice has taken," she said, "it was worth several times the money to chastise the men. It was the greatest bargain I ever got. If the complainants are satisfied I am."

Willard Dramatic Co.'s New Rooms.

The Willard Dramatic Company of Plainfield has finally settled in its new rooms on East Front street. A good sized stage has been built at one end of the hall and the curtain has been hung. The painting of the scenery is being pushed along rapidly and it is hoped that it will be finished by the latter part of next week. The company held a reception Christmas night.

The Plainfield to be Finished.

Judge Kirkpatrick signed an order last Monday instructing Receiver James Smith, Jr., of the United States Ship building Company, to finish the ferryboat Plainfield in the Crescent Shipyard at Elizabethport, the Central Railroad to pay over the $37,500 remaining of the contract price; if it costs more to complete the boat the railroad people to pay the difference; if less the creditors of the corporation to get the benefit.

New Industry for Jersey.

A news item in the Elizabeth *Daily Journal* states that the Frederick J. Quinby Company, which has a unique distinction among the publishing houses of this country, for the beautiful and costly editions which it issues, and which is said to stand alone in the world in its revival of the ancient art of illuminating on parchment, will shortly abandon its plant in Boston, Mass., and remove to Orange, in this State, where a group of three fireproof buildings for its occupancy is to be erected at a cost of about $75,000. When completed the buildings will present the appearance of an elegant private establishment or some public institution, rather than of a manufacturing plant.

The plans of the company include several novel features. An art gallery, designed to be open to the public, and in which shall be hung many of the original drawings and paintings owned by the concern, embracing examples of the work of quite a galaxy of distinguished artists, both American and European, is one of these. A school for instruction in drawing, illuminating and binding is another. This will be a real innovation, no publishing house in the world having founded such a school. This one will be modeled at some extent after a famous school in England, where, however, only bookbinding is taught. The "Harcourt School" at Orange, will be the only one in the world giving instruction in illumination.

The decision of the Quinby Company to establish itself in Orange will deprive "the Hub" of not only the various departments of the publishing house proper, but of the Harcourt bindery, which it owns, where were bound the unrivaled Bibliomaniac sets of the works of Paul de Kock, valued at $50,000 each; the beautiful Quinby edition of Dickens, and the single volume of Napoleana, for which a well-known bibliophile paid $3,000. Although moderate priced books are bound at the Harcourt bindery, the principal output consists of costly and highly artistic volumes, practically all of the work being done by hand, and by methods based on those used in the making of parchment books in the old world c[illegible]

New Jersey people will be interested to learn that the Quinby Company will make a display at the St. Louis Exposition such as has never been attempted by any publishing house at home or abroad. The large space which has been allotted to it in the liberal arts building, will be utilized to enable the general public to observe how the costliest books in the world are made. Hand-made paper will be shown, both in deckels, in the form of pulp, and in finishing sheets, just as it is received from the only factory in America which manufactures it; printing will be done directly on parchment by means of old-fashioned hand presses such as Ben Franklin used in the eighteenth century; hand illuminating in gold, silver and bronze will be done on parchment precisely as it was done centuries ago by the monks of Southern Europe; and, finally, exquisite bindings in genuine French levant, will be "tooled" by hand, and the daintiest inlaying done by the Vicnese and Florentine methods.

The most interesting sight will be that of the making of a set of the famous de Kock books, similar to the Bibliomaniac edition, whose sets of 100 volumes are valued at $50,000 each. The set to be made at the St. Louis Exposition will be presented to the United States government for permanent exhibition and preservation in the Congressional Library, as the foremost exemplar of artistic and luxurious bookmaking in America down to the present time.

The New York Daily Tribune.

Of course, a great deal depends on your own taste in the matter of newspapers. If you want a publication that serves up so much gore and so many thrills in every issue, it is money thrown away to buy The Tribune. If, however, you are looking for a daily history of the world, carefully collated and sifted and presented in the most attractive form that the facts and the laws of good taste will permit, you cannot make any mistake in reading The Tribune every day. But The Daily Tribune is more than a continuous history. It contains special articles on nearly every subject which is supposed to interest intelligent and clean-minded people, to say nothing of the illuminating and instructive editorial articles and reviews of books, music and the drama. Just by way of experiment, why don't you invest $1 and get The Daily and Sunday Tribune by mail for a month? With The Sunday Tribune goes a handsome Illustrated Supplement equal to a ten cent magazine.

State Horticultural to Meet.

The twenty-ninth annual meeting of the New Jersey State Horticultural Society will be held in the Supreme Court room at Trenton on January 7 and 8. A program of much interest has been prepared.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

SHAPE OF BODY BURNED INTO FLOOR.

Mrs. Johanna Noonan, of Elizabeth was found by her nephew, James Lee, last Saturday night, dead, with her clothes burned off and the shape of her body burned in the floor. It is supposed she upset a lamp, and in trying to put out the flames her clothing caught on fire.

TRADING STAMPS WITH BEER.

T[illegible]ing stamps with drinks, has been introduced by the proprietor of a Jersey City saloon, who placed the sign in his window last Saturday afternoon. Before 6 o'clock the barroom was crowded and from the side door for half a block, was a line of men, women and children with cans, waiting their turn to be served.

PHOTOGRAPHS REQUIRED OF EMPLOYES.

The Public Service Corporation, of Elizabeth, has made a rule requiring motormen and conductors hereafter entering the employ of the company to have their photographs taken and placed in the company's bureau of records for identification purposes. The public Service corporation has about 2,500 motormen and conductors and cannot always keep accurate track of discharged employes.

ALTHOUGH DYING, KEEPS HIS PLEDGE.

Thomas Goldy, nineteen years old, who lived at Alton street and Kearny avenue, Kearny, N. J., was struck by a trolley car in front of his home Saturday night. His skull was fractured and he died in a Newark hospital. When he was picked up unconscious an attempt was made to force brandy down his throat. Before it could be done he opened his eyes and said—"I know I'm dying, but [illegible] liquor." The boy's father is employed by the government in Taunton.

PLANKING CAUGHT [illegible]

A peculiar acc[illegible] Burlington last S[illegible] delayed traffic on th[illegible] of the Pennsylvan[illegible] A low hanging pilot on engi[illegible]o, drawing a heavy line of loade[illegible]ight cars, caught under the planks in the crossing at Broad and High streets, which had been raised by the frost. The cowcatcher doubled under and ploughed through planks and ties, throwing the splintered timber in all directions. It was nearly an hour before the engine and crossing were repaired so that travel could be resumed.

TO FOLLOW WASHINGTON'S STEPS.

The North American Gun Club of Trenton has arranged to celebrate the battle of Trenton on Christmas eve and the next morning by duplicating the march made across the Delaware by General Washington. The club will go to Washington crossing early Christmas eve, and at 2 o'clock take up the march to Trenton.

On arriving at Trenton they will be met by a band and friends and escorted to a hall, where breakfast will be served. In the afternoon the club will have a meeting at which there will be speeches by leading citizens.

POISONED BY CHRISTMAS CAKES.

Four children of William Pross, superintendent of the Hawthorne Silk mills, Paterson, were poisoned last week by eating colored Christmas cakes and only urgent efforts on the part of a doctor prevented the death of the youngest child, William, aged 2 years. The cakes were bought by Pross' daughter in a local store. The four children ate the cake and vomiting and convulsions followed. A physician worked over the children and succeeded in saving them. Mrs. Pross would not give the name of the storekeeper from whom the cakes were bought. The physician says he is satisfied the children were suffering from arsenical poisoning.

REMARKABLE PIGS.

A farmer of Salem county is quoted as being responsible for the following story. Here it is. He owned a drove of ten fine blooded hogs. He turned them loose in the pasture last spring to shift for themselves. They had to be called back only for meals, and as the farmer was a weak voiced man, he hit upon a plan of pounding with a stick upon a board. The sound thus produced meant "corn" to the porcine intelligence. As soon as the winter apples were gathered from the trees they were turned into the apple or-

Wonderful Love

By Beatrice Fairfax

WHAT a wonderful thing is love? It demands so much and it thrives on so little.

Dante loved Beatrice with the purest and tenderest love from the moment his eyes first rested on her, a little maid of nine years. Through all his lifetime he saw her but once or twice, but his love never wavered. She was the dream, love of his existence, an inspiration to his best works, a never-fading vision of love and delight.

Materialists of the present day scoff at love at first sight, but Dante, one of the greatest men the world has ever known, fell madly in love the moment he saw the lovely child Beatrice.

Think of the endurance of a love that subsisted on nothing for all those years, and then think of all that we moderns demand of love. We are exact-ing, and, alas! we are unforgiving. Our faith is not always strong beyond doubt, and we are too prone to be influenced by appearances.

Dante saw Beatrice through the pure crystal of love's eyes; he knew her at once for the guiding star of his life, and though the star swung in its own orbit far away from his, he worshiped it from afar and lived his great and noble life serene in the thought that even though the star was not for him, life was fuller and more beautiful because of its gentle radiance.

And even if we cannot always have the one we love, are we not ten thousand times better off for having loved?—New York Journal.

Man, Irresistible Man

By a Woman Cynic

HAND now for the man who feels that he is so irresistible that every woman is at his feet the moment she meets him. He isn't uncommon, alas; he is all too numerous. He is afraid to be more than half-way civil to a girl for fear she may misinterpret his attentions.

If a girl makes a pretty little complimentary remark to him he first swells up with conceit and then instantly collapses through fear that she is after him.

He keeps a guard on his every look and action for fear the girl will think he is in love with her. He does not, of course, know that in all probability the girl would not have him if he were to go on his bended knees and beseech her ever so hard.

And such is masculine contradictoriness that if he did know it he would very likely turn around and fall in love with her.

I remember once meeting a man of this class. He was showering his valuable (?) attentions upon a pretty little rose of a girl. All went well until some teasing friend remarked on the friendship, taking it for granted that the gay Lothario's attentions were serious. At once his fears were aroused and he exclaimed: "I assure you there is nothing in it. She is a sweet girl and I am willing to do all I can for her to give her any pleasure I can, but this dear self—never."

The fact that the girl married another man a week later did not in the least disturb his colossal conceit. He simply thought she married through pique and blighted affection, and for some time spoke of her as "poor little Mary."

It is well for all men to bear in mind that a sensible girl does not look on every man she meets as a possible husband.—New York American.

Women Are of the Ruling Sex

By Alice Bentley

W. R. STEAD says that there are only three privileges of my sex—namely, that in going in or out of a room the woman goes first; that she is served before man at a meal (a statement which is quite wrong, by the way, only one woman at table having that distinction, the one on the host's right; the other guests, whether male of female, in every household above mere middle class being served in regular rotation), and that in a train a man gives up his seat to her. I Stead many more. Our bills are paid for us—when our male [illegible] any money to pay them with; we are made love to, which may [illegible] is distinctly enjoyable; we are admired, which is no doubt [illegible] the less gratifying to us. In spite of the preponderance of our sex [illegible] of us are so pleased with ourselves that we have no desire to visit [illegible] in the neighborhood of the Mountains of the Moon; and considering [illegible] can do anything we like in this year of grace, and that we rule all your [illegible] as it is, dear Mr. Stead, why call us "despised" and rail at the world for not making us "supreme," when it had never occurred to us that we were anything else?

Will Russia Rule the World?

A Serious and Urgent Warning---But the Problem is So Big That the Small Localized Mind Does Not See It

By John Brisben Walker

WE are probably on the eve of the greatest war the world has ever seen. I am opposed to war; I do not believe in war; I hope there never will be another war. But if there can be a just war, it is called for now. Either America and Southern Europe must fight Russia at this time or concede to her all of Asia.

Few people understand how insiduously Russia has been moving her forces up against the barriers of Persia, India and China. Year after year Russian army posts have been advanced, reinforced, built into large commands, until to-day Russia is ready to attack not China alone, but along her entire frontier line in Asia, and is probably in a position to capture China, India and even Persia, unless a determined front is put up by the rest of the world.

It is astounding the lethargy which has been exhibited toward the occupation of Manchuria. Every one in the least familiar with the situation has recognized that once Russia became intrenched in Northern China, with the Trans-Siberian Railroad completed, her battleships in sufficient numbers, it would be almost impossible to dislodge her.

She came into Manchuria deliberately, she never had any intention of leaving it, and she is quite ready today to begin battle.

During a discussion with a Russian who was visiting me several years ago, I asked the question, "What part of China does Russia want?" He replied, "Russian wants no part of China." Then added after a moment, "She wants it all."

The Manchurians and Mongols furnish splendid fighting material, at least so far as private soldiers go. They can live on almost nothing, make long marches, sleep on the ground, obey orders and learn to handle firearms with accuracy. In other words, they have all the elements of first-class private soldiers.

The Russians have the officers ready to put over them. It will not be necessary for Russia to move vast numbers of men from Europe. Russia is now established, its forts built, its navies are in the eastern harbors of Asia, the officers have arrived, and vast quantities of stores and arms have been shipped in. It only remains now to drill the natives in order to organize an army large enough to sweep down on Pekin and over Northern China.

Whence will the force be brought to combat the army that Russia has even now on the ground? This is estimated in the daily papers at 80,000, with another 100,000 comparatively near by in reserve. The brave little Japanese have neither the numbers nor the wealth to combat a nation such as Russia. The Chinese are unorganized. The English will have enough to do to defend India.

Meanwhile, French, German, English and Americans are too busy with affairs to reflect that if Russia adds another 400,000,000 to her subjects, and then, with her low-priced labor, builds armaments, she will be a threat to the rest of the world. Even America, vain as we are of our strength, might well find occasion in the future to regret our present indifference.

Manchuria is but a stepping-stone to China. China captured, the balance of power is forever determined. Napoleon said that in a hundred years the world would be either Cossack or Republican. We have been so intent on our own little corner of the world that we have failed to reflect what a Cossack world would mean.

The Manchurian question is the most tremendous matter before the world to-day, but it is all so distant and Russia is doing her will so quietly that we are like children without comprehension of what the future will hold.

CHICAGO STRIKERS RIOT

Police Disperse Mobs---To Protect Funeral Parties.

RICH AND POOR SUFFER ALIKE

Coroner's Physician Has to Ride on an Undertaker's Wagon to Protect His Wife's Body on the Way to the Cemetery—Livery Drivers and Relatives and Mourners Insulted.

Chicago, Ill.—The bodies of Judge Jonas Hutchinson, of the Superior Court, and Frederick R. Otis were carried to cemeteries in the plain black wagons of undertakers, position and wealth being unable to secure more fitting conveyances, owing to the strike of the livery drivers. Neighbors came to the relief of the families by offering private vehicles for the use of the mourners.

The strikers carried on their fight against the dead, and in several cases the police were called upon to protect funeral parties. In one case there was an actual riot.

Livery owners met and decided to hire an attorney and take steps to hold the city responsible for any damage done by mobs.

Policemen clubbed a crowd of 300 or 400 persons, many of them strike sympathizers, while a priest was saying mass over the body of Anna Vleck, who is said to have been murderd by her husband. The police were forced to charge the crowd to prevent it from committing violent assaults upon Anton Liuhart, undertaker, who drove the plain black wagon in which the body was taken to and from the church.

When the crowds had been dispersed and the mass was over the policemen acted as pallbearers. The body of the woman was placed in a wagon and driven rapidly to the Bohemian National Cemetery. The children were not allowed to go to the cemetery to see their mother's burial.

A funeral car, instead of a hearse, accompanied by a police guard, was utilized by Joseph Blake, an undertaker, to circumvent striking pickets, from whom violence was feared, at the funeral of Elsie Keefer, the one-year-old daughter of Joseph Keefer, President of a tea company.

Livery stable owners and undertakers say they can hire all the men they need to fill the place of the strikers, but they dare not send out their vehicles for fear of violence and riot.

While strike sympathizers surrounded the home of Dr. O. W. Lemke, Coroner's Physician, the doctor told his friends that he would drive the hearse that bore the body of his wife to Waldheim Cemetery.

For the first time in years a surpliced choir went from a Catholic church to take part in [illegible] at a private residence. [illegible] bility to hire a hearse [illegible] the funeral of the father [illegible] States Attorney Crowe was held in the family residence instead of church. Father Gallighan took the entire choir to the house and conducted mass there.

Permission to move patients from their homes to hospitals was denied in several instances by striking drivers. John McLaughlin and Frank Kummerow were summoned by emergency calls to remove Catholic clergymen to hospitals. They sought permission from the strikers, but were denied. Mr. McLaughlin, accompanied by a clerical associate of a priest, finally drove the carriage himself. Although some of the pickets threatened violence, none was attempted. Mr. Kummerow took his patient to the hospital, accompanied by the attending physician and a priest.

A. B. Perrigo, who has an ambulance service, says pickets have surrounded his place and prevented his answering calls to the relief of those needing surgical and medical attention.

Stablemen in many of the barns quit work. Few of them are unionized, but they fear to incur the displeasure of organized labor.

HEINZE GUILTY OF CONTEMPT.

Ordered to Pay a Fine of $2000 For Ignoring a Federal Court's Order.

Butte, Mont.—Judge Beatty, in the United States Court, ruled upon contempt proceedings instituted against F. A. Heinze and other officers of the Montana Ore Purchasing Company, for ignoring the order of Judge Knowles, of the Federal Court, of Montana, in permitting the representatives of the Butte and Boston Mining Company to inspect the Michael Davitt mine through the workings of Rarus mine, owned by Heinze, to see whether Heinze had obeyed the injunction against working ore from the Michael Davitt mine. The court finds that Heinze and J. H. Trerise and Albert Frank, two of his superintendents, were guilty of contempt of court. He ordered that unless they complied with the order of inspection forthwith they be fined: Heinze, $2000; Trerise, $500; Frank, $500 and stand committed until the fines are paid.

Stockholders Must Pay Up.

Stockholders of the defunct Indiana National Bank, at Elkhart, Ind., will have to put up amounts equal to their first investments to pay off the obligations.

Bondholders Make Appeal.

English bondholders have appealed to President Roosevelt not to allow Panama to shirk her share of the Colombian bonds.

Arraigned For Bribery.

Senator Dietrich was arraigned in the United States Court, at Omaha, Neb., to answer to the indictment of bribery and conspiracy in accepting a bribe. He pleaded not guilty and the trial was set for January 4.

Lynched in Tennessee.

Joe Drake, a young negro, was taken from the Lauderdale County Jail, at Ripley, Tenn., and lynched for the murder of Chester Conner, a white man, at Asiport.

MURDERS WHOLE FAMILY

Machinist Kills His Wife, Three Children and Himself.

Three Little Ones Shot to Death After a Frantic Struggle For Their Lives.

Cleveland, Ohio.—After writing and mailing a letter to a friend telling him that he intended to murder his family, Roscoe W. Derby, a machinist, killed his wife and three children, and then committed suicide. The crime was one of the most deliberate ever committed in this city.

Derby, who was thirty-nine years of age, lived with his family in the Albion Terrace, on Barbara street. To all appearances the family was in comfortable circumstances. Derby had work and earned good wages.

The crimes were extraordinary in their thoroughness and there was, evidently, no mishap in the enactment. The wife was killed first, while sleeping at her husband's side in bed; two of the children were killed as they ran hither and thither through the house in the darkness of early morning endeavoring to escape their merciless parent. The third child was killed in its bed after the elder brother and sister had been killed. The dead are: Roscoe Derby; his wife, Della; Harold, aged eight; Alice, aged seven, and Thomas, aged five.

Derby had been out late one night. When he got home, his wife and he talked with a neighbor who had been calling, over the approaching festival. Derby seemed pale and nervous. Shortly after his arrival at home the neighbor left and the Derby family went to bed.

The crime is believed to have been committed about 4 o'clock in the morning. Mrs. Derby was shot to death in bed, two bullets [illegible] been fired into her forehead, a [illegible] rd, probably fired after the cl[illegible] been exterminated, in the t[illegible] neck. Mrs. Derby probably [illegible] killed during sleep, the expres[illegible] r face showing no sign of [illegible] and it was calm and peaceful.

Two of the ch[illegible] wever, probably had a struggl[illegible] eir infuriated parent, because [illegible] been awakened by the nois[illegible] revolver being fired and sough[illegible] ape him, but without avail. [illegible] body was found lying in [illegible] blood in the kitchen, and tha[illegible] in the dining room with her [illegible] e floor and a bullet in her bre[illegible]

After the ext[illegible] y crimes had been committe[illegible] erpetrator of them went int[illegible] droom where his wife had [illegible] d, and lying down at her sid[illegible] bullet into his own brain, and [illegible] is wife's side.

The coolness [illegible] derer was indicated by the [illegible] ch of his victims was shot [illegible] e head. In

STARVED FO[illegible] CHILDREN.

Husband in Jail [illegible] Support, Mrs. Flaherty D[illegible] e Family.

St. Paul, Minn.—Mrs. Geneva Flaherty, of Duluth, while on her way to Mauston, Wis., her brother's home, died on a Northern Pacific train, as it was entering the city. The Coroner's verdict was that death was due to starvation and exposure.

Mrs. Flaherty was accompanied by four children, whose ages ranged from fifteen months to ten years. Her husband is in the Duluth jail on a charge of non-support, and it was while struggling against ill health and poverty to provide foor for her offspring that she starved herself to such an extent that death followed.

CUBA'S NEW TARIFF.

Increase of Over $2,000,000 Expected in Revenue.

Havana, Cuba.—President Palma issued a proclamation declaring that the reciprocity treaty with the United States would be in force after December 27.

A member of the Senate Committee on Tariffs says the report of the committee will provide an entirely new system of revenue. If it is carried, it is expected that it will provide an increase of over $2,000,000 in revenues above the loss due to the reciprocity treaty with the United States.

DISCHARGED ITS MINERS.

Four Thousand Bituminous Men Refuse to Work at the Old Scale.

Altoona, Pa.—The Somerset Coal and Coke Company, whose miners are on strike, paid off 4000 of the men and discharged them, because they refused to obey the order of the company to go back to work on the old conditions. All the men discharged had obeyed the order of the United Mine Workers to go on strike. Only four of the miners of the company are working, and they are small ones.

Frederic R. Coudert Dead.

Frederic R. Coudert, the distinguished New York lawyer, died at his residence, at Washington, D. C., of heart disease, in his seventy-second year.

Murderer Mutilated Body.

Sarah Martin, of Cherry Hill, was murdered and her body mutilated in a sailors' lodging house, at Water street and James Slip. Her slayer escaped.

Oil Man Murdered.

Ernest Morgan, a well known oil man, of Jacobsburg, W. Va., was murdered in the streets of Pine Grove, five miles from his home. His body was frozen stiff, and his head and face were covered with wounds.

Alexander Haff a Suicide.

Alexander Haff, former superintendent of foreign mails in the New York Postoffice, who was arrested four months ago on the charge of stealing from letters, shot and killed himself.

NINE KILLED IN WRECK

Accident on St. Louis and San Francisco Railway.

SWITCH HAD BEEN LEFT OPEN

The "Meteor," Going at Full Speed, is Thrown From Track Through Negligence of Freight Crew — Derailed Train Plunges Down an Embankment—Wreckage Takes Fire.

Kansas City, Mo.—The Meteor, the fast train on the St. Louis and San Francisco Railway, was wrecked at Godfrey, fifteen miles south of Fort Scott, Kansas. The train ran into a switch, and all except the sleeper was derailed and turned over.

Nine persons were killed and thirty-one injured. The dead and injured were taken to Fort Scott.

The dead are all Western men. One man, whose body has not been identified, was thrown sixty feet into a neighboring cornfield. Two men, one from Oklahoma and the other from Arkansas, were fatally injured. Sixteen persons, including Henry M. McDonnell, of Lodi, Ohio, were seriously hurt, and fifteen others were slightly injured. Most of the injured were badly burned, as well as being maimed.

The wrecked train was made up of two baggage and one mail car, a smoker, two chair cars and a sleeper. When the train reached Godfrey it was running at full speed to make up time. The crew of a freight train that had preceded the Meteor left the switch open and the passenger train jumped the track and rolled down a slight embankment. The sleeper turned over, and so fast was the train running that the engine and the forward baggage car landed nearly sixty feet off the roadbed before the train stopped. The sleeper remained upright and none of the passengers of this car was injured.

The baggage cars were wrecked and the smoker was badly damaged. Five of those killed were in the forward end of the smoker and four of them were killed instantly. A news agent, who was badly mangled, died on the relief train that carried the dead and injured to Fort Scott.

Engineer B. A. Dewees, of Fort Scott; Conductor Roy, of Topeka, and Fireman Bishard, of Fort Scott, were killed outright, and Express Messenger John Bell, of Kansas City, was seriously injured. Others of the crew, and almost every passenger on the train, except those in the sleeper, who escaped with a severe shake up, were injured, some of them seriously.

It was some time before those of the crew escaping injury were able with [illegible] the passengers who were [illegible] the injured. A wrecking [illegible] physicians did not leave [illegible] until several hours after the wreck occurred.

The responsibility for the wreck is laid at the door of a brakeman of the freight crew who failed to flag the passenger train. The engine on the freight had become "dead," and the crew was ordered to remain on the main track, and to turn the switch for the passenger train, then about due. The brakeman was ordered to flag the Meteor, but is alleged to have neglected to do so.

In the crash the baggage car telescoped the engine and landed in a cornfield, while the smoker and the two chair cars were piled in a mass on top of the engine. Most of the injured were in the chair cars, which took fire soon after the wreck occurred.

PANIC AT NEW YORK FIRE.

Battalion Chief Loses Life and Damage is $250,000.

New York City.—The famous "two nines" fire alarm, summoning more fire apparatus than any other alarm provided for by New York's Fire Department, was sounded for a terrific fire, which destroyed the six-story factory building of the Herrmann Furniture and Plumbing Cabinet Works, in Mott street, and the four-story varnish factory of the firm, run under the name of the H. Herrmann Lumber Company.

A quarter of a million dollars' damage was done. Battalion Chief Martin Coleman perished in the fall of two great walls of the factory.

There was a frightful panic among the Italian inmates of the swarming front and rear tenements opposite and in the rear of the burning buildings.

The fire started on the third floor, and when the firemen arrived the first, second and third floors were in a blaze. The third, fourth and fifth alarms were sent in rapid succession, and about an hour after the fire started the "two nines" alarm was sounded.

MURDERERS CONVICTED.

Sentences Range From Six Months to Seven Years in Prison.

Kishineff, Bessarabia.—Two Russians, Goetschin and Marosleik, who have been on trial for murder as the authors of the massacre of Jews here last spring, were sentenced to seven and five years' penal servitude respectively.

Twenty-two other persons involved in the massacre were sentenced to terms, ranging from one to two years each. One person was sentenced to six months' imprisonment, and twelve were acquitted. Forty-eight civil actions brought against the prisoners were dismissed.

The costs of the prosecution must be paid by the convicted persons.

Negro Confesses Crime.

Jim Lucas, one of the three negroes under arrest for entering St. John's Orphanage, at Wheeling, W. Va., and brutally attacking Sister Alma, confessed and implicated Flam Houaker and Tom Easton.

Negroes to Be Disfranchised.

The Attorney-General of Maryland has prepared a bill to be introduced in the Legislature of that State providing for the disfranchisement of about 30,000 negroes.

JAPAN REPLIES TO RUSSIA

Czar's Foreign Office Looks For a Peaceful Solution.

Negotiations Resumed at Tokio—Government Ready For Hostilities — War Insurance Rates Increased.

Tokio, Japan.—Japan's reply to Russia was handed to Baron de Rosen at a conference between the Russian Minister and Foreign Minister Komura, in the Russian Legation.

Japan's reply is in no way in the nature of an ultimatum, but she asks Russia to reconsider certain essential points in her reply to Japan. Baron de Rosen is now sufficiently recovered to resume the negotiations.

St. Petersburg, Russia.—Officials of the Foreign Office do not share the pessimistic feeling regarding the situation in the Far East which now seems to be general. They say there is no reason to despair of a peaceful settlement of the difficulties over which Russia and Japan are at variance.

London, England.—A special dispatch from Tokio was the first intimation the Japanese Legation here received that Japan's reply had actually been communicated to Baron de Rosen. The Legation later communicated the details of the reply to the British Foreign Office, but refused to divulge the details. The Legation admitted that in general terms the dispatch from Tokio covered the situation, which a Legation official characterized as being "quite grave," but one from which no decisive developments could be expected immediately.

Lord Rothschild, while declining to venture an opinion as to the outcome of the Japanese-Russian crisis, said:

"One of the most important factors is whether America will seize the opportunity to press her claims for open ports in Manchuria. If she does so it would certainly help a peaceful solution. I have heard of no suggested loans either Japanese or Russian. What they would have to do in case of war is a hypothesis I do not care to discuss."

Japanese-Russian war risks at Lloyds' have risen to thirty-five guineas per cent. to the end of January, and forty-five to the end of February. Cargo insurance jumped from five to twenty shillings. The owners of two cargoes already half way to Japan found difficulty in effecting insurance, even at the latter rate.

RISKED LIFE FOR FOREMAN.

Son of a Wealthy Man Plays Role of a Hero.

Colorado Springs, Col.—Donald Ford, son of one of the wealthiest mine owners of this city, risked his life by entering a precipitation tank in the Telluride reduction [illegible] to drag out the body of How[illegible] under whom [illegible] Both were [illegible] hours. Had he remained [illegible] half a minute longer [illegible] killed. Both men were [illegible] other employes, who choppe[illegible] in the bottom of the [illegible] ward, who is nineteen years old, is studying to be a mining engineer, and, determined to master all branches, secured employment in the mill.

ATTACKED CONGRESSMAN.

Man Who Used a Pistol Gets Five Years in Prison.

Tallahassee, Fla.—Walter L. Taylor, after being acquitted on four indictments, charging him with assault on Congressman Lamar, was convicted on the fifth of assault with intent to murder. Judge Malone sentenced him to five years in the State prison.

Soon after Lamar, then Attorney-General, was nominated for Congress, Taylor accused him of having said that he stuffed a ballot box in a primary and presented Lamar a pistol, demanding a written retraction. Lamar took the pistol from him and gave it to Taylor's uncle, who returned it to him, whereupon Taylor again drew it on Lamar and compelled him to sign the retraction.

ARMY REORGANIZATION ORDER.

Some of the General Officers Object to Their Assignments.

Washington, D. C.—As a result of objections made by some of the general officers assigned to divisional and departmental commands under the geographical reorganization made last week, there will probably be some reassignments. The officers who have raised the objections say that they were not consulted with reference to changing their headquarters, and they feel that they are entitled to some consideration in this respect.

The changes to be made will be merely to meet the personal wish of these officers, and will not affect the geographical lines of divisions and departments established in the reorganization order.

Seven Years For Teller Edge.

James M. Edge, absconding note teller of the First National Bank, of Paterson, N. J., was sentenced by Judge Kirkpatrick, in the United States Court, at Trenton, to seven years, without hard labor, in the Essex County Penitentiary.

Murder Jury Disagrees.

The jury disagreed in the case of Mrs. Cora Weeks, on trial at Bedford, Ind., charged with killing Mrs. Susanna Ireland, her aged mother. Joseph Weeks, husband of Mrs. Weeks, is awaiting trial for complicity.

Kills Wife in Church.

L. W. Horn, a farmer, shot and fatally wounded his wife in church, at Centreville, Ia. Jealousy is the supposed cause. Horn fled, pursued by a sheriff and bloodhounds. His body was found at Sedan later with a bullet hole in the head.

Power House Boilers Explode.

The boilers in the power house of the transit company, at St. Louis, Mo., exploded, killing one man, injuring a dozen more and wrecking the building.

PROTEST OF COLOMBIA

Foreign Minister Denies American Rights in Panama.

Declares That the United States Departed From All Precedents—Foreign Powers Fully Approve Our Course.

Bogota, Colombia.—Dr. Luis Carlos Rico, Minister of Foreign Affairs, has cabled General Reyes, at Washington, under date of December 16, as follows:

"If the explanation which the United States Government has given to the press is of a diplomatic character, answer clearing the following points:

"By the treaty of 1846 the United States did not acquire control over inter-oceanic transit, but entered into obligations by which, for compensatory favors, it guaranteed the neutrality, property and sovereignty of the Isthmus, the sovereignty being indivisible. If the United States Government prevents the Government of Colombia from subduing the rebels, then it ought to submit them to Colombian authority.

"The United States has never protected Colombia against foreign invasions. Whenever that Government has interfered to prevent the interruption of traffic, it has been because of the rights granted or at Colombia's request. Only in this instance has it interfered, on its own initiative, with the evident object of protecting the secessionists on the Isthmus.

"If the guarantee of neutrality were to be looked upon as a privilege it would prevent the sovereign government from keeping order on the Isthmus, which is against the principles of all governments.

"The protocls of 1879 did not grant any new rights to the United States, much less the right of dominating this territory. The Hay-Herran Canal treaty did not modify the obligations which the United States contracted by the treaty of 1846 to guarantee the neutrality, sovereignty, and property of the Isthmus. When this treaty was disapproved, no new propositions were made.

"The orders given by the United States Government to its Navy have helped to favor the secession movement, and Colombia was at peace when this movement was begun.

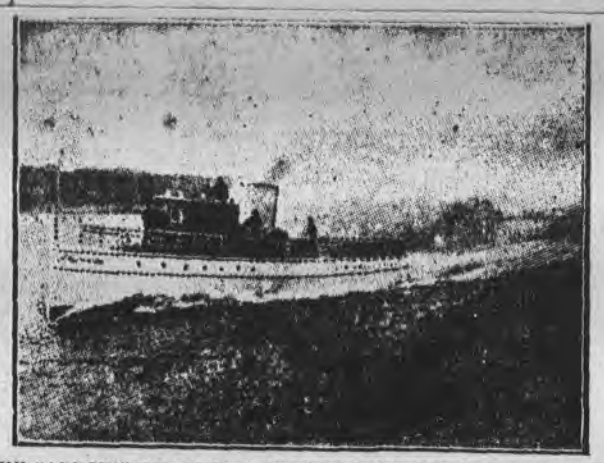
"The conduct of the Washington Executive has been and now is favorable in every way to the rebellion, but not to the maintenance of order, which is contrary to the principles and antecedents of the United States Government and to the police established by it during the American [illegible] sion.

Washington, D. [illegible] statement made [illegible] pean Ambassador [illegible] United States [illegible] [illegible] [illegible]

AUTO BOATS--- THE LATEST FAD

Water Toys That Are Expensive, But Can Fly.

ONE of the latest fads with those who can afford such costly toys is to own and race an "auto boat." For some time these dainty little machines have been very popular in France, where their number is legion, and there are many of them owned by Englishmen, but it is only recently that they have become popular here.



THE "ARROW," CHARLES R. FLINT'S FAMOUS YACHT, THE FASTEST BOAT ON EARTH, MAKING THE WORLD'S RECORD OF FORTY-FIVE MILES IN ONE HOUR.
—Collier's Weekly.

The fastest of these boats, so far as the records show, is the Rollo, owned by M. Giraud. It was built by a firm that has become famous for turning out fast automobiles. The motor is of twenty-four horse-power, just as is used in road machines, but with certain modifications that adapt it to driving a boat. The canoe into which the motor was put is thirty-nine feet three inches in length and four feet three inches beam. In model the boat is almost wedge shaped, the entrance being fine, the run almost straight, and aft the hull is flat on the bottom to prevent squatting when running fast. The hull is constructed very lightly and the deck is of the thinnest mater

The Rollo Club is the leading organization for the sport in France, and when M. Giraud had finished his boat he [illegible] to that club to manage a [illegible]. The first trial was at [illegible] and several boats of high [illegible] against the new- [illegible] the race. She [illegible]s in one hour [illegible]ty-one seconds, [illegible] miles an hour. [illegible] did better than [illegible] in the races of the [illegible] Voile de Paris, she made

raced was eight and one-half knots, and the Napier's time was twenty-four minutes forty-four seconds, averaging 20.6 knots an hour or 23.7 statute miles. Against the Napier was the Beadle, thirty feet long, driven by a fifty horse-power eight-cylinder gasoline motor and a Thornycroft boat, thirty feet long, driven by a twenty horse-power four-cylinder gasoline motor.

So far there have been no boats that have done as well in these waters as the Napier and Rollo.

Mr. Charles R. Flint's instructions to his yacht builder were terse and to the point. When the man came prepared with plans and specifications, Mr. Flint waved them aside.

"I want the fastest boat afloat," he said. "I do not care how you build it or what it will cost. Build me a craft that will break the speed record."

When the Arrow was delivered to Mr. Flint a number of months later, the magnate took her out for a trial trip over a measured mile course. The lithe, slim, low-lying craft with its raking, squat funnel and sharp bow darted through the water like a greyhound. She seemed fairly to leap from one wave crest to another. The torpedo boat stern was smothered in foam, and against the knife-like edge of the bow curled an enormous "bone"

MR. EDGE'S BOAT APPEARS ON THE LEFT; MR. BEADLE'S ON THE RIGHT.

82.30 statute miles in two hours forty-one minutes thirty-eight seconds, which is a little better than twelve of record[illegible]. Many experiments [illegible] Vail; clerk of the [illegible] motor, and its [illegible] etc. [illegible] by: master gradually [illegible] sidered [illegible] ved, so that in subsequent race[illegible] tail K[illegible] Rollo showed a speed of fourteen [illegible]s an hour and then a speed of 15.67 miles an hour.

In a long distance trial the Rollo ran 200 miles at an average of thirteen miles an hour, and once in a speed trial over a measured mile on the Seine, with the tide in her favor, she skipped along at the rate of twenty-five miles an hour. This is a remarkable performance for a boat of the size of the Rollo and having such a small powered motor. This boat has caused many others to be built, and they have been so successful that next season they will be seen in these waters.

In England Alfred Harmsworth, who is an enthusiastic automobilist, recently offered a cup for international races with power boats. It was the intention of two Americans to send boats across the ocean to try to capture the trophy, but they could not be got ready in time, so the idea was postponed for a year; but when the races are held next season this country will be represented. Three boats raced for the cup, and the winner was the Napier.

which wet the forward deck with spray. Her owner stood aft with watch in hand. In affairs of commerce he was always cool and collected. His deals were executed with the sang froid of a Napoleon.

Now he was transformed. His usually imperturbable face revealed an intense eagerness not at all characteristic of the man. He alternately eyed the second hand of his watch and the red-painted buoys marking the course. As one after another was passed he laughed aloud. Then when the last buoy fixed astern he clapped his hands in ecstasy of triumph.

"Forty-five miles an hour!" he cried. "That beats the record!"

When Charles R. Flint stood on the deck of his boat and saw her travel faster than any other craft had traveled before, he typified in himself the spirit that seems to be born in man—and especially in Americans. The desire to do something a little better than any one else has done, to move a little faster by train or boat, in running or swimming or driving, is inherent in a great many human beings.

Americans consume 36,000,000 pounds of Chinese teas, 31,00,000 of Japanese and about 4,000,000 of Indian.

THE NAPIER LAUNCH OF S. F. EDGE, ESQ.

owned by S. F. Edge. This boat was built from designs by Linton Hope. She was forty feet long and was driven by a seventy-five horse-power four-cylindered gasoline motor attached to

According to the Mexican Journal of Commerce seventy per cent. of $500,000,000 capital invested in Mexico by Americans has gone towards building railroads.

THE NITRATE SUPPLY.

Its Exhaustion a Very Remote Contingency.

A good deal has been written about the imminent exhaustion of the Chilean nitrate beds which to-day supply the world with the nitrates for commerce, fertilizers and expensive manufactures. The annual consumption of the world is placed at 1,500,000 tons. The Chilean Government has a deposit which is estimated at 30,000,000 tons. There are in addition known private deposits that are estimated to contain 35,000,000 tons. Making allowance for increasing annual consumption to meet the needs of the world, which are always growing, owing to increasing population and exhaustion of virgin soils, thirty or thirty-five years will see an end of the visible supply. Of course new deposits may be discovered at any time, or the known processes of extracting nitrogen from the air by electricity which are now in an experimental stage, may be perfected, or the use of "nitragen," that is, the cultures of soil bacteria, which extract nitrogen from the air and deliver it to the roots of plants, may become universal. In any event the culmination of the Malthusian theory that the world will eventually starve to death for want of nitrogen in the soil to grow cereals will not come within the present generation. Science before this has performed seeming miracles, if those two words may be linked, and scientific investigators are especially active in pioneer work along the verge of the great unknown.

WISE WORDS.

Many men owe the grandeur of their lives to their tremendous difficulties.—C. H. Spurgeon.

Man's flesh is not eaten, his skin is not put on; what can he be without a pleasant tongue?

Give a swift horse to him who tells the truth, so that as soon as he has told it he may ride and escape.

Had it been with the beard that wisdom dwelt, men would have taken counsel with the goat.—Turkish Proverb.

Write your name in kindness, love and mercy on the hearts of those who come in contact with you, and you will never be forgotten.—Chalmers.

We are in danger of looking too far for opportunities of doing good and communicating. In reaching for rhododendrons we tramble down the daisies.—Marion Harland.

Let not future things disturb thee, for thou wilt come to them if it shall be necessary, having with thee the same reason which now thou usest for present things.—Marcus Antonius.

Let not the pressure of business, nor the allurements of pleasure, nor the tendencies of the flesh, nor the drowsiness of the spirit keep thee from thy morning interview with the King of kings.

The all-embracing knowledge of God associated with the act of giving existence is a solemn pledge on His part that the existence given shall prove a final blessing to its possessor.—Thomas B. Thayer.

When goodness separates itself, it is only half good. A virtue which is not active is in danger itself of turning to vice. Jesus was not too good for publicans and sinners. How many of His disciples are?—J. F. Dutton.

American Made Dolls.

There is a big factory in the United States now—in New Jersey—which makes dolls, very perfect and enduring ones, of sheet steel. They are light and strong, so strong they cannot be broken even if stepped on. Their smile is the kind that will not come off, for their complexion is of baked enamel, not to be rubbed or scraped away. They are startlingly lifelike, these babies from New Jersey, for they have ball and socket joints, even for their ankles, and strike all sorts of childish attitudes. The hands can be fitted with gloves, and the eyes are removable, to accommodate little girls who have decided preferences as to brown eyes or blue. The hair can be removed for a shampoo or a change of complexion. They will talk, even, if one cares to pay for a phonograph attachment. Altogether, this pioneer American doll is characteristically smart and good looking.—Good Housekeeping.

The Death Substitute.

"I had in my employ," said one of the missionaries to China, "a very valuable Chinese servant, upon whom I leaned with implicit confidence. One day he came to me and said: 'I shall be obliged to ask you to find somebody to take my place, as in the course of a few weeks I am to be executed in place of a rich gentleman, who is to pay me very liberally for becoming his substitute.'

"I asked what possible inducement there could be to forfeit his life for any amount of money. He replied: 'I have an aged father and mother, who are very poor and unable to work, and the money I am to receive will make them comfortable as long as they live. I think it is my duty to give up my life to accomplish this.'"—V. G.

The Telephone and the Tramp.

A striking instance of the value of the rural telephone to the farmer in adding to the safety of his family during his absence from home developed at New Castle recently. An unknown tramp was terrorizing the neighborhood near New Lisbon. He called at farmhouses and demanded food, and when refused threatened to kill the family where he called. The women of the neighborhood became frightened and telephoned to the Sheriff. Sheriff Christopher went to the neighborhood and by aid of the telephone system through that section traced the tramp and finally overtook him. The tramp is now in jail.—Orleans (Ind.) Herald.

THE CHANGE WAS MADE.

But It Was the Big Firm That Paid Increased Rent.

Jules Huret, the French journalist, who has announced that Americans make love too coldly, is the son of a rich and astute merchant. M. Huret likes to tell a story in illustration of his father's fine business sense.

"My father, years ago," he will begin, "occupied a small shop on the ground floor of a large building. He was then at the beginning of his career, and his income was somewhat paltry. He was, however, an economical man.

"A clothing firm occupied all of the building except the portion held by my father, and this firm had arranged with the proprietor that they should have that portion, too, whenever they were ready to pay the rental demanded.

"Well, one day they decided to take in my father's shop, and their manager accordingly called on him, and in a friendly way told him that he had better look about for another stand at once, since his firm would be taking over the shop in May.

"'But I don't want to move,' said my father.

"'Well, but you'll have to,' said the manager. 'You are a poor man, and my firm is rich. We can afford to pay three times as much rent for this floor as you can. Now, if you'll leave quietly, without making any fuss, we'll help you to find a new place. But, if you stay, you'll have to pay a rent that will beggar you—simply beggar you, remember.'

"'Give me,' said my father humbly, 'two weeks to think this matter over.'

"'Well and good,' the manager replied, and two weeks later called on him again. My father was all smiles as he received him.

"'Everything, my friend, is arranged,' my father said. 'You may stay here, as before. I don't pay any rent at all, but you pay 2,500 francs a year more than you paid last. I have bought the building.'"

BRIDE DID NOT SCARE.

Story of a Joke That Was Not All a Joke.

When the bridal couple boarded the train at Buffalo everybody sat up and took notice. They conducted themselves as well as could be expected under the circumstances, but after about four hours' ride the bridegroom left her side and got off at a station where a short stop was made. He said to the bride that he wanted to speak to a man, but on the quiet he said to one of the boys:

"When the train starts I'll get into the car behind and she'll think I was left. Then look out as we her go into fits. I'll appear on the scene in time to prevent consequences."

As the train started a drummer, who was told of the bridegroom's plan, walked into the car and without a question sat down beside the bride and soon was talking about the weather, Buffalo and a dozen other things. She grew interested. The husband waited a quarter of an hour and then sneaked into the car. He saw his wife talking in a very animated way, and when he went forward she looked up and said:

"That you, James? I thought you were left. Sit down somewhere."

And for two hours he "sot," while the drummer held the fort, and everybody was tickled to death.

Made a Bad Bargain.

In the days of "rotten boroughs" in England that of Gatton Park is said to have been the worst. It had only one qualified voter and yet it returned two members of parliament. Of course with this right the property was very valuable and in 1830 it was purchased by Lord Monson for $500,000. Two years later it was disfranchised.

No Other Newspaper
in the country covers the news of its State so promptly and thoroughly as does the
Newark Evening News
AND
Newark Sunday News

THERE is not a section of New Jersey, however remote, that is not under the watchful eye of an alert and competent correspondent. It is this thoroughness in covering State news that makes the paper indispensable to Jerseymen. But, aside from its specialty as a reporter of State events, the NEWARK EVENING AND SUNDAY NEWS stands in the very front rank of American journals as an all-around newspaper. It contains each day more general news than any New York or Philadelphia afternoon newspaper. Its exclusive interviews with prominent people have given it fame not limited to the Western hemisphere, and its editorial opinions are widely quoted by the press of the country.

Looking Forward
Good as the NEWS is now it will be better in the future. Its management is never satisfied with present achievement. While many improvements have been made in the past year, still greater changes in the way of progress are planned for the year to come. Neither labor nor expense will be spared to enhance the attractiveness of the NEWS as a home newspaper.

Independent, Never Neutral
The NEWARK NEWS is an independent newspaper. This is true not only as to politics, but as to all matters of public interest. No party boss, no corporation influence can control its columns. It is both fair and fearless, keeping ever in view the welfare of the people and the interests of honest government.

Its reports of the Legislature are full, but discriminating. Uninteresting details of the routine work are eliminated, and attention is devoted to the important bills presented, and the bearing of all these measures as related to the welfare of the people is made public. A special study of the political situation is made and unbiased reports are given. The enviable reputation that the NEWS has held in the past in this regard will be maintained in the future.

TERMS OF SUBSCRIPTION:
The EVENING NEWS, by mail, $5 a year, or 50c. a month.
The SUNDAY NEWS, by mail, $1.50 a year.
The EVENING NEWS and SUNDAY NEWS, by mail, $6.50 a year, or 60c. a month.

The **News** is delivered by newsdealers and carriers in all towns in Northern New Jersey and all along the Jersey coast, at 10 cents a week for the evening paper and 3 cents a copy for the Sunday edition.

Circulation of the NEWS Over 54,000 a Day.

SATURDAY, DECEMBER 26, 1903.

TO ADVERTISERS.

Frequent changes of advertisements is one of the main requisites for a successful result; we therefore urge our advertisers to change their ads at least once a month. Try and get such changes to us as early in the week as possible, never later than Thursday noon.

The REVIEW *is on sale at the Union News Stand, east bound railroad station, and at E. M. Laing's, 149 W. Front St.*

IT MUST BE STOPPED.

THE New Jersey legislator who is responsible for a law being passed prohibiting the shooting of live pigeons for "sport" within the State will deserve the praise of every man and woman in the country.

It is to the shame of the fair name of our state that such "sport" has been allowed to go unchecked thus far. [illegible]rts have been made during the past two or three years to stop it, but through the influence of men who take pleasure in this cruel practice, the law still allows the slaughter to continue.

Some of our readers who have never witnessed a live pigeon shoot can obtain a slight idea of the "sport" from the description which follows, taken from the news columns of the Newark *Evening* [illegible]re of December 10, last:

"A score of [illegible]hted marksmen, in firing [illegible] pigeon after pigeon falli[illegible]y a bullet of the snooters, vicio[illegible] dogs carrying the victims to a heap where they lay by the hundreds, bleeding and dying, and a division of the spoils by the competitors marked the scene at the old racetrack grounds at Guttenberg yesterday, where the winter live-bird handicap shoot was contested. The slaughter continued from morning until dusk, and when darkness prevented further shooting nearly 2,000 pigeons had been killed and several hundred dollars exchanged hands.

Twenty-four marksmen, from all parts of this State, New York, Pennsylvania and some from as far as Virginia, competed in the shoot, among them being such crack shots as: Van Allen, Apgar, Piercy, Lockwood, Smith, Schneider, Nieman, Hexamer, Van Volkenburgh, Koegel, Heflick, Martin, Richter, Interman, Sanders and Morrison. The utmost secrecy was kept in connection with the affair, and all scores were suppressed.

"The shoot was contested in a continuous downpour of rain and hail. The old track was deserted by all but the shooters, several helpers and a few strangers who were sized up in a suspicious manner for fear that a report of the shoot would gain circulation. A score of crates, each containing 100 birds was stacked up in the dilapidated shanty serving as the shooting-box, and one after another was dragged out to the platform, where the pigeons took their turns in becoming victims of the sport.

"Two sets of traps were in use. As the shooter stepped out to the mark designated by the handicapper, he levelled his double-barrelled breech loader, aimed it straightaway, and as a bird was liberated from one of the four traps he quickly turned the direction of the gun and fired. With unerring aim the bullet usually sped on its course and the bird, pierced to the death, dropped to the ground. Then a big retrieving dog seized the bird and carried it back to the shooting-box, leaving a tiny scarlet trail of blood in the snow. Now and then a pigeon succeeded in flying beyond the green flags, denoting the boundary line, but it was not to escape in this manner. Outside the rail was a string of pot hunters alert and watching for strays, and each pigeon was the target of a volley of shots. There were many disputes, some of which terminated in fights among the outside shooters, each claiming possession of the dead bird. Late in the afternoon the heap of pigeons lying stiff and stark, had taken on the size of a huge mound, all the victims of the marksmen's sport."

NOTICE TO ADVERTISERS.

The REVIEW is printed and distributed a day earlier this week on account of Christmas falling on our regular publication day. The same arrangement will also be made next week, and advertisers are requested to hand in copy for new advertisements, and changes in old ones, by or before Wednesday. Correspondents will also kindly note this and get in copy as early in the week as possible.

TO GUIDE the destinies of this great state through three months or more of legislative toil, these officers have been chosen:

For president of the senate, Senator Edmund W. Wakelee, of Bergen; for floor leader of the senate majority, Senator Joseph Cross, of Union. The other officers chosen are Walter E. Edge, of Atlantic, secretary; Howard L. Tyler, Cumberland, assistant secretary; Isaac R. Pierson, Morris, supervisor of bills; Merchant Meeker, Union, journal clerk; J. Howard Sprague, Ocean, assistant journal clerk; Robert E. Buster, Passaic, calendar clerk; David A. MacIntyre, Essex, bill clerk; D. Hart Cunningham, Mercer, sergeant-at-arms; Geo. W. Mount, Burlington, assistant sergeant-at-arms; Joshua D. Watson, Camden, assistant bill clerk.

We understand that the borough Mayor, one evening this week, in the presence of several gentlemen, acknowledged that it was possible for the borough officials to enforce the ordinance relative to the selling of liquor without a license but thought as the penalty for violating such a law was only a fine of $20, such cases should go to Somerville.

It is only a week or two ago that the Mayor was quoted in the Plainfield newspapers as saying that it was impossible for the borough authorities to do anything towards suppressing such violations.

THE *Youth's Companion* shows the superiority of our government over all others when it says that "Only men with an imperfect knowledge of American history will believe that the frauds in the Post Office Department justify doubts concerning the soundness of popular government. If the frauds had been concealed there would have been reason for despair. But so long as the government has sufficient vitality to purify itself the future is safe. Honesty is the rule in public life. That is why the exposure of dishonesty makes a sensation.

REFERRING to the discussions which have recently been raised against the old question whether popular education is not left too much in the hands of women, the *Youth's Companion* says: "No matter what the pedagogical answer to that question may be, one human fact is certain: that to brave, patient, industrious women who have served in the public schools for small salaries every schoolboy, young or old, owes unending debt."

THE Post-Check currency bill, now before Congress, is a good thing and should become operative. In addition to being a great accommodation to a majority of the people who wish to send small amounts by mail, the proposed currency contemplates the issuance of new bills every time one is used as a check. On sanitary grounds alone the bill should pass.

NOAH RABY, the Middlesex county youngster, now about ready to celebrate his 132d birthday, comes to the front with new teeth and a return of his sight. Great is Jersey!

THE change in the new school laws, whereby the collectors of boroughs and townships turn over the school monies in their possession to the school boards, was accomplished throughout the state with but little friction. As all the school boards already consisted of nine members it was only necessary to elect one of the nine as treasurer, and this was easily and quickly done.

ANOTHER point the people would like to be informed upon, namely: The present borough volunteer fire department costs about $1000 per annum. A paid department would cost anywhere from $4,000 to $8,000 per annum. How much will the borough save (?) by having a paid department?

IN trying to clear out a "hornet's nest" it is well to remember that the hornets have stingers. It is just possible that this fact was not thought of by the boroughite who is now engaged in this herculean task, and we merely mention it to jog his memory.

NO explanation has been offered yet as to why the old Warren engine house is not to be used as council chambers. The people are anxiously awaiting to hear why this matter was dropped so suddenly and so heavily.

JERSEY day at the St. Louis exhibition next year has been officially set as Wednesday, October 5, one week later than it was originally intended to hold it.

His Penance.

Miss Klubmuch—Oh, Mr. Pectawee, you're the very man I wanted to see.

Mr. Pectawee—Well, I'm delighted to say that the exhibition is now open.

Miss Klubmuch—I want you to help me to persuade your wife—

Mr. Pectawee sadly)—I'm very sorry, but it's no use getting me to help. I would only do your cause more harm than good just now.

Miss Klubmuch—Why, what do you mean?

Mr. Pectawee—Well, you see, I'm on a husk mattress again.

Miss Klubmuch—On a what?

Mr. Pectawee—Husk mattress. Did you ever have to sleep on a husk mattress? Of all the lumpy, bumpy, knobby beds of torture it is big IT. You're all up hill and down dale on one, too, and the man never was made who could lie comfortably on one—not even a lawyer. It's alithery and slidery, and gives you the creeps and crawls, and sends cold shivers chasing themselves up and down your back every time you touch it. And, besides, it rustles and rattles so every time you make the slightest movement that you have as much chance of getting to sleep as an idiotic kitten tumbling around in a waste-paper basket. Oh, it's a dandy for real luxurious insomnia, I tell you.

Miss Klubmuch—But what's it for?

Mr. Pectawee—I'm not positive, but I think this time it's because I got home very late from a banquet a few nights ago. Maybe it's for something else, but that's the only iniquity I've been up to lately that I can remember.

Miss Klubmuch—I mean, why do you sleep on one since you dislike them so much?

Mr. Pectawee (gloomily)—Oh, it's not my choice; don't believe that for a second. It's Marie's. It's a little pleasantry of hers. You see, she never blows me up, or nags me, or makes my life a burden in any verbal way when I do something she doesn't approve of. Instead she just ships my good old comfortable hair mattress off to be renovated, slaps this husk horror on my bed, and there it stays until she thinks I'll be good again, and all the time she's the fond and patient and forgiving wife. But as long as it's on my bed I know I'm in disgrace just the same. It's there now. So you see I can't help you to persuade her to do anything.

ALEX. RICKETTS.

Effect of Radium on the Eye.

F. H. Glew writes to Nature: "If a tube containing radium bromide is wrapped in black paper and brought within three or four inches of the eye in a dark room, a curious sensation of general illumination of the eye is experienced; this occurs whether the eyelid is closed or not. It is difficult accurately to describe the sensation produced; the eye seems filled with light. Probably the effect is due to general fluorescence of every part of the eye."

A [illegible]el Sto

An Englishman and a Frenchman, both duellists of some note, about to encounter each other in a duel, chanced to meet at the ticket office of the station en route for the appointed field when the following dialogue took place:

Frenchman (loftily)—Return ticket to B——.

Englishman—B—— single.

Frenchman—Ha! you fear you will never come back; I always take a return.

Englishman—I never do; I always take my return half from the corpse.—*Tit-Bits.*

PARKER'S THEORY.

Eight Hours of Sleep for Brain Workers Is Necessary.

Parker has a theory that no man can get along without eight hours' sleep every day.

"There's no use trying to cut down on your rest," he told some of the boys at the family hotel where he is living during the absence of his wife and daughter. "The day naturally divides itself into three parts, eight hours for work, eight hours for recreation and eight hours for sleep. There you have it. If I don't get eight hours of good solid rest at night I'm absolutely no good at all the next day. My head feels like a drum, my nerves are bad and I'm away off all around. It's all right if a man's a mere laborer or a clerk or is running a bank or holding a political office for him to get along on five or six hours' sleep. But when one is doing brain work, he needs the good old eight hours of it right along."

The sleeping question was, in fact, a hobby with Parker. He talked much about it, and had a theory that nine out of every ten persons who have poor health would be all right if they would only follow his advice as to sleeping. He was elaborating his favorite doctrine at the hotel a few evenings ago when somebody proposed that they adjourn to the club and play bottle pool. Parker is what they call a "bottle pool shark." He plays a good game and is fond of it.

Along about 10 o'clock he began to talk of the necessity of quitting.

"Boys," he said, "I've got to get up early to-morrow morning and it won't do for me to stay here much longer. I expect to have an unusually troublesome case to look after, so its important for me to be at my best."

At 10.30 he protested that he ought to quit, but the others urged him to play "just one more game," and after that was ended he had to play another because they were all "going to quit then," and thus it continued until midnight.

Parker was worried when they finally put after week s.

month followed month, nothing [illegible], "I ought to [illegible] those much discussed ch[illegible] hanging around here [illegible]cres became all the [illegible] heads more knowingly o' night. Unless I sleep [illegible]sconsolately. The tim[illegible] morrow morning, [illegible]when off in the dim dista[illegible]d all day."

[illegible]y the sea discerned a wh[illegible]one to bed the boys [illegible]he water. Looking mo[illegible] here a ship, there ain't what there was in [illegible]d still more. Wh[illegible] arranged to have [illegible] all were [illegible] to [illegible]ad the place doctor[illegible] country [illegible] other steps to keep [illegible] ing out. He left or[illegible]nd at 8, deciding that [illegible] ove to reach his office [illegible] physical condition [illegible] and not be at

somebody [illegible] get up, [illegible]led out [illegible]nto his [illegible]om his [illegible] proverb [illegible] chair [illegible] affi[illegible]nd, [illegible]re to [illegible]ver [illegible]ed [illegible]ment [illegible]

"Kind of late fo[illegible]is tah Pahken?"

"A little, George, [illegible]as up late last night. Is [illegible]ght over there I wonder what [illegible] the matter with my confounded [illegible]? It must have stopped a couple [illegible] hours, for some reason."

Somebody had telephoned to his partner, so that he was on hand when Parker [illegible]d the office along about 7 o'cl[illegible]

"H[illegible]," he said, "I tho[illegible]e sick."

MR. EDGE[illegible]st's all. Never felt I tell you, as long [illegible] eight hours out of [illegible] pretty sure to be [illegible]y-one minutes [illegible]t go to bed till [illegible] which is a little [illegible] morning, but I [illegible] miles an hour. [illegible] Why? Be[illegible] were made with [illegible]olen I got out of bed. Better [illegible] late and in good trim for work than to get around on time and have a head that's all clogged up, eh?"

Everybody said that Parker showed unusual skill in handling his case that day. He had the lawyer on the prime side up in the air half the time, and when it came to cross-examining witnesses, it was mere fun for him to get them all mixed up, so that they contradicted themselves in the most ridiculous ways and made his client an easy winner.

He was bubbling over with good spirits when he went in to dinner at the hotel in the evening and proposed another session of bottle pool. Then they told him how the clocks had been set back and showed him how he had been working away all day after having had less than six hours' sleep.

He decided that he wouldn't have any dessert, as he wasn't feeling well, and at 7.30 he went to bed, exhausted physically and mentally, and hinting as he did so that he knew of a certain family hotel which could furnish the nucleus for a lunatic asylum without half exhausting its resources. He has ceased, however, to be a propaganda of the eight-hour sleep theory.—Chicago Record-Herald.

Home.

The woman had the broad Yorkshire dialect.

"Isn't your home rather small?" I asked.

"Us'll build a hell to it, int' spring, happen," said she.

"That will be nice."

"It ull be 'eaven, wull it?"—Detroit Free Press.

Mrs. Mann—This milk tastes as if it contained water.

Milkman—Great Scott! did you expect I could put champagne in it?

Next!

Somerset County Orphan's Court
Administrator's Sale.

In the matter of the Insolvent Estate of Francis S. Runyon, deceased. | Order for sale of land.

By virtue of an order entered in the above stated matter on the twentieth day of November A. D. 1903, I shall sell at public vendue on the premises hereinafter described known as No. 151 Grove Street, in the Borough of North Plainfield, Somerset County, New Jersey, on Monday the twenty eighth day of December A. D. 1903, at 2 o'clock in the afternoon, all the following described land and premises, with the appurtenances, being the same described in said order, that is to say: All that certain tract or parcel of land and premises hereinafter particularly described, situate lying and being in the Borough of North Plainfield, in the County of Somerset and State of New Jersey. Being Known and designated as Lot No. 1, on the Map of W. H. McMahon's land, made by N. Vars, Surveyor.

Beginning at a point at the intersection of the centre line of Grove Street and Linden Avenue thence running a South Westerly course along the middle of Linden Avenue One Hundred fifty-five (155) feet to a stake and corner of Lot No. 14; thence running in a northwesterly course along the line of lot No. 14, seventy-five (75) feet to a stake and corner of lot No. 2, sold to Peter Hansen; thence running in a northeasterly course along the line of lot No. 2, one hundred and fifty-five (155) feet to a point in the middle of Grove street; thence running along the middle of Grove Street in a south easterly course seventy five (75) feet to the place of beginning.

Subject to the restrictions recited in a certain agreement made between John Tappen and others, dated May 12th, 1868, recorded in Book X. No. 3 of Deeds for Somerset County, on page 393 &c., respecting nuisances. Being the same premises conveyed to said Francis S. Runyon, by deed of Mary R. Loomis, dated July 16th, 1901, recorded in Book Z. No. 9 of Deeds for said County of Somerset, on page 384 &c.;

Dated November 22rd, 1903.

NELSON RUNYON, Administrator &c,
of FRANCIS S. RUNYON, deceased.

To CONSUMPTIVES

The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease CONSUMPTION, is anxious to make known to his fellow sufferers the means of cure. To those who desire it, he will cheerfully send (free of charge) a copy of the prescription used, which they will find a sure cure for CONSUMPTION, ASTHMA, CATARRH, BRONCHITIS and all throat and lung MALADIES. He hopes all sufferers will try his remedy, as it is invaluable. Those desiring the prescription, which will cost them nothing, and may prove a blessing, will please address.

Merry Christmas

Star of Bethlehem.

BY PIGLHEIN.

Holiday Decorations for the House and Dinner Table.

HEARTS if not human tongues are even now saying "Merry Christmas," and the next few days will be the happiest in all the year. This is the season when unselfishness reigns supreme, self-forgetfulness is universal, for everybody is planning to give pleasure to others.

No one is busier than the homemaker, who has not only her Christmas dinner to plan and supervise, but she must decorate the house with seasonable greens and scarlet berries. In fact, there is no season that demands so urgently embellishments that bespeak the most beautiful of religious festivals, the birth of Christ.

Red is preeminently the Christmas color, but it is more effective when combined with green. Holly, winter

HELIOTROPE.

berries, cranberries and the beautiful poinsettia, which in many parts of the world is known as the Christmas flower, are the favorite bits of scarlet that lend bright and cheery notes of color to rooms and churches.

And then a bunch of mistletoe must hang somewhere—this strange little waxberry that has so many sentimental superstitions connected with it.

Plenty of green should be used in all decorations, as it lightens the brilliance of the scarlet, and it should be in this instance as in all others nature's background, the setting for all her blooms.

Wreaths of holly tied with red ribbon or suspended by a wire from the middle window sash lend cheer to an apartment, or wreaths of evergreen tied with scarlet ribbon can be used. The evergreen lasts longer, and it is deliciously aromatic.

If the purse strings are long enough to admit of it measure the living room and buy sufficient evergreen to make a festoon about the frieze of the room. It comes by the yard twisted in rope fashion, and enough of it to use in this manner can be procured at small expense.

The little Norfolk Christmas trees add much to the Christmas decorations. They are, however, unfortunately quite expensive, but they last a long time; in fact, longer than the majority of house plants, as they do not require such constaint moistening.

There are Christmas bells fashioned of immortelles, also ones of holly and evergreen that can be used with good results if suspended in doorways or from the top of window casements.

If there are open fireplaces they should be filled with spicy evergreen boughs, and the chimney breast proper can be made charming with festoons of evergreen. For example, take several yards of the green and divide it, tucking the middle to the picture molding and at the same time suspend from it a large holly wreath. Then let the rope drop about three feet and carry it up again to the molding, fastening it there, and allowing the ends to fall to the mantel shelf. If more color is desired the wreath can be tied with red ribbon, allowing the ends to hang well down on the chimney breast. Large doorways or arches can be embellished in the same manner.

Even the simplest homes should have some emblem distinctive of the season, and if wreaths and evergreens ready to be put to immediate use are too costly, the loose holly in large branches can be obtained and used as it is, tied in bunches, or can be made into

PLUM PUDDING.

wreaths by deft fingers and a little wire.

The market is flooded with imitation evergreen that looks like stage grass, but it is devoid of either significance or beauty, consequently it has no decorative value. One sprig of the genuine Christmas green is worth an armful of this poor replica of nature's creation.

Nothing is more beautiful or decorative than the graceful poinsettia and a plant or spray of it in a room brightens it more than a bunch of either red roses or red carnations, simply because it is distinctly a Christmas flower. It also lends itself admirably to the decoration of a dinner table.

Next to the Christmas tree in all its splendor and beauty, which is naturally the most important even of the day for the little ones, comes the Christmas dinner and the setting and enriching of the table for the feast.

The illustration furnished presents a timely yet simple decoration for either

a luncheon or a dinner table. The cloth is white, the serving plates of red, gold and white.

In the centre is a miniature Christmas tree, which was cut from the top of a large one. It is decorated with glistening balls, berries and the usual favors, a bunch of mistletoe tied at the top. About the base of the tree is a wreath of holly and bunches of winter or ilex berries, which furnish a wealth of scarlet, which contrasts well with the snowy white napery.

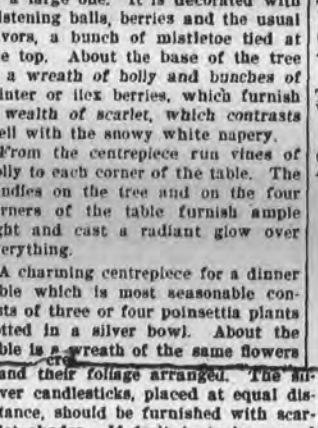
From the centrepiece run vines of holly to each corner of the table. The candles on the tree and on the four corners of the table furnish ample light and cast a radiant glow over everything.

A charming centrepiece for a dinner table which is most seasonable consists of three or four poinsettia plants potted in a silver bowl. About the table is a wreath of the same flowers and their foliage arranged. The silver candlesticks, placed at equal distance, should be furnished with scarlet shades. If fruit is to be served use red apples and white grapes, and arrange them in low silver dishes.

A simple and inexpensive table decoration can be made of a medium sized pot of fine ferns, the pot wound with red satin ribbons tied in a large rosette-like bow on each side. A pleasing Christmas note can be given by the use of red shades on the candles and a ball of holly suspended from the centre gas fixture.

Spicy, red carnations are also much used for tables. They require tall, slender-necked vases of either silver or glass. A large one should be placed in the centre on either a red and white or an all white embroidered centrepiece, and smaller vases at the corners of the table.

Gorgeous, indeed, will be a table embellishment that has been arranged for a Christmas dinner. Covers are laid for ten. A lace centered cloth, which



A CORNER OF THE TABLE.

also has a border of lace inset in the top, the cloth designed to be used on a round-topped table, is to be mounted on an undercloth of scarlet liberty satin. The centrepiece is to be a large urn-shaped silver bowl, filled with maiden hair fern. Four triple silver candelabra with red satin lining the silver shades and a few small silver dishes will be the only other settings.

Inexpensive and pretty is a large bowl of holly, used as a centre embellishment, and over it hung on the gas fixtures four wreaths, tied together with a large bow of scarlet ribbon.

In selecting a menu for the Christmas dinner, select as many viands as suggest the season's color as possible. Even the bonbons can be colored red. For instance, Hungarian peppers can be chopped fine and sprinkled over the anchovy canapes; lobster farci served in the shells as a fish course—this naturally following the soup course; a stuffed tomato salad, served after the turkey and cranberry jelly, the plum pudding thickly studded with candied cherries.

Ancient Hymns and Carols that Still Echo down the Corridors of Time

THE HOLLY AND THE IVY.

The holly and the ivy
Now are both well grown,
Of all the trees that are in the wood
The holly bears the crown.

The rising of the sun,
The running of the deer,
The playing of the merry organ,
The singing of the choir.

The holly bears a blossom
As white as the lily flower,
And Mary bore sweet Jesus Christ
To be our Saviour.

The holly bears a berry
As red as any blood,
And Mary bore sweet Jesus Christ
To do poor sinners good.

The holly bears a prickle
As sharp as any thorn,
And Mary bore sweet Jesus Christ
On Christmas Day in the morn.

A CHRISTMAS CHIME.

Ring joyously, ye Christmas bells,
Banish all thought of funeral knells
And requiems whose music swells
Through sylvan glades and gloomy dells,
Till echo on the hills is sighing
Over another year that's dying;
Though on the ground its shroud is lying,
Of pure white snow, loose ye your roar
And ring your chimes for rich and poor,
In crowded town, on lonely moor,
Touch human hearts and homes, and cheer
The desolate; and bid men stay
Their angry strife, and live their life
Anew; for life is but a day,
And soon, too soon, will pass away;
As yonder pathless white will disappear
Beneath men's footsteps in the coming year.

CHRISTMAS.

By Lady Lindsay.

When Jesu was a little child
He slept on Mary's knee and smiled—
She rock'd Him on her knee.
(So pray you hearken, gentles all,
And give us cheer in house and hall),
She rock'd Him on her knee.

"Nowell, Nowell," the angels sung,
The dumb beasts spake in unknown tongue
For Benedicite.
(So pray you hearken, gentles all,
And give us cheer in house and hall),
For Benedicite.

The shepherds' flute gave merry sound,
With hollies green they strewed the ground,
For joy the Christ to see.
(So pray you hearken, gentles all,
And give us cheer in house and hall),
For joy the Christ to see.

Especially Favored.

The red immortelles are especially favored for Christmas decorations, and bells and balls, large and small, made of them, will finish the ends of evergreen ropes and depend from chandeliers and fixtures. Paper is also used for balls and bells with much the same effect.

Christmas Location.

She—"Sometimes I wish that Christmas came a little later in the season."

He (testily)—"So do I. I wish it came on the 30th of February."

Dinner

Oyster soup, celery.
Boiled cod with lobster sauce.
Roast goose, apple sauce croquettes, baked onions, cranberries, mashed potato.
Lettuce or orange salad, wafers, olives.
Mince pie, cheese.
Neapolitan ice cream, cakes.
Coffee, nuts and raisins.

Couldn't Fool Him!

She—"Wotcher chucklin about?"

He—"To t'ink dat Santy Claus'd try to fool me wit' me old las' year's sled painted red!"—New York Journal.

THE GIVER OF USEFUL GIFTS

NEXT in iniquity to the man who errs on the safe side and gives no Christmas gifts whatever is the man who goes to the other extreme and invariably presents his wife at Christmas time with furniture for the house or with necessary clothing for herself.

This censurable custom begins, usually, with the honeymoon. Some indispensable piece of household furniture is found lacking; the self-sacrificing bride suggests that it would make a desirable holiday gift, and the deed is done. If all future Christmases bring coal stoves, Jaeger underwear, and tubs for the laundry, the bride has only her own lack of foresight to thank for it; for man is a creature of habit; this particular habit is one that grows, and the last state of the man who gives useful gifts is apt to be far worse than the first.

The man who begins by giving his wife an umbrella stand for the accommodation of his own umbrella is prone, at recurring Christmas tides, to remember the dining room with a new sideboard, the library with a roll-top desk, the kitchen with a new range, and, finally, the cellar with a few tons of furnace coal. Of course, no hall is complete without its umbrella stand, no dining room properly furnished without its buffet, no kitchen complete without its porcelain lined refrigerator, no heat apparatus of use without appropriate fuel; but these ponderous tokens of affection do not make ideal Christmas gifts. They lead the unfortunate recipient to suspect that the gifts would continue even if she were not there to receive them.

If, in addition to being economical, the man prove lacking in taste—or, worse still, if he have a great deal of taste and all of it bad—his wife is indeed to be pitied. She must live not only with the man himself, but with his Christmas presents—the gorgeous rugs, the upholstered chairs, the glittering lamps and, worst of all, the pictures he continues to bestow upon the house as pleasant surprises to his trusting wife.

It is misdirected generosity rather than selfishness that prompt the giving of these useful but inappropriate gifts in many cases. Curiously enough, economy of this sort often goes hand in hand with a lavish expenditure of money; but this only aggravates the case. As the man increases in prosperity, his gifts become more and more expensive, yet, having started in this way, this amiable, obtuse Santa Claus will cling to the economical habit of putting everything he fancies the house needs into his wife's Christmas stocking. She, poor thing, is economical, too, in her own way, and cannot bring herself to give away or destroy a high priced rug, or an expensive picture, merely because it happens to be hideous; so she suffers in silence—sometimes.

This type of man usually goes from bad to worse—that is, from furniture to clothes. He begins, perhaps, like Johnny of the song, by bringing home a "bonny blue ribbon," stockings, underwear, or possibly silk petticoats for the partner of his joys and sorrows.

The man, however, does not stop at this point. Emboldened by his fancied success, he buys other and more surprising things. From the hour of his wedding he has secretly cherished an ambition to give his wife one really handsome gown—one that will stand apart from all other gowns, and fill all other women with envy. He is vague as to material, but he favors brocaded velvet or red satin. No faded, uncertain tint for him, if you please.

But one such gown is enough. No woman wants a man to buy all her gowns for her. She sees that something must be done before the habit becomes fixed. Happily, there is a remedy; happily, again, it is worse than the disease, or it might not prove effective. It involves the purchase of—no, not neckties; a man expects those and fortifies himself accordingly—but a quantity of the vilest cigars that money can buy, and a polka-dotted smoking jacket. A man who can face powder and bullets on a battlefield will go down before poor tobacco and polka dots in his own den.

If perchance the man does not smoke, his wife can still bombard him with hats—hats picked up at bargain sales. Heaping coals of fire on a man's head does not compare with heaping that same head with miscellaneous hats of assorted sizes. If this does not finish him—although only the most obstinate cases survive a course of hats—she must, as a last resort, buy him a suit of clothes.

The following Christmas she will find roses at her plate, and a large check pinned to her stocking with this postscript:

"Buy your own Christmas present—but for heaven's sake don't spend this on anything for me. Lovingly,

"John."

—Collier's Weekly.

SCIENCE & MECHANICS

According to the experts it takes ten pounds of milk to make a pound of cheese and twenty-three pounds of milk to make a pound of butter.

Spanish sardines are not exported in any considerable quantities to the United States for the reason that they are very much larger than the American taste demands.

It is stated from Berlin that the imperial budget for 1904, now in preparation, allots $375,000 for combating typhus, which is especially virulent in Bavaria, Prussia and Alsace-Lorraine.

As a result of the experiments made with automobiles recently in the Italian army it has been decided to place such a vehicle at the disposal of every army commander. A section of trained automobile drivers will be formed.

According to the official returns, there were 275 sugar mills in operation in European Russia last year. The best crop of the country amounted to nearly 9,000,000 tons, while the area under cultivation was 1,310,000 acres.

Not more than 330 square miles of territory are under cultivation in henequin or sisal hemp, yet on this small area is produced the fibre that literally binds the wheat harvests of the world. It is used alike in Minnesota and Argentina, Siberia and Egypt.

The experiment of raising ostriches in Australia has been successful. Twenty-two birds were first brought from Africa and placed on a farm near Sydney. Those raised in Australia produced beautiful feathers twenty-seven inches long and of pure white.

Animal foods, judged by bulk and weight, are more expensive, pound for pound, than vegetable foods. But, as a whole, vegetable foods are not more economical. Animal foods furnish more than six-tenths of the protein and nine-tenths of the fat of the total food consumed.

The greatest successes in the electrical transmission of water power have been made in the United States. The maximum distance over which power is transmitted is from Colgate to San Francisco, 220 miles, with a loss of twenty-five per cent. At Colgate the body of water is small, but the fall is 1500 feet.

Threshing machines are used to a limited extent in Seville, but the old system of beating out the grain by driving colts and mares around in the open threshing floor is still generally prevalent. With the exception of half a dozen farmers who have chiefly English implements, no one there uses really modern agricultural machinery.

Young Women of Paris.

The demoiselles of the telephone and the telegraph of Paris deserve well of a somewhat ungrateful public. Their temper is a little short at times, but their salary and prospects are still shorter. For a long time they have claimed better treatment. The State, if it has drawn back with one hand, gives with another. It has decided to build a house where these hard-working young women may be lodged and fed at a reasonable price. It has been borne in upon the authorities that many of their assistants must find a difficulty in obtaining suitable quarters within easy reach of their work. Thus the idea of the house has taken practical shape. There is much more disposition than formerly to "look after" the various sections of society which, by reason of their isolated position, are exposed to danger. Hence the founding of a number of institutions in Paris of late years where the foreign-born governess and other solitary mortals are offered more cheerful surroundings than the four bare walls of a cheap lodging.—Paris Correspondent in Pall Mall Gazette.

The Earth's Crust.

At the Geodetic Congress recently held in Amsterdam, a resolution was adopted requesting the various nations of Europe to carry out extensive measurements of the force of gravity from the shore of the Atlantic eastward across the lowlands of Europe and Asia, as well as in the plateau around Thibet. The object is to obtain a broad knowledge of the variations in gravity and the distribution of bulk in the crust of the earth. These studies of variations in weight would be combined with astronomical determinations of latitude and longitude.

Climate of Panama.

Tracey Robinson, one time United States Vice-Consul at Colon, called at the State Department to see Secretary Hay, and sent in a card, the first yet received there, bearing the words, "Republic of Panama." He told the Secretary that he wanted to enter a defense of the climate of the Isthmus, where he had lived for forty years and enjoyed perfect health, a statement borne out by his appearance.—Washington Star.

A Giant in Strength.

"How's the baby getting on?" asked a family friend. "Growing bigger and stronger every day, I suppose."

"He's growing bigger every day," said the proud father, "and he's plenty strong enough now to suit me. You remember what a tremendous voice he had when you saw him three months ago? Well, it's still more tremendous now, yet he lifts it a dozen times a day."

$100 Reward. $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address

F. J. CHENEY & Co., Toledo, O.

Sold by Druggists, 75c.

Hall's Family Pills are the best.

Australia has, as the result of last year's drought, bought since January 7,000,000 bushels of wheat, or its equivalent in flour, from the Pacific Coast, and 1,000,000 from New York.

Over 41,000,000 pictorial postcards were delivered by the Swedish post-office in 1902.

Bronchitis

"I have kept Ayer's Cherry Pectoral in my house for a great many years. It is the best medicine in the world for coughs and colds."
J. C. Williams, Attica, N. Y.

All serious lung troubles begin with a tickling in the throat. You can stop this at first in a single night with Ayer's Cherry Pectoral. Use it also for bronchitis, hard colds, consumption.

Three sizes: 25c., 50c., $1.00.

Consult your doctor. If he says take it, then do as he says. If he tells you not to take it, then don't take it. He knows.

You should promptly correct any constipation or biliousness with Ayer's Pills, small, laxative doses.

J. C. AYER CO., Lowell, Mass.

The Kaiser as Patient.

Fortunately they have not been many times in the emperor's life when he has been entirely under medical sway; but the German court doctors were long since convinced that His Majesty, in the capacity of patient, was no more conventional than he is accustomed to be in any of the other roles he plays from day to day. At the outset of his indisposition [illegible] inclined to give the doctors et their counsels by his resistance to [illegible] stantly expressed their views and [illegible] to treat [illegible] ter of fact, however [illegible] is very strong and [illegible] sion to [illegible] confinement [illegible] posed to allow him [illegible] His [illegible] of the prescription [illegible] is found [illegible] on every detail [illegible] than [illegible] a text [illegible] ing it [illegible] theories [illegible] at their [illegible] know from [illegible] that it is not to attempt to show their complete superiority by plunging into detail.—Men and Women.

The vineyards of Central Asia, [illegible] all from American stock. Ohio has a large and regular export trade in cuttings with all the wine growing countries, owing largely to the fact that the American vine is free from common parasites, notably phylaxeria.

Another club woman, Mrs. Haule, of Edgerton, Wis., tells how she was cured of irregularities and uterine trouble, terrible pains and backache, by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—A while ago my health began to fail because of female troubles. The doctor did not help me. I remembered that my mother had used **Lydia E. Pinkham's Vegetable Compound** on many occasions for irregularities and uterine troubles, and I felt sure that it could not harm me at any rate to give it a trial.

"I was certainly glad to find that within a week I felt much better, the terrible pains in the back and side were beginning to cease, and at the time of menstruation I did not have nearly as serious a time as heretofore, so I continued its use for two months, and at the end of that time I was like a new woman. I really have never felt better in my life, have not had a sick headache since, and weigh 20 pounds more than I ever did, so I unhesitatingly recommend your medicine."—MRS. MAY HAULE, Edgerton, Wis., Pres. Household Economics Club.

—$5000 forfeit if original of above letter proving genuineness cannot be produced.

SERMON FOR SUNDAY

ELOQUENT DISCOURSE ENTITLED "BREAD UPON THE WATERS."

Rev. Edward Niles Declares That the Opinion of the Worldly Economist Is Not a Supreme Court Whose Decisions Are Binding on the Christian.

BROOKLYN, N. Y.—Sunday morning, in the White Church (Bushwick Avenue Reformed) the pastor, Rev. Edward Niles, preached on "Bread Upon the Waters." The text was from Ecclesiastes xi: 1: "Cast thy bread upon the waters, for thou shalt find it after many days." Mr. Niles said:

The book of Ecclesiastes is the life review of the wisest and richest man of his day. Every statement has been tested. A young man might have said the same thing with equal eloquence and conviction, but the impression on the mind of the elderly reader would be, "Yes, his advice is all very well in theory, but what does he know about life?"

The words of the aged Solomon are open to no such criticism. Our text is the first of the short, pithy sentences with which the teachings of his wonderful career are summed up.

In thought he goes back to the early days of his reign. Then his country was insignificant. Jerusalem itself was a pioneer city only thirty-three years old. His people bore something of the same relation to the surrounding nations as did the Boers of a dozen years ago to the European countries. They were strong, religious self contained, with few extremes of poverty or wealth, who had partially enslaved, partially exterminated, the original inhabitants of the land. Yet, they were mostly isolated on their plantations and lacked the polish of refinement and culture which only comes with long settlement of a country and contact with the great world.

Solomon recalled how ardently he had entered into the work of putting his subjects abreast of the times. He had widened the borders of the land until they reached the Red Sea. There a dockyard was established, a fleet of ships was built and launched, marking the first ventures of the Jews in commerce.

Human nature being the same in all ages, we can be sure that many a Jewish fogy remonstrated. "What, take hard earned money, the result of so much toil in the fields, and put it in these tubs, to go on no one knows where, to return no one knows when, if ever? Young King, don't be so foolish as to throw away our money on the sea."

The day when these ships sailed off in search of trade and profit was likely made the occasion of great pageant by the Government to counteract these grumblings, as week after week went by and month followed month, nothing was heard of those much discussed ships. The wiseacres became all the wiser, shook their heads more knowingly and croaked more disconsolately. The time came, however, when off in the dim distance the watcher on the sea discerned a white speck upon the sea. Looking more intently, he discerned a ship, there another and beyond still more. When near enough to be hailed all were found to be well. Their cargoes of wealth beyond what had been known had been brought to the shores of Palestine. Their rich burdens were carried up to Jerusalem and deposited in the treasury of over $1,000,000 more than exceeded them. I [illegible] caused Solomon [illegible] formation the [illegible] brokers. [illegible] received [illegible] for [illegible] ns [illegible] [illegible] [illegible]

HAPPENINGS IN NEW JERSEY.

Continued From First Page

chard which is full of dead trees in which the woodpeckers found a happy hunting ground. No sooner were the hogs left by themselves than a "rap-rap-rap" sounded from the further side of the inclosure. Off they scampered to the promised banquet. "Tap-tap-tap" called them back to the starting point before they were half across. "R-r-r-rap" came from an industrious redhead in a third quarter. To make a long story short, the hogs chased the woodpeckers about the lot from morn to noon, from noon to dewy eve, and with the setting sun dropped from sheer exhaustion. The next day the hogs were again placed in the pasture field.

CENTENNIAL BUILDING.

The New Jersey building at the Centennial Exposition, which has been a conspicuous figure in Haddonfield since its removal there in 1877, may soon be sold. It was purchased from the centennial commissioners by Isaac A. Braddock, and has been owned by him ever since. The building cost $15,000. Up to ten years ago it was the only hall of any size in town. In it were organized various secret societies, which have since used the building for lodge rooms. The graduation exercises of the public schools were held there until 1892, and all the plays given up to the time of the building of the present opera house were given there. Evangelist Needham, one of the late Dwight L. Moody's associates, and Muller, the noted English philanthropist, have spoken there, besides Congressmen and other federal officers. For a number of years the floor of the hall, was turned into a skating rink. It is prized by the townspeople as a relic and is pointed out at all times to visitors with a natural show of pride.

Kills Huge Steer with Club.

Edward Galligan, a Pennsylvania trackwalker, fought a runaway steer on the trestle leading to the Bergen cut, Monday and killed it. Before this the steer had been chased with a switch engine.

The steer, which was a monster, broke away from a pen in the Jersey City stock yards, at the foot of Sixth street, and knocking several men down, ran up the embankment leading to the trestle. A number of railroad men fled when the steer charged them, as they tried to stop it.

The steer ran for several blocks along the trestle, and it was then that the crew of the drill engine started after it. The steer turned at bay when Jersey avenue was reached.

Galligan, who is a giant in stature, grabbed a club used by brakemen and advanced upon the steer. Several other of the men had lassoes, but Galligan was the first to reach the animal which he struck between the eyes as it lowered its head to charge him, and following up his blow, killed the steer.

The last blow forced the animal from the trestle, and it narrowly escaped falling on a trolley car passing on Jersey avenue.

Lakewood's Wooded Drives.

The drive, first among Lakewood's special diversions, still securely holds the favor of the great majority of resorters, and has probably advertised the charms of the place more effectively than any other single agency.

Among the first of the plans for development inaugurated years ago by the corporation owning the Laurel House was the well planned construction of many miles of smooth, hard gravel road, radiating from the village in all directions. The Lake Drive, perhaps the most popular because of its glimpses of water through the foliage, is but one of a long list of drives which are favored both by driving and riding parties, while well-kept walks, punctuated by an occasional wayside bench, are also popular at all times.

The laying out of these drives and walks have been done with artistic taste. They wind in easy curves among the trees over slightly rolling country, and though passing through pine forests at all times, there is a variety and change of scene, and ears to hear only the ring of hoofs on the hard roadbed.

In spring, flowers fill the air with fragrance, and the birds add life and melody to the hour. Here and there you pass groups of children, with their nurses, building their forts of moss, of waist deep in rustling leaves curiously watched by bright-eyed squirrels busy with their stores of nuts or frisking from branch to branch.

What wonder that the woodland drive is a daily delight, and that it is favored not only by carriages but by riding parties and 'cyclists as well.

The New Jersey Central is the only road reaching Lakewood and its service is the best in the land. A Booklet on Lakewood is sent free to any address by General Passenger Department, C. R. R. of N. J., New York City.

The First Flag Unfurled on Confederate Soil.

General Drake has offered to the State of New Jersey through Governor Murphy the colors of the Third Regiment of New Jersey. These colors were the first to be unfurled on Confederate soil by the Army of the Potomac. The flag has been in the possession of General Drake all these years, and he has decided to present it to the State, to be kept with others in the State House.

The flag was made by Trenton women in 1861 and presented to the Third Regiment on its departure for the national capital. The occasion was an imposing one, taking place in Trenton in front of Frederick R. Wilkinson's residence, on State street, where the regiment was drawn up under Colonel William Napton.

General Drake was then color-bearer at the head of General Theodore Runyon's New Jersey Brigade and carried the flag from Washington across the long bridge into Virginia, on the night of May 24, 1861, there unfurling it for the first time on Confederate soil.

Imperial Social Club Dance.

The Imperial Social Club of Plainfield held their Christmas Eve dance in Olympia Hall, Thursday night. A large crowd was present and enjoyed the excellent music which was furnished by Prof. Suhr's Orchestra. At midnight refreshments were served.

Not True, Says the Counterfeiter.

The State prison authorities made a mistake in calculating the day for the release of William H. Brockway, the counterfeiter. It has been discovered that his ten year expires on Sunday. He will then take the paupers oath and remain in confinement thirty days longer, in lieu of the $1,000 fine imposed on him.

Brockway declares he will probably live with relatives in Northern New Jersey. He said today there was no truth in the talk about certain banknote plates that he had hidden, for all he had was taken by the detectives. It was declared that for an especially valuable $500 note plate money and freedom were offered him.

The Fool's Way.

The Barber—The fools are not all dead yet.

The Broker—No, but there are a lot who dye every day, aren't there?—Yonkers Statesman.

Quite a Difference.

"What is the difference between a gown and a creation?"

"I can't give you the exact figures, but it's a small fortune."—Chicago Post.

A Novice.

Photographer—Did you ever sit for a photograph before?

Little Girl—No, sir. I've always stood.

THE AMERICAN MONTHLY REVIEW OF REVIEWS

THE NECESSARY MAGAZINE IN THE PRESIDENTIAL YEAR
The Review of Reviews is often called a necessity, in recognition of its usefulness in keeping readers "up with the times."
In Presidential election years the REVIEW OF REVIEWS magazine is more than ever "the necessary informer." Everybody wants to be truly and quickly informed about this or that public question that has forged to the front; to know about the new candidates and the personal factors in politics, to have a complete picture at hand of the current movement of history.
Dr. Shaw's editorials, in its authentic and timely contributions articles, in its brilliant character sketches, in its condensations and reviews of all the important articles of other magazines, and in its hundred a month of valuable portraits, witty cartoons, and interesting views, the REVIEW OF REVIEWS gives the much desired news of the world's and our own progress. "The World under a Field-glass" is the way one subscriber describes it. Men in public life, like President Theodore Roosevelt, the members of Congress, and the great captains of industry, who must keep "up with the times," intelligent men and women all over America, have decided it is "indispensable."
